(1) May 7, 1985, the opening date of the Ottawa meeting of experts on human rights and fundamental freedoms, is designated as "Helsinki Human Rights Day";

(2) the President is authorized and requested to issue a proclamation reasserting the American commitment to full implementation of the human rights and humanitarian provisions of the Helsinki Accords, urging all signatory nations to abide by their obligations under the Helsinki Accords, and encouraging the people of the United States to join the President and Congress in observance of "Helsinki Human Rights Day" with appropriate programs, ceremonies, and activities;

(3) the President is further requested to continue his efforts to achieve full implementation of the human rights provisions of the Helsinki Accords by raising the issue of noncompliance with the Governments of the Soviet Union, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, and Romania at every available opportunity;

(4) the President if further requested to convey to all signatories of the Helsinki Accords that respect for human rights and fundamental freedoms is a vital element of further progress in the ongoing Helsinki process; and

(5) the President is authorized to convey to allies and friends of the United States that unity on the question of respect for human rights and fundamental freedoms is the most effective means to promote the full implementation of the human rights and humanitarian provisions of the Helsinki Accords.

SEC. 2. The Secretary of the Senate is directed to transmit copies of this joint resolution to the President, the Secretary of State, and the Ambassadors of the thirty-four Helsinki signatory nations.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Senate Joint Resolution 15 designates May 7, 1985, as "Helsinki Human Rights Day" and calls upon the President to issue a proclamation reasserting the commitment of the United States to full implementation of the human rights and humanitarian provisions of the 1975 Helsinki Final Act.

This resolution unanimously passed the other body on March 28 and was ordered reported by the Committee on Foreign Affairs on April 3. The measure was also referred to the Committee on Post Office and Civil Service which I understand has no objection to it being considered here today. Senate Joint Resolution 15 is nearly identical to House Joint Resolution 132 which was introduced by our colleagues Mr. LANTOS and Mr. PORTER, the cochairmen of the congressional human rights caucus, along with 79 cosponsors.

Mr. Speaker, I am pleased to be the floor manager for this legislation. For almost the past 9 years, I have had the privilege of serving as chairman of the Commission on Security and Cooperation in Europe, known as the Helsinki Commission, which monitors Soviet and East European compliance with the human rights provision of the Helsinki accords. I have witnessed firsthand the importance of expressions of congressional support for human rights. We in the Congress must remain steadfast in our defense of human rights and redouble our efforts to draw the glare of international public opinion onto those governments that abuse the human rights of their citizens.

In this connection, Mr. Speaker, I would like to draw the attention of our colleagues to a report issued by the General Accounting Office last month on the work of the Helsinki Commission. The GAO found that "with a small professional staff, the Commission has: First, actively promoted a strong U.S. human rights policy in the Helsinki process; second, played a major role in planning and conducting U.S. Helsinki diplomacy; third, made itself a principal Western source of information on Soviet and East European violations; and fourth, helped resolve numerous family reunification cases for Eastern victims of Communist repression."

Mr. Speaker, I am extremely proud of the Commission's record and I would like to take this opportunity to offer my best wishes to the Commission's new Chairman from the other body, the distinguished Senator from New York, Senator D'AMATO, and to the new cochairman, our distinguished colleague from Maryland [Mr. HOYER]. It is with a great deal of satisfaction and a tinge of regret I step down as Chairman although I plan to remain an active member of the Commission. Satisfaction over what we have accomplished and yet regret that the deplorable actions of Soviet and East European authorities—including the denial of religious rights, restrictions on emigration, and repression of human rights activists—necessitate the exist-

ence of the Commission. It is precisely these kinds of actions which also require constant and consistent expressions of congressional concern such as the resolution now before us.

Mr. Speaker, Senate Joint Resolution 15 is similar to a measure adopted by the Congress 2 years ago which designated August 1, the anniversary of the signing of the Helsinki Final Act, as "Helsinki Human Rights Day." The date change in this resolution was made to focus attention on the 35-nation Meeting of Experts on Human Rights that will be held in Ottawa, Canada, beginning on May 7, 1985. This special Human Rights Meeting was mandated by the Madrid Meeting of the Conference on Security and Cooperation in Europe and will be attended by representatives of the Soviet Union, all East European countries as well as the United States, Canada, and the West European nations.

By designating May 7, the opening day of this conference, as "Helsinki Human Rights Day" we will be strengthening the hand of the U.S. delegation and publicly supporting their efforts to achieve greater respect for human rights in all Helsinki countries.

Mr. Speaker, Senate Joint Resolution 15 calls upon the President to continue his efforts to achieve full implementation of the Helsinki accords' human rights and humanitarian provisions by raising at every available opportunity, both in bilateral and multilateral fora, the issue of Soviet and East European human rights violations.

The resolution also calls upon the President to enlist the support of our allies in promoting respect for human rights in Eastern Europe and the Soviet Union. Finally, the measure requests the President to communicate to the other 34 signatories of the Helsinki accords our position that respect for human rights is vital to further progress in the ongoing effort to achieve total compliance with the accords, thus making it clear that progress in human rights is an essential component of improved East-West relations.

Mr. Speaker, I commend the Senator from Arizona and one of the newest members of the Helsinki Commission, Senator DECONCINI, for his initiative in introducing this legislation and I urge our colleagues to support the measure.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I offer my strong support of this joint resolution designating May 7, 1985, as "Helsinki Human Rights Day." This is an important commitment to the cause of human rights.

As my colleagues well remember, 10 years ago, the Helsinki accords were signed by numerous countries to include the Soviet Union and Eastern bloc nations.

The Helsinki accords clearly express the commitment of all participating states to respect human rights and fundamental freedoms. These accords also require that the participating states act in conformity with the principles of the Charter of the United Nations and with the Universal Declaration of Human Rights.

Unfortunately, the U.S.S.R. and many other Communist countries around the world are routinely violating human rights. These governments are denying individuals their inherent rights to freedom of religion, thought, conscience, and belief.

As called for at the Madrid Review Conference of 1983, a meeting of experts on human rights will be convened in Canada on May 7, 1985. Important questions concerning human rights will be discussed there. It is appropriate that the opening date of this Ottawa meeting be designated by Congress as "Helsinki Human Rights Day."

Our support for this joint resolution is an important message to the world about our strong support for human rights and the Helsinki accords. I call upon my colleagues in the House to join me in support of Senate Joint Resolution 15.

The administration supports enactment of Senate Joint Resolution 15.

□ 1250

Mr. FASCELL. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. Mr. Speaker, I rise in strong support of Senate Joint Resolution 15 and want to congratulate the chairman of the Foreign Affairs Committee, DANTE FASCELL, for his masterful caring, and courageous leadership. For over 7 years of the Commission on Security and Cooperation in Europe. The Helskinki Commission. I also want to commend the chairman for bringing this timely resolution to the floor for our consideration.

In addition to designating May 7, 1985, as "Helsinki Human Rights Day", Senate Joint Resolution 15 requests that the President convey to the other 34 signatory countries of the Helsinki Final Act the view that respect for human rights and fundamental freedoms is a vital element of further progress in the ongoing Helsinki process.

As you know, Mr. Speaker, the Final Act signed in Helsinki, Finland, in August of 1975, set forth guiding principles to govern relations among the signatory states. Though not legally binding, to the extent that we monitor and periodically review compliance or noncompliance, we institute a process that may become politically binding and morally compelling.

The Helsinki process allows a context for serious, public debate on East-West issues. One of those issues, which is a legitimate international concern, is respect for human rights. The relevance and pertinence of human rights issues within the overall context of East-West relations should not be underestimated.

Respect for human rights—defined in principle VII of the Helsinki Final Act as "deriving from the inherent dignity of the human person and essential for his free and full development"—is made an essential principle guiding relations among the signatories.

Principle VII, which holds the signatories to certain levels of tolerance for individual beliefs and rights, and the implementing provisions of basket III legitimated the issue of human rights as an appropriate item of public discussion and negotiation within an East-West context.

One of the successes of the Madrid meeting under the expert leadership of Max Kampelman was the agreement to convene an expert's meeting in Ottawa, Canada, on May 7, 1985, to focus on the status of human rights in the participating states. This meeting is an integral part of the Helsinki process. I am committed to that process, for it affords us the unique and exciting prospect for promoting more human, political, social and cultural exchanges.

As cochair of the Helsinki Commission, I look forward to working in partnership with other Government agencies in Ottawa. With the effective and positive influence of nongovernmental organizations, I am hopeful that the Commission will contribute to the growth of confidence among nations and will play a role in bringing pressure to bear on the Soviet Union and other nations to comply with the Helsinki accords. As the Commission undertakes specific new commitments, I hope to continue the legacy of nonpartisanship left by Chairman FASCELL.

Mr. BROOMFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. GILMAN], a member of the committee.

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding time to me, and I want to commend our distinguished chairman, the gentleman from Florida [Mr. FASCELL] and our ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], for bringing this measure to the floor at this time on the 10th anniversary year of the Helsinki accords, a particularly important year as we look back on what has been accomplished and what has yet to be accomplished.

Mr. Speaker, I rise in support of Senate Joint Resolution 15, legislation

designating May 7, 1985, as "Helsinki Human Rights Day," and requesting the President to continue our Nation's efforts to achieve full implementation of the Helsinki accords. I was pleased that the Committee on Foreign Affairs, of which I am a member, recently passed this measure, which was approved by the Senate.

The resolution before us outlines the obligations and commitments of states party to the Helsinki accords of 1975. The Helsinki Final Act underscores the commitment that these signatory nations are obliged to respect with regard to human rights—rights to freedom of movement, thought, religion, cultural exchanges, and freedom to emigrate. While the intent of the Helsinki agreement is clear, the Soviet Union and other Warsaw Pact nations have failed to implement the Final Act. Indeed, these nations have continued, and in a number of areas, accelerated their blatant denial of even the most basic human rights.

The Belgrade Review Conference (1977-78) and the Madrid Review Conference (1980-83), both of which I had the opportunity to participate in, underscored the intention of the U.S. and other nations committed to the full implementation of the Helsinki process, to bring life to the Final Act, and to maintain pressure on the Soviets and East Europeans to recognize and to fulfill their human rights obligations. A third followup is scheduled for November 1986, and as the resolution indicates in May of this year, a human rights expert meeting focusing on Final Act obligations and commitments will be convened in Ottawa.

Mr. Speaker, in January, I had the opportunity to travel to Moscow with a delegation of my congressional colleagues. During that visit, we met with a number of Soviet officials. In February, a number of my colleagues and I participated in discussions with a group of Soviet parliamentarians who had come to the United States. It was clear to me, during these discussions, as it had been during earlier meetings I had had with Soviet officials, that the subject of human rights is not a subject that the Soviets can discuss comfortably. No wonder, their record is abysmal, their defense utilizes mirrors, selective interpretations of international agreements, and a touch of Alice in Wonderland thrown in for good measure.

The Soviets maintain that they have fulfilled their obligations. Soviet Foreign Minister Gromyko stated during a rare press conference in Moscow in January of this year—following his meeting with Secretary Shultz—that "the Soviet Union is not in the habit of violating its commitments under treaties and agreements signed by it and other states, be it bilateral or a multilateral agreement. We take pride in this fact. Incidentally, the world is used to this. When the Americans say that the Soviet Union's respect for the provisions of one agreement or another is doubtful, they are listened to, you know, rather with indifference, and no other state has ever made us any statements that such claims correspond to reality, no never. Our conscience is clear. We do not make agreements to break them, we fulfill them from beginning to end."

Politiburo Member Shcherbitsky, when he and his Soviet colleagues met with us in Washington last month, echoed a similar theme. He said, "In the Soviet Union we consistently observe all conventions and agreements, specifically Helsinki."

Against this backdrop, one must consider the reality of human rights abuses in the Soviet Union, abuses suffered not only by Jews, but by Christians and other minority groups. Concerning emigration and the case of Soviet Jews, the situation is particularly grave: The number permitted to emigrate has dropped precipitously—from 51,000 in 1979, down to 900 in 1984—while the Soviets engage in a systematic campaign of harassment of those seeking to emigrate.

Indeed, emigration has risen and fallen from 1971 to 1984, for example 34,700 in 1973 to 16,736 in 1977 to 51,000 as I indicated in 1980. Such movement can be chartered over the early years of détente, the Jackson-Vanik amendment on trade, the grain embargo, U.S. boycott of the Olympics, the Soviet invasion of Afghanistan, and the KAL shoot down. We can only speculate about the relationship between these events and rates of emigration.

Any request to emigrate today leads to loss of job, harassment, charges of parasitism, and imprisonment. Estimates place at close to 400,000 those Soviet Jews who have begun the emigration process and are now trapped in limbo. Of this number some 20,000 have been formally refused.

Mr. Speaker, we must not hesitate to continue to point out violations of the Helsinki agreement by the Soviet Union and any other nations which trample on human rights. We must continue to shed light on the terrible plight of those who can now only dream about the most basic of freedoms for themselves and for their families.

I have seen that dream in the eyes of those refused the right to emigrate, of those who suffer arbitrary harassment, and of those whose children are beaten in schools because their families adhere to certain religious beliefs. I believe that this measure will help to bring needed visibility to the Helsinki process and the basic freedoms and rights it is struggling to secure for millions who are denied these rights.

Accordingly, I urge my colleagues to suspend the rules and pass Senate Joint Resolution 15, so that the Soviets and others who claim adherence to the Helsinki agreement will fully recognize that Congress is determined to bring some facts to the words of the Helsinki document.

□ 1300

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. SOLOMON], a member of the committee.

Mr. SOLOMON. I thank the gentleman for yielding time to me.

Mr. Speaker, in commending the gentleman from Florida [Mr. FASCELL] for his outstanding leadership as chairman of the Helsinki Commission, I rise in strong support of this resolution and now is a particularly appropriate time for us, as the representatives of the American people, to be making this statement.

At a time when new leadership has come to the Kremlin, and when arms control talks are underway in earnest in Geneva, it is incumbent on us to reaffirm the centrality of the human rights issue in the dialog between East and West. This resolution is a necessary declaration to that effect. Because, Mr. Speaker, there can be neither security nor cooperation in Europe until all of the signatories to the Helsinki Final Act—those signatories on both sides of the Iron Curtain—respect by word and deed those basic human rights and aspirations that are enumerated in that document.

It is also important for us, as free men and women, to use every opportunity we have to press the issue, to demand compliance by the signatories. This resolution seeks to make the Helsinki Final Act a living document, a living and powerful expression of the rights of man. Without continued vigilance on our part, including resolutions of this kind, the Helsinki Final Act could become merely an empty document, not worth the paper it is printed on.

And so I commend our distinguished chairman of the Committee on Foreign Affairs for expediting the consideration of this resolution. May 7 is the day that an important conference begins up in Ottawa and that conference will examine the developments these past years since the Helsinki Final Act was signed. It is most appropriate, then, for us to declare May 7 as "Helsinki Human Rights Day" and to mark that occasion with the necessary ceremonies and observation that it deserves. In such a way we are keeping faith with our own heritage as a free people, and we are offering hope to those still oppressed—we have not forgotten them.

I urge passage of Senate Joint Resolution 15.

Mr. BROOMFIELD. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. KEMP].

Mr. KEMP. I thank my colleague from Michigan for yielding.

Mr. Speaker, I rise to offer my strong support of this resolution proclaiming May 7 as Helsinki Human Rights Day, and to pay my deepest and most profound respects to the chairman, the gentleman from Florida [Mr. FASCELL], for the great effort that he has made as the chairman of the Commission over these early years of the Commission. I am proud to stand as a new member of the Commission, and I look forward to working with the gentleman from Florida [Mr. FASCELL] and the new chairman, AL D'AMATO, from our State.

I appreciate the remarks of the gentleman from New York who preceded me. I believe that there is no better way to stand in solidarity with the men and women of Central and Eastern Europe, and particularly the Jews and Christians and the dissidents of the Soviet Union, than by overwhelmingly and unanimously passing May 7 as Helsinki Human Rights Day.

May 7, the day we have chosen to commemorate Helsinki Human Rights Day, is the opening day of the Ottawa Human Rights Experts Meeting. 1985 marks an important year in the Helsinki process as we celebrate the 10th anniversary of the signing of the Helsinki accords. This is also an important time for me personally, as I have just been appointed to the U.S. Helsinki Commission.

Yesterday, former Helsinki Commission chairman, DANTE FASCELL, turned the gavel over to my good friend and colleague, Senator AL D'AMATO. Chairman FASCELL and his staff have been universally acclaimed for the fine work they have done in monitoring and furthering the goals and mandates of the Commission. I would like to reiterate my congratulations and appreciation for his outstanding leadership of the Commission for the past 8 years.

The accords on Security and Cooperation in Europe signed at Helsinki, Finland, in 1975 established a framework for the 35 participating states to resolve the humanitarian, economic, political and military issues which divide Europe. It also called for periodic meetings, one of which is scheduled to begin on May 7 in Ottawa on the subject of human rights and fundamental freedoms.

Each signatory country established an organization at home to monitor the process. Some of these monitoring groups were official, such as ours, and their members have been honored for their hard work and achievements. But some were unofficial, such as the Soviet Union's, whose members were subsequently jailed and exiled on charges of anti-Soviet agitation and propaganda. Only two of the original 50 members of the Soviet Helsinki Watch group stayed out of jail, and they did this by publishing a document in 1982 stating that the watch had been disbanded.

In other words, in the Soviet Union the very organization constituted to monitor observance of the accords became a victim of Soviet violations of their obligations thereunder.

It is bitterly ironic that this should happen. This is exactly the type of repressive antihumanitarian activities we have vowed, by treaty, to eliminate. I look forward to working with former Chairman FASCELL, Chairman D'AMATO, and my colleagues on the Commission here in the U.S. and in the other 34 signatory countries to achieve the mandates of the Helsinki accord. Let's start by proclaiming May 7 Helsinki Human Rights Day.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LANTOS].

Mr. LANTOS. I thank the gentleman for yielding.

Mr. Speaker, first I would like to pay public tribute to Chairman DANTE FASCELL for the phonomenal way he has set the course for the Helsinki Commission. With dedication, commitment, and judgment he has set a pattern which will, for years to come, establish the Helsinki Commission as a serious organization determined to protect human rights and to insist that human rights violations cease, in accord with the Helsinki accords.

Mr. Speaker, as we sit down with the Soviet Union in Geneva to deal with the question of arms control, arms reduction, and disarmament, the persistent failure of the Soviets to observe the Helsinki accords must be uppermost in our minds. There is no way the Soviet Union can gain credibility to observe arms treaties in Geneva unless they observe human rights commitments they have made. The pattern of violations, which we have seen over the years, in direct defiance of international treaties agreed to by the Soviet Union, does not auger well for the Geneva arms control and disarmament negotiations.

The American people must ask the simple question: If the Soviet Union has set its signature to the Helsinki accords and has persistently violated it, what guarantees do we have that they might not violate disarmament and arms control agreements?

As one who is profoundly committed to arms control and disarmament so that we might diminish the threat of a nuclear holocaust, I strongly urge the Soviet Union, as we begin the second decade of the Helsinki accords, to move in the direction of improving its human rights performance.

The Congressional human rights caucus is monitoring the acts of the Soviet Union in this field, and we are deeply concerned that unless dramatic improvements occur in the near future, the hope that the new Soviet leader has brought to the whole world for a change in policy will be a vain and unrealized hope.

It is appropriate for us to approve this resolution. But it is even more important for us to recognize that Helsinki is not a symbolic act. It deals with the lives of millions of human beings who are crying out for fundamental human rights in the Soviet Union—rights which have thus far been denied them.

I hope that in the second decade of the Helsinki accords there will be a more proper adherence to the agreements reached at Helsinki and we will be able to place confidence in negotiations that we have with the Soviets on other matters.

I urge my colleagues to approve the resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Speaker, I rise to commend my colleague, the chairman of the Foreign Affairs Committee for offering this resolution and for his continuing leadership and commitment throughout his long congressional career to the cause of human rights throughout the world.

I commend also my colleague, the gentleman from Maryland [Mr. HOYER], and, in the other body, Senator D'AMATO, the new chairman of the Helsinki Commission, and the sponsor of this resolution in the Senate, Senator DECONCINI, for their work on behalf of human rights.

This resolution marks May 7, 1985, as Helsinki Human Rights Day to coincide with the opening of a 6-week meeting in Ottawa to discuss compliance with the human rights provisions of the accords.

As a new member of the Commission on Security and Cooperation in Europe, a founding member of the International Parliamentary Group on Human Rights in the Soviet Union [IPG], and as founder and cochairman with my very distinguished colleague from California [Mr. LANTOS], of the congressional human rights caucus, I will be proud to participate with my colleagues in this important process.

I think that we have to remember that not only do we in governments in the western world have a commitment to the Helsinki process but, most importantly, the oppressed peoples in the Soviet Union and in Eastern Europe, have made such a commitment. Many voluntary monitoring groups were established throughout the Soviet Union and in Eastern Europe after the accords were signed in 1975, with great personal risk to the individuals involved, who have suf-

fered harassment, repression and persecution, including imprisonment and incarceration in psychiatric hospitals, for their commitment to see that their countries carry out the provisions of these accords.

We will bring to the process at Ottawa many of the cases that have come to our attention, the matters of Viktor Savelev of Georgia, imprisoned recently for simply transporting unauthorized Baptist materials, the matters of Pavel Vezikov, of Estonia, of Rudolf Battek, of Czechoslovakia, the repression of Turks in Bulgaria by their government—all of these will be brought by us to the table at Helsinki to bring before the Soviet Union and Eastern European nations the instances of their noncompliance with the Helsinki accords.

This resolution is an important expression of Congress' support for human rights. I urge its adoption.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Speaker, I want to commend the committee and I want to commend the Commission but I want to raise, I think as the next level of Western concern for human freedom, an underlying problem that the Commission is going to run into, and I cite and recommend tc the Commission members to read the State Department publication, Grenada Documents, An Overview and Selection.

The problem for Western thought in dealing with the Helsinki accords is the fact that the Soviet Union is a system which honestly and sincerely believes in Marxism and Leninism and that Marxism and Leninism is a system which systematically oppresses human beings for the power of an elite.

□ 1310

I would suggest that anyone who reads the Grenada Documents, which is the first time we have ever captured a Communist government's and a Communist party's records, will discover things such as, for example, Maurice Bishop's statement, and I quote from his secret speech, "The Line of March of the Party":

> Laws are made in this country when Cabinet agrees and when I sign a document on behalf of Cabinet. And then that is what everybody in the country—like it or don't like it—has to follow. Or consider how people get detained in this country. We don't go and call for no votes. You get detained when I sign an order after discussing it with the National Security Committee of the Party or with a higher Party body. Once I sign it—like it or don't like it—its up the hill for them.

The point is, when you read this document, including Embassy reports from Moscow, training agreements with the Soviet Union, reports by the Cuban Emissaries, the Soviet system and Marxism-Leninism is a systematic approach to the oppression of human beings.

Having a Helsinki accord with the Soviet Union is comparable to having a Helsinki accord with Nazi Germany. The challenge to the West is, once you really understand that they are systematically and deliberately oppressing human beings, then what? Do you continue the public relations charade? Do you vote through "Days of Remembrance"? In what way, effectively, do we in the West force a study of human rights violations by a system whose current leader, Gorbachev, was the handpicked choice of Andropov who spent 15 years as the head of the KGB, the secret police, locking people up, and who invented the practice of appointing political prisoners to serve in mental institutions.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding me this time.

Mr. Speaker, I, too, want to say to the committee that I think that this resolution is fine; it should be passed. But the question that you have to raise is: Just what are we doing with the resolution? The question comes up because this resolution is aimed at telling our President that he ought to request full implementation of human rights; that we ought to move forward in trying to get the Soviets to comply with Helsinki.

We say flatly in this resolution that the Soviets are in noncompliance with Helsinki. We all know that; absolutely. So we are passing this resolution to say, well, they ought to get into compliance.

Are they going to listen to this resolution? Is this resolution going to do that much good? What we are dealing with here is brutal, murdering liars. They brutally murdered Major Nicholson. We pulled that resolution off the calendar today. Then we say in this resolution that they are in noncompliance with Helsinki, which proves that they are liars. That is what we are dealing with.

The question is whether we pass resolution like this after resolution like this, whether or not we are going to get the message across. Now, it seems to me what we have got to begin to do is deal with them firmly in a way which suggests that we are not going to put up with this nonsense any more. That we are going to do more than simply pass resolutions that condemn them. We are going to do more than simply say to our President that we ought to say to them that they ought to get into compliance.

It is high time that we develop as a policy in this Congress something which really means something to them. That we do take the steps that are needed to have a defense that the Soviets are concerned about. That we do not treat them as though they are good actors in the world; they are not. They are brutal, murdering liars who need to be treated that way by this House.

This resolution simply says that it is time that they get into compliance and so on, and we ought to proclaim a day to do it. Fine. But it seems to me we have got to do a lot more.

● Mr. MILLER of California. Mr. Speaker, I rise is strong support of Senate Joint Resolution 15, which would designate May 7, 1985, as "Helsinki Human Rights Day."

We have just returned from a very historic mission to the Soviet Union, where we met with the new leadership of that nation. We discussed several of the most important issues which stand between our two nations.

As the chair of the human rights task force during our trip, I raised with our Soviet hosts very troubling record of the Soviet Union with respect to human rights and the persecution of Soviet Jews and other religious and cultural minorities within that country.

The failure of the Soviet Union to abide by the terms of the Helsinki Final Act raises very serious concerns in the Congress of the United States. As I told the Soviet leaders, if we cannot trust you to abide by the terms of a treaty assuring human rights to those who pose no real threat to Soviet security, how can we trust you to abide by an arms control treaty whose violation could endanger the security of all our citizens, and the future of the entire planet?

The issue of human rights does not just apply to the Soviet Union. In South Africa, in Central America, in Eastern Europe—in far too many nations around the world, governments disregard fundamental human rights. No government, least of all our own which has the strongest historic commitment to human liberty, should ignore those abuses.

This resolution (S.J. Res. 15) proclaims that respect for human rights and fundamental freedoms is a vital element of further progress in the relations between nations. It is an indispensable item on the American agenda; it cannot, and it will not, be bargained away or muted. On that, all of us in this Chamber—Democrat and Republican, liberal and conservative—are in full agreement.

For as Thomas Jefferson wrote nearly two centuries ago:

> The God who gave us life gave us liberty at the same time. The hands of force may destroy, but cannot disjoin them.

Mr. Speaker, I am very hopeful that the negotiations which occurred in Moscow and Leningrad this last week will help pave the way for improved relations between the Soviet Union and the United States. And I am simi-

larly hopeful that the forthcoming meetings in Ottawa will serve to reinforce the basic importance of human rights and freedom among all nations.

I urge all Members of this House to vote in favor of this resolution, and I urge the President to issue this proclamation declaring once again the commitment of this Nation to full implementation of the human rights and humanitarian provisions of the Helsinki Final Act.●

● Mr. SMITH of New Jersey. Mr. Speaker, I rise today in strong support of Senate Joint Resolution 15 designating May 7, 1985, as Helsinki Human Rights Day. I am proud to have cosponsored this important resolution.

For a 6-week period, beginning on that day, representatives of the 36 nations which signed the Helsinki Final Act will meet in Ottawa to discuss compliance with the historic human rights provisions of that agreement. Signed in 1975 by the United States, Canada, the Soviet Union and 33 European nations, the Final Act was a vital step forward in the international human rights movement. Not only does the document commit the signatories to respect fundamental human rights such as family reunification, but for the first time it committed all of us to convene periodically to review each nations' progress in implementing the accords.

The Ottawa meeting has been scheduled to specifically address the human rights provisions of the Helsinki Final Act. In Principle VII of the agreement, the signatories agreed to respect human rights and fundamental freedoms, including freedom of religion, thought, conscience and belief. The Ottawa meeting has been scheduled at the insistence of the Western nations, I might add it is no surprise, Mr. Speaker, that the Soviet Union and its Eastern European allies were extremely reluctant to attend such a meeting.

The countries of the Eastern bloc have tragically failed to uphold their commitments to respect these fundamental freedoms. Since the Madrid followup review ended in 1983, the Soviets, for example, have escalated their brutal war against the people of Afghanistan. They have killed 289 innocent civilians by shooting down a civilian airliner. And their campaign against their own citizens who dare to practice their religion or to speak out in favor of human rights ranks among the most systematic and repressive programs in recent history.

The plight of Jews in the Soviet Union stands out as perhaps the most glaring example of Soviet disregard for their solemn commitment to observe fundamental human rights. Emigration of Soviet Jews has declined from 51,320 to less than 1,000 in a matter of 5 years, Mr. Speaker. This steady decline has been accompanied by a brutal and pervasive campaign of anti-Semitism resulting in the arrests of Hebrew teachers, the wide dissemination of vicious propaganda, the harassment of thousands of believers, and the denial of countless applications for exit visas on spurious grounds.

And sadly, Mr. Speaker, this campaign is only one aspect of Soviet disregard for human rights—fundamental rights which they agreed to uphold in 1975 at Helsinki, in 1977 at Belgrade, and most recently in 1983 at Madrid. And now we are meeting again, this time to discuss human rights explicitly. Some might ask why we continue to support the Helsinki process when it appears our efforts to improve the lives of human rights activists in Eastern Europe have apparently reaped few benefits.

On the eve of the Ottawa meeting, I would like to defend this ongoing progress to those who might question its impact. As a member of the U.S. (Helsinki) Commission on Security and Cooperation in Europe, I have followed the process with great interest. During that time I have come to realize that without question, the Helsinki process provides us with an invaluable forum to discuss violations of human rights. Morover, it has given us a set of standards to which all have agreed and all can and must be held accountable. It has survived the inevitable episodes of decline in East-West relations, providing an ongoing forum where allied and nonallied nations may discuss their differences openly.

But the factor which has truly convinced me that this process must continue, and that it does indeed have lasting value and impact, is the deeply held belief in the East that the Helsinki process has eased the plight of human rights activists in these nations. The issue of human rights is now in the forefront of the international debate, thanks largely to the periodic review meetings. These discussions have legitimized international action and provided an indispensable forum to criticize violations, applaud improvements, and monitor compliance in general. Millions of Eastern Europeans have taken heart in the human rights provisions of the Final Act. Activists have testified again and again as to the significance of this agreement, a unique and unprecedented means of publicizing violations of basic human rights principles.

I think it is fitting, Mr. Speaker, that we recognize the great significance of the Ottawa Human Rights Experts Meeting, and the Final Act in general, by designating May 7, 1985, as Helsinki Human Rights Day.

It is an excellent opportunity for the United States to reassert its commitment to fundamental human rights. It is my sincerest hope that the passage of this resolution will improve the prospects for a fuller implementation of the Helsinki accords, and I urge its approval by my colleagues.●

● Mr. CONTE. Mr. Speaker, I rise in support of Senate Joint Resolution 15, a resolution to designate May 7, 1985 as "Helsinki Human Rights Day."

On May 7, a meeting will convene in Ottawa, Canada to review progress in implementing the Helsinki accords. Unfortunately, that meeting will reveal continued noncompliance by a number of signatory nations.

Last week, for example, Jewish people all over the world celebrated Passover—all over the world, that is, except in the Soviet Union. It is more than symoblic to note that it is imposible for Soviet Jews to celebrate Passover, which commemorates the struggle of the Jews from slavery to freedom, without fear of harassment, arrest, or persecution by the government. The restrictions on emigration rights is further testament to the realization that, as Passover 1985 passed, the struggle for religious freedom continues in the Soviet Union.

But the plight of the Soviet Jews, unfortunately, is not an isolated example. Press restrictions, imprisonments without due process, torture, and countless other violations of human rights exist throughout the Soviet Bloc and in many Latin and South American countries, death to dissenters is the "modus operandi" of the Khomeini regime in Iran, a genocide of the Afghan people is being perpetrated by the Soviet occupation force, and the Marxist Ethiopian Government spends millions of dollars on its 10th anniversary while its people starve.

Yes, the struggle for human rights continues, but the world is a better place with the Helsinki accords. The accords serve as a beacon of hope for oppressed people everywhere, and this resolution is an important statement of continued U.S. support for the accords ideals. Senate Joint Resolution 15 tells the world that we continue to support a higher moral order and that violations by signatory nations will not, and must not, go unnoticed.

Mr. Speaker, I have a meeting scheduled at the White House shortly to brief the President on our just-completed trip to the Soviet Union. Given that commitment, I may miss the vote on this resolution. I endorse wholeheartedly Senate Joint Resolution 15, However, and urge the support of my colleagues. Let May 7, 1985 be designated "Helsinki Human Rights Day" and let the American people through our President, condemn the self-righteous pronouncements on hyman rights by Helsinki violators. We must continue to play our role in the "Helsinki process," a process that we confidently believe will utilmately achieve the goal of human rights, freedom and justice throughout the world.●

Mr. FASCELL. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and pass the Senate joint resolution, Senate Joint Resolution 15.

The question was taken.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the Senate joint resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

EXPRESSING SENSE OF CONGRESS THAT TAIWAN SHOULD CONTINUE TO COOPERATE IN THE CASE OF HENRY LIU AND TO CONCLUDE AN EXTRADITION AGREEMENT

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 110) expressing the sense of the Congress that the authorities on Taiwan should continue to cooperate fully in the case of Henry Liu and that an extradition agreement should be concluded between the American Institute in Taiwan and the Coordination Council for North American Affairs.

The Clerk read as follows:

H. CON. RES. 110

Whereas Henry Liu, a United States citizen of Chinese ancestry, was murdered in Daly City, California, on October 15, 1984;

Whereas certain citizens of Taiwan have been, and others may be, charged by authorities in the United States in connection with this crime;

Whereas certain citizens and government officials of Taiwan, including Vice Admiral Wang Hsi-ling, head of the Intelligence Bureau of the Ministry of National Defense, have been indicted in Taiwan for involvement in the murder of Henry Liu;

Whereas Taiwan has requested on numerous occasions that an extradition agreement be concluded with the United States; and

Whereas an extradition agreement with Taiwan would improve the administration of criminal justice in the United States: Now therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the American Institute in Taiwan and the Coordination Council for North American Affairs should take immediate steps to conclude an extradition agreement which meets the best interest of both sides.

SEC. 2. It is further the sense of the Congress that—

(1) inasmuch as legal proceedings against several of the individuals charged with the murder of Henry Liu are currently underway in Taiwan, justice be done under the laws of Taiwan;

(2) the authorities on Taiwan should cooperate fully with authorities in the United States in the investigation and prosecution of the case of Henry Liu; and

(3) following the current proceedings in Taiwan referred to in paragraph (1), the authorities on Taiwan should exercise the powers they may have, under all applicable law—

(A) to bring to justice any other individuals who may be criminally liable in accordance with law in connection with the murder of Henry Liu, and

(B) to send to the United States, under appropriate legal processes, any citizen of Taiwan, and any other person in Taiwan, who is charged by authorities in the United States in connection with the murder of Henry Liu, and whose transfer to the United States is requested by authorities in the United States.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes and the gentleman from Iowa [Mr. LEACH] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on October 15, 1984, an American citizen of Chinese descent by the name of Henry Liu, was brutally murdered at his home in Daly City, CA. It subsequently turned out that the assassins of Henry Liu were citizens of Taiwan who had been recruited, trained, and dispatched to the United States by authorities of the Government of Taiwan in order to execute Henry Liu.

Henry Liu's crime, it appears, is that he was a known critic of the Government of Taiwan. Now, I know there are differences of opinion in this House about the nature of the regime on Taiwan. But of one thing I am sure all of us agree: That is that here in the United States, we cannot accept, we cannot tolerate, we cannot forgive efforts by foreign authorities to intimidate and, indeed, to eliminate, American citizens on American territory.

The law enforcement authorities in California have charged two Taiwanese citizens, Chen Chi-li and Wu Tun, with responsibility for this foul deed. The U.S. Government has requested the authorities on Taiwan to deliver these two individuals to the United States so that they can be put on trial before the appropriate judicial authorities in our own country.

The U.S. Government has also asked the authorities on Taiwan to cooperate with us in the investigation of this crime. I want to acknowledge this afternoon that, so far, the authorities on Taiwan have complied with all of the requests that we have made for their cooperation in the investigation of this crime except one. That is that they have so far refrained and refused to extradite these two individuals to the United States.

Subsequent to the indictment of these two hired guns by the law enforcement authorities here in the United States for their involvement in the murder of Henry Liu, it turned out that the authorities on Taiwan themselves acknowledged that the murderers had been recruited for this assignment by Admiral Wang, who is the head of the Bureau of Military Intelligence, and both Admiral Wang and two of his associates in that bureau have been, as I understand it, indicted by the authorities on Taiwan for their complicity in this affair.

The resolution before us today expresses the sense of the Congress that the authorities on Taiwan should fully cooperate with the United States in our efforts to make sure that justice is done in this affair, and to extradite to the United States, in compliance with the appropriate legal processes and procedures in Taiwan, those individuals who have been accused of involvement in this affair by the duly-constituted law enforcement authorities of California and of our own country.

□ 1320

The resolution also calls for the negotiation of an extradition agreement between Taiwan and the United States so that a formal arrangement can be put in place to deal with problems like this in the future. There are some who have said that Taiwan, in the absence of an extradition treaty, lacks the authority to deliver the individuals involved to the United States. Yet it is the belief of the Committee on Foreign Affairs, based on a memo submitted to us by the Law Division of the Library of Congress, that within the framework of Taiwanese law, the President of Taiwan retains the residual authority, if he chooses to use it, to deliver the individuals involved to the United States.

It is our feeling that if justice is going to be ultimately done in the case of the murder of Henry Liu, it will be important to the individuals accused of responsibility for his assassination to be tried not just in Taiwan but here is the United States as well.

We need to know not simply who is responsible for pulling the trigger, but who is responsible for giving the order that ultimately led to the murder of Henry Liu.

So I want to urge my colleagues in the House to support this resolution. It has been modified in a number of

ways to meet the concerns which were expressed both in our subcommittee and in the full committee by some of my good friends such as the gentleman from New York [Mr. SOLOMON] and the gentleman from Illinois [Mr. HYDE].

I believe that the final product reflects their concerns as well as ours and that this resolution does have broad bipartisan support.

Let me just say in conclusion that all of us, without exception, not only object to what happened to Henry Liu; all of us without exception are not only deeply dismayed by what happened to Henry Liu; but all of us, I believe, recognize that the future relationship between Taiwan and the United States requires a cessation of any efforts on the part of the authorities on Taiwan to intimidate people in the United States. This kind of behavior is simply not acceptable, particularly between friendly governments, and I think that the adoption of this resolution expressing the sense of the Congress on this issue will make it very clear to the authorities on Taiwan that we are concerned about what happened and that we seek their continuing cooperation in making sure that justice is done in this matter.

Mr. Speaker, I reserve the balance of my time.

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I fully endorse everything that the distinguished chairman of the Subcommittee on Asian and Pacific Affairs, the gentleman from New York [Mr. SOLARZ], has indicated and would like to present a little different and larger perspective on the issue that relates a little bit beyond just simply the murder of an American citizen, Mr. Henry Liu.

Mr. Speaker, I rise in support of House Concurrent Resolution 110 which expresses the sense of Congress that the authorities on Taiwan should cooperate fully in the case of Henry Liu and that an extradition agreement should be concluded between the American Institute in Taiwan and the Coordination Council for North American Affairs.

I want to commend the gentleman from New York, [Mr. SOLARZ], and the gentleman from Florida, the chairman of the full committee [Mr. FASCELL], for bringing this resolution before the House. I also want to take this opportunity to commend the gentleman from New York [Mr. SOLOMON], who is a member of the Subcommittee on Asian and Pacific Affairs, for having first recommended that the resolution not only touch on the Henry Liu case but also urge that an extradition agreement be concluded between the American Institute on Taiwan and the Coordination Council for North American Affairs.

It should be noted that the resolution is supportive of and consistent with administration efforts to obtain the return to the United States of those individuals in Taiwan who have been charged by American authorities in California with the murder of Henry Liu. In addition, the Foreign Affairs Committee has also received written comments from the Department of State stating that it has no objection in principle to the conclusion of an extradition agreement between AIT and CCNAA. The Department notes, however, that concluding such an agreement will involve complex negotiations with potential problems of implementation and questions about the appropriate legislative authority required.

The murder of Henry Liu poses potentially grave ramifications for future United States-Taiwan relations. The indictment of Vice Adm. Wang Hsi-Ling, head of the Intelligence Bureau of Taiwan's Ministry of National Defense, and other Government officials for involvement in the murder of Henry Liu is extremely disturbing. The notion that a foreign government may have attempted to silence an outspoken critic and extend the control over free expression it maintains internally on the island into the United States itself is an insult to our constitutional heritage.

It was not long ago, in 1981, that Congress held hearings on the death of Dr. Chen Wen-Cheng, an assistant professor at Carnegie Mellon University, who was found dead under suspicious circumstances following interrogation by Taiwan Government officials during a visit back to his homeland. At that time, it was the hope of concerned Members of Congress that the congressional hearings, efforts by the FBI and State Department, and the subsequent enactment of legislation barring arms sales to governments engaged in harassment and intimidation of individuals in the United States would effectively deter any future such conduct—either on the part of the Taiwan Government or any other government.

Sadly, the murder of Henry Liu demonstrates otherwise and we have seen not an end to but a more blatant example of the silencing of dissent on foreign soil.

Although the United States may have a national interest in maintaining warm relations with certain governments which do not protect as assiduously as we the civil liberties of their citizens, such relations should not provide opportunity and temptation to such governments to abridge the rights guaranteed by the U.S. Constitution to individuals—citizens and aliens alike—residing within our borders.

The protection and guarantees of the U.S. Constitution are not negotiable. The Taiwan Government has been effectively on notice since 1981 that any action taken by their agents against any individual in this country who is engaged in the lawful exercise of his or her civil and constitutional liberties would seriously jeopardize the warm relations between our governments.

Although Taiwanese authorities have convicted and sentenced two of the individuals charged by U.S. authorities with involvement in Henry Liu's murder and have permitted U.S. law enforcement officials to interview certain individuals in Taiwan implicated in Mr. Liu's death, Congress continues to expect the Taiwan Government to respond appropriately to all U.S. Government requests on this matter. More importantly, Congress expects the Government on Taiwan to cease and desist from interfering with any individuals freely exercising their civil liberties in this country. Failure to do so may result in congressional action to exercise appropriate prerogatives regarding United States-Taiwan relations. As I suggested in testimony before the Asian and Pacific Affairs Subcommittee on the Dr. Chen case back in 1981, if there continues to be evidence of espionage or harassment by Taiwan agents in the United States, the State Department should give serious consideration to cutting back the current number of CCNAA offices in the United States, which have grown from eight to eleven since the enactment of the Taiwan Relations Act.

In addition, the Department should consider requesting the withdrawal of all Taiwanese Government personnel who may be part of the intelligence services implicated in the ordering of the murder of this U.S. citizen. The conduct alleged in the case before us—of government sanctioned murder—is not the conduct of friends. Actions—not words—will be the response Congress will be looking for in the days ahead.

There are perhaps two larger lessons to be drawn from the issue before us today. First, the murder of Henry Liu emphasizes anew the stark reality of the institution of martial law in Taiwan—the intolerance it breeds for dissent both at home and abroad—and the comfort it provides those who subscribe to a doctrine of national security which subordinates basic respect for law and human rights to the self-interest of ruling authorities. As long as the broad brush of national security can be used to gloss over the excesses of the state, there can be no guarantee in the future that murderous acts will not reoccur. Nondemocratic governments which refuse to submit themselves to a genuine test of popular will are more easily seduced by the temptations of personal power and operate with far fewer of the restraints, checks

and balances which democratic governments, like our own, must respect.

The murder of Henry Liu must be seen in this larger context and the Government of Taiwan urged once again to repeal marital law and restore to the people of Taiwan a fully functioning democratic system.

Second, this incident underscores the need for Congress to take another look at the steps taken by our own Government since our hearings in 1981 to ensure that individuals of foreign descent in the United States are fully protected in the exercise of their civil and constitutional rights. The death first of Dr. Chen and now of Henry Liu, not to mention the years of less publicized accounts of harassment and intimidation of Taiwanese students on American campuses, have left everyone of Taiwanese descent living in America with a chilling message.

Tragically, they are not the first or only ones to have felt the terror of the long arm of a foreign government. Other aliens and U.S. citizens of foreign descent have too frequently been coerced by agents of foreign governments over the years. The activities of the Iranian Savak and the KCIA against Iranians and Koreans in the United States, particularly in the 1970's, have been well documented in congressional hearings and other public records. The assassination on the streets of Washington of the former Ambassador from Chile, Orlando Letelier, led to a U.S. grand jury indictment against agents associated with DINA, the Chilean secret police. And, prior to the expulsion of the Libyan diplomatic delegation from the United States in 1981, Libyan students living in the United States were also targeted by their home government.

The case with the most striking similarities to that of Henry Liu, however, goes back to the 1950's, when Jesus de Galindez, a Spanish exile who taught in the Dominican Republic before coming to the United States, was murdered for writing as Henry Liu did a book critical of a foreign head of state. Galindez, an instructor at Columbia University, wrote his doctoral thesis on Trujillo.

Agents of the Trujillo government in the Dominican Republic reportedly offered to buy Galindez's writings before they could be published but, like Henry Liu, who was likewise reported to have received similar offers to temper his description of Chiang Kai-shek and his family from Taiwan agents, he refused. Accounts of the Galindez case are not entirely clear. But it appears that he was kidnapped from his home in New York, drugged and flown secretly one night to the Dominican Republic never to be heard from again.

The Galindez incident became a cause celebre in Congress and caused a fundamental reassessment of our Government's policy toward the Trujillo regime in the Dominican Republic. Unless full accountability is established for this crime, a similar reassessment may occur toward the Government on Taiwan.

Mr. Speaker, this Congress does not want to hold more hearings and consider more legislation on this subject in the years to come. It is time to put an effective end to hostile acts of murder and censorship on U.S. soil. Congressman SOLARZ, Congressman MINETA and I have written to the House Intelligence Committee to request a full investigation into the extent of activity by foreign governments in the United States who harass and intimidate individuals exercising their civil and constitutional rights, as well as into the effectiveness of existing laws and the need for additional remedies.

In this regard, I want to commend the State Department, the Justice Department and the authorities in California, particularly the Daly City police, for their diligent efforts to pursue justice in this case and urge my colleagues to give their unanimous support to House Concurrent Resolution 110 in an effort to show the solidarity of the U.S. Congress in support for the concerns of Americans of Taiwanese descent. American civil liberties must never be considered fickle and less applicable to immigrants from an Asian or African country than to emigres from Northern Europe.

Finally, lest my colleagues think we are talking about an abstract problem, I would like to bring to the attention of the House the case of a leading citizen of my State of Iowa, Hualing Engle, a Chinese-born American novelist, married to one of America's most respected poets and founder of the University of Iowa's Writer's Workshop, Paul Engle.

Last fall, Hualing received an anonymous death threat because in a recent novel she apparently was not critical enough of the People's Republic of China, even though her father was executed by Mao Tse-tung, her brother killed while serving in the Taiwan Air Force, and she herself was a refugee who fled to Taiwan from the Communists in 1949.

This death threat, which is being investigated by the FBI is not of light consequence in that one of the individuals implicated in the murder of Henry Liu reputedly testified that in coming to our shores he was also asked to murder a prominent American novelist, name unmentioned. As recently as December 1984, Hualing Engle has been referenced in the Taiwan press as 1 of 12 American so-called "leftists" unfriendly to the Taiwan Government. There may be doubt she was targeted for murder, but there is little doubt that she is the object of Taiwan Government intimidation.

For a foreign government to censure its own press is a violation of civil liberties with which no American can sympathize; but for a foreign government to attempt to muzzle free literary expression in America itself is a high crime of a profoundly graver nature.

It is simply the height of naivete to think the Taiwanese Government does not penetrate Taiwanese organizations and keep close records on Taiwanese citizens and Taiwan-born Americans in this country.

Why, my colleagues might ask, does the Government have so much concern? Part of the answer presumably relates to the desire of Taiwanese authorities to repress potential criticism of their Government in the United States. Part is simply a reflection of paranoid authoritarianism. And part may be an understanding that the freedom of dissent that exists here causes America to be a safe haven for political ideas and prospective political organizing. Governments around the world understand that it is no accident leaders of the stature of Sun Yat Sen, Benigno Aquino, and Kim Dae Jung lived in exile at one time or another in the United States.

But whatever the reasons foreign governments may have for their efforts to stifle dissent in America, we have a responsibility to uphold without compromise our constitutional standards. It is one thing for a foreign government to establish repressive institutions within its borders, but there must never be any tolerance of any kind for intimidation of American citizens on American shores.

Mr. Speaker, I reserve the balance of my time.

Mr. SOLARZ. Mr. Speaker, I yield 4 minutes to the very distinguished gentleman from California [Mr. LANTOS], in whose district the murder of Henry Liu took place, and who was among the very first to issue a call for congressional action in response to this dastardly deed.

□ 1330

Mr. LANTOS. Mr. Speaker, I thank the gentleman for yielding me this time, and I would like to pay public tribute to both the subcommittee chairman, the gentleman from New York [Mr. SOLARZ], and the gentleman from Iowa [Mr. LEACH] for the diligence and seriousness with which they have pursued this case.

Mr. Speaker, the issue before the House in this resolution is a matter of grave concern, with extremely serious and far-reaching implications for the relationship between the United States and the Government in Taiwan. These matters relate to the brutal murder of Mr. Henry Liu, an American

citizen of Daly City, CA, in my congressional district.

Although for us this is an important matter of national policy, for Mrs. Liu it is a very personal and tragic event, and I would like publicly to express my deepest and most sincere sympathy to her.

Mr. Speaker, it is unacceptable for U.S. citizens to be killed on American soil by individuals from other countries, whether these people are acting on their own authority or whether they are put up to these acts by government officials. It is in the best interest of justice, it is in the best interest of the United States, and it is in the best interest of the Government of Taiwan for this matter to be fully and fairly aired in an American court of law.

I, of course, understand that the United States and the Government of Taiwan have no treaty of extradition. This resolution urges the U.S. Government to reach agreement with the Government of Taiwan on an extradition procedure. It is important that this be done.

The lack of such a treaty must not prevent the Government of Taiwan from voluntarily returning the perpetrators of the murder of Henry Liu, as well as their accomplices, to the United States so they can be tried in California, where they committed this outrageous crime.

It is in the interest of the governments of Taiwan and the United States to close the book on this tragic and horrible event as quickly and as fully as possible. This cannot be accomplished except through court proceedings in an American court of law. Although individuals may be tried in Taiwan, the suspicion will inevitably linger that there might be a coverup.

It would be naive to suggest that this brutal murder has not cast a shadow upon the relations between the United States and Taiwan. It is, therefore, important for both our countries to remove that shadow by acting as expeditiously as possible to assure that the accused are returned to the United States and will stand trial.

In conclusion, Mr. Speaker, I would just like to add that we must insist upon opposing terrorism, whether it is perpetrated by Qadhafi of Libya or Khomeini of Iran or our friends in Taiwan, Terrorist activities on American soil will not be tolerated by either the American people or by the Congress of the United States.

Mr. LEACH of Iowa. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, this resolution, in its final form, is the result of a considerable amount of work at both the subcommittee and full committee levels.

Let me say that all of us are united in our condemnation of the brutal and disgusting murder of Henry Liu, an American citizen of Chinese descent who was shot down in front of his home last October.

In considering the practical implications of a resolution of this type, several issues had to be faced, including the fact that no legal extradition procedures exist between the United States and the Republic of China on Taiwan. So language to that effect was added. Moreover, most countries of the world, including ours, do not make it a practice to extradite their own citizens to other countries for purpose of standing trial.

Therefore, the language of this resolution had to be refined further so as to take into account the established legal procedures on Taiwan and to ask that the persons accused of murdering Henry Liu be sent to the United States in a manner consistent with those procedures.

I support this resolution and hope that the authorities in the Republic of China will be sensitive to the outcry in the United States over the murder of Henry Liu and the demand that justice be done.

I do believe, however, that the record should state that, short of returning the two accused gangsters to the United States to stand trial in this case, Taiwan has cooperated fully with the United States.

It was police authorities in Taiwan who first cracked the case last November and who reported their findings to American authorities immediately.

The Government of the Republic of China has made any and all documents and evidence in the case available to American investigators and allowed FBI agents to interrogate the two accused gangsters in the case for 17 hours in Taipei last January.

At no time has our State Department ever said or insinuated that the authorities in Taiwan have acted irresponsibly in this case.

The two accused gangsters have been convicted in Taiwanese courts and have been sentenced to life in prison. Three officials in the Military Intelligence Bureau who were implicated in the case are presently in a court-martial and if convicted, they face the likelihood of a sentence at least as harsh as that given to the gangsters.

Let me conclude by declaring again that I support this resolution. The murder of Henry Liu was a tragic and inexcusable crime committed against an American citizen and this resolution expresses our outrage.

Mr. LEACH of Iowa. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. HYDE].

Mr. HYDE. Mr. Speaker, I thank my good friend, the gentleman from Iowa [Mr. LEACH], and I want to acknowledge that I endorse this resolution completely. I think it says what needs to be said. The murder of Henry Liu was an outrage, and anyone who was involved in it or who had anything to do with it ought to be brought to justice, and justice ought to be speedy, and it ought to be thorough.

That said, I think that a few other comments are necessary. First of all, the Government of Taiwan cannot be accused at this point in the proceedings of training and recruiting the gangsters who committed this murder. It is true that there are three people, citizens of Taiwan, who hold positions in or who formerly held positions in the military. The former Director of the Defense Ministry's Intelligence Bureau and two of his deputies have been tried before a court-martial last Friday. They have not yet been found quilty or innocent nor have they been sentenced.

But the point is that no demand for the return of these people has been made by our Federal Government, only by local authorities. I think that should be noted for the record, and I think it should be noted that the Taiwan authorities have cooperated with our Federal authorities.

Next, I think it is important to note that naming government officials for their involvement in a crime cannot be taken as evidence of official complicity in this matter. I do not think that the fact that these three people are being tried and have been tried, in addition to the two convicted murderers, necessarily means that this was an official act of the government. I think that is unfair and really ought not to be added to this debate.

The only other point I would make is that initially this resolution indicated that we wanted them sent back here. We want them returned here, but I think we need to recognize that there are legal processes that exist in Taiwan, the Republic of China, and that these legal processes ought to be respected and followed before we can properly request someone to be shipped back to us. It must be done according to the rule of law.

Now, it is ironical that Taiwan has been asking for an extradition agreement with us for many years.

□ 1340

It takes a tragedy like this to finally get some momentum going toward obtaining an extradition agreement, because Taiwan has some people over here they would like extradited back to their country.

But I think it is a good resolution. I share the horror of what happened. I hope and pray that justice will be effectively meted out and if, in accord-

ance with a reasonable construction of the law of the Republic of China, then these criminals should be returned here for trial.

Mr. SOLARZ. Mr. Speaker, I yield 5 minutes to the gentleman from California [Mr. MINETA], who has been one of the most eloquent exponents of this resolution and who testified before our committee on the issue several weeks ago.

Mr. MINETA. Mr. Speaker, I rise in strong support of House Concurrent Resolution 110. This legislation is appropriate, moderate, and timely, and I urge my colleagues to support it.

For those who are unfamiliar with the case that prompted this resolution, let me provide the main facts. Henry Liu was a U.S. citizen who was murdered in Daly City, CA, by gangsters acting as agents on behalf of a foreign government.

The murder was a blatant act of international terrorism. How else can we classify the brutal murder by foreign agents of U.S. citizens trying to exercise their constitutional right to speak and publish political commentary?

Several aspects of this case are particularly distressing to me.

First, is the failure of our own Federal Government to respond more boldly to this crime. Several weeks ago, a U.S. drug agent was tragically murdered in Mexico. The response by our Government was immediate and dramatic. When it appeared that the Mexican Government was not fully cooperating in solving the case, officials from the White House on down voiced their criticism. Borders were tightened, ambassadors were summoned—all to express the necessary and rightful outrage of both the crime and the subsequent inaction.

And yet, how many people know of Henry Liu? He was not a heroic U.S. Government agent, simply a U.S. citizen, who believed he was free to write what he wanted, and that our Federal Government would protect him. He was not killed in a foreign land by drug dealers. He was killed in his garage in California by foreign agents. And the U.S. Government's reaction has been inaction. While the FBI has investigated the case, the files sit in the cabinet gathering dust, because no Federal grand jury has been called by the U.S. attorney to decide if Mr. Liu's civil rights were violated.

I was terribly disappointed that the administration did not make a stronger effort to have these criminals returned to the United States for trial. The government on Taiwan is currently trying those involved in the killing, including the three top officials of their defense intelligence service. Frankly, I am not confident that we will learn all of the facts of this act of terrorism as long as the only trials occurring are those in Taiwan. This was a crime occurring in our country; it requires U.S. justice: a full hearing, in an open courtroom.

I deeply regret that the government of Taiwan did not return the criminals to the United States for trial. For a government which claims to want close friendship with the United States, their behavior is curious. For a government who depends on the United States for millions of dollars of arms, their behavior is curious. The murder of Henry Liu has put a thorn in the side of United States-Taiwanese relations, a thorn whose pain will remain in this Member's mind for a long time to come.

Mr. Speaker, as a former member of the House Permanent Select Committee on Intelligence, I deplore the activities of all foreign agents in this Nation. I deplore the activities of those agents who work for our adversaries, and I deplore the activities of those who work for our would-be friends. Those who would call themselves friend, but send spies to surveil and harass our citizens, endanger that friendship.

Along with Mr. SOLARZ and Mr. LEACH, I have written to the chairman of the Intelligence Committee requesting his assistance in studying this problem, and I will insert our letter and Mr. HAMILTON's reply for the RECORD following my remarks.

Mr. Speaker, this case has been a tragedy for the family of Henry Liu, and for all Americans of Asian ancestry. I urge my colleagues to demonstrate their awareness and concern for this sad event by approving House Concurrent Resolution 110.

In closing, Mr. Speaker, let me just add my deep thanks to Mr. SOLARZ, Mr. LEACH, Mr. LANTOS, and Mr. LAGOMARSINO without whose hard work this resolution would not be before us today.

I include the material referred to, as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, March 14, 1985.

Hon. LEE H. HAMILTON,
Permanent Select Committee on Intelligence, H-405, The Capitol, Washington, DC.

DEAR CHAIRMAN HAMILTON: As you may know, a United States citizen named Henry Liu was recently murdered in California by agents of the government of Taiwan. Mr. Liu's killing was apparently the result of his writings, which have been critical of the Taiwan government.

The two men identified by the FBI as being directly responsible for the killing are now in Taiwan, and will not be returned to the United States for trial in our courts. In addition, the three top officials of the Taiwan military intelligence agency have been linked to this killing.

Our review of this case has raised serious questions about the extent of activity within this country of foreign agents who harass and intimidate U.S. citizens and residents seeking to exercise their rights under our Constitution. In the last few years, Congressional studies and news reports have increasingly highlighted this important problem.

We are particularly concerned about the Liu case, and other reports of extensive activities directly against U.S. citizens by agents of friendly nations such as Taiwan. We, therefore, urge that your committee investigate this problem with special emphasis on the activities of agents of Taiwan and other countries.

We are interested in your conclusions on the magnitude of such activity, the effectiveness of existing laws, and what administrative or legislative steps need to be taken to relieve this unwelcome and unlawful intrusion into the lives of our citizens and residents.

We look forward to the results of your investigation with great anticipation, and are ready to work with you and your staff in this work.

Thank you very much.

Sincerely yours,

NORMAN Y. MINETA,
STEPHEN J. SOLARZ,
JIM LEACH,
Members of Congress.

U.S. HOUSE OF REPRESENTATIVES,
PERMANENT SELECT COMMITTEE ON INTELLIGENCE,
Washington, DC, April 4, 1985.

Hon. NORMAN Y. MINETA,
2350 Rayburn House Office Building, Washington, DC.

DEAR NORM: Thank you for your letter of March 14 urging that the Permanent Select Committee on Intelligence investigate activities against U.S. citizens in this country by agents of friendly nations, such as Taiwan.

Responsibility for investigating and preventing such activities rests with the Federal Bureau of Investigation. The Committee authorizes the Foreign Counterintelligence budget of the FBI and conducts regular oversight over the Bureau's counterintelligence activities. The FBI applies its resources and energies against the intelligence services of foreign countries on a case-by-case basis. Some countries, such as the Soviet Union, have a history as well as a current profile of active espionage within the U.S. and require major proactive efforts. Other countries may conduct intelligence activities in the U.S. but do not pose a threat to U.S. citizens or classified information. Here the Bureau's response is reactive.

The FBI has an obligation to respond to any allegations made to the Bureau of harassment or intimidation by a foreign intelligenc service of U.S. citizens or residents in this country. Overall, the FBI believes that foreign nations that may be interested in the activities of U.S. residents of the same national strain or who may attempt to influence such persons must temper these desires with the awareness that the Bureau monitors their activities carefully and is capable of acting to prevent such activities.

It is clear to me that the Bureau must take a proactive stance against some nations and a reactive one versus others who represent less of a threat. This sort of a posture naturally follows from the application of finite resources against the threat from a very large foreign presence in this country.

The Permanent Select Committee on Intelligence has devoted particular attention to this problem in the last four years and has consistently supported or added to FBI foreign counterintelligence personnel augmentations. I believe the Committee is im-

pressed by the Bureau's desire to cover any possible counterintelligence threat to our citizens and I have no information which would contradict their statements to the Committee that, with regard to so-called friendly nations whose intelligence services may be active in this country, the Bureau's efforts are adequately sized and funded in the context of overall FBI resources.

The Committee feels that its inquiry into this question with, as you have pointed out, the background of previous Congressional expressions of concern in this area, may help to reaffirm that the Bureau's efforts should continue to be directed in the future towards providing adequate resources to address this problem. The Committee will continue to review this issue from time to time and would appreciate any information which you can supply now or in the future which would assist in ensuring that the Bureau's efforts are well focused and appropriately sized in view of the nature of friendly intelligence activities in the United States.

I cannot assure you that incidents such as the Liu case will not occur in the future, but I do point out that the Bureau's reaction to the murder of Professor Liu has been swift and, I believe, effective. The Bureau believes that the Liu case is unusual in many respects and does not represent a pattern of harassment of Americans by the Taiwanese intelligence services.

Finally, I have suggested to the Bureau that the Committee would be sympathetic to any reallocaton of investigative effort it may feel is called for in light of any possible increased threat or enhanced appreciation of such a threat in this area.

With best wishes, I am,

Sincerely yours,

LEE H. HAMILTON,
Chairman.

Mr. LEACH of Iowa. Mr. Speaker, let me just comment briefly that I appreciate very much the leadership of the gentleman from New York [Mr. SOLARZ] and the rest of the committee, but particularly also the comments of the gentleman from California [Mr. MINETA] indicating that this is a civil liberties issue.

I think all of us have to understand that we cannot allow our system to be one in which civil liberties are considered fickle and in which there is less concern for descendants of an Asian or African state than there might be for those of a northern European one.

Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Speaker, I thank the gentleman for yielding. I may require an extension of that 1 minute.

Mr. Speaker, I appreciate the gentleman yielding. I would have had no difficulty at all at the outset of the pending resolution if the facts had yielded a situation in which no action at all was being taken by the Government from which these assassins came; that is, if we had been placed in a situation where a foreign government was granting sanctuary to its own citizens to prevent them from coming to justice, so speak, then I would have no difficulty with this, because the outrage would have been replicated much more than the outrage is being fomented in this resolution; but the fact of the matter is that the Government of Formosa, so far as I have been able to uncover, took action on its own to bring this to justice.

Mr. LANTOS. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. LEACH of Iowa. Mr. Speaker, I would be delighted to yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. GEKAS. I yield to the gentleman from California.

Mr. LANTOS. Mr. Speaker, I thank my friend for yielding.

The issue here is not an ordinary garden variety murder case. We understand that the people who pulled the trigger have been tried and have been convicted.

The fundamental issue is how high up in the hierarchy of the Taiwan Government did the orders come from that made these gangsters pull the trigger? That issue will not be resolved by a Taiwanese court. That issue will have to be resolved in a California court.

Mr. GEKAS. Mr. Speaker, I would regain my time simply to say that I feel a basic comfort in the fact that this very same government took the pains to bring those individuals to justice for whatever level of administration of justice is going to be undertaken on the Island of Formosa. That does not detract from the validity of this resolution, and I support the resolution.

I simply wish to place on record that many of us have reservation about a huge outcry on our part of a country that is taking measures to bring these individuals to justice and to comply with requests from our Government; not so with other governments also friendly to us who grant sanctuary to assassins and other criminals of similar ilk. That is the point that I wanted to bring up.

I thank the gentleman for yielding.

□ 1350

Mr. SOLARZ. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. MATSUI].

Mr. MATSUI. Mr. Speaker, three reputed gangsters have recently been sentenced for the slaying in Daly City, CA, of Asian American author Henry Liu. They were not sentenced in San Mateo County, CA, where the assassination took place. They were not sentenced in a court of the United States. Rather, the alleged murderers of Henry Liu, an American citizen shot to death on American soil, were sentenced in a court in Taipei, Taiwan.

I strongly encourage the Government of Taiwan to voluntarily return the perpetrators of this crime to the United States.

The fact that the United States and the government in Taiwan have no treaty of extradition serves only as a fence behind which suspicion will grow. It is in the mutual interest of the Government of Taiwan and the Government of the United States to remove this barrier. A trial in Taiwan, even one which is conducted in a fair and open manner, does not remove that suspicion. Only a trial in an American court of law can adequately remove any suspicion of a coverup on the part of the Taiwan authorities.

I strongly urge my colleagues to support House Concurrent Resolution 110 which will make known the sense of the Congress that Taiwan should continue to cooperate in the case of Henry Liu and to conclude an extradition agreement.

Mr. Speaker, I would like to congratulate the gentleman from New York [Mr. SOLARZ] and the gentleman from Iowa [Mr. LEACH], and certainly I would like to congratulate the gentleman from California [Mr. MINETA] in the sense that they have brought this issue to the public conscience of the American people.

I would just like to say one thing in the remaining 30 seconds I have. You know, this is not a situation where the crime occurred in Taiwan or some foreign country. The crime occurred in Daly City, CA. This was an American citizen, and I just have to believe that it was an outrageous situation.

We do not know how far it went but if it were a Greek American citizen who was killed in Pennsylvania, I think perhaps the gentleman who just spoke might have a different attitude about this and might say no, this person should not be tried in Greece; this person should be tried in the United States. And I think that is where the mistake is coming from.

This happened in this country. It was an American citizen.

Mr. GEKAS. Will the gentleman yield?

Mr. MATSUI. I will yield to the gentleman whatever time I have remaining.

Mr. GEKAS. I have never placed the rights of American citizens under any coloration of ethnic background or of any race. Of course I would react the same way.

The SPEAKER pro tempore. The time of the gentleman from California [Mr. MATSUI] has expired.

Mr. LEACH of Iowa. I yield the gentleman from Pennsylvania [Mr. GEKAS] 1 additional minute.

Mr. GEKAS. I think it is unseemly on the part of my comrade in arms here in the Congress to ascribe to me any kind of ethnic considerations here. There are none. We are not talking about that.

What we are talking about is, and the only comment I made was this is

totally a different situation from where a country normally many times grants sanctuary to its citizens rather than prosecuting them. Here the Government of Formosa, of Taiwan, did take, in comparison, some other extraordinary measures to bring the culprits to justice. That is the only comment I made. It has nothing to do with the ethnicity or the ethnic background of the victim.

Mr. SOLARZ. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from New York [Mr. SOLARZ] has 2 minutes remaining.

Mr. SOLARZ. Mr. Speaker, I yield one of my precious 2 remaining minutes to my very good friend, the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. I want to commend the gentleman from New York [Mr. SOLARZ] and my colleague from Iowa [Mr. LEACH] for this resolution. I think it is very important to do this for all Americans.

I had the privilege of representing the Liu in Congress for 2 years, and along with my colleague from California [Mr. LANTOS], I want to express my deepest sympathy to the Henry Liu family who have suffered an irreversible loss.

Why is what we do here today important to all Americans? First of all, we have to take a stand against terrorism in our own country. If we do nothing, there is a chilling effect on all our citizens who could be the victim of foreign terrorism, because they are exercising their rights of freedom of press, freedom of speech, rights that we treasure here in our Nation. So we must protect the rights of all Americans to be defended by our criminal justice system, the greatest criminal justice system in the world.

Mr. Liu deserves nothing less.

I yield back the balance of my time.

Mr. LEACH of Iowa. Mr. Speaker, I yield myself such time as I may consume.

I would just like to conclude with the observation made by the gentleman from Pennsylvania [Mr. GEKAS]. It is impressive that the Government of Taiwan has convicted and sentenced to life imprisonment two of the triggermen involved in this incident. It is also impressive that they have brought to trial a higher ranking authority, although that verdict is still out.

But I would stress from the perspective of the United States that the higher ranking authorities that have so far been implicated, or at least the highest ranking authority that has so far been implicated, is the equivalent of what might be considered the head of our Defense Intelligence Agency or the head of the CIA. So it is an extraordinarily high ranking authority of a foreign state.

Finally let me just stress that there are indications that two murders were ordered by high ranking authorities of Taiwan. One was a citizen of the State of California; one was possibly a citizen of the State of Iowa. And as a citizen of the United States, we have to ask why were their murders ordered? They were ordered because these citizens criticized a foreign government. That is an extraordinary motivation: criticism, one a literator, one a journalist. For our society to tolerate the kind of behavior implied in this act without a very strong sense of outrage being reflected in this Congress I think would be a mistake.

I yield back the balance of my time.

Mr. SOLARZ. Mr. Speaker, I yield myself the remaining time.

In conclusion I would just like to say that if this was an isolated incident it would have been bad enough. What makes matters worse is that it is part of a pattern.

Four years ago the authorities on Taiwan murdered a permanent resident in the United States, Chen Wen-Cheng, a professor at the Carnegie-Mellon Institute in Pittsburgh, on a return visit which he made to see his family in Taiwan. In the interim there have been persistent reports that the authorities on Taiwan are intimidating Taiwanese Americans in our country. The bullet which was aimed at the heart of Henry Liu was also aimed at the heart of the Constitution of the United States. It was designed not only to silence Mr. Liu, it was designed to silence other critics of the Government of Taiwan.

That is why we need to adopt this resolution, in order to make it clear to the authorities on Taiwan that the Congress simply will not tolerate these activities in the future.

Mr. Speaker, I yield back the balance of my time.

● Mrs. BURTON of California. Mr. Speaker, I urge the House to pass this important resolution, which calls on the Government of Taiwan to cooperate in the case of Henry Liu and the extradition of the men accused of his murder.

Passage of this bill by the House today will send a strong message to Taiwan that the United States will not tolerate foreign nationals assassinating Americans.

The involvement of Taiwanese Government officials in this cold-blooded crime makes it all the more outrageous. I am committed to continue to pressure the Taiwanese Government and to ensure that our own Justice Department actively pursues this case.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 110.

The question was taken.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EXPORT ADMINISTRATION ACT REAUTHORIZATION

Mr. BONKER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1786) to reauthorize the Export Administration Act of 1979, and for other purposes, as amended.

The Clerk read as follows:

H.R. 1786

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

Titles I and II of this Act may be cited as the "Export Administration Amendments Act of 1985".

TITLE I—AMENDMENTS TO EXPORT ADMINISTRATION ACT OF 1979

SEC. 101. REFERENCE TO THE ACT.

Except as otherwise expressly provided, whenever in this title an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the the Export Administration Act of 1979.

SEC. 102. FINDINGS.

Section 2 (50 U.S.C. App. 2401) is amended as follows:

(1) Paragraph (2) is amended by striking out "by strengthening the trade balance and the value of the United States dollar, thereby reducing inflation" and inserting in lieu thereof "by earning foreign exchange, thereby contributing favorably to the trade balance".

(2) Paragraph (3) is amended by striking out "which would strengthen the Nation's economy" and inserting in lieu thereof "consistent with the economic, security, and foreign policy objectives of the United States".

(3) Paragraph (6) is amended to read as follows:

"(6) Uncertainty of export control policy can inhibit the efforts of United States business and work to the detriment of the overall attempt to improve the trade balance of the United States.".

(4) Paragraph (9) is amended by striking out "achievement of a positive balance of payments" and inserting in lieu thereof "a positive contribution to the balance of payments".

(5) Section 2 is amended by adding at the end the following:

"(10) It is important that the administration of export controls imposed for foreign policy purposes give special emphasis to the need to control exports of goods and substances hazardous to the public health and the environment which are banned or severely restricted for use in the United States, and which, if exported, could affect the international reputation of the United States as a responsible trading partner.

"(11) The acquisition of national security sensitive goods and technology by the Soviet Union and other countries the actions or policies of which run counter to the national security interests of the United States, has led to the significant enhancement of Soviet bloc military-industrial capabilities. This enhancement poses a threat to the security of the United States, its allies, and other friendly nations, and places additional demands on the defense budget of the United States.

"(12) Availability to controlled countries of goods and technology from foreign sources is a fundamental concern of the United States and should be eliminated through negotiations and other appropriate means whenever possible.

"(13) Excessive dependence of the United States, its allies, or countries sharing common strategic objectives with the United States, on energy and other critical resources from potential adversaries can be harmful to the mutual and individual security of all those countries.".

SEC. 103. DECLARATION OF POLICY.

Section 3 (50 U.S.C. App. 2402) is amended as follows:

(1) Paragraph (3) is amended by inserting before the period at the end "or common strategic objectives".

(2) Paragraph (7) is amended—

(A) by striking out "every reasonable effort" in the second sentence and inserting in lieu thereof "reasonable and prompt efforts"; and

(B) by striking out "resorting to the imposition of controls on exports from the United States" in the second sentence and inserting in lieu thereof "imposing export controls".

(3) Paragraph (8) is amended—

(A) by striking out "every reasonable effort" in the second sentence and inserting in lieu thereof "reasonable and prompt efforts"; and

(B) by striking out "resorting to the imposition of export controls" in the second sentence and inserting in lieu thereof "imposing export controls".

(4) Paragraph (9) is amended—

(A) by inserting "or common strategic objectives" after "commitments" each place it appears; and

(B) by inserting before the period at the end the following: ", and to encourage other friendly countries to cooperate in restricting the sale of goods and technology that can harm the security of the United States".

(5) Section 3 is amended by adding at the end the following:

"(12) It is the policy of the United States to sustain vigorous scientific enterprise. To do so involves sustaining the ability of scientists and other scholars freely to communicate research findings, in accordance with applicable provisions of law, by means of publication, teaching, conferences, and other forms of scholarly exchange.

"(13) It is the policy of the United States to control the export of goods and substances banned or severely restricted for use in the United States in order to foster public health and safety and to prevent injury to the foreign policy of the United States as well as to the credibility of the United States as a responsible trading partner.

"(14) It is the policy of the United States to cooperate with countries which are allies of the United States and countries which share common strategic objectives with the United States in minimizing dependence on imports of energy and other critical resources from potential adversaries and in developing alternative supplies of such resources in order to minimize strategic threats posed by excessive hard currency earnings derived from such resource exports by countries with policies adverse to the security interests of the United States.

"(15) It is the policy of the United States, particularly in light of the Soviet massacre of innocent men, women, and children aboard Korean Air Lines flight 7, to continue to object to exceptions to the International Control List for the Union of Soviet Socialist Republics, subject to periodic review by the President.".

SEC. 104. GENERAL PROVISIONS.

(a) VALIDATED LICENSES AUTHORIZING MULTIPLE EXPORTS.—Section 4(a)(2) (50 U.S.C. App. 2403(a)(2)) is amended to read as follows:

"(2) Validated licenses authorizing multiple exports, issued pursuant to an application by the exporter, in lieu of an individual validated license for each such export, including, but not limited to, the following:

"(A) A distribution license, authorizing exports of goods to approved distributors or users of the goods in countries other than controlled countries. The Secretary shall grant the distribution license primarily on the basis of the reliability of the applicant and foreign consignees with respect to the prevention of diversion of goods to controlled countries. The Secretary shall have the responsibility of determining, with the assistance of all appropriate agencies, the reliability of applicants and their immediate consignees. The Secretary's determination shall be based on appropriate investigations of each applicant and periodic reviews of licensees and their compliance with the terms of licenses issued under this Act. Factors such as the applicant's products or volume of business, or the consignees' geographic location, sales distribution area, or degree of foreign ownership, which may be relevant with respect to individual cases, shall not be determinative in creating categories or general criteria for the denial of applications or withdrawal of a distribution license.

"(B) A comprehensive operations license, authorizing exports and reexports of technology and related goods, including items from the list of militarily critical technologies developed pursuant to section 5(d) of this Act which are included on the control list in accordance with that section, from a domestic concern to and among its foreign subsidiaries, affiliates, joint venturers, and licensees that have long-term, contractually defined relations with the exporter, are located in countries other than controlled countries, and are approved by the Secretary. The Secretary shall grant the license to manufacturing, laboratory, or related operations on the basis of approval of the exporter's systems of control, including internal proprietary controls, applicable to the technology and related goods to be exported rather than approval of individual export transactions. The Secretary and the Commissioner of Customs, consistent with their authorities under section 12(a) of this Act, and with the assistance of all appropriate agencies, shall periodically, but not less frequently than annually, perform audits of licensing procedures under this subparagraph in order to assure the integrity and effectiveness of those procedures.

"(C) A project license, authorizing exports of goods or technology for a specified activity.

"(D) A service supply license, authorizing exports of spare or replacement parts for goods previously exported.".

(b) CONTROL LIST.—Section 4(b) is amended—

(1) by striking out "Commodity" and "commodity"; and

(2) by striking out "consisting of any goods or technology subject to export controls under this Act" and inserting in lieu thereof "stating license requirements (other than for general licenses) for exports of goods and technology under this Act".

(c) FOREIGN AVAILABILITY.—Section 4(c) is amended—

(1) by striking out "significant" and inserting in lieu thereof "sufficient";

(2) by inserting after "those produced in the United States" the following: "so as to render the controls ineffective in achieving their purposes"; and

(3) by adding at the end the following: "In complying with the provisions of this subsection, the President shall give strong emphasis to bilateral or multilateral negotiations to eliminate foreign availability. The Secretary and the Secretary of Defense shall cooperate in gathering information relating to foreign availability, including the establishment and maintenance of a jointly operated computer system.".

(d) NOTIFICATION OF PUBLIC AND CONSULTATION WITH BUSINESS.—Section 4(f) is amended to read as follows:

"(f) NOTIFICATION OF THE PUBLIC; CONSULTATION WITH BUSINESS.—The Secretary shall keep the public fully apprised of changes in export control policy and procedures instituted in conformity with this Act with a view to encouraging trade. The Secretary shall meet regularly with representatives of a broad spectrum of enterprises, labor organizations, and citizens interested in or affected by export controls, in order to obtain their views on United States export control policy and the foreign availability of goods and technology.".

SEC. 105. NATIONAL SECURITY CONTROLS.

(a) AUTHORITY.—

(1) TRANSFERS TO EMBASSIES OF CONTROLLED COUNTRIES.—Section 5(a)(1) (50 U.S.C. App. 2404(a)(1)) is amended by inserting after the first sentence the following new sentence: "The authority contained in this subsection includes the authority to prohibit or curtail the transfer of goods or technology within the United States to embassies and affiliates of controlled countries.".

(2) CLERICAL AMENDMENT.—Section 5(a)(2) is amended—

(A) by striking out "(A)"; and

(B) by striking out subparagraph (B).

(3) SAFEGUARDS TO PREVENT DIVERSIONS.—Section 5(a)(3) is amended by striking out the last sentence.

(b) POLICY TOWARD INDIVIDUAL COUNTRIES.—

(1) CONTROLLED COUNTRIES.—Section 5(b) is amended by striking out the first sentence and inserting in lieu thereof the following: "(1) In administering export controls for national security purposes under this section, the President shall establish as a list of con-

trolled countries those countries set forth in section 620(f) of the Foreign Assistance Act of 1961, except that the President may add any country to or remove any country from such list of controlled countries if he determines that the export of goods or technology to such country would or would not (as the case may be) make a significant contribution to the military potential of such country or a combination of countries which would prove detrimental to the national security of the United States. In determining whether a country is added to or removed from the list of controlled countries, the President shall take into account—

"(A) the extent to which the country's policies are adverse to the national security interests of the United States;

"(B) the country's Communist or non-Communist status;

"(C) the present and potential relationship of the country with the United States;

"(D) the present and potential relationships of the country with countries friendly or hostile to the United States;

"(E) the country's nuclear weapons capability and the country's compliance record with respect to multilateral nuclear weapons agreements to which the United States is a party; and

"(F) such other factors as the President considers appropriate.

Nothing in the preceding sentence shall be interpreted to limit the authority of the President provided in this Act to prohibit or curtail the export of any goods or technology to any country to which exports are controlled for national security purposes other than countries on the list of controlled countries specified in this paragraph.".

(2) EXPORTS TO COCOM COUNTRIES.—Section 5(b) is amended by adding at the end the following:

"(2) No authority or permission to export may be required under this section before goods or technology are exported in the case of exports to a country which maintains export controls on such goods or technology cooperatively with the United States pursuant to the agreement of the group known as the Coordinating Committee, if the goods or technology is at such a level of performance characteristics that the export of the goods or technology to controlled countries requires only notification of the participating governments of the Coordinating Committee.".

(3) TECHNICAL AMENDMENT.—Section 5(b)(1), as amended by paragraph (1) of this subsection, is amended in the last sentence by striking out "specified in the preceding sentence" and inserting in lieu thereof "set forth in this paragraph".

(c) CONTROL LIST.—

(1) ANNUAL REVIEW.—Section 5(c) is amended—

(A) in paragraph (1) by striking out "commodity"; and

(B) by amending paragraph (3) to read as follows:

"(3) The Secretary shall review the list established pursuant to this subsection at least once each year in order to carry out the policy set forth in section 3(2)(A) of this Act and the provisions of this section, and shall promptly make such revisions of the list as may be necessary after each such review. Before beginning each annual review, the Secretary shall publish notice of that annual review in the Federal Register. The Secretary shall provide an opportunity during such review for comment and the submission of data, with or without oral presentation, by interested Government agencies and other affected or potentially affected parties. The Secretary shall publish in the Federal Register any revisions in the list, with an explanation of the reasons for the revisions. The Secretary shall further assess, as part of such review, the availability from sources outside the United States of goods and technology comparable to those subject to export controls imposed under this section.".

(2) EFFECTIVE DATE.—The amendment made by paragraph (1)(B) of this subsection shall take effect on October 1, 1985.

(d) EXPORT LICENSES.—Section 5(e) is amended—

(1) in paragraph (1) by striking out "a qualified general license in lieu of a validated license" and inserting in lieu thereof "the multiple validated export licenses described in section 4(a)(2) of this Act in lieu of individual validated licenses"; and

(2) by striking out paragraphs (3) and (4) and inserting in lieu thereof the following:

"(3) The Secretary, subject to the provisions of subsection (1) of this section, shall not require an individual validated export license for replacement parts which are exported to replace on a one-for-one basis parts that were in a good that has been lawfully exported from the United States.

"(4) The Secretary shall periodically review the procedures with respect to the multiple validated export licenses, taking appropriate action to increase their utilization by reducing qualification requirements or lowering minimum thresholds, to combine procedures which overlap, and to eliminate those procedures which appear to be of marginal utility.

"(5) The export of goods subject to export controls under this section shall be eligible, at the discretion of the Secretary, for a distribution license and other licenses authorizing multiple exports of goods, in accordance with section 4(a)(2) of this Act. The export of technology and related goods subject to export controls under this section shall be eligible for a comprehensive operations license in accordance with section 4(a)(2)(B) of this Act.".

(e) INDEXING.—Section 5(g) is amended to read as follows:

"(g) INDEXING.—In order to ensure that requirements for validated licenses and other licenses authorizing multiple exports are periodically removed as goods or technology subject to such requirements becomes obsolete with respect to the national security of the United States, regulations issued by the Secretary may, where appropriate, provide for annual increases in the performance levels of goods or technology subject to any such licensing requirement. The regulations issued by the Secretary shall establish as one criterion for the removal of goods or technology from such license requirements the anticipated needs of the military of controlled countries. Any such goods or technology which no longer meets the performance levels established by the regulations shall be removed from the list established pursuant to subsection (c) of this section unless, under such exceptions and under such procedures as the Secretary shall prescribe, any other department or agency of the United States objects to such removal and the Secretary determines, on the basis of such objection, that the goods or technology shall not be removed from the list. The Secretary shall also consider, where appropriate, removing site visitation requirements for goods and technology which are removed from the list unless objections described in this subsection are raised.".

(f) MULTILATERAL EXPORT CONTROLS.—Section 5(i) is amended—

(1) by striking out paragraph (3);

(2) in paragraph (4)—

(A) by striking out "(4)" and inserting in lieu thereof "(3)"; and

(B) by striking out "pursuant to paragraph (3)" and inserting in lieu thereof "by the members of the Committee"; and

(3) by adding at the end the following:

"(4) Agreement to enhance full compliance by all parties with the export controls imposed by agreement of the Committee through the establishment of appropriate mechanisms.

"(5) Agreement to improve the International Control List and minimize the approval of exceptions to that list, strengthen enforcement and cooperation in enforcement efforts, provide sufficient funding for the Committee, and improve the structure and function of the Secretariat of the Committee by upgrading professional staff, translation services, data base maintenance, communications, and facilities.

"(6) Agreement to coordinate the systems of export control documents used by the participating governments in order to verify effectively the movement of goods or technology subject to controls by the Committee from the country of any such government to any other place.

"(7) Agreement to establish uniform, adequate criminal and civil penalties to deter more effectively diversions of items controlled for export by agreement of the Committee.

"(8) Agreement to increase on-site inspections by national enforcement authorities of the participating governments to ensure that end users who have imported items controlled for export by agreement of the Committee are using such items for the stated end uses, and that such items are, in fact, under the control of those end users.

"(9) Agreement to strengthen the Committee so that it functions effectively in controlling export trade in a manner that better protects the national security of each participant to the mutual benefit of all participants.".

(g) COMMERCIAL AGREEMENTS WITH CERTAIN COUNTRIES.—Section 5(j) is amended to read as follows:

"(j) COMMERCIAL AGREEMENTS WITH CERTAIN COUNTRIES.—(1) Any United States firm, enterprise, or other nongovernmental entity which enters into an agreement with any agency of the government of a controlled country, that calls for the encouragement of technical cooperation and that is intended to result in the export from the United States to the other party of unpublished technical data of United States origin, shall report to the Secretary the agreement with such agency in sufficient detail.

"(2) The provisions of paragraph (1) shall not apply to colleges, universities, or other educational institutions.".

(h) NEGOTIATIONS WITH OTHER COUNTRIES.—Section 5(k) is amended—

(1) by inserting after "conducting negotiations with other countries" the following: ", including those countries not participating in the group known as the Coordinating Committee,"; and

(2) by adding at the end the following: "In cases where such negotiations produce agreements on export restrictions comparable in practice to those maintained by the Coordinating Committee, the Secretary shall treat exports, whether by individual or multiple licenses, to countries party to such

agreements in the same manner as exports to members of the Coordinating Committee are treated, including the same manner as exports are treated under subsection (b)(2) of this section and section 10(o) of this Act.".

(i) DIVERSION OF CONTROLLED GOODS OR TECHNOLOGY.—Section 5(l) is amended to read as follows:

"(l) DIVERSION OF CONTROLLED GOODS OR TECHNOLOGY.—(1) Whenever there is reliable evidence, as determined by the Secretary, that goods or technology which were exported subject to national security controls under this section to a controlled country have been diverted to an unauthorized use or consignee in violation of the conditions of an export license, the Secretary for as long as that diversion continues—

"(A) shall deny all further exports, to or by the party or parties responsible for that diversion or who conspired in that diversion, of any goods or technology subject to national security controls under this section, regardless of whether such goods or technology are available from sources outside the United States; and

"(B) may take such additional actions under this Act with respect to the party or parties referred to in subparagraph (A) as the Secretary determines are appropriate in the circumstances to deter the further unauthorized use of the previously exported goods or technology.

"(2) As used in this subsection, the term 'unauthorized use' means the use of United States goods or technology in the design, production, or maintenance of any item on the United States Munitions List, or the military use of any item on the International Control List of the Coordinating Committee.".

(j) ADDITIONAL NATIONAL SECURITY PROVISIONS.—Section 5 is amended by adding at the end the following new subsections:

"(m) GOODS CONTAINING MICROPROCESSORS.—Export controls may not be imposed under this section on a good solely on the basis that the good contains an embedded microprocessor, if such microprocessor cannot be used or altered to perform functions other than those it performs in the good in which it is embedded. An export control may be imposed under this section on a good containing an embedded microprocessor referred to in the preceding sentence only on the basis that the functions of the good itself are such that the good, if exported, would make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States.

"(n) SECURITY MEASURES.—The Secretary and the Commissioner of Customs, consistent with their authorities under section 12(a) of this Act, and in consultation with the Director of the Federal Bureau of Investigation, shall provide advice and technical assistance to persons engaged in the manufacture or handling of goods or technology subject to export controls under this section to develop security systems to prevent violations or evasions of those export controls.

"(o) RECORDKEEPING.—The Secretary, the Secretary of Defense, and any other department or agency consulted in connection with a license application under this Act or a revision of a list of goods or technology subject to export controls under this Act, shall make and keep records of their respective advice, recommendations, or decisions in connection with any such license application or revision, including the factual and analytical basis of the advice, recommendations, or decisions.

"(p) NATIONAL SECURITY CONTROL OFFICE.—To assist in carrying out the policy and other authorities and responsibilities of the Secretary of Defense under this section, there is established in the Department of Defense a National Security Control Office under the direction of the Under Secretary of Defense for Policy. The Secretary of Defense may delegate to that office such of those authorities and responsibilities, together with such ancillary functions, as the Secretary of Defense considers appropriate.

"(q) EXCLUSION FOR AGRICULTURAL COMMODITIES.—This section does not authorize export controls on agricultural commodities, including fats, oils, and animal hides and skins.".

SEC. 106. MILITARILY CRITICAL TECHNOLOGIES.

(a) Section 5(d) (50 U.S.C. App. 2404(d)) is amended—

(1) in paragraph (2)—

(A) in subparagraph (B) by striking out "and" after "test equipment,";

(B) by adding "and" at the end of subparagraph (C);

(C) by inserting after subparagraph (C) the following:

"(D) keystone equipment which would reveal or give insight into the design and manufacture of a United States military system,"; and

(D) by striking out "countries to which exports are controlled under this section" and inserting in lieu thereof the following: ", or available in fact from sources outside the United States to, controlled countries"; and

(2) by striking out paragraphs (4) through (6) and inserting in lieu thereof the following:

"(4) The Secretary and the Secretary of Defense shall integrate items on the list of militarily critical technologies into the control list in accordance with the requirements of subsection (c) of this section. The integration of items on the list of militarily critical technologies into the control list shall proceed with all deliberate speed. Any disagreement between the Secretary and the Secretary of Defense regarding the integration of an item on the list of militarily critical technologies into the control list shall be resolved by the President. Except in the case of a good or technology for which a validated license may be required under subsection (f)(4) or (h)(6) of this section, a good or technology shall be included on the control list only if the Secretary finds that controlled countries do not possess that good or technology, or a functionally equivalent good or technology, and the good or technology or functionally equivalent good or technology is not available in fact to a controlled country from sources outside the United States in sufficient quantity and of comparable quality so that the requirement of a validated license for the export of such good or technology is or would be ineffective in achieving the purpose set forth in subsection (a) of this section. The Secretary and the Secretary of Defense shall jointly submit a report to the Congress, not later than 1 year after the date of the enactment of the Export Administration Amendments Act of 1985, on actions taken to carry out this paragraph. For the purposes of this paragraph, assessment of whether a good or technology is functionally equivalent shall include consideration of the factors described in subsection (f)(3) of this section.

"(5) The Secretary of Defense shall establish a procedure for reviewing the goods and technology on the list of militarily critical technologies at least annually for the purpose of removing from the list of militarily critical technologies any goods or technology that are no longer militarily critical. The Secretary of Defense may add to the list of militarily critical technologies any good or technology that the Secretary of Defense determines is militarily critical, consistent with the provisions of paragraph (2) of this subsection. If the Secretary and the Secretary of Defense disagree as to whether any change in the list of militarily critical technologies by the addition or removal of a good or technology should also be made in the control list, consistent with the provisions of the fourth sentence of paragraph (4) of this subsection, the President shall resolve the disagreement.

"(6) The establishment of adequate export controls for militarily critical technology and keystone equipment shall be accompanied by suitable reductions in the controls on the products of that technology and equipment.

"(7) The Secretary of Defense shall, not later than 1 year after the date of the enactment of the Export Administration Amendments Act of 1985, report to the Congress on efforts by the Department of Defense to assess the impact that the transfer of goods or technology on the list of militarily critical technologies to controlled countries has had or will have on the military capabilities of those countries.".

SEC. 107. FOREIGN AVAILABILITY.

(a) CONSULTATIONS ON FOREIGN AVAILABILITY.—Section 5(f)(1) (50 U.S.C. App. 2404(f)(1)) is amended by inserting after "The Secretary, in consultation with" the following: "the Secretary of Defense and other".

(b) DETERMINATIONS OF FOREIGN AVAILABILITY.—Section 5(f)(3) is amended to read as follows:

"(3) The Secretary shall make a foreign availability determination under paragraph (1) or (2) on the Secretary's own initiative or upon receipt of an allegation from an export license applicant that such availability exists. In making any such determination, the Secretary shall accept the representations of applicants made in writing and supported by reasonable evidence, unless such representations are contradicted by reliable evidence, including scientific or physical examination, expert opinion based upon adequate factual information, or intelligence information. In making determinations of foreign availability, the Secretary may consider such factors as cost, reliability, the availability and reliability of spare parts and the cost and quality thereof, maintenance programs, durability, quality of end products produced by the item proposed for export, and scale of production. For purposes of this paragraph, 'evidence' may include such items as foreign manufacturers' catalogues, brochures, or operation or maintenance manuals, articles from reputable trade publications, photographs, and depositions based upon eyewitness accounts.".

(c) NEGOTIATIONS ON FOREIGN AVAILABILITY.—Section 5(f)(4) is amended by striking out the first sentence and inserting in lieu thereof the following: "In any case in which export controls are maintained under this section notwithstanding foreign availability, on account of a determination by the President that the absence of the controls would prove detrimental to the national security of the United States, the President shall actively pursue negotiations with the govern-

ments of the appropriate foreign countries for the purpose of eliminating such availability. If, within 6 months after the President's determination, the foreign availability has not been eliminated, the Secretary may not, after the end of that 6-month period, require a validated license for the export of the goods or technology involved. The President may extend the 6-month period described in the preceding sentence for an additional period of 12 months if the President certifies to the Congress that the negotiations involved are progressing and that the absence of the export control involved would prove detrimental to the national security of the United States.".

(d) OFFICE OF FOREIGN AVAILABILITY.—

(1) ESTABLISHMENT.—Section 5(f)(5) is amended to read as follows:

"(5) The Secretary shall establish in the Department of Commerce an Office of Foreign Availability which, in the fiscal year 1985, shall be under the direction of the Assistant Secretary of Commerce for Trade Administration, and, in the fiscal year 1986 and thereafter, shall be under the direction of the Under Secretary of Commerce for Export Administration. The Office shall be responsible for gathering and analyzing all the necessary information in order for the Secretary to make determinations of foreign availability under this Act. The Secretary shall make available to the Committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate at the end of each 6-month period during a fiscal year information on the operations of the Office, and on improvements in the Government's ability to assess foreign availability, during that 6-month period, including information on the training of personnel, the use of computers, and the use of Foreign Commercial Service officers. Such information shall also include a description of representative determinations made under this Act during that 6-month period that foreign availability did or did not exist (as the case may be), together with an explanation of such determinations.".

(2) CLERICAL AMENDMENT.—Section 5(f)(6) is amended by striking out "Office of Export Administration" and inserting in lieu thereof "Office of Foreign Availability".

(e) REGULATIONS ON FOREIGN AVAILABILITY.—Section 5(f) is amended by adding at the end the following new paragraph:

"(7) The Secretary shall issue regulations with respect to determinations of foreign availability under this Act not later than 6 months after the date of the enactment of the Export Administration Amendments Act of 1985.".

(f) TECHNICAL ADVISORY COMMITTEES.—

(1) MEMBERSHIP.—Section 5(h)(1) is amended by inserting ", the intelligence community," after "Departments of Commerce, Defense, and State".

(2) MATTERS ON WHICH COMMITTEES CONSULTED.—Section 5(h)(2) is amended in the second sentence—

(A) by striking out "and" at the end of clause (C); and

(B) by inserting before the period at the end of the second sentence the following: ", and (E) any other questions relating to actions designed to carry out the policy set forth in section 3(2)(A) of this Act.".

(3) FOREIGN AVAILABILITY CERTIFICATIONS.—Section 5(h)(6) is amended by striking out "and provides adequate documentation" and all that follows through the end of the paragraph and inserting in lieu thereof the following: "the technical advisory committee shall submit that certification to the Congress at the same time the certification is made to the Secretary, together with the documentation for the certification. The Secretary shall investigate the foreign availability so certified and, not later than 90 days after the certification is made, shall submit a report to the technical advisory committee and the Congress stating that—

"(A) the Secretary has removed the requirement of a validated license for the export of the goods or technology, on account of the foreign availability,

"(B) the Secretary has recommended to the President that negotiations be conducted to eliminate the foreign availability, or

"(C) the Secretary has determined on the basis of the investigation that the foreign availability does not exist.

To the extent necessary, the report may be submitted on a classified basis. In any case in which the Secretary has recommended to the President that negotiations be conducted to eliminate the foreign availability, the President shall actively pursue such negotiations with the governments of the appropriate foreign countries. If, within 6 months after the Secretary submits such report to the Congress, the foreign availability has not been eliminated, the Secretary may not, after the end of that 6-month period, require a validated license for the export of the goods or technology involved. The President may extend the 6-month period described in the preceding sentence for an additional period of 12 months if the President certifies to the Congress that the negotiations involved are progressing and that the absence of the export control involved would prove detrimental to the national security of the United States.".

(i) STANDARD FOR FOREIGN AVAILABILITY.—Subsections (f)(1), (f)(2), and (h)(6) of section 5 are each amended by striking out "sufficient quality" and inserting in lieu thereof "comparable quality".

(j) TECHNICAL AMENDMENTS.—Subsections (f)(1), (f)(4), and (h)(6) of section 5 are each amended by striking out "countries to which exports are controlled under this section" and inserting in lieu thereof "controlled countries".

SEC. 108. FOREIGN POLICY CONTROLS.

(a) AUTHORITY.—Section 6(a) (50 U.S.C. App. 2405(a)) is amended—

(1) in paragraph (1)—

(A) by striking out "or (8)" and inserting in lieu thereof "(8), or (13)"; and

(B) by inserting in the second sentence after "Secretary of State" the following: ", the Secretary of Defense, the Secretary of Agriculture, the Secretary of the Treasury, the United States Trade Representative,";

(2) by redesignating paragraphs (2) through (4) as paragraphs (3) through (5), respectively;

(3) by inserting after paragraph (1) the following new paragraph:

"(2) Any export control imposed under this section shall apply to any transaction or activity undertaken with the intent to evade that export control, even if that export control would not otherwise apply to that transaction or activity."; and

(4) in paragraph (3), as redesignated by paragraph (2) of this subsection, by striking out "(e)" and inserting in lieu thereof "(f)".

(b) CRITERIA.—Section 6(b) is amended to read as follows:

"(b) CRITERIA.—(1) Subject to paragraph (2) of this subsection, the President may impose, extend, or expand export controls under this section only if the President determines that—

"(A) such controls are likely to achieve the intended foreign policy purpose, in light of other factors, including the availability from other countries of the goods or technology proposed for such controls, and that foreign policy purpose cannot be achieved through negotiations or other alternative means;

"(B) the proposed controls are compatible with the foreign policy objectives of the United States and with overall United States policy toward the country to which exports are to be subject to the proposed controls;

"(C) the reaction of other countries to the imposition, extension, or expansion of such export controls by the United States is not likely to render the controls ineffective in achieving the intended foreign policy purpose or to be counterproductive to United States foreign policy interests;

"(D) the effect of the proposed controls on the export performance of the United States, the competitive position of the United States in the international economy, the international reputation of the United States as a supplier of goods and technology, or on the economic well-being of individual United States companies and their employees and communities does not exceed the benefit to United States foreign policy objectives; and

"(E) the United States has the ability to enforce the proposed controls effectively.

"(2) With respect to those export controls in effect under this section on the date of the enactment of the Export Administration Amendments Act of 1985, the President, in determining whether to extend those controls, as required by subsection (a)(3) of this section, shall consider the criteria set forth in paragraph (1) of this subsection and shall consider the foreign policy consequences of modifying the export controls.".

(c) CONSULTATION WITH INDUSTRY.—Section 6(c) is amended to read as follows:

"(c) CONSULTATION WITH INDUSTRY.—The Secretary in every possible instance shall consult with and seek advice from affected United States industries and appropriate advisory committees established under section 135 of the Trade Act of 1974 before imposing any export control under this section. Such consultation and advice shall be with respect to the criteria set forth in subsection (b)(1) and such other matters as the Secretary considers appropriate.".

(d) CONSULTATION WITH OTHER COUNTRIES.—Section 6 is amended—

(1) by redesignating subsections (d) through (k) as subsections (e) through (l), respectively; and

(2) by inserting after subsection (c) the following new subsection:

"(d) CONSULTATION WITH OTHER COUNTRIES.—When imposing export controls under this section, the President shall, at the earliest appropriate opportunity, consult with the countries with which the United States maintains export controls cooperatively, and with such other countries as the President considers appropriate, with respect to the criteria set forth in subsection (b)(1) and such other matters as the President considers appropriate.".

(e) CONSULTATION WITH THE CONGRESS.—Section 6(f), as redesignated by subsection (d) of this section, is amended to read as follows:

"(f) CONSULTATION WITH THE CONGRESS.—(1) The President may impose or expand

export controls under this section, or extend such controls as required by subsection (a)(3) of this section, only after consultation with the Congress, including the Committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate.

"(2) The President may not impose, expand, or extend export controls under this section until the President has submitted to the Congress a report—

"(A) specifying the purpose of the controls;

"(B) specifying the determinations of the President (or, in the case of those export controls described in subsection (b)(2), the considerations of the President) with respect to each of the criteria set forth in subsection (b)(1), the bases for such determinations (or considerations), and any possible adverse foreign policy consequences of the controls;

"(C) describing the nature, the subjects, and the results of, or the plans for, the consultation with industry pursuant to subsection (c) and with other countries pursuant to subsection (d);

"(D) specifying the nature and results of any alternative means attempted under subsection (e), or the reasons for imposing, expanding, or extending the controls without attempting any such alternative means; and

"(E) describing the availability from other countries of goods or technology comparable to the goods or technology subject to the proposed export controls, and describing the nature and results of the efforts made pursuant to subsection (h) to secure the cooperation of foreign governments in controlling the foreign availability of such comparable goods or technology.

Such report shall also indicate how such controls will further significantly the foreign policy of the United States or will further its declared international obligations.

"(3) To the extent necessary to further the effectiveness of the export controls, portions of a report required by paragraph (2) may be submitted to the Congress on a classified basis, and shall be subject to the provisions of section 12(c) of this Act. Each such report shall, at the same time it is submitted to the Congress, also be submitted to the General Accounting Office for the purpose of assessing the report's full compliance with the intent of this subsection.

"(4) In the case of export controls under this section which prohibit or curtail the export of any agricultural commodity, a report submitted pursuant to paragraph (2) shall be deemed to be the report required by section 7(g)(3)(A) of this Act.

"(5) In addition to any written report required under this section, the Secretary, not less frequently than annually, shall present in oral testimony before the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Foreign Affairs of the House of Representatives a report on policies and actions taken by the Government to carry out the provisions of this section.".

(f) EXCLUSION OF CERTAIN ITEMS FROM FOREIGN POLICY CONTROLS.—Section 6(g), as redesignated by subsection (d) of this section, is amended—

(1) by inserting after the first sentence the following: "This section also does not authorize export controls on donations of goods (including, but not limited to, food, educational materials, seeds and hand tools, medicines and medical supplies, water resources equipment, clothing and shelter materials, and basic household supplies) that are intended to meet basic human needs."; and

(2) by striking out the last sentence and inserting in lieu thereof the following: "This subsection shall not apply to any export control on medicine, medical supplies, or food, except for donations, which is in effect on the date of the enactment of the Export Administration Amendments Act of 1985. Notwithstanding the preceding provisions of this subsection, the President may impose export controls under this section on medicine, medical supplies, food, and donations of goods in order to carry out the policy set forth in paragraph (13) of section 3 of this Act.".

(g) FOREIGN AVAILABILITY.—

(1) IN GENERAL.—Section 6(h), as redesignated by subsection (d) of this section, is amended—

(A) by inserting "(1)" immediately before the first sentence; and

(B) by adding at the end the following:

"(2) Before extending any export control pursuant to subsection (a)(3) of this section, the President shall evaluate the results of his actions under paragraph (1) of this subsection and shall include the results of that evaluation in his report to the Congress pursuant to subsection (f) of this section.

"(3) If, within 6 months after the date on which export controls under this section are imposed or expanded, or within 6 months after the date of the enactment of the Export Administration Amendments Act of 1985 in the case of export controls in effect on such date of enactment, the President's efforts under paragraph (1) are not successful in securing the cooperation of foreign governments described in paragraph (1) with respect to those export controls, the Secretary shall thereafter take into account the foreign availability of the goods or technology subject to the export controls. If the Secretary affirmatively determines that a good or technology subject to the export controls is available in sufficient quantity and comparable quality from sources outside the United States to countries subject to the export controls so that denial of an export license would be ineffective in achieving the purposes of the controls, then the Secretary shall, during the period of such foreign availability, approve any license application which is required for the export of the good or technology and which meets all requirements for such a license. The Secretary shall remove the good or technology from the list established pursuant to subsection (l) of this section if the Secretary determines that such action is appropriate.

"(4) In making a determination of foreign availability under paragraph (3) of this subsection, the Secretary shall follow the procedures set forth in section 5(f)(3) of this Act.".

(2) AMENDMENTS NOT APPLICABLE TO CERTAIN EXISTING CONTROLS.—The amendments made by paragraph (1) of this subsection shall not apply to export controls in effect under subsection (i), (j), or (k) of section 6 of the Export Administration Act of 1979 (as redesignated by subsection (d) of this section) immediately before the date of the enactment of this Act, or to export controls made effective by subsection (i)(2) of this section or by section 6(n) of the Export Administration Act of 1979 (as added by subsection (l)(1) of this section).

(h) INTERNATIONAL OBLIGATIONS.—Section 6(i), as redesignated by subsection (d) of this section, is amended by striking out "(f), and (g)" and inserting in lieu thereof "(e), (g), and (h)".

(i) COUNTRIES SUPPORTING INTERNATIONAL TERRORISM.—

(1) IN GENERAL.—Section 6(j), as redesignated by subsection (d) of this section, is amended to read as follows:

"(j) COUNTRIES SUPPORTING INTERNATIONAL TERRORISM.—(1) The Secretary and the Secretary of State shall notify the Committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate at least 30 days before any license is approved for the export of goods or technology valued at more than $7,000,000 to any country concerning which the Secretary of State has made the following determinations:

"(A) Such country has repeatedly provided support for acts of international terrorism.

"(B) Such exports would make a significant contribution to the military potential of such country, including its military logistics capability, or would enhance the ability of such country to support acts of international terrorism.

"(2) Any determination which has been made with respect to a country under paragraph (1) of this subsection may not be rescinded unless the President, at least 30 days before the proposed rescission would take effect, submits to the Congress a report justifying the rescission and certifying that—

"(A) the country concerned has not provided support for international terrorism, including support or sanctuary for any major terrorist or terrorist group in its territory, during the preceding 6-month period; and

"(B) the country concerned has provided assurances that it will not support acts of international terrorism in the future.".

(2) APPLICABILITY TO PRIOR DETERMINATIONS.—Any determination with respect to any country which was made before January 1, 1982, under section 6(i) of the Export Administration Act of 1979, as in effect before the date of the enactment of this Act, and which was no longer in effect on the date of the enactment of this Act, shall be reinstated upon the expiration of 90 days after such date of enactment unless, within that 90-day period, the President submits a report under section 6(j)(2) of the Export Administration Act of 1979, as amended by subsection (d) of this section and paragraph (1) of this subsection, containing the certification described in such section 6(j)(2) with respect to that country.

(j) CRIME CONTROL INSTRUMENTS.—

(1) CONCURRENCE OF SECRETARY OF STATE.—Section 6(k)(1), as redesignated by subsection (d) of this section, is amended by adding at the end the following new sentence: "Notwithstanding any other provision of this Act—

"(A) any determination of the Secretary of what goods or technology shall be included on the list established pursuant to subsection (l) of this section as a result of the export restrictions imposed by this subsection shall be made with the concurrence of the Secretary of State, and

"(B) any determination of the Secretary to approve or deny an export license application to export crime control or detection instruments or equipment shall be made in concurrence with the recommendations of the Secretary of State submitted to the Secretary with respect to the application pursuant to section 10(e) of this Act,

except that, if the Secretary does not agree with the Secretary of State with respect to any determination under subparagraph (A) or (B), the matter shall be referred to the President for resolution.".

(2) APPLICABILITY OF AMENDMENT.—The amendment made by paragraph (1) of this subsection shall apply to determinations of the Secretary of Commerce which are made on or after the date of the enactment of this Act.

(k) CONTROL LIST.—Section 6(l), as redesignated by subsection (d) of this section, is amended—

(1) in the first sentence by striking out "commodity"; and

(2) by amending the second sentence to read as follows: "The Secretary shall clearly identify on the control list which goods or technology, and which countries or destinations, are subject to which types of controls under this section.".

(l) ADDITIONAL PROVISIONS ON FOREIGN POLICY CONTROLS.—

(1) CONTRACT SANCTITY, EXTENSION OF CERTAIN CONTROLS, AND EXPANDED AUTHORITY.—Section 6 is amended by adding at the end the following:

"(m) EFFECT ON EXISTING CONTRACTS AND LICENSES.—The President may not, under this section, prohibit or curtail the export or reexport of goods, technology, or other information—

"(1) in performance of a contract or agreement entered into before the date on which the President reports to the Congress, pursuant to subsection (f) of this section, his intention to impose controls on the export or reexport of such goods, technology, or other information, or

"(2) under a validated license or other authorization issued under this Act,

unless and until the President determines and certifies to the Congress that—

"(A) a breach of the peace poses a serious and direct threat to the strategic interest of the United States,

"(B) the prohibition or curtailment of such contracts, agreements, licenses, or authorizations will be instrumental in remedying the situation posing the direct threat, and

"(C) the export controls will continue only so long as the direct threat persists.

"(n) EXTENSION OF CERTAIN CONTROLS.—Those export controls imposed under this section with respect to South Africa which were in effect on February 28, 1982, and ceased to be effective on March 1, 1982, September 15, 1982, or January 20, 1983, shall become effective on the date of the enactment of this subsection, and shall remain in effect until 1 year after such date of enactment. At the end of that 1-year period, any of those controls made effective by this subsection may be extended by the President in accordance with subsections (b) and (f) of this section.

"(o) EXPANDED AUTHORITY TO IMPOSE CONTROLS.—(1) In any case in which the President determines that it is necessary to impose controls under this section without any limitation contained in subsection (c), (d), (e), (g), (h), or (m) of this section, the President may impose those controls only if the President submits that determination to the Congress, together with a report pursuant to subsection (f) of this section with respect to the proposed controls, and only if a law is enacted authorizing the imposition of those controls. If a joint resolution authorizing the imposition of those controls is introduced in either House of Congress within 30 days after the Congress receives the determination and report of the President, that joint resolution shall be referred to the Committee on Banking, Housing, and Urban Affairs of the Senate and to the appropriate committee of the House of Representatives. If either such committee has not reported the joint resolution at the end of 30 days after its referral, the committee shall be discharged from further consideration of the joint resolution.

"(2) For purposes of this subsection, the term 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the Congress, having received on a determination of the President under section 6(o)(1) of the Export Administration Act of 1979 with respect to the export controls which are set forth in the report submitted to the Congress with that determination, authorizes the President to impose those export controls.', with the date of the receipt of the determination and report inserted in the blank.

"(3) In the computation of the periods of 30 days referred to in paragraph (1), there shall be excluded the days on which either House of Congress is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.".

(2) APPLICABILITY OF AMENDMENTS.—Subsections (m) and (o) of section 6 of the Export Administration Act of 1979, as added by paragraph (1) of this subsection, shall not apply to export controls in effect immediately before the date of the enactment of this Act, or to export controls made effective by subsection (i)(2) of this section or by section 6(n) of the Export Administration Act of 1979 (as added by paragraph (1) of this subsection).

SEC. 109. PETITIONS FOR MONITORING OR SHORT SUPPLY CONTROLS.

Section 7(c) (50 U.S.C. App. 2406(c)) is amended to read as follows:

"(c) PETITIONS FOR MONITORING OR CONTROLS.—(1)(A) Any entity, including a trade association, firm, or certified or recognized union or group of workers, that is representative of an industry or a substantial segment of an industry that processes metallic materials capable of being recycled may transmit a written petition to the Secretary requesting the monitoring of exports or the imposition of export controls, or both, with respect to any such material, in order to carry out the policy set forth in section 3(2)(C) of this Act.

"(B) Each petition shall be in such form as the Secretary shall prescribe and shall contain information in support of the action requested. The petition shall include any information reasonably available to the petitioner indicating that each of the criteria set forth in paragraph (3)(A) of this subsection is satisfied.

"(2) Within 15 days after receipt of any petition described in paragraph (1), the Secretary shall publish a notice in the Federal Register. The notice shall—

"(A) include the name of the material that is the subject of the petition,

"(B) include the Schedule B number of the material as set forth in the Statistical Classification of Domestic and Foreign Commodities Exported from the United States,

"(C) indicate whether the petitioner is requesting that controls or monitoring, or both, be imposed with respect to the exportation of such material, and

"(D) provide that interested persons shall have a period of 30 days beginning on the date of publication of such notice to submit to the Secretary written data, views or arguments, with or without opportunity for oral presentation, with respect to the matter involved.

At the request of the petitioner or any other entity described in paragraph (1)(A) with respect to the material that is the subject of the petition, or at the request of any entity representative of producers or exporters of such material, the Secretary shall conduct public hearings with respect to the subject of the petition, in which case the 30-day period may be extended to 45 days.

"(3)(A) Within 45 days after the end of the 30- or 45-day period described in paragraph (2), as the case may be, the Secretary shall determine whether to impose monitoring or controls, or both, on the export of the material that is the subject of the petition, in order to carry out the policy set forth in section 3(2)(C) of this Act. In making such determination, the Secretary shall determine whether—

"(i) there has been a significant increase, in relation to a specific period of time, in exports of such material in relation to domestic supply and demand;

"(ii) there has been a significant increase in the domestic price of such material or a domestic shortage of such material relative to demand;

"(iii) exports of such material are as important as any other cause of a domestic price increase or shortage relative to demand found under clause (ii);

"(iv) a domestic price increase or shortage relative to demand found under clause (ii) has significantly adversely affected or may significantly adversely affect the national economy or any sector thereof, including a domestic industry; and

"(v) monitoring or controls, or both, are necessary in order to carry out the policy set forth in section 3(2)(C) of this Act.

"(B) The Secretary shall publish in the Federal Register a detailed statement of the reasons for the Secretary's determination pursuant to subparagraph (A) of whether to impose monitoring or controls, or both, including the findings of fact in support of that determination.

"(4) Within 15 days after making a determination under paragraph (3) to impose monitoring or controls on the export of a material, the Secretary shall publish in the Federal Register proposed regulations with respect to such monitoring or controls. Within 30 days after the publication of such proposed regulations, and after considering any public comments on the proposed regulations, the Secretary shall publish and implement final regulations with respect to such monitoring or controls.

"(5) For purposes of publishing notices in the Federal Register and scheduling public hearings pursuant to this subsection, the Secretary may consolidate petitions, and responses to such petitions, which involve the same or related materials.

"(6) If a petition with respect to a particular material or group of materials has been considered in accordance with all the procedures prescribed in this subsection, the Secretary may determine, in the absence of significantly changed circumstances, that any other petition with respect to the same material or group of materials which is filed within 6 months after the consideration of the prior petition has been completed does not merit complete consideration under this subsection.

"(7) The procedures and time limits set forth in this subsection with respect to a pe-

tition filed under this subsection shall take precedence over any review undertaken at the initiative of the Secretary with respect to the same subject as that of the petition.

"(8) The Secretary may impose monitoring or controls, on a temporary basis, on the export of a metallic material after a petition is filed under paragraph (1)(A) with respect to that material but before the Secretary makes a determination under paragraph (3) with respect to that material only if—

"(A) the failure to take such temporary action would result in irreparable harm to the entity filing the petition, or to the national economy or segment thereof, including a domestic industry, and

"(B) the Secretary considers such action to be necessary to carry out the policy set forth in section 3(2)(C) of this Act.

"(9) The authority under this subsection shall not be construed to affect the authority of the Secretary under any other provision of this Act, except that if the Secretary determines, on the Secretary's own initiative, to impose monitoring or controls, or both, on the export of metallic materials capable of being recycled, under the authority of this section, the Secretary shall publish the reasons for such action in accordance with paragraph (3)(A) and (B) of this subsection.

"(10) Nothing contained in this subsection shall be construed to preclude submission on a confidential basis to the Secretary of information relevant to a decision to impose or remove monitoring or controls under the authority of this Act, or to preclude consideration of such information by the Secretary in reaching decisions required under this subsection. The provisions of this paragraph shall not be construed to affect the applicability of section 552(b) of title 5, United States Code.".

SEC. 110. SHORT SUPPLY CONTROLS.

(a) DOMESTICALLY PRODUCED CRUDE OIL.—Section 7(d) (50 U.S.C. App. 2406(d)) is amended—

(1) in paragraph (1) by striking out "unless" and all that follows through "met" and inserting in lieu thereof "subject to paragraph (2) of this subsection";

(2) in paragraph (2)(A) by striking out "makes and publishes" and inserting in lieu thereof "so recommends to the Congress after making and publishing";

(3) in paragraph (2)(B)—

(A) by striking out "reports such findings" and inserting in lieu thereof "includes such findings in his recommendation"; and

(B) by striking out "thereafter" and all that follows through the end of the sentence and inserting in lieu thereof "after receiving that recommendation, agrees to a joint resolution which approves such exports on the basis of those findings, and which is thereafter enacted into law."; and

(4) by adding at the end the following:

"(4) Notwithstanding the provisions of section 20 of this Act, the provisions of this subsection shall expire on September 30, 1990.".

(b) REFINED PETROLEUM PRODUCTS.—Section 7(e)(1) is amended in the first sentence by striking out "No" and inserting in lieu thereof the following: "In any case in which the President determines that it is necessary to impose export controls on refined petroleum products in order to carry out the policy set forth in section 3(2)(C) of this Act, the President shall notify the Congress of that determination. The President shall also notify the Congress if and when he determines that such export controls are no longer necessary. During any period in which a determination that such export controls are necessary is in effect, no".

(c) UNPROCESSED RED CEDAR.—Section 7(i) is amended—

(1) in the last sentence of paragraph (1) by inserting "harvested from State or Federal lands" after "red cedar logs";

(2) by redesignating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively;

(3) by inserting after paragraph (1) the following new paragraph:

"(2) To the maximum extent practicable, the Secretary shall utilize the multiple validated export licenses described in section 4(a)(2) of this Act in lieu of validated licenses for exports under this subsection."; and

(4) by amending paragraph (5)(A), as redesignated by paragraph (2) of this subsection, to read as follows:

"(A) lumber of American Lumber Standards Grades of Number 3 dimension or better, or Pacific Lumber Inspection Bureau Export R-List Grades of Number 3 common or better;".

(d) AGRICULTURAL COMMODITIES.—Section 7(g)(3) is amended to read as follows:

"(3)(A) If the President imposes export controls on any agricultural commodity in order to carry out the policy set forth in paragraph (2)(B), (2)(C), (7), or (8) of section 3 of this Act, the President shall immediately transmit a report on such action to the Congress, setting forth the reasons for the controls in detail and specifying the period of time, which may not exceed 1 year, that the controls are proposed to be in effect. If the Congress, within 60 days after the date of its receipt of the report, adopts a joint resolution pursuant to paragraph (4) approving the imposition of the export controls, then such controls shall remain in effect for the period specified in the report, or until terminated by the President, whichever occurs first. If the Congress, within 60 days after the date of its receipt of such report, fails to adopt a joint resolution approving such controls, then such controls shall cease to be effective upon the expiration of that 60-day period.

"(B) The provisions of subparagraph (A) and paragraph (4) shall not apply to export controls—

"(i) which are extended under this Act if the controls, when imposed, were approved by the Congress under subparagraph (A) and paragraph (4); or

"(ii) which are imposed with respect to a country as part of the prohibition or curtailment of all exports to that country.

"(4)(A) For purposes of this paragraph, the term 'joint resolution' means only a joint resolution the matter after the resolving clause of which is as follows: 'That, pursuant to section 7(g)(3) of the Export Administration Act of 1979, the President may impose export controls as specified in the report submitted to the Congress on .', with the blank space being filled with the appropriate date.

"(B) On the day on which a report is submitted to the House of Representatives and the Senate under paragraph (3), a joint resolution with respect to the export controls specified in such report shall be introduced (by request) in the House by the chairman of the Committee on Foreign Affairs, for himself and the ranking minority member of the Committee, or by Members of the House designated by the chairman and ranking minority member; and shall be introduced (by request) in the Senate by the majority leader of the Senate, for himself and the minority leader of the Senate, or by Members of the Senate designated by the majority leader and minority leader of the Senate. If either House is not in session on the day on which such a report is submitted, the joint resolution shall be introduced in that House, as provided in the preceding sentence, on the first day thereafter on which that House is in session.

"(C) All joint resolutions introduced in the House of Representatives shall be referred to the appropriate committee and all joint resolutions introduced in the Senate shall be referred to the Committee on Banking, Housing, and Urban Affairs.

"(D) If the committee of either House to which a joint resolution has been referred has not reported the joint resolution at the end of 30 days after its referral, the committee shall be discharged from further consideration of the joint resolution or of any other joint resolution introduced with respect to the same matter.

"(E) A joint resolution under this paragraph shall be considered in the Senate in accordance with the provisions of section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976. For the purpose of expediting the consideration and passage of joint resolutions reported or discharged pursuant to the provisions of this paragraph, it shall be in order for the Committee on Rules of the House of Representatives to present for consideration a resolution of the House of Representatives providing procedures for the immediate consideration of a joint resolution under this paragraph which may be similar, if applicable, to the procedures set forth in section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976.

"(F) In the case of a joint resolution described in subparagraph (A), if, before the passage by one House of a joint resolution of that House, that House receives a resolution with respect to the same matter from the other House, then—

"(i) the procedure in that House shall be the same as if no joint resolution had been received from the other House; but

"(ii) the vote on final passage shall be on the joint resolution of the other House.

"(5) In the computation of the period of 60 days referred to in paragraph (3) and the period of 30 days referred to in subparagraph (D) of paragraph (4), there shall be excluded the days on which either House of Congress is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.".

(e) CONTRACT SANCTITY.—Section 7 is amended by striking out subsection (j) and inserting in lieu thereof the following:

"(j) EFFECT OF CONTROLS ON EXISTING CONTRACTS.—The export restrictions contained in subsection (i) of this section and any export controls imposed under this section shall not affect any contract to harvest unprocessed western red cedar from State lands which was entered into before October 1, 1979, and the performance of which would make the red cedar available for export. Any export controls imposed under this section on any agricultural commodity (including fats, oils, and animal hides and skins) or on any forest product or fishery product, shall not affect any contract to export entered into before the date on which such controls are imposed. For purposes of this subsection, the term 'contract to export' includes, but is not limited to, an export sales agreement and an agreement to

invest in an enterprise which involves the export of goods or technology.".

SEC. 111. LICENSING PROCEDURES.

(a) REDUCTION OF PROCESSING TIME.—Section 10 (50 U.S.C. App. 2409) is amended—

(1) by striking out "60" each place it appears and inserting in lieu thereof "40";

(2) by striking out "90" each place it appears and inserting in lieu thereof "60"; and

(3) by striking out "30" each place it appears and inserting in lieu thereof "20".

(b) AMENDMENTS WITH REGARD TO EXPORTS TO COCOM COUNTRIES.—

(1) ACTION ON APPLICATIONS NOT REFERRED TO OTHER DEPARTMENTS OR AGENCIES.—Section 10(c) is amended by striking out "In each case" and inserting in lieu thereof "Except as provided in subsection (o), in each case".

(2) REFERRALS TO OTHER DEPARTMENTS AND AGENCIES.—Section 10(d) is amended—

(A) by striking out "In each case" and inserting in lieu thereof "Except in the case of exports described in subsection (o), in each case"; and

(B) by adding at the end the following: "Notwithstanding the 10-day period set forth in subsection (b), in the case of exports described in subsection (o), in each case in which the Secretary determines that it is necessary to refer an application to any other department or agency for its information and recommendations, the Secretary shall, immediately upon receipt of the properly completed application, refer the application to such department or agency for its review. Such review shall be concurrent with that of the Department of Commerce.".

(3) ACTION BY OTHER DEPARTMENTS AND AGENCIES.—Section 10(e) is amended—

(A) in paragraph (1) by striking out the first sentence and inserting in lieu thereof the following: "Any department or agency to which an application is referred pursuant to subsection (d) shall submit to the Secretary the information or recommendations requested with respect to the application. The information or recommendations shall be submitted within 20 days after the department or agency receives the application or, in the case of exports described in subsection (o), before the expiration of the time periods permitted by that subsection."; and

(B) in paragraph (2)—

(i) by striking out "If the head" and inserting in lieu thereof "(A) Except in the case of exports described in subsection (o), if the head", and

(ii) by adding at the end the following:

"(B) In the case of exports described in subsection (o), if the head of any such department or agency notifies the Secretary, before the expiration of the 15-day period provided in subsection (o)(1), that more time is required for review by such department or agency, the Secretary shall notify the applicant, pursuant to subsection (o)(1)(C), that additional time is required to consider the application, and such department or agency shall have additional time to consider the application within the limits permitted by subsection (o)(2). If such department or agency does not submit its recommendations within the time periods permitted under subsection (o), it shall be deemed by the Secretary to have no objection to the approval of such application.".

(4) ACTION BY THE SECRETARY.—Section 10(f) is amended in paragraphs (1) and (4) by adding at the end of each such paragraph the following: "The provisions of this paragraph shall not apply in the case of exports described in subsection (o).".

(c) RIGHT OF APPLICANT TO RESPOND TO NEGATIVE RECOMMENDATIONS.—Section 10(f)(2) is amended—

(1) by inserting "in writing" after "inform the applicant"; and

(2) by striking out ", and shall accord" and all that follows through the end of the paragraph and inserting in lieu thereof the following: ". Before a final determination with respect to the application is made, the applicant shall be entitled—

"(A) to respond in writing to such questions, considerations, or recommendations within 30 days after receipt of such information from the Secretary; and

"(B) upon the filing of a written request with the Secretary within 15 days after the receipt of such information, to respond in person to the department or agency raising such questions, considerations, or recommendations.

The provisions of this paragraph shall not apply in the case of exports described in subsection (o).".

(d) RIGHTS OF APPLICANT WITH RESPECT TO PROPOSED DENIAL.—Section 10(f)(3) is amended by striking out the first sentence and inserting in lieu thereof the following: "In cases where the Secretary has determined that an application should be denied, the applicant shall be informed in writing, within 5 days after such determination is made, of—

"(A) the determination,

"(B) the statutory basis for the proposed denial,

"(C) the policies set forth in section 3 of this Act which would be furthered by the proposed denial,

"(D) what if any modifications in or restrictions on the goods or technology for which the license was sought would allow such export to be compatible with export controls imposed under this Act,

"(E) which officers and employees of the Department of Commerce who are familiar with the application will be made reasonably available to the applicant for considerations with regard to such modifications or restrictions, if appropriate,

"(F) to the extent consistent with the national security and foreign policy of the United States, the specific considerations which led to the determination to deny the application, and

"(G) the availability of appeal procedures.

The Secretary shall allow the applicant at least 30 days to respond to the Secretary's determination before the license application is denied.".

(e) ADDITIONAL PROVISIONS.—Section 10 is amended—

(1) in the section heading by adding "; OTHER INQUIRIES" after "APPLICATIONS"; and

(2) by adding at the end the following new subsections:

"(k) CHANGES IN REQUIREMENTS FOR APPLICATIONS.—Except as provided in subsection (b)(3) of this section, in any case in which, after a license application is submitted, the Secretary changes the requirements for such a license application, the Secretary may request appropriate additional information of the applicant, but the Secretary may not return the application to the applicant without action because it fails to meet the changed requirements.

"(l) OTHER INQUIRIES.—(1) In any case in which the Secretary receives a written request asking for the proper classification of a good or technology on the control list, the Secretary shall, within 10 working days after receipt of the request, inform the person making the request of the proper classification.

"(2) In any case in which the Secretary receives a written request for information about the applicability of export license requirements under this Act to a proposed export transaction or series of transactions, the Secretary shall, within 30 days after receipt of the request, reply with that information to the person making the request.

"(m) SMALL BUSINESS ASSISTANCE.—Not later than 120 days after the date of the enactment of this subsection, the Secretary shall develop and transmit to the Congress a plan to assist small businesses in the export licensing application process under this Act. The plan shall include, among other things, arrangements for counseling small businesses on filing applications and identifying goods or technology on the control list, proposals for seminars and conferences to educate small businesses on export controls and licensing procedures, and the preparation of informational brochures.

"(n) REPORTS ON LICENSE APPLICATIONS.—(1) Not later than 180 days after the date of the enactment of this subsection, and not later than the end of each 3-month period thereafter, the Secretary shall submit to the Committee on Foreign Affairs of the House of Representatives and to the Committee on Banking, Housing, and Urban Affairs of the Senate a report listing—

"(A) all applications on which action was completed during the preceding 3-month period and which required a period longer than the period permitted under subsection (c), (f)(1), or (h) of this section, as the case may be, before notification of a decision to approve or deny the application was sent to the applicant; and

"(B) in a separate section, all applications which have been in process for a period longer than the period permitted under subsection (c), (f)(1), or (h) of this section, as the case may be, and upon which final action has not been taken.

"(2) With regard to each application, each listing shall identify—

"(A) the application case number;

"(B) the value of the goods or technology to which the application relates;

"(C) the country of destination of the goods or technology;

"(D) the date on which the application was received by the Secretary;

"(E) the date on which the Secretary approved or denied the application;

"(F) the date on which the notification of approval or denial of the application was sent to the applicant; and

"(G) the total number of days which elapsed between receipt of the application, in its properly completed form, and the earlier of the last day of the 3-month period to which the report relates, or the date on which notification of approval or denial of the application was sent to the applicant.

"(3) With respect to an application which was referred to other departments or agencies, the listing shall also include—

"(A) the departments or agencies to which the application was referred;

"(B) the date or dates of such referral; and

"(C) the date or dates on which recommendations were received from those departments or agencies.

"(4) With respect to an application referred to any other department or agency which did not submit or has not submitted its recommendations on the application within the period permitted under subsection (e) of this section to submit such recommendations, the listing shall also include—

"(A) the office responsible for processing the application and the position of the officer responsible for the office; and

"(B) the period of time that elapsed before the recommendations were submitted or that has elapsed since referral of the application, as the case may be.

"(5) Each report shall also provide an introduction which contains—

"(A) a summary of the number of applications described in paragraph (1)(A) and (B) of this subsection, and the value of the goods or technology involved in the applications, grouped according to—

"(i) the number of days which elapsed before action on the applications was completed, or which has elapsed without action on the applications being completed, as follows: 61 to 75 days, 76 to 90 days, 91 to 105 days, 106 to 120 days, and more than 120 days; and

"(ii) the number of days which elapsed before action on the applications was completed, or which has elapsed without action on the applications being completed, beyond the period permitted under subsection (c), (f)(1), or (h) of this section for the processing of applications, as follows: not more than 15 days, 16 to 30 days, 31 to 45 days, 46 to 60 days, and more than 60 days; and

"(B) a summary by country of destination of the number of applications described in paragraph (1)(A) and (B) of this subsection, and the value of the goods or technology involved in the applications, on which action was not completed within 60 days.

"(o) EXPORTS TO MEMBERS OF COORDINATING COMMITTEE.—(1) Fifteen working days after the date of formal filing with the Secretary of an individual validated license application for the export of goods or technology to a country that maintains export controls on such goods or technology pursuant to the agreement of the governments participating in the group known as the Coordinating Committee, a license for the transaction specified in the application shall become valid and effective and the goods or technology are authorized for export pursuant to such license unless—

"(A) the application has been otherwise approved by the Secretary, in which case it shall be valid and effective according to the terms of the approval;

"(B) the application has been denied by the Secretary pursuant to this section and the applicant has been so informed, or the applicant has been informed, pursuant to subsection (f)(3) of this section, that the application should be denied; or

"(C) the Secretary requires additional time to consider the application and the applicant has been so informed.

"(2) In the event that the Secretary notifies an applicant pursuant to paragraph (1)(C) that more time is required to consider an individual validated license application, a license for the transaction specified in the application shall become valid and effective and the goods or technology are authorized for export pursuant to such license 30 working days after the date that such license application was formally filed with the Secretary unless—

"(A) the application has been otherwise approved by the Secretary, in which case it shall be valid and effective according to the terms of the approval; or

"(B) the application has been denied by the Secretary pursuant to this section and the applicant has been so informed, or the applicant has been informed, pursuant to subsection (f)(3) of this section, that the application should be denied.

"(3) In reviewing an individual license application subject to this subsection, the Secretary shall evaluate the information set forth in the application and the reliability of the end-user.

"(4) Nothing in this subsection shall affect the scope or availability of licenses authorizing multiple exports set forth in section 4(a)(2) of this Act.

"(5) The provisions of this subsection shall take effect 4 months after the date of the enactment of the Export Administration Amendments Act of 1985.".

SEC. 112. VIOLATIONS.

(a) IN GENERAL.—Section 11(a) (50 U.S.C. App. 2410(a)) is amended by inserting after "violates" the following: "or conspires to or attempts to violate".

(b) WILLFUL VIOLATIONS.—Section 11(b) is amended—

(1) in paragraph (1)—

(A) by striking out "exports anything contrary to" and inserting in lieu thereof "violates or conspires to or attempts to violate";

(B) by striking out "such exports" and inserting in lieu thereof "the exports involved";

(C) by inserting after "benefit of" the following: ", or that the destination or intended destination of the goods or technology involved is,"; and

(D) by striking out "country to which exports are restricted for national security or" and inserting in lieu thereof "controlled country or any country to which exports are controlled for";

(2) in paragraph (2) by striking out the last sentence; and

(3) by adding after paragraph (2) the following new paragraphs:

"(3) Any person who possesses any goods or technology—

"(A) with the intent to export such goods or technology in violation of an export control imposed under section 5 or 6 of this Act or any regulation, order, or license issued with respect to such control, or

"(B) knowing or having reason to believe that the goods or technology would be so exported,

shall, in the case of a violation of an export control imposed under section 5 (or any regulation, order, or license issued with respect to such control), be subject to the penalties set forth in paragraph (1) of this subsection and shall, in the case of a violation of an export control imposed under section 6 (or any regulation, order, or license issued with respect to such control), be subject to the penalties set forth in subsection (a).

"(4) Any person who takes any action with the intent to evade the provisions of this Act or any regulation, order, or license issued under this Act shall be subject to the penalties set forth in subsection (a), except that in the case of an evasion of an export control imposed under section 5 or 6 of this Act (or any regulation, order, or license issued with respect to such control), such person shall be subject to the penalties set forth in paragraph (1) of this subsection.

"(5) Nothing in this subsection or subsection (a) shall limit the power of the Secretary to define by regulations violations under this Act.".

(c) CIVIL PENALTIES; ADMINISTRATIVE SANCTIONS.—Section 11(c) is amended—

(1) by striking out "head" and all that follows in paragraph (1) through "thereof," and inserting in lieu thereof "Secretary (and officers and employees of the Department of Commerce specifically designated by the Secretary)"; and

(2) by adding at the end the following new paragraphs:

"(3) An exception may not be made to any order issued under this Act which revokes the authority of a United States person to export goods or technology unless the Committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate are first consulted concerning the exception.

"(4) The President may by regulation provide standards for establishing levels of civil penalty provided in this subsection based upon the seriousness of the violation, the culpability of the violator, and the violator's record of cooperation with the Government in disclosing the violation.".

(d) REFUNDS OF PENALTIES.—Section 11(e) is amended—

(1) by inserting after "subsection (c)" the following: ", or any amounts realized from the forfeiture of any property interest or proceeds pursuant to subsection (g),"; and

(2) by inserting after "refund any such penalty" the following: "imposed pursuant to subsection (c)".

(e) FORFEITURES; PRIOR CONVICTIONS.—Section 11 is amended—

(1) by redesignating subsection (g) as subsection (i); and

(2) by inserting after subsection (f) the following new subsections:

"(g) FORFEITURE OF PROPERTY INTEREST AND PROCEEDS.—(1) Any person who is convicted under subsection (a) or (b) of a violation of an export control imposed under section 5 of this Act (or any regulation, order, or license issued with respect to such control) shall, in addition to any other penalty, forfeit to the United States—

"(A) any of that person's interest in, security of, claim against, or property or contractual rights of any kind in the goods or tangible items that were the subject of the violation;

"(B) any of that person's interest in, security of, claim against, or property or contractual rights of any kind in tangible property that was used in the export or attempt to export that was the subject of the violation; and

"(C) any of that person's property constituting, or derived from, any proceeds obtained directly or indirectly as a result of the violation.

"(2) The procedures in any forfeiture under this subsection, and the duties and authority of the courts of the United States and the Attorney General with respect to any forfeiture action under this subsection or with respect to any property that may be subject to forfeiture under this subsection, shall be governed by the provisions of section 1963 of title 18, United States Code.

"(h) PRIOR CONVICTIONS.—No person convicted of a violation of section 793, 794, or 798 of title 18, United States Code, section 4(b) of the Internal Security Act of 1950 (50 U.S.C. 783(b)), or section 38 of the Arms Export Control Act (22 U.S.C. 2778) shall be eligible, at the discretion of the Secretary, to apply for or use any export license under this Act for a period of up to 10 years from the date of the conviction. The Secretary may revoke any export license under this Act in which such person has an interest at the time of the conviction.".

(f) TECHNICAL AMENDMENT.—Section 11(i), as redesignated by subsection (e) of this section, is amended by striking out "or (f)" and inserting in lieu thereof "(f), (g), or (h)".

SEC. 113. ENFORCEMENT.

(a) GENERAL AUTHORITY.—Section 12(a) (50 U.S.C. App. 2411(a)) is amended—

(1) by inserting "(1)" immediately before the first sentence;

(2) by striking out "such investigations and" and inserting in lieu thereof "such investigations within the United States, and the Commissioner of Customs (and officers or employees of the United States Customs Service specifically designated by the Commissioner) may make such investigations outside of the United States, and the head of such department or agency (and such officers or employees) may";

(3) by striking out "the district court of the United States for any district in which such person is found or resides or transacts business, upon application, and" and inserting in lieu thereof "a district court of the United States,";

(4) by adding at the end the following new sentence: "In addition to the authority conferred by this paragraph, the Secretary (and officers or employees of the Department of Commerce designated by the Secretary) may conduct, outside the United States, pre-license investigations and post-shipment verifications of items licensed for export, and investigations in the enforcement of section 8 of this Act."; and

(5) by adding at the end the following new paragraphs:

"(2)(A) Subject to subparagraph (B) of this paragraph, the United States Customs Service is authorized, in the enforcement of this Act, to search, detain (after search), and seize goods or technology at those ports of entry or exit from the United States where officers of the Customs Service are authorized by law to conduct such searches, detentions, and seizures, and at those places outside the United States where the Customs Service, pursuant to agreements or other arrangements with other countries, is authorized to perform enforcement activities.

"(B) An officer of the United States Customs Service may do the following in carrying out enforcement authority under this Act:

"(i) Stop, search, and examine a vehicle, vessel, aircraft, or person on which or whom such officer has reasonable cause to suspect there are any goods or technology that has been, is being, or is about to be exported from the United States in violation of this Act.

"(ii) Search any package or container in which such officer has reasonable cause to suspect there are any goods or technology that has been, is being, or is about to be exported from the United States in violation of this Act.

"(iii) Detain (after search) or seize and secure for trial any goods or technology on or about such vehicle, vessel, aircraft, or person, or in such package or container, if such officer has probable cause to believe the goods or technology has been, is being, or is about to be exported from the United States in violation of this Act.

"(iv) Make arrests without warrant for any violation of this Act committed in his or her presence or view or if the officer has probable cause to believe that the person to be arrested has committed or is committing such a violation.

The arrest authority conferred by clause (iv) of this subparagraph is in addition to any arrest authority under other laws.

"(3)(A) Subject to subparagraph (B) of this paragraph, the Secretary shall have the responsibility for the enforcement of section 8 of this Act and, in the enforcement of the other provisions of this Act, the Secretary is authorized to search, detain (after search), and seize goods or technology at those places within the United States other than those ports specified in paragraph (2)(A) of this subsection. The search, detention (after search), or seizure of goods or technology at those ports and places specified in paragraph (2)(A) may be conducted by officers or employees of the Department of Commerce designated by the Secretary with the concurrence of the Commissioner of Customs or a person designated by the Commissioner.

"(B) The Secretary may designate any employee of the Office of Export Enforcement of the Department of Commerce to do the following in carrying out enforcement authority under this Act:

"(i) Execute any warrant or other process issued by a court or officer of competent jurisdiction with respect to the enforcement of the provisions of this Act.

"(ii) Make arrests without warrant for any violation of this Act committed in his or her presence or view, or if the officer or employee has probable cause to believe that the person to be arrested has committed or is committing such a violation.

"(iii) Carry firearms in carrying out any activity described in clause (i) or (ii).

"(4) The authorities conferred by paragraphs (2) and (3) shall be exercised pursuant to regulations promulgated by the Attorney General concerning searches, detentions, stops, examinations, seizures, arrests, execution of warrants, or use of firearms.

"(5) All cases involving violations of this Act shall be referred to the Secretary for purposes of determining civil penalties and administrative sanctions under section 11(c) of this Act, or to the Attorney General for criminal action in accordance with this Act.

"(6) Notwithstanding any other provision of law, the United States Customs Service may expend in the enforcement of export controls under this Act not more than $12,000,000 in the fiscal year 1985 and not more than $14,000,000 in the fiscal year 1986.

"(7) Not later than 90 days after the date of the enactment of the Export Administration Amendments Act of 1985, the Secretary, with the concurrence of the Secretary of the Treasury, shall publish in the Federal Register procedures setting forth, in accordance with this subsection, the responsibilities of the Department of Commerce and the United States Customs Service in the enforcement of this Act. In addition, the Secretary, with the concurrence of the Secretary of the Treasury, may publish procedures for the sharing of information in accordance with subsection (c)(3) of this section, and procedures for the submission to the appropriate departments and agencies by private persons of information relating to the enforcement of this Act.

"(8) For purposes of this section, a reference to the enforcement of this Act or to a violation of this Act includes a reference to the enforcement or a violation of any regulation, order, or license issued under this Act.".

(b) CONFIDENTIALITY.—Section 12(c)(3) is amended—

(1) by striking out "Departments or agencies which obtain" and inserting in lieu thereof "Any department or agency which obtains";

(2) by inserting ", including information pertaining to any investigation," after "enforcement of this Act";

(3) by striking out "the department" and inserting in lieu thereof "each department"; and

(4) by adding at the end the following: "The Secretary and the Commissioner of Customs, upon request, shall exchange any licensing and enforcement information with each other which is necessary to facilitate enforcement efforts and effective license decisions. The Secretary, the Attorney General, and the Commissioner of Customs shall consult on a continuing basis with one another and with the heads of other departments and agencies which obtain information subject to this paragraph, in order to facilitate the exchange of such information.".

SEC. 114. ADMINISTRATIVE PROCEDURE.

Section 13 (50 U.S.C. App. 2412) is amended—

(1) in the section heading by striking out "EXEMPTION FROM CERTAIN PROVISIONS RELATING TO";

(2) in subsection (a) by inserting "and subsection (c) of this section" after "11(c)(2)"; and

(3) by adding at the end the following:

"(c) PROCEDURES RELATING TO CIVIL PENALTIES AND SANCTIONS.—(1) In any case in which a civil penalty or other civil sanction (other than a temporary denial order or a penalty or sanction for a violation of section 8) is sought under section 11 of this Act, the charged party is entitled to receive a formal complaint specifying the charges and, at his or her request, to contest the charges in a hearing before an administrative law judge. Subject to the provisions of this subsection, any such hearing shall be conducted in accordance with sections 556 and 557 of title 5, United States Code. With the approval of the administrative law judge, the Government may present evidence in camera in the presence of the charged party or his or her representative. After the hearing, the administrative law judge shall make findings of fact and conclusions of law in a written decision, which shall be referred to the Secretary. The Secretary shall, in a written order, affirm, modify, or vacate the decision of the administrative law judge within 30 days after receiving the decision. The order of the Secretary shall be final and is not subject to judicial review.

"(2) The proceedings described in paragraph (1) shall be concluded within a period of 1 year after the complaint is submitted, unless the administrative law judge extends such period for good cause shown.

"(d) IMPOSITION OF TEMPORARY DENIAL ORDERS.—(1) In any case in which it is necessary, in the public interest, to prevent an imminent violation of this Act or any regulation, order, or license issued under this Act, the Secretary may, without a hearing, issue an order temporarily denying United States export privileges (hereinafter in this subsection referred to as a 'temporary denial order') to a person. A temporary denial order may be effective no longer than 60 days unless renewed in writing by the Secretary for additional 60-day periods in order to prevent such an imminent violation, except that a temporary denial order may be renewed only after notice and an opportunity for a hearing is provided.

"(2) A temporary denial order shall define the imminent violation and state why the temporary denial order was granted without a hearing. The person or persons subject to the issuance or renewal of a temporary denial order may file an appeal of the issuance or renewal of the temporary denial order with an administrative law judge who shall, within 10 working days after the appeal is filed, recommend that the tempo-

rary denial order be affirmed, modified, or vacated. Parties may submit briefs and other material to the judge. The recommendation of the administrative law judge shall be submitted to the Secretary who shall either accept, reject, or modify the recommendation by written order within 5 working days after receiving the recommendation. The written order of the Secretary under the preceding sentence shall be final and is not subject to judicial review. The temporary denial order shall be affirmed only if it is reasonable to believe that the order is required in the public interest to prevent an imminent violation of this Act or any regulation, order, or license issued under this Act.

"(e) APPEALS FROM LICENSE DENIALS.—A determination of the Secretary, under section 10(f) of this Act, to deny a license may be appealed by the applicant to an administrative law judge who shall have the authority to conduct proceedings to determine only whether the item sought to be exported is in fact on the control list. Such proceedings shall be conducted within 90 days after the appeal is filed. Any determination by an administrative law judge under this subsection and all materials filed before such judge in the proceedings shall be reviewed by the Secretary, who shall either affirm or vacate the determination in a written decision within 30 days after receiving the determination. The Secretary's written decision shall be final and is not subject to judicial review. Subject to the limitations provided in section 12(c) of this Act, the Secretary's decision shall be published in the Federal Register.".

SEC. 115. ANNUAL REPORT.

(a) CONTENTS OF REPORT.—Section 14(a)(15) (50 U.S.C. App. 2413(a)(15)) is amended by striking out "an analysis" and all that follows through "process, and".

(b) ADDITIONAL REPORTING REQUIREMENTS.—Section 14 is amended by adding at the end the following:

"(d) REPORT ON EXPORTS TO CONTROLLED COUNTRIES.—The Secretary shall include in each annual report a detailed report which lists every license for exports to controlled countries which was approved under this Act during the preceding fiscal year. Such report shall specify to whom the license was granted, the type of goods or technology exported, and the country receiving the goods or technology. The information required by this subsection shall be subject to the provisions of section 12(c) of this Act.

"(e) REPORT ON DOMESTIC ECONOMIC IMPACT OF EXPORTS TO CONTROLLED COUNTRIES.—The Secretary shall include in each annual report a detailed description of the extent of injury to United States industry and the extent of job displacement caused by United States exports of goods and technology to controlled countries. The annual report shall also include a full analysis of the consequences of exports of turnkey plants and manufacturing facilities to controlled countries which are used by such countries to produce goods for export to the United States or to compete with United States products in export markets.".

SEC. 116. UNDER SECRETARY OF COMMERCE FOR EXPORT ADMINISTRATION; REGULATIONS.

(a) IN GENERAL.—Section 15 (50 U.S.C. App. 2414) is amended to read as follows:

"ADMINISTRATIVE AND REGULATORY AUTHORITY

"SEC. 15. (a) UNDER SECRETARY OF COMMERCE.—The President shall appoint, by and with the advice and consent of the Senate, an Under Secretary of Commerce for Export Administration who shall carry out all functions of the Secretary under this Act which were delegated to the office of the Assistant Secretary of Commerce for Trade Administration before the date of the enactment of the Export Administration Amendments Act of 1985, and such other functions under this Act which were delegated to such office before such date of enactment, as the Secretary may delegate. The Secretary shall designate three Assistant Secretaries of Commerce to assist the Under Secretary in carrying out such functions.

"(b) ISSUANCE OF REGULATIONS.—The President and the Secretary may issue such regulations as are necessary to carry out the provisions of this Act. Any such regulations issued to carry out the provisions of section 5(a), 6(a), 7(a), or 8(b) may apply to the financing, transporting, or other servicing of exports and the participation therein by any person. Any such regulations the purpose of which is to carry out the provisions of section 5, or of section 4(a) for the purpose of administering the provisions of section 5, may be issued only after the regulations are submitted for review to the Secretary of Defense, the Secretary of State, and such other departments and agencies as the Secretary considers appropriate. The preceding sentence does not require the concurrence or approval of any official, department, or agency to which such regulations are submitted.

"(c) AMENDMENTS TO REGULATIONS.—If the Secretary proposes to amend regulations issued under this Act, the Secretary shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Foreign Affairs of the House of Representatives on the intent and rationale of such amendments. Such report shall evaluate the cost and burden to United States exporters of the proposed amendments in relation to any enhancement of licensing objectives. The Secretary shall consult with the technical advisory committees authorized under section 5(h) of this Act in formulating or amending regulations issued under this Act. The procedures defined by regulations in effect on January 1, 1984, with respect to sections 4 and 5 of this Act, shall remain in effect unless the Secretary determines, on the basis of substantial and reliable evidence, that specific change is necessary to enhance the prevention of diversions of exports which would prove detrimental to the national security of the United States or to reduce the licensing and paperwork burden on exporters and their distributors.".

(b) PAY FOR THE UNDER SECRETARY.—Section 5314 of title 5, United States Code, is amended by inserting "Under Secretary of Commerce for Export Administration," after "Under Secretary of Commerce for Economic Affairs,".

(c) PAY FOR THE ASSISTANT SECRETARIES.—Section 5315 of such title is amended by striking out

"Assistant Secretaries of Commerce (8)."

and inserting in lieu thereof

"Assistant Secretaries of Commerce (12).".

(d) EFFECTIVE DATE.—The provisions of section 15(a) of the Export Administration Act of 1979, as amended by subsection (a) of this section, and the amendments made by subsections (b) and (c) of this section shall take effect on October 1, 1985.

(e) BUDGET ACT.—Any new spending authority (within the meaning of section 401 of the Congressional Budget Act of 1974) which is provided under this section shall be effective for any fiscal year only to the extent or in such amounts as are provided in appropriation Acts.

SEC. 117. DEFINITIONS.

Section 16 (50 U.S.C. App. 2415) is amended—

(1) in paragraph (3), by inserting "natural or manmade substance," after "article,";

(2) by amending paragraph (4) to read as follows:

"(4) the term 'technology' means the information and know-how (whether in tangible form, such as models, prototypes, drawings, sketches, diagrams, blueprints, or manuals, or in intangible form, such as training or technical services) that can be used to design, produce, manufacture, utilize, or reconstruct goods, including computer software and technical data, but not the goods themselves;";

(3) by redesignating paragraph (5) as paragraph (8); and

(4) by inserting after paragraph (4) the following new paragraphs:

"(5) the term 'export' means—

"(A) an actual shipment, transfer, or transmission of goods or technology out of the United States;

"(B) a transfer of goods or technology in the United States to an embassy or affiliate of a controlled country; or

"(C) a transfer to any person of goods or technology either within the United States or outside of the United States with the knowledge or intent that the goods or technology will be shipped, transferred, or transmitted to an unauthorized recipient;

"(6) the term 'controlled country' means a controlled country under section 5(b)(1) of this Act;

"(7) the term 'United States' means the States of the United States, the District of Columbia, and any commonwealth, territory, dependency, or possession of the United States, and includes the outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)); and".

SEC. 118. EFFECT ON OTHER ACTS.

(a) CLARIFYING AMENDMENT.—Section 17(a) (50 U.S.C. App. 2416(a)) is amended by striking out "Nothing" and inserting in lieu thereof "Except as otherwise provided in this Act, nothing".

(b) ACT NOT TO AFFECT CERTAIN PROVISIONS OF AGRICULTURAL ACT OF 1970.—Section 17 is amended by adding at the end the following:

"(f) AGRICULTURAL ACT OF 1970.—Nothing in this Act shall affect the provisions of the last sentence of section 812 of the Agricultural Act of 1970 (7 U.S.C. 612c-3).".

SEC. 119. AUTHORIZATION OF APPROPRIATIONS.

Section 18 (50 U.S.C. App. 2417) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 18. (a) REQUIREMENT OF AUTHORIZING LEGISLATION.—(1) Notwithstanding any other provision of law, money appropriated to the Department of Commerce for expenses to carry out the purposes of this Act may be obligated or expended only if—

"(A) the appropriation thereof has been previously authorized by law enacted on or after the date of the enactment of the Export Administration Amendments Act of 1985; or

"(B) the amount of all such obligations and expenditures does not exceed an amount previously prescribed by law enacted on or after such date.

"(2) To the extent that legislation enacted after the making of an appropriation to

carry out the purposes of this Act authorizes the obligation or expenditure thereof, the limitation contained in paragraph (1) shall have no effect.

"(3) The provisions of this subsection shall not be superseded except by a provision of law enacted after the date of the enactment of the Export Administration Amendments Act of 1985 which specifically repeals, modifies, or supersedes the provisions of this subsection.

"(b) AUTHORIZATION.—There are authorized to be appropriated to the Department of Commerce to carry out the purposes of this Act—

"(1) $24,600,000 for the fiscal year 1985, of which $8,712,000 shall be available only for enforcement, $1,851,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5 of this Act, and $14,037,000 shall be available for all other activities under this Act;

"(2) $29,500,000 for the fiscal year 1986, of which $10,000,000 shall be available only for enforcement, $2,000,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5 of this Act, and $17,500,000 shall be available for all other activities under this Act; and

"(3) such additional amounts for each of the fiscal years 1985 and 1986 as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs.".

SEC. 120. TERMINATION OF AUTHORITY.

Section 20 (50 U.S.C. App. 2419) is amended to read as follows:

"TERMINATION DATE

"SEC. 20. The authority granted by this Act terminates on September 30, 1989.".

SEC. 121. IMPORT SANCTIONS.

Chapter 4 of title II of the Trade Expansion Act of 1962 (19 U.S.C. 1861 et seq.) is amended by adding at the end the following new section:

"SEC. 233. IMPORT SANCTIONS FOR EXPORT VIOLATIONS.

"(a) Any person who violates any national security export control imposed under section 5 of the Export Administration Act of 1979 (50 U.S.C. App. 2404), or any regulation, order, or license issued under that section, may be subject to such controls on the importing of goods or technology into the United States as the President may prescribe.

"(b) Except as provided in subsection (a) of this section, any person who violates any regulation issued under a multilateral agreement, formal or informal, to control exports for national security purposes, to which the United States is a party, may be subject to such controls on the importing of goods or technology into the United States as the President may prescribe, but only if—

"(1) negotiations with the government or governments, party to the multilateral agreement, with jurisdiction over the violation have been conducted and been unsuccessful in restoring compliance with the regulation involved;

"(2) the President, after the failure of such negotiations, has notified the government or governments described in paragraph (1) and the other parties to the multilateral agreement that the United States proposes to subject the person committing the violation to specific controls on the importing of goods or technology into the United States upon the expiration of 60 days from the date of such notification; and

"(3) a majority of the parties to the multilateral agreement (other than the United States), before the end of that 60-day period, have expressed to the President concurrence in the proposed import controls or have abstained from stating a position with respect to the proposed controls.".

SEC. 122. HOURS OF OFFICE OF EXPORT ADMINISTRATION.

The Secretary of Commerce shall modify the office hours of the Office of Export Administration of the Department of Commerce on at least four days of each workweek so as to accommodate communications to the Office by exporters throughout the continental United States during the normal business hours of those exporters.

SEC. 123. TECHNICAL AMENDMENTS.

(a) ARMS EXPORT CONTROL ACT.—Section 38(e) of the Arms Export Control Act (22 U.S.C. 2778(e)) is amended by striking out "(f)" and inserting in lieu thereof "(g)".

(b) MINERAL LEASING ACT OF 1920.—Subsection (u) of section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185) is amended—

(1) by striking out "1969 (Act of December 30, 1969; 83 Stat. 841)" and inserting in lieu thereof "1979 (50 U.S.C. App. 2401 and following)"; and

(2) by striking out "1969" each subsequent place it appears and inserting in lieu thereof "1979".

SEC. 124. AMENDMENT TO THE FOREIGN ASSISTANCE ACT OF 1961.

Section 502B(a)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2304(a)(2)) is amended by inserting after "Senate" the first place it appears the following: "and the chairman of the Committee on Banking, Housing, and Urban Affairs of the Senate (when licenses are to be issued pursuant to the Export Administration Act of 1979).".

SEC. 125. EXPORT OF HORSES.

The Act of March 3, 1891 (46 U.S.C. 466a and 466b), is amended by adding at the end the following:

"SEC. 3. EXPORT OF HORSES.

"(a) RESTRICTION ON EXPORT OF HORSES.—Notwithstanding any other provision of law, no horse may be exported by sea from the United States, or any of its territories or possessions, unless such horse is part of a consignment of horses with respect to which a waiver has been granted under subsection (b).

"(b) GRANTING OF WAIVERS.—The Secretary of Commerce, in consultation with the Secretary of Agriculture, may issue regulations providing for the granting of waivers permitting the export by sea of a specified consignment of horses, if the Secretary of Commerce, in consultation with the Secretary of Agriculture, determines that no horse in that consignment is being exported for purposes of slaughter.

"(c) PENALTIES.—

(1) CRIMINAL PENALTY.—Any person who knowingly violates this section or any regulation, order, or license issued under this section shall be fined not more than 5 times the value of the consignment of horses involved or $50,000, whichever is greater, or imprisoned not more than 5 years, or both.

"(2) CIVIL PENALTY.—The Secretary of Commerce, after providing notice and an opportunity for an agency hearing on the record, may impose a civil penalty of not to exceed $10,000 for each violation of this section or any regulation, order, or license issued under this section, either in addition to or in lieu of any other liability or penalty which may be imposed.".

SEC. 126. ALASKAN OIL STUDY.

(a) REVIEW OF ALASKAN OIL POLICY.—

(1) IN GENERAL.—The President shall undertake a comprehensive review of the issues and related data concerning possible changes in the existing incentives to produce crude oil from the North Slope of Alaska (including changes in Federal and State taxation, pipeline tariffs, and Federal leasing policies) and possible changes in the existing distribution of crude oil from the North Slope of Alaska (including changes in export restrictions which would permit exports at free market levels and at levels of 50,000 barrels per day, 100,000 barrels per day, 200,000 barrels per day, and 500,000 barrels per day), as well as the appropriateness of continuing existing controls. Such review shall include, but not be limited to, a study of—

(A) the effect of such changes on the energy and national security of the United States and its allies;

(B) the role of such changes in United States foreign policymaking, including international energy policymaking;

(C) the impact of such changes on employment levels in the maritime industry, the oil industry, and other industries;

(D) the impact of such changes on the refiners and on consumers;

(E) the impact of such changes on the revenues and expenditures of the Federal Government and the government of Alaska;

(F) the effect of such changes on incentives for oil and gas exploration and development in the United States; and

(G) the effect of such changes on the overall trade deficit of the United States, and the trade deficit of the United States with respect to particular countries, including the effect of such changes on trade barriers of other countries.

(2) FINDINGS, OPTIONS, AND RECOMMENDATIONS.—The President shall develop, after consulting with appropriate State and Federal officials and other persons, findings, options, and recommendations regarding the production and distribution of crude oil from the North Slope of Alaska.

(b) CONSULTATION AND REPORT.—In carrying out subsection (a), the President shall consult with the Committees on Foreign Affairs and Energy and Commerce of the House of Representatives and the appropriate committees of the Senate. Not later than 9 months after the date of the enactment of this Act, the President shall transmit to each of those committees a report which contains the results of the review under subsection (a)(1), and the findings, options, and recommendations developed under subsection (a)(2).

TITLE II—EXPORT PROMOTION PROGRAMS

SEC. 201. REQUIREMENT OF PRIOR AUTHORIZATION.

(a) GENERAL RULE.—Notwithstanding any other provision of law, money appropriated to the Department of Commerce for expenses to carry out any export promotion program may be obligated or expended only if—

(1) the appropriation thereof has been previously authorized by law enacted on or after the date of the enactment of this Act; or

(2) the amount of all such obligations and expenditures does not exceed an amount previously prescribed by law enacted on or after such date.

(b) EXCEPTION FOR LATER LEGISLATION AUTHORIZING OBLIGATIONS OR EXPENDITURES.—To the extent that legislation enacted after the making of an appropriation to carry out any export promotion program authorizes the obligation or expenditure thereof, the

limitation contained in subsection (a) shall have no effect.

(c) PROVISIONS MUST BE SPECIFICALLY SUPERSEDED.—The provisions of this section shall not be superseded except by a provision of law enacted after the date of the enactment of this Act which specifically repeals, modifies, or supersedes the provisions of this section.

(d) EXPORT PROMOTION PROGRAM DEFINED.—For purposes of this title, the term "export promotion program" means any activity of the Department of Commerce designed to stimulate or assist United States businesses in marketing their goods and services abroad competitively with businesses from other countries, including, but not limited to—

(1) trade development (except for the trade adjustment assistance program) and dissemination of foreign marketing opportunities and other marketing information to United States producers of goods and services, including the expansion of foreign markets for United States textiles and apparel and any other United States products;

(2) the development of regional and multilateral economic policies which enhance United States trade and investment interests, and the provision of marketing services with respect to foreign countries and regions;

(3) the exhibition of United States goods in other countries; and

(4) the operations of the United States and Foreign Commercial Service, or any successor agency.

SEC. 202. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated $113,273,000 for each of the fiscal years 1985 and 1986 to the Department of Commerce to carry out export promotion programs.

SEC. 203. BARTER ARRANGEMENTS.

(a) REPORT ON STATUS OF FEDERAL BARTER PROGRAMS.—The Secretary of Agriculture and the Secretary of Energy shall, not later than 90 days after the date of the enactment of this Act, submit to the Congress a report on the status of Federal programs relating to the barter or exchange of commodities owned by the Commodity Credit Corporation for materials and products produced in foreign countries. Such report shall include details of any changes necessary in existing law to allow the Department of Agriculture and, in the case of petroleum resources, the Department of Energy, to implement fully any barter program.

(b) AUTHORITIES OF THE PRESIDENT.—The President is authorized—

(1) to barter stocks of agricultural commodities acquired by the Government for petroleum and petroleum products, and for other materials vital to the national interest, which are produced abroad, in situations in which sales would otherwise not occur; and

(2) to purchase petroleum and petroleum products, and other materials vital to the national interest, which are produced abroad and acquired by persons in the United States through barter for agricultural commodities produced in and exported from the United States through normal commercial trade channels.

(c) OTHER PROVISIONS OF LAW NOT AFFECTED.—In the case of any petroleum, petroleum products, or other materials vital to the national interest, which are acquired under subsection (b), nothing in this section shall be construed to render inapplicable the provisions of any law then in effect which apply to the storage, distribution, or use of such petroleum, petroleum products, or other materials vital to the national interest.

(d) CONVENTIONAL MARKETS NOT TO BE DISPLACED BY BARTERS.—The President shall take steps to ensure that, in making any barter described in subsection (a) or (b)(1) or any purchase authorized by subsection (b)(2), existing export markets for agricultural commodities operating on conventional business terms are safeguarded from displacement by the barter described in subsection (a), (b)(1), or (b)(2), as the case may be. In addition, the President shall ensure that any such barter is consistent with the international obligations of the United States, including the General Agreement on Tariffs and Trade.

(e) REPORT TO THE CONGRESS.—The Secretary of Energy shall report to the Congress on the effect on energy security and on domestic energy supplies of any action taken under this section which results in the acquisition by the Government of petroleum or petroleum products. Such report shall be submitted to the Congress not later than 90 days after such acquisition.

TITLE III—NUCLEAR AGREEMENTS FOR COOPERATION

SEC. 301. AGREEMENTS FOR COOPERATION.

(a) NOTIFICATION OF AND CONSULTATION WITH THE CONGRESS; HEARINGS.—Section 123 of the Atomic Energy Act of 1954 (42 U.S.C. 2153) is amended—

(1) in subsection a. by inserting after "Assessment Statement" the following: "(A) which shall analyze the consistency of the text of the proposed agreement for cooperation with all the requirements of this Act, with specific attention to whether the proposed agreement is consistent with each of the criteria set forth in this subsection, and (B)";

(2) in subsection b. by inserting before "the President" the following: "the President has submitted text of the proposed agreement for cooperation, together with the accompanying unclassified Nuclear Proliferation Assessment Statement, to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives, the President has consulted with such Committees for a period of not less than thirty days of continuous session (as defined in section 130 g. of this Act) concerning the consistency of the terms of the proposed agreement with all the requirements of this Act, and"; and

(3) in subsection d. by inserting before the sentence which begins "Any such proposed agreement" the following: "During the sixty-day period the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate shall each hold hearings on the proposed agreement for cooperation and submit a report to their respective bodies recommending whether it should be approved or disapproved.".

(b) CONGRESSIONAL REVIEW OF AGREEMENTS.—Subsection d. of section 123 of the Atomic Energy Act of 1954 (42 U.S.C. 2153(d)) is amended—

(1) by striking out "adopts a concurrent resolution" and inserting in lieu thereof "adopts, and there is enacted, a joint resolution";

(2) by striking out the period at the end of the first proviso and inserting in lieu thereof ": *Provided further,* That an agreement for cooperation exempted by the President pursuant to subsection a. from any requirement contained in that subsection shall not become effective unless the Congress adopts, and there is enacted, a joint resolution stating that the Congress does favor such agreement."; and

(3) by striking out "130 of this Act for the consideration of Presidential submissions" and inserting in lieu thereof "130 i. of this Act".

(c) PROCEDURES FOR CONSIDERATION OF AGREEMENTS.—

(1) TECHNICAL CHANGES.—Section 130 a. of the Atomic Energy Act of 1954 (42 U.S.C. 2159(a)) is amended—

(A) in the first sentence—

(i) by striking out "123 d.,"; and

(ii) by striking out ", and in addition, in the case of a proposed agreement for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c., the Committee on Armed Services of the House of Representatives and the Committee on Armed Services of the Senate,"; and

(B) in the proviso, by striking out "and if, in the case of a proposed agreement for cooperation arranged pursuant to subsection 91 c., 144 b., or 144 c. of this Act, the other relevant committee of that House has reported such a resolution, such committee shall be deemed discharged from further consideration of that resolution".

(2) PROCEDURES FOR CONSIDERATION OF JOINT RESOLUTIONS.—Section 130 of the Atomic Energy Act of 1954 is amended by adding at the end the following:

"i. (1) For the purposes of this subsection, the term 'joint resolution' means a joint resolution, the matter after the resolving clause of which is as follows: 'That the Congress (does or does not) favor the proposed agreement for cooperation transmitted to the Congress by the President on .', with the date of the transmission of the proposed agreement for cooperation inserted in the blank, and the affirmative or negative phrase within the parenthetical appropriately selected.

"(2) On the day on which a proposed agreement for cooperation is submitted to the House of Representatives and the Senate under section 123 d., a joint resolution with respect to such agreement for cooperation shall be introduced (by request) in the House by the chairman of the Committee on Foreign Affairs, for himself and the ranking minority member of the Committee, or by Members of the House designated by the chairman and ranking minority member; and shall be introduced (by request) in the Senate by the majority leader of the Senate, for himself and the minority leader of the Senate, or by Members of the Senate designated by the majority leader and minority leader of the Senate. If either House is not in session on the day on which such an agreement for cooperation is submitted, the joint resolution shall be introduced in that House, as provided in the preceding sentence, on the first day thereafter on which that House is in session.

"(3) All joint resolutions introduced in the House of Representatives shall be referred to the appropriate committee or committees, and all joint resolutions introduced in the Senate shall be referred to the Committee on Foreign Relations and in addition, in the case of a proposed agreement for cooperation arranged pursuant to section 91 c., 144 b., or 144 c., the Committee on Armed Services.

"(4) If the committee of either House to which a joint resolution has been referred has not reported it at the end of 45 days after its introduction, the committee shall

be discharged from further consideration of the joint resolution or of any other joint resolution introduced with respect to the same matter; except that, in the case of a joint resolution which has been referred to more than one committee, if before the end of that 45-day period one such committee has reported the joint resolution, any other committee to which the joint resolution was referred shall be discharged from further consideration of the joint resolution or of any other joint resolution introduced with respect to the same matter.

"(5) A joint resolution under this subsection shall be considered in the Senate in accordance with the provisions of section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976. For the purpose of expediting the consideration and passage of joint resolutions reported or discharged pursuant to the provisions of this subsection, it shall be in order for the Committee on Rules of the House of Representatives to present for consideration a resolution of the House of Representatives providing procedures for the immediate consideration of a joint resolution under this subsection which may be similar, if applicable, to the procedures set forth in section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976.

"(6) In the case of a joint resolution described in paragraph (1), if prior to the passage by one House of a joint resolution of that House, that House receives a joint resolution with respect to the same matter from the other House, then—

"(A) the procedure in that House shall be the same as if no joint resolution had been received from the other House; but

"(B) the vote on final passage shall be on the joint resolution of the other House.".

(d) APPLICABILITY OF AMENDMENTS.—The amendments made by this section shall apply to any agreement for cooperation which is entered into after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. ROTH. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Washington [Mr. BONKER] will be recognized for 20 minutes and the gentleman from Wisconsin [Mr. ROTH] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1786 is the extension and reauthorization of the Export Administration Act of 1979. This measure has been thoroughly considered by the House of Representatives in the last session of Congress. It has been the subject of extensive hearings and markup and over 6 months in conference with the other body in 15 separate conference meetings.

In the final hours of the last session, we were unable to resolve two very controversial features of this bill: Title III, which related to economic sanctions on South Africa, and section 10(G), which pertains to the authority of the Defense Department to review shipments to free world countries.

Now both those issues have been resolved. Title III has been removed and introduced as a separate bill and amendments to 10(G) have been removed from the legislation before us.

Mr. Speaker, H.R. 1786 attempts to balance the competing priorities which are affected by this complex legislation. It represents a consensus of the Foreign Affairs Committee, as well as a coordinated effort with other standing committees which have claimed some jurisdiction over this bill. The modifications we have made in H.R. 1786 have been closely coordinated with the other body and I have every reason to expect that the Senate will act promptly and favorably on this bill. It has the support of the business community and, I believe, the ranking member will attest to this later on, the support of the Reagan administration.

□ 1400

H.R. 1786 contains only minor modifications of what the conference committee produced in the last session of Congress. In addition to removing title III, which will be the subject of separate legislation, the committee also deleted the section dealing with nuclear exports, offered by Mr. WOLPE, which will also be addressed in a separate bill.

The Export Administration Act is the President's principal authority for controlling exports for foreign policy and for national security reasons. In this legislation, we have attempted to remove the President's authority to terminate existing contracts for foreign policy reasons. The contract sanctity provision protects all U.S. export contracts from disruption for foreign policy reasons. The retroactive application of foreign policy export controls brands American companies as unreliable suppliers in the eyes of our trading partners. As a result, foreign purchasers have sought out alternative foreign suppliers. The committee believes the "sanctity of contract" provision set forth in section 108 of H.R. 1786 will restore the reputation of U.S. exporting companies as reliable suppliers by extensively constraining the retroactive application of foreign policy export controls.

We have also included language that requires the President to consult before he imposes foreign policy controls in the future, with the Congress of the United States, industry, and our allies. We have established elaborate criteria which must be followed. We have provided for consideration of foreign availability in case the President feels disposed to use the foreign policy control authority in the future.

I believe that these contract sanctity provisions will restore the reputation of U.S. exporters as reliable suppliers in international markets.

We have also dealt effectively with national security problems. The reforms in H.R. 1786 enable U.S. high technology exports to compete more effectively in foreign markets. We have done this simply by decontrolling at least the low technology licensing requirements on shipments to countries that maintain controls in cooperation with the United States that otherwise would be destined for adversary nations.

On mid-level and high-level technology we have provided for expedited procedures so there will be no further delays in the licensing process. We have also put into the language a foreign availability section that will require the Secretary of Commerce to deal effectively with our controls when there are comparable products that are in circulation worldwide. He will have 18 months in which to negotiate with the other country to have that item controlled if it is in circulation, and if the Secretary does not succeed, then he has no choice but to decontrol the item.

We have also decontrolled those products that are being restricted solely because they have an embedded microprocessor. We have provided for notification to Congress of license application exceeding the statutory time limits for decision, the result of an amendment put forth by Congressman LES AUCOIN.

At the same time, we have also put forth additional programs for enforcement. We have done this by broadening the prohibitions and allowing for tougher penalties for violators of national security export controls. We have provided new authority to impose import controls against foreign violators of our export control policy, if approved by the allies. We have strengthened and clarified enforcement authorities for the customs and for the Commerce Department to deter and detect violations in the future.

This legislation also contains new provisions that protect the agricultural and commodity exports of this Nation. We have done this by exempting agricultural exports from national security controls, providing for sanctity of agricultural contracts both under foreign policy and the short supply sections of the legislation. Any future agricultural export embargo is subject to an automatic termination unless approved by the Congress in 60 days.

Let me say with respect to agricultural products, I cannot imagine how we can constrain the President any more effectively than by way of this legislation. There is simply no way that he can find authority in the future to tamper with existing con-

tracts on exports of agricultural commodities.

Finally, the legislation has a number of other provisions, including the extension of the existing prohibition on exports of Alaskan crude oil from the North Slope. For nuclear cooperation agreements, where the Congress previously has had a procedure for dealing with bilateral nuclear agreements that was ruled unconstitutional by the Chadda decision, we have provided a new two-tier procedure for congressional approval or disapproval of bilateral nuclear agreements. That is in this legislation as well.

Finally, we have an extension of the Export Administration Act that will carry this law through September 1989.

Now let me conclude, Mr. Speaker, by noting that since March 1984, we have been without an Export Administration Act. The 1979 act originally expired in September 1983 but the House and the Senate extended the law several times. Since March 1984, however, exports have been controlled under the International Emergency Economic Powers Act. It is a rather inadequate emergency authority under which to administer export controls, particularly for the antiboycott provision and the short supply provisions. Therefore, many parts of this elaborate law are subject to challenges because the President lacks the explicit authority he needs to carry out these controls effectively.

So I think it is the responsible and necessary action of this Congress to vote favorably on this legislation and hopefully the Senate will do likewise. That way we can restore the Export Administration Act authorities and procedures, and put this issue to rest for another 4 years.

Mr. Speaker, I would like to acknowledge the leadership of the ranking member of the committee, Mr. ROTH. He has been knowledgeable and informed, involved in all aspects of this complex legislation. He has worked cooperatively with the majority. He has had a very difficult job in that the administration has never spoken with a single voice on these issues. This legislation has been known to bitterly divide some of the departments and agencies that are involved in our export control program. Yet he has managed to keep communication going on all sides, as well as with the leadership in the other body.

I would also like to acknowledge Congressman ZSCHAU from California and Congressman BEREUTER, both of whom have been heavily involved in this legislation, as well as a number of Members on the majority side, notably Congressman BERMAN, for putting forth a considerable effort over a 2-year period of time to make the Export Administration Amendments Act of 1985 a reality.

Mr. Speaker, the Committee on Foreign Affairs in H.R. 1786 has adopted without change most of the provisions worked out in the last Congress by the conferees on similar bills passed in that Congress, H.R. 3231 and S. 979. In so doing, the committee endorses the reasoning and intent expressed on behalf of the House conferee, at least, in the draft statement of managers inserted in the CONGRESSIONAL RECORD of October 11, 1984, at pages H12150 and following. I would like to mention just a few sections of H.R. 1786 to review and reaffirm the intent of the committee in the 99th Congress, and the House conferees in the 98th Congress, on certain important points.

Among other amendments to section 3 of the act, the committee added a policy statement on sustaining the ability of scientists and other scholars freely to communicate their research findings. The committee is deeply concerned that an overly broad interpretation of the Export Administration Act may seriously limit, on grounds of national security, the legitimate scientific communication process on which scientific productivity in the United States depends.

Clearly, the strength of U.S. technology which underlies national security will not be maintained or improved if scientific and technological progress and innovation are inhibited as a result of overreaching security limitations on dissemination of scientific information under the Export Administration Act. As a National Academy of Sciences panel on Scientific Communication and National Security concluded in September 1982, the country's long-term security is best protected through the continued vitality and achievements of its economic, technical, scientific, and intellectual communities.

Moreover, science and national security are not antagonistic to one another. Scientists and Government leaders demonstrate a broad appreciation of the national security concept, including not only military applications and preparations, but also economic, cultural, and other considerations.

The committee shares the concerns expressed by the Academy panel. The policy statement on scientific enterprise was added to make explicit the view of the committee that traditional scientific communication activities of universities and the academic community, such as basic research, publications, and exchanges in the open classroom and among scholars, should be free from restriction unless the scientific information in question is subject to security classification under the President's Executive Order 12356 or its availability in the United States is limited by Government contract controls or proprietary or trade secret restrictions. The Committee recognizes that there are legitimate concerns about the flow of sensitive U.S. technology through scientific communication and exchanges which may be damaging to U.S. national security and that there is an important role for U.S. Government oversight.

However, the committee conferees believes that existing Government, authority to declare material classified, to control work performed under contracts, and to limit the entry to and movement within the United States of foreign nationals is adequate to meet virtually all of our reasonable security needs. Any application of the provisions of the Export Administration Act to traditional scientific communication that deviates from the views stated here bears a heavy burden of justification to the Congress.

Amendments to section 4(a) of the act repeal the authority of the Secretary to offer qualified general licenses and authorize the Secretary to offer distribution, comprehensive operations, project, and service supply licenses, except that distribution and comprehensive operations licenses may not be offered for exports to controlled countries.

In agreeing to the executive branch's request to repeal the authority of the Secretary to offer qualified general licenses, the committee does not intend that the Secretary rescind such licenses currently in effect; nor does the committee necessarily intend that qualified general licenses not be available in the future. The committee notes that the Secretary retains authority to create by regulation such types of licenses as may assist in the effective and efficient implementation of the act, and leaves to the Secretary's discretion the possibility of continuing to offer the qualified general license or to create new types of licenses which the Secretary finds appropriate to protect national security and reduce the burden of individual validated licenses on U.S. exporters and on U.S. Government agencies.

The committee strongly supports the use of licenses authorizing multiple exports. The use of such licenses for transactions between reliable suppliers and customers will result in more effective and efficient export control by permitting greater attention to unknown customers while enhancing the competitive position of U.S. firms through prompt deliveries to reliable consignees.

By designating in this bill certain multiple licensing procedures, such as the Comprehensive Operations License, the committee does not intend to limit the Secretary's discretionary authority to establish new categories of multiple licenses to assist in the effective and efficient implementation of export controls and enforcement of the EAA. (If the Secretary determines

that a multiple licensing procedure for exports of certain commodities or to certain geographic locations is needed for the effective and efficient operation of the act, he may establish the license under his general authority of section 4(a)(4) of the EAA.)

The committee endorses the distribution license for exports to countries other than the controlled countries listed pursuant to section 5(b) of the act, as amended, as a means of reducing the burden on exporters engaging in trade not prejudicial to the national security, and of reducing the license processing burden on administering authorities. The factors described in the provision to be considered when relevant in individual applications for a license are not to be determinative in creating categories or general criteria for denial of applications or for withdrawal of such a license. This does not limit the authority of the Secretary to determine which items on the control list are eligible for export under a distribution license.

The committee agreed to create a new type of license authorizing multiple exports, the comprehensive operations license, which is to be made available for exports to all countries other than the controlled countries listed pursuant to section 5(b) of the act, as amended. The license is intended to facilitate cooperative innovation and transfer of know-how among the affiliated companies, including subcontractors and suppliers, of the international operations of U.S. exporters. The comprehensive operations license should not affect or restrict the scope or availability of other licenses authorizing multiple exports, such as the distribution license.

The committee notes that in deleting the House requirement that a comprehensive operations license be valid for more than 1 year, their intent is to leave to the Secretary's discretion the length of time for which such a license would be valid. The committee expects that on a case-by-case basis the Secretary may find it appropriate to authorize such a license for a period of several years; however, the Secretary and the Commissioner of Customs, consistent with their respective authorities under section 12(a) of the act, are required to perform annual audits of exports pursuant to such licenses.

The committee agreed to amend section 5(b) of the act to eliminate U.S. licensing requirements for exports to Cocom countries with respect to relatively low-technology items that require only notification for export under Cocom multilateral controls, that is, for items specified in the Administrative Exception Notes [AEN's] of the control list. The committee preserved U.S. licensing requirements for all other shipments of controlled goods and technology to such cooperating countries but, through amendments in section 111 of this bill, modified the licensing process, effective 4 months after the date of enactment of this bill, to provide greater speed and predictability for export license applicants.

The application process for individual validated licenses for exports to such countries under section 10 of the act is amended to provide that if the Secretary does not inform the applicant within 15 working days after receipt of the export license application of the disposition of the application or that more time is necessary to consider it, a license automatically becomes valid and effective and shipment can be made pursuant to that license. If the Secretary notifies the applicant that more time is necessary to consider the application, an additional 15-working-day period is available for the Secretary to take action. At the end of this second 15-working-day period, however, absent action by the Secretary to deny, a license automatically becomes valid and effective.

The committee intends that the notification by the Department of Commerce to an export license applicant that the Department has received an export license application shall contain an application number that shall be identical to the number of the subsequent license to export, and when a license becomes effective, either by Government action or by the expiration of the specified time periods, the exporter may refer to that number—such as on a Shipper's Export Declaration—in exporting the goods or technology specified in the application, without waiting to receive a formal license to export.

U.S. exporters gain certainty that they may ship their products to cooperating countries after no more than 15 or, if necessary, 30 working days of submitting an application, unless the application is denied within such time periods. Export authority obtained in this manner constitutes an individual validated export license in all respects, while general and multiple licensing procedures remain unaffected.

The same treatment of license applications shall be applied, as provided in section 5(k), as amended, to all exports to non-Cocom countries which cooperate formally or informally with the United States in the application of export controls to controlled countries.

The committee's review of the implementation of the Export Administration Act during the last session of the Congress has revealed instances in which the competitiveness of U.S. exporters has been hampered by the inefficiency of the agencies with regulatory and enforcement authority. Specifically, the committee is aware that the application of the export administration regulations in some cases is inconsistent and irrational, and that some U.S. exporters and foreign customers are not accorded the fair and equal treatment on a day-to-day basis to which they are entitled.

The committee has not attempted to specifically address these problems in this bill, in the belief that it is the express policy of the United States that these controls be administered fairly. The committee intends, however, to monitor closely the administrative practices in the future and, if necessary, to consider remedial legislation.

The committee agreed to expand the category of agreements to export technical data which must be reported to the Secretary under section 5(j) of the act, and to retain the existing exemption for educational institutions.

In retaining the exemption in current law for colleges, universities, and other educational institutions from the requirement to report agreements which involve technical cooperation, the committee notes and emphasizes that educational institutions remain subject to the same controls and license requirements for technology transfers as all other exporters. Prior reporting of technical cooperation agreements, however, is a mechanism for possible prior restraint of scientific discourse. The courts have generally recognized and upheld a freer standard for such discourse in the academic setting than for commercial speech. (See, for example, *Trane Co.* v. *Baldrige*, 552 Fed. Supp. 1378, Aff'd 728 F. 2d 915.)

On that basis, the committee concludes that it is appropriate to require prior reporting of commercial agreements with foreign government agencies, but to place no such requirement on colleges, universities, and other educational institutions, which must nevertheless obtain appropriate licenses before exporting any controlled technology, technical data, or goods. It is the intent of the committee that U.S. Government agencies should require, as part of U.S. Government research contracts with colleges, universities, and other educational institutions, reporting to the Commerce Department of such institutions' agreements with any agency of the Government of a controlled country that might involve transfer of technology or technical data, to the extent that any U.S. Government agency might wish to be informed of such agreements.

The committee is particularly concerned by recent reports that the Defense Department is imposing restrictions on the exchange of technical and scientific information by educational institutions through international conferences and other scholarly activities. The Defense Department has no unilateral authority under this legislation or the Export Administration Act to determine what activities of education-

al institutions may require an export license, to require prior reporting, or to exercise prior censorship of scientific meetings and exchanges unless, as I have noted, the information involved comes under a Defense Department contract with the institution or individuals involved which specifically contains such a stipulation. It would appear that the Defense Department may be taking actions which exceed its authority.

It is certainly the intention of this legislation to reaffirm the exemption for universities and educational institutions from prior reporting requirements, and to reaffirm that any export license required of those institutions for the export of any technology is subject to the procedures of the Export Administration Act. Those procedures give the Secretary of Commerce final authority to interpret licensing requirements, with the advice of the Defense Department is some circumstances, and to issue or deny licenses. In no case under this legislation, however, are such authorities to be excercised directly or solely by the Department of Defense.

The committee agreed to amend section 5(k) of the act to require negotiations on controls with countries which are not members, of Cocom, to provide that countries which enter into agreements on export restrictions comparable in practice to those of Cocom are to be treated like Cocom countries for purposes of export controls, and to specify that treating other countries like Cocom countries includes comparable treatment on exports by multiple as well as individual licenses, the elimination of licenses for low-technology items indicated in the Administration Exception Notes, and the expedited processing of applications provided in the new subsection (o) of section 10 of the act.

The committee feels that the Secretary should focus on the practical effect of agreements with non-Cocom countries in restricting transfer of goods and technology to potential adversaries, rather than the formal or informal nature of the agreements or arrangements, in deciding whether to extend favorable licensing treatment on exports to such cooperating countries.

The committee agreed to amend section 5 of the act to state that controls may not be imposed on a good containing an embedded microprocessor unless the function of the good itself is such that export of the good would make a significant contribution to the military potential of a controlled country. The committee concurred with actions of the Secretary, in consultation with the Secretary of Defense, in April 1984 to decontrol 94 categories of unilaterally-controlled instruments incorporating microprocessors.

The committee is deeply concerned, however, that the United States may have overstated the agreement of Cocom during the recently-completed Cocom list review in U.S. regulations issued on December 31, 1984, which appear to reimpose controls on the decontrolled instruments through an impractical definition of "embedded." The committee notes that no comparable definition yet has appeared in the regulations of any other Cocom member. The December 31, 1984, regulations therefore constitute unilateral U.S. controls. The committee notes that no national security justification has been provided for reimposing such controls, that the definition of "embedded" is inconsistent with the intent of the committee, and that an apparently unilateral control over previously decontrolled items has been deceptively promulgated in the regulations as a multilateral control. The committee expects a national security justification for controlling any nonstrategic item with an embedded microprocessor and a delay in the effective date of the December 31, 1984, regulations until the regulations can be revised to eliminate all unilateral controls over any good or technology and to conform U.S. regulations to the Cocom agreement and the intent of the committee in adopting this provision.

The committee agreed in section 108 to a number of constraints on the President's authority to impose new foreign policy controls, including additional requirements for consultations and reports, and greater attention to foreign availability of items controlled for foreign policy purposes.

It is important to note that the act refers to imposition, expansion, or extension of foreign policy controls. Controls in effect on the date of enactment, or made effective by enactment, may be extended for an additional time period upon their renewal date and in some cases are exempted from these new constraints. But addition of items or destinations to the control list constitutes imposition of new controls, even if the items or destinations are added to an existing category of controls. Imposition of new controls or expansion of existing controls after the date of enactment is subject to these new constraints.

Section 113 of H.R. 1786 amends section 12(a) of the Export Administration Act regarding investigation and other enforcement authorities. The intent of these amendments is that the Secretary of Commerce and the Commissioner of Customs should have complementary and cooperative roles in the enforcement of this act inside and outside the United States. The committee does not intend for the Commissioner of Customs to have exclusive responsibility for investigations outside the United States. The Commerce Department should continue to use and upgrade its prelicense checks and post-shipment verification techniques. The committee intends that the Commerce Department have independent authority to investigate potential export control violations, both domestically and overseas. Any investigations undertaken, expanded, or continued on the basis of prelicense or post-shipment inquiries should be considered part of the prelicensing and post-shipment verification authority granted to Commerce in this act.

The committee intends that the Commission of Customs have primary, but again not exclusive, responsibility for enforcement at ports of entry and exit from the United States. For purposes of this act, the term ports of entry and exit from the United States is limited to the actual areas at which international carriers arrive and depart, such as airports, boat docks, or bus terminals, and public and private premises immediately adjacent to such areas which provide direct services to ports, such as port authority facilities, warehouses, and freight forwarding terminals. It also includes the international vehicles and carriers entering such port areas.

In carrying out its enforcement and investigation authority inside the United States, at places other than ports of entry and exit from the United States, Commerce is not required to consult with our seek the concurrence of the Commissioner of Customs. Exercise by Commerce of its authority at ports of entry and exit requires the concurrence of the Commissioner of Customs or a person designated by the Commissioner. The concurrence should not unreasonably be withheld, and should be provided in a timely manner so that law enforcement officials can effectively prevent the illegal export of goods and technology. To that end, the committee intends that Customs and Commerce development procedures which will allow for swift and routine concurrence on the part of the Commissioner.

Section 12(c) of the act is amended to provide for greater sharing of information between the Commerce Department and the Customs Service. This amendment is not intended, however, to provide or entitle either agency to unlimited access to the other's enforcement or licensing data. Rather, the amendment is intended to provide for a reasonable and timely sharing of information pertinent to ongoing investigations, export control violations, and license decisions. Specifically, whenever the Secretary uncovers evidence or information pertaining to an ongoing investigation of the Commissioner of Customs, the Secretary shall provide that information or evidence to the Commissioner. Whenever the Commissioner uncovers evidence or information pertaining to

an ongoing investigation being conducted by the Secretary, or whenever the Commissioner uncovers evidence or information pertaining to an export control violation, the Commissioner shall provide such information or evidence to the Secretary. The sharing of data by the Commissioner is essential not only to further enforcement efforts, but also to ensure that the Secretary makes informed licensing decisions in the meantime. It is not intended that the agency furnishing information or evidence is, by so doing, relinquishing investigatory jurisdiction over the matter or case to which the information or evidence pertains. Whenever the two agencies may determine that they are independently investigating the same apparent export control violations, the Secretary and Commissioner should take appropriate steps to establish which agency will have primary responsibility for completion of the investigation.

The committee expects that H.R. 1786 will result in a greater number of criminal prosecutions for violations of the EAA. However, I also wish to emphasize that the Commerce Department should continue to bring administrative proceedings seeking to impose civil penalties and other administrative sanctions. In this regard, I understand that some confusion has arisen concerning the time limits for initiating administrative actions and on bringing actions in Federal court to collect civil penalties.

Our intent is that the Commerce Department must bring its administrative case within 5 years from the date the violation occurred. Thereafter, if it is necessary for the Government to seek to enforce collection of the civil penalty, the complaint must be filed in Federal court within 5 years from the date the penalty was due, but not paid. Any other interpretation would have the Commerce Department discover, investigate, prosecute, and, file a complaint in U.S. District Court to collect the penalty imposed, but not paid, in the administrative proceeding all within 5 years from the date of the violation. In many instances, particularly those involving well-hidden diversions through foreign countries, such a task would be impossible.

Section 113 of H.R. 1786 requires that the grant of police powers given by this bill to the Department of Commerce and the U.S. Customs Service shall be exercised pursuant to regulations promulgated by the Attorney General concerning the use of police powers. The intent of this provision is to ensure that, through guidance to be provided by the Attorney General, police powers are exercised in a uniform manner by all agencies that have the legislative authority to use such powers. This provision is not intended to dilute or fundamentally to alter, in any manner, the authority of Commerce and Customs to exercise the police powers given to them by this bill.

Section 123 of the Atomic Energy Act, as amended by the 1978 Nuclear Non-Proliferation Act [NNPA], 42 U.S.C. 2153, requires that proposed agreements for nuclear cooperation with other countries shall include the terms, duration, nature, scope of cooperation, and other requirements listed in that section. Subsection (d) of that section presently provides that the President must submit proposed agreements for nuclear cooperation to the Congress and that such agreements cannot become effective if, during a 60-day review period, Congress adopts a concurrent resolution stating Congress does not favor the agreement. The Supreme Court's June 1983, Chadha decision raised serious questions about the constitutionality of that concurrent resolution disapproval procedure. In order to remedy that legal problem, and to ensure an adequate and timely congressional review procedure for agreements for nuclear cooperation proposed by the President, the provisions of this bill dealing with such agreements make changes to the existing provisions of sections 123 and 130.

Section 123(a) presently requires, among other things, that the Director of the Arms Control and Disarmament Agency [ACDA] must prepare a nuclear proliferation assessment statement regarding any proposed agreement for peaceful nuclear cooperation. This bill amends section 123(a) to require that any such assessment statement must analyze the consistency of the text of the proposed agreement for cooperation with all the requirements of this act, with specific attention to whether the proposed agreement is consistent with each of the criteria set forth in section 123(a). This provision is intended to ensure that the ACDA director specifically analyzes in writing why any proposed agreement is or is not consistent with each of these nine criteria.

This provision is very important because section 123(d) of the bill is also amended to provide that if the President exempts a proposed agreement from one or more of the criteria for nuclear agreements which are set forth in section 123(a), then the agreement cannot be brought into force unless the Congress adopts, and there is enacted, a joint resolution stating that the Congress does favor the agreement. If there is no exemption, then such agreements for cooperation can be brought into effect after the congressional review period is completed unless Congress adopts a joint resolution of disapproval.

This bill also amends section 123(b) of the present law to require that before the beginning of the 60-day congressional review period set forth in section 123(d), as amended by this bill, the President submit the text of a proposed agreement along with the Nuclear Proliferation Assessment Statement to the Committees on Foreign Affairs and Foreign Relations of the House and Senate respectively, and consult with these committees for a period of not less than 30 days of continuous session concerning the consistency of the terms of the proposed agreement with all the requirements of the Atomic Energy Act. This special provision—the amendment to section 123(b)—does not have any precedential value for other agreements concluded by the President and is included here solely because we are adopting a new system for nuclear cooperation agreements so that the balance between the Congress and the President on nuclear agreements that was upset by the Chadha decision can be restored. Since the track chosen for approving such agreements depends on whether they are outside the parameters of the nine section 123(a) nonproliferation criteria, the provision is intended to ensure that the committees can advise the President on that all important issue during the 30-day prior consultation period but not necessarily before that agreement is signed.

For example, if during the 30-day prior consultation period either the House Foreign Affairs Committee or the Senate Foreign Relations Committee indicates that in its judgment the proposed agreement is outside the parameters of the nine section 123(a) nonproliferation criteria, the Congress expects that the President will submit an exemption. When an exemption is submitted, the amendment to section 123(d) requires that the Congress pass a joint resolution of approval before such an agreement becomes effective. During the 30-day period of informal committee review, the respective committees could, of course, conduct hearings to assist their Members in reaching a recommendation as to whether the President should submit an exemption.

The provisions of section 123(b), as amended, are not intended to insert Congress into the process of negotiating agreements. After the 30-day period of informal consultation, the President may choose to renegotiate an agreement. However, the provision does not require renegotiation of an agreement prior to its final consideration by the Congress. These provisions are intended to ensure that the President has the advice of the Congress as to whether there should be an exemption from any of the nine nonproliferation criteria of section 123(a).

The steps for submitting, consulting and approving nuclear cooperation agreements set forth in section 123(b), as amended, need not be taken in any particular sequence. It is up to the

President to decide if he wants to authorize the execution of an agreement for cooperation before seeking congressional advice regarding whether an exemption is required, and thus the agreement may or may not be approved and executed prior to submission for the 30-day prior consultation review period. While the President may choose to resubmit an agreement following the 30-day consultation period, these amendments do not require separate submissions under section 123(b) and section 123(d). A single submission would satisfy the law. The Congress fully expects, however, that the President will resubmit any agreement for which he has not submitted an exemption if either committee during the prior consultation period recommends that an exemption is required.

This bill, as noted above, also amends section 123(d) of present law to provide that if the President exempts a proposed agreement for nuclear cooperation from any section 123(a) nonproliferation criteria, then the agreement cannot be brought into force unless the Congress enacts a joint resolution of approval. If there is no exemption, the agreement can go into effect after the 60-day congressional review period in section 123(d) unless Congress passes a joint resolution of disapproval.

Section 123(d) is further amended to provide that during the 60-day period proposed agreements for nuclear cooperation are formally before the Congress that the Committees on Foreign Affairs and Foreign Relations of the House and Senate shall hold hearings on them and report to their respective bodies whether such agreements should be approved or disapproved. This is to ensure that Members of each body are given an opportunity to cast an informed vote on such agreements. It is our clear intention that the respective committees shall hold hearings on each proposed agreement for cooperation. We fully expect and are directing and mandating in law that the committees of jurisdiction comply with this requirement.

However, if for some reason, either of the committees ever fails to hold the hearings and/or submit the reports by the end of the congressional review period mandated by this subsection, that would not constitute a procedural defect in the congressional review of an agreement for nuclear cooperattion, and would not prevent the entry into force of the agreement. This amendment to section 123 makes clear that only a joint resolution of disapproval may prevent the entry into force of such an agreement unless there has been a Presidential exemption of a required provision, in which case a joint resolution of approval is needed to permit such an agreement to come into force. If unanticipated circumstances prevent a hearing from being held or a report from being issued during the statutory period, we fully expect the appropriate committee chairman will explain in writing to the respective House the precise reasons for such an unexpected omission.

Section 130 of existing law has also been amended with respect to its provisions providing expedited procedures for consideration of nuclear cooperation agreements. That section has been amended to state, among other things, that all joint resolutions of approval and disapproval which are introduced in the House of Representatives shall be referred to the "appropriate Committee or Committees." This does not mean that such agreements or resolutions relating to them will be referred to an expanded number of committees in the House or will be subjected to hearings before an expanded number of committees in the House.

It is our intention that both agreements and related resolutions dealing with civil nuclear cooperation will continue to be referred to the House Foreign Affairs Committee, as under current law, and that agreements and resolutions for defense nuclear cooperation will continue to be referred to the Armed Services Committee as well. This is what would occur currently under House rules, and this is appropriate in view of the expertise and jurisdiction of these committees in this area.

The SPEAKER pro tempore (Mr. MINETA). The gentleman from Washington has consumed 10 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me begin by complimenting our chairman Mr. BONKER for his excellent statement and for his expertise in this area. Mr. BONKER is possibly the most gifted Member of this body and it is a pleasure to work with him. I also wish to compliment all the members of our subcommittee and the staff, for their diligent and superb work. When we began work on this comprehensive and far-reaching legislation, 2½ years ago, we had four goals in mind.

First, to reduce the number of goods and technology subject to export controls;

Second, to increase and improve the scrutiny of any foreign sales of our most sophisticated and militarily critical technologies;

Third, to improve the efficiency of the export licensing process so as not to unduly handicap our exporters' ability to be competitive; and

Fourth, to establish a set of criteria and procedural requirements to govern the use of foreign policy controls.

These goals have been addressed in this legislation. This is a complicated bill and probably the most important legislation affecting trade to come before Congress this session.

To hammer out a compromise agreed to by all, was not an easy task. But I think we have managed to do it. This compromise enjoys the support of the Senate and the House, Republicans and Democrats, the administration and the business community.

We have a moral obligation to enact this legislation into law without delay. Export controls strike at the national security of our Nation. The President is now invoking national emergency measures to control and prohibit the export of U.S. technology to our adversaries abroad, and he has been forced to use these extraordinary measures because Congress has not passed an EAA bill.

There is no more urgent trade matter before the Congress than the renewal of the Export Administration Act. Exporters in your district and mine are subjected to lengthy delays in obtaining export licenses. Critical high-technology items are being diverted to the Soviet bloc because Government resources are spread too thin. The export licensing morass urgently requires corrections.

That is why I reintroduced a renewal of the Export Administration Act—H.R. 28—on the very first day of this Congress. Under the very fine leadership of our subcommittee chairman, the gentleman from Washington [Mr. BONKER] we immediately took action in our subcommittee and in our full committee to report this bill to the floor, now as a committee bill H.R. 1756. Congressman BONKER and I agreed early in this session that a fast-track approach to this legislation was essential.

Many people contributed to this bill. I would like to extend my personal gratitude to the gentleman from Washington for his dedication to this bill. It is a truly bipartisan product. Let me just enumerate some of the improvements contained in this bill:

With respect to national security—

It imposes much tougher penalties for violators of national security export controls.

It grants authority to the President to impose import controls against foreign violators of export controls.

It adds enforcement powers for Customs and Commerce to deter and detect violations.

With respect to streamlining the export licensing process—

We have eliminated the need for some 40 percent of the volume of export licenses now required. Exporters selling low-technology items to our

allies will no longer have to file for export licensing permits.

We have mandated a faster licensing process in all product categories. With respect to high-technology exports to our allies, our exporters must receive a response on their applications for licenses within 15 days.

The bill provides a process for eliminating restrictions on U.S. exports of items freely available in other countries.

Agricultural exports are largely exempted from national security, foreign policy, and short supply controls.

Any future agricultural export embargoes are subject to automatic termination unless a continuation is approved by Congress within 60 days.

With respect to foreign policy controls—

The criteria that the President must meet in order to impose foreign policy controls are significantly tightened. That is, trade sanctions can only be used if all other channels of diplomacy have been tried.

The President must now take into account, among other criteria, the foreign availability of comparable goods and technology before imposing trade sanctions.

And, a "contract sanctity" provision protects all U.S. exports covered by contracts in the event of trade sanctions.

This is a comprehensive bill that will make a substantial difference in our conduct of national security, foreign policy, and short supply controls. We have worked diligently to take into account the many diverse concerns of the administration, our allies, and the business community and to meet the four goals which we established for ourselves 2½ years ago. I therefore ask my colleagues to join me in passing H.R. 1786.

□ 1410

Mr. BONKER. Mr. Speaker, I yield 1 minute to the gentleman from Oregon [Mr. AuCoin].

Mr. AuCOIN. Mr. Speaker, I rise in support of the export policy amendments before us today and urge their prompt adoption.

I am particularly pleased that the bill before us includes the amendment I authored in the last Congress—an amendment which is critical to the future of the high technology industry in Oregon and elsewhere—to expedite export licenses for U.S. manufacturers.

International competition in the high-technology sector is ferocious, a fact all of us here know only too well. Innovation is the lifeblood of that competition, and the premium is on being the first to the market with a new product. Unfortunately, the ability of American innovators to win customers against foreign competitors is hamstrung by infuriating delays in U.S. Government export applications. Companies in my district are still waiting for approval of export applications involving our own allies filed more than a year ago—applications that are supposed to be handled within 180 days.

We address that problem in this bill with a provision that holds agencies responsible for processing export applications accountable to Congress for undue delays. We give the oversight committees of Congress a new tool with which to identify and alleviate backlogs that damage the credibility of U.S. manufacturers as reliable suppliers, cost them customers and profits abroad, and cost jobs and payrolls at home.

I also want to commend my colleague, Mr. Bonker, and members of the committee, for including provisions which recognize that every piece of U.S. equipment that has a microchip in it isn't a threat to our national security. Companies in my district, such as Tektronix, have told me that this is one of their top priorities. This bill takes a first step in removing excessive controls that only damage our competitive position abroad. And, as new technologies develop and others become less sensitive, we should keep in mind that need to impose controls only on those products which raise legitimate national security concerns.

Mr. Speaker, one of the very regrettable casualties of the last session of Congress was the failure of the House and Senate to reach a consensus on what our national policies should be concerning the products we export to other countries * * * regrettable because every day's delay in resolving this critical policy dispute costs us jobs and profits here at home. A year ago, this country ended up with a trade deficit of $70 billion, then a record. We've just ended a year in which the trade deficit hit $123 billion.

Every billion-dollar increment in this soaring deficit represents 20,000 to 40,000 jobs here at home that aren't created.

By adopting the export policy amendments before the House today, we can begin to attack this problem—not with protectionism—but by implementing sensible policies that will give U.S. manufacturers some predictability in shaping their strategies for marketing their products overseas.

Mr. BONKER. Mr. Speaker, I yield 2 minutes to the distingiushed chairman of the Committee on Energy and Commerce, the gentleman from Michigan [Mr. Dingell].

Mr. DINGELL. Mr. Speaker, I want to commend the distinguished gentleman from Washington State, the chairman of the subcommittee; and my distinguished friend from Florida, the chairman of the full committee.

I observe that we can rejoice that we were able to resolve in such a gentlemanly fashion the jurisdictional concerns that have involved this bill to the satisfaction of both the distinguished Committee on Foreign Affairs and the Committee on Energy and Commerce.

As I note, H.R. 1786 addresses certain energy matters and certain programs and activities of the Department of Commerce under the jurisdiction of the Commerce Committee, which are defined as export promotion.

Because the Committee on Foreign Affairs agreed to certain energy amendments and an explicit recognition that some of the programs and activities covered by section 201 fall within the jurisdiction of the Committee on Energy and Commerce, my committee did not insist on sequential referral.

I want to again commend my colleague from Washington and also my colleague from Florida, the chairman of the full committee, because of this.

I note that as a part of the resolution of these concerns, an exchange of correspondence between the chairmen of the two committees addressed these various jurisdictional concerns and that those documents will be included in the record.

I also wish to express my thanks to my colleagues, the gentleman from Washington, and also the gentleman from Florida, for the gracious and statement-like fashion in which they and their staffs handled this matter so that we were able to resolve the issues that related to jurisdiction in an expeditious and gentlemanly fashion.

Mr. BONKER. I thank the gentleman, and speaking on behalf of the chairman of the full committee, we concur with the sentiments which the gentleman has just expressed. We also are rejoicing that we were able to settle these jurisdictional issues.

Mr. ROTH. Mr. Speaker, I yield 3 minutes to the ranking member of the Committee on Foreign Affairs, the very able gentleman from Michigan [Mr. Broomfield].

Mr. BROOMFIELD. Mr. Speaker, I would like to take this opportunity to commend the gentleman from Wisconsin [Mr. Roth] and the subcommittee chairman, Mr. Bonker, for their leadership in developing legislation to reauthorize the Export Administration Act. Mr. Roth, as the ranking Republican on the subcommittee, has helped provide the leadership and dedication necessary to bring this legislation to the House floor.

On the first day of this session, he introduced H.R. 28—the fast-track vehicle needed for rallying a coalition that includes the administration, the business community, and a bipartisan team in the House and the Senate. With only minor technical amendments made to H.R. 28, a clean bill—

H.R. 1786—was reported out of the Foreign Affairs Committee and is before us today.

An exhaustive evaluation was made throughout the last Congress to devise ways to deter more effectively the illicit transfer of American technology to the Eastern bloc. This bill contains many new provisions that will help safeguard our militarily critical technologies from falling into Soviet hands. At the same time, many improvements are made in this bill to correct a deficient and cumbersome export licensing system that has caused unnecessary hardships for many American exporters.

In my opinion, this bill strikes a balance between the twin objectives of abating the transfer of sensitive Western technologies to the Soviet bloc and streamlining the export licensing process so as not to unduly handicap the competitiveness of U.S. exporters.

Business has a right to expect the Congress to set standards and criteria for exporting U.S. technology abroad and it behooves us to act now. We, as a Nation, cannot afford to delay this effort any longer. I again extend my sincere congratulations to Mr. ROTH, Mr. BONKER, and the staff for the decisive action taken in this session to move this bill forward. I urge my colleagues to support H.R. 1786.

□ 1420

Mr. ROTH. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL], who I am sure will agree with us because he usually agrees with us on these matters.

Mr. FRENZEL. Mr. Speaker, I want to endorse the comments made by the distinguished gentleman from Washington, the chairman of the Subcommittee on International Economic Policy, and to congratulate him and the distinguished gentleman from Wisconsin for their persistence in moving this bill along.

Members will recall that the House bill was passed nearly a year ago at this time. It was in conference for about 8 months, many long weeks of consistent actual discussion with the other body in that conference. As the last Congress adjourned, we were not able to reach agreement in the conference committee. Now the managers of the bill, particularly the gentleman from Washington and the gentleman from Wisconsin, have brought us back a bill which is very similar to the House position of last year. In my judgment, it is a good compromise.

We do not yet have a bill that suits exactly what the House would have wanted. We do not have a bill that suits what I would have wanted or probably exactly the way the gentleman from Wisconsin and the gentleman from Washington would like to see that bill. Nevertheless, it is an enormous improvement. It does provide a better opportunity for American companies, particularly smaller ones, to move goods in world commerce, both West West and West East and, therefore, it will help America's export prospects, in my judgment.

I do believe that there have been seldom wider differences between the two bodies of Congress than in this bill. The other body took a very strong position on national defense, ours on expanding commerce. I think this is a good compromise. I hope it will be accepted.

Mr. ROTH. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. PURSELL].

Mr. PURSELL. Mr. Speaker, I am not a member of the committee, but I and many other Members of Congress on both sides of the aisle who are trying to reduce Federal spending in a fair and equitable way are carefully watching these authorization bills. I am disappointed that the bill is on the suspension calendar, that we have not had a chance to look at the hard numbers because no CBO estimates were available and, due to the circumstances surrounding the bill, no report was filed, and, finally, that amendments thereto that would bring this bill back to the 1985 appropriation level are not permitted because it is on the Suspension Calendar.

As I understand the bill, and I would encourage either manager of the bill to correct me if I am wrong, we are requesting $24.6 million for administration in this piece of legislation for 1985 which matches the fiscal year 1985 appropriation, obtained in the last Congress through a waiver of the House rules. This legislation also calls for a 1986 authorization of $29.6 million for administration only. The export promotion activities portion of the bill is $113.3 million per year through 1989. If you look at this and if my figures are correct—and I think we are going to have a colloquy on the other side with the gentleman from Connecticut [Mr. MORRISON] later—this authorization bill on suspension calls for an increase in administrative expenditures alone of 21 percent. My first question to our chairman is: Are we getting a 21-percent increase in administration in this authorization bill?

Mr. BONKER. If the gentleman will yield, first of all, the figures that are in the measure before us were all recommended by the administration. These were not increases by the committee.

The SPEAKER pro tempore. The time of the gentleman from Michigan [Mr. PURSELL] has expired.

Mr. BONKER. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan.

If the gentleman will yield further, the figures come from the administration. They are the administration's requests for fiscal years 1985 and 1986.

The legislation enhances the enforcement responsibilities of the Department of Commerce. Hopefully, the additional funds will equip them to better process licenses that until now have been subject to lengthy delays and which has frustrated American exporters and hindered U.S. competitiveness.

Mr. PURSELL. How many new personnel will this authorization bill give us over and above 1985 levels?

Mr. BONKER. There is a distinction between money that is set aside for the administration of the licensing program and the money that is set aside for enforcement. Most of the increases have come with respect to enforcement.

This is one issue of which there was a consensus between the Senate and the House, and that is Commerce had to do more with respect to enforcement.

I might add that, while we have increased Commerce's enforcement budget slightly, we have cut back the Customs Service budget for enforcement on export controls by about $16 million. So, overall, the taxpayer is much better off with this legislations.

Mr. PURSELL. But that is in Treasury, not in Commerce. I will ask the gentleman again—I have not had an answer yet—how many additional personnel are we hiring under this authorization bill? All programs: administration, new office, restructuring, total, aggregate, bottom line, personnel.

Mr. BONKER. Let me read from the administration's fiscal year 1985 budget proposal: The increase to be used to audit distribution licenses, that will be 31 positions; support Cocom and the technical advisory committee's work to integrate the militarily critical technologies list, that is 5 positions; assess foreign availability which is required now in this legislation, 24 positions.

Mr. PURSELL What is the total number?

Mr. BONKER. The total number would be 60 new positions.

Mr. PURSELL. Sixty new positions?

Mr. BONKER Yes.

Mr. PURSELL. I think it is unfortunate, in the limited time here, with all due respect to the committee, that we have an expenditure in growth not only in dollars but also in personnel. In light of the deficit, I would suggest that the bill should not have been on the Suspension Calendar so that we could have had full debate on this.

I am not against safeguarding national security or facilitating commerce, two of the basic functions of this country's export administration activities. However, I am against increasing funding for any program in fiscal year 1986 over what was appropriated in fiscal year 1985.

At least a freeze in funding must be accomplished in fiscal year 1986 if we are to make any progress at reducing the deficit. The budget deficit now under current law will increase to well over $200 billion next fiscal year—and that accounts for inflation. If we increase budgets on top of that, the budget deficit will go even higher. To get a real reduction in the deficit, we must freeze spending at fiscal year 1985 appropriated levels.

Unfortunately, because this bill is being considered on the Suspension Calendar, there is no ability to amend this bill to reduce funding fiscal year 1985 appropriated levels. We did that with the NASA authorization for fiscal year 1986 2 weeks ago on this very floor. The gentleman from Connecticut [Mr. MORRISON] and myself introduced an amendment to freeze NASA authorization for fiscal year 1986 at fiscal year 1985 appropriated levels. It passed overwhelmingly—369 to 36. The Members of this body expressed their will in a bipartisan and unequivocal way, and hence expressed the will of the people of this country—that we have to reduce Federal spending and hence the deficit. And we have to do it across the board—there can be no sacred cows. But without the ability to amend this bill as we did the NASA authorization and as we will do again this week with National Science Foundation and National Bureau of Standards authorizations for fiscal year 1986, we have no alternative to represent that will but to vote against the bill, to continue across the board the movement to freeze spending, and to send a message to those committees that have yet to report out their authorizations that an overwhelming number of Members of this House are serious in their commitment to reduce Federal spending and hence the burgeoning Federal deficit, which threatens the economic health of this country.

I therefore urge my colleagues to oppose this legislation. Thank you.

Mr. ROTH. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. ZSCHAU].

Mr. ZSCHAU. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 1786. This is a bill that has been carefully worked out over a 2-year period with hours of hearings, hours of discussions in the House of Representatives, in the various committee levels, and then over a period of months last year with the other body in conference. It is a tribute to the leadership of the gentleman from Washington [Mr. BONKER] and the leadership of the gentleman from Wisconsin [Mr. ROTH] that we have brought together this carefully crafted bill. It attempts to do almost the impossible, the impossible task of controlling better our militarily critical technologies, while streamlining the procedures under which export licenses are granted, so that our exporting companies are not subjected to undue or unncecssary delays as they attempt to compete in very competitive markets.

The question was raised earlier by the gentleman from Michigan [Mr. PURSELL]: How can we justify in times of large budget deficits a small increase in millions of dollars for this legislation?

□ 1430

If we want to have economic growth in this country, we are going to have to have a strong export policy. The amount of money that we are spending in this bill in order to speed up the licensing process and enable our companies to compete better, will be paid for many, many times by the increase in exports and the increase in economic growth.

I think that at a time when our trade deficit is so large, when our budget deficit is so large, this is a very high-leverage way of expending money now in order to improve the overall economic situation.

I would, in conclusion, like to pose a question to the gentleman from Washington [Mr. BONKER], the chairman of the subcommittee. I would like to ask this question of his interpretation of a change that we did not make in H.R. 1786. I notice that H.R. 1786 does not amend the section 10G of the Export Administration Act, and I ask the chairman: Does he interpret this to mean that the Department of Defense has no authority in the Export Administration Act, as amended by this bill, H.R. 1786, to review export license applications for exports to countries other than the control countries?

I yield to the gentleman for his reply.

Mr. BONKER. The gentleman is correct. The law is explicit, and this legislation is explicit in that DOD has review authority only on shipments to controlled countries. It does not possess statutory authority to review license shipments to free world or COCOM countries, and no such authority is contained in this legislation.

Mr. ZSCHAU. I thank the chairman for that clarification. In conclusion, I would urge my colleagues to support H.R. 1786.

Mr. ROTH. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. I thank the gentleman for yielding me this time.

Mr. Speaker, a short while ago, the American public was shocked to learn of the shipment of a whole flock of helicopters to North Korea. Following that bizarre event, editorially at least, and on many occasions from the floor of this House, questions were asked as to how that could have happened, and various targets were fomented for blame.

I would like to know whether or not, if the ranking member, the gentleman from Wisconsin, would care to answer, whether or not, as I believe it does, that this piece of legislation goes a long way toward preventing a repeat of that kind of bizarre incident.

I yield to the gentleman for his reply.

Mr. ROTH. As usual, the gentleman from Pennsylvania is very astute in his interpretation of the legislation. I think that had we had this legislation, we have tougher penalties for violators; it adds enforcement powers to Customs and to Commerce, and that is precisely why I think the gentleman would want to vote for this legislation.

Mr. GEKAS. I thank the gentleman for that explanation. I tell you, I feel better about the prospective prevention of this thing happening again than I do about any explanation yet forthcoming on how it happened in the first place. At least we have some confidence, at least from the drafters and from the interpretation of this particular piece of legislation that we are not likely to have to undergo that embarrassing situation again.

Mr. ROTH. Mr. Speaker, I yield 4 minutes to the gentleman from Nebraska [Mr. BEREUTER], who has done such a yeoman job on this legislation.

Mr. BEREUTER. I thank the gentleman for yielding me this time.

Mr. Speaker, I would like to begin my comments by commending the chairman, the gentleman from Washington [Mr. BONKER] for his very able, diligent and skillful leadership in bringing back to the floor this compromise legislation once again. It has been a long time in the making. The conference last year was the longest before the 98th Congress.

I would like also to extend my congratulations and recognition, on a personal basis, to the gentleman from Wisconsin [Mr. ROTH] for his outstanding role in formulating this legislation and its predecessor in the 98th Congress.

To our chairman, the gentleman from Florida, and to our ranking member, we appreciate the expedited treatment given by the committee to bring the bill to the floor today.

The bill has been very comprehensively explained by the gentleman from Wisconsin and the gentleman from Washington. This legislation builds almost totally upon the bill as it existed at the end of our very long conference last year. There are at least several exceptions.

Those exceptions relate to two very controversial areas, where, with the recognition and support of the primary cosponsors, we deleted those two very controversial sections of the bill.

Second, through the able work of our staff and our chairman, we were able to iron out jurisdictional difficulties with the Energy and Commerce Committee through technical amendments.

With those exceptions, we are building upon the experience of the last Congress. I, of course, am interested in all of the provisions. As the gentleman from California said, the importance of this legislation, in terms of increasing our export base and solving some of our trade deficits, cannot be overemphasized. But I am particularly pleased with the strong antiembargo and strong contract sanctity provisions that relate to agriculture.

I thank my colleagues and our staff for all of the work that they have done in bringing us once again to this point. We hope for a similar expeditious treatment of the legislation by the other body.

Again, I want to thank the chairman. It has been a very knowledgeable experience working with you, and I very much appreciate the cooperation that I have received.

Mr. ROTH. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BONKER. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut [Mr. MORRISON].

Mr. MORRISON of Connecticut. I thank the gentleman for yielding me this time.

Mr. Speaker, I want to join with the gentleman from Michigan to express my concern about an increase in the administration expense for this authorization from an appropriated level of this time, for fiscal 1985, of $18.5 to $29.5 million for fiscal 1986.

We are talking here about a 60-percent increase. It is true that this may be an area of priority for increased expenditures, but writing in the dark without a budget at a time when we have a $200 billion budget deficit is not the way to solve our budget deficit crisis. We ought not to have this increase now before us on suspension with no chance to deal with that amount of money.

I think it is unfortunate that the substantial content of this bill is put in jeopardy by this relatively small budget consideration.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. BONKER. I think it should be remembered by those who are concerned about the cost that we have effectively reduced the Customs Service budget from $30 to $12 million. That is a considerable savings. We have increased the enforcement responsibility of the Commerce Department, and we cannot expect them to carry out that work if they do not have the resources to do the job.

Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. I thank the gentleman from yielding me this time.

Mr. Speaker, I have to add my comments to those of the speakers before me. What a tremendous amount of respect and regard should be paid to both the gentleman from Washington and the gentleman from Wisconsin. For those who are not on the subcommittee or the conference committee, they can have very little understanding of the incredible number of obstacles and hurdles that were overcome in reaching the point that we seem to be today. It is only through their perseverence, and hard work, and patience that we are able to come to this point.

Mr. Speaker, the legislation before this House is the result of 2 years of work by the Foreign Affairs Committee. It achieves the two goals which guided us throughout the process. The bill reduces the licensing requirements which burden the exporting community and cause delays in foreign trade. At the same time it strengthens the controls necessary to protect our national security. The bill's provisions make export controls more effective and efficient.

One of the bill's central reforms is a decontrol of low-technology exports to Cocom member countries—NATO minus Iceland, plus Japan. This will reduce the number of licenses required by at least 12,000 and possibly by as much as 18,000. Low-technology goods are available to the Soviet Union from other countries. This legislation recognizes the fact of foreign availability and ensures that American businesses will not face continued delays and redtape because of outdated restrictions.

The bill requires action on most Cocom licenses within 15 days and on all within 30. Throughout our work on the legislation, we heard business complaints about delays in processing licenses. Congress now mandates swift action on all license applications. This efficiency is necessary if the United States is to regain its competitive edge in foreign trade.

One provision mandates Cocom negotiations and requires that one-third of the commodity control list be negotiated annually. This ensures a timely review of the list of sensitive commodities. It will keep the list up to date and should speed the process of removing goods which no longer require controls.

The legislation decontrols much equipment containing embedded microprocessors. This is another example of the committee's recognition that current controls place outmoded restrictions on the export of these goods.

The bill contains a range of other reforms to streamline the export process. These include:

Preservation of the distribution license and the project license;

Creation of a new bulk license for technology transfer, known as a comprehensive operations license;

Defining integration of the military critical technologies list and the commodity control list.

One significant reform is a decontrol of goods readily available to the Eastern bloc from other nations. If a good is available to the Soviet Union from other sources, the United States does not enhance its security by maintaining controls on the good. The provisions in this bill facilitate findings of foreign availability and decontrol of such goods. It requires an official finding on foreign availability when an exporter or a technical advisory committee say that a good is available. Once foreign availability was found, a good would have to be decontrolled within 18 months if other exporters did not agree in negotiations to remove its availability to controlled countries.

The bill makes important reforms in foreign policy export controls. It establishes stricter procedures for imposition of foreign policy controls and limits a President's authority to halt contracted exports.

The Export Administration Act is this Nation's basic legal authority for administering controls on U.S. exports. We have been operating for too long under the unwieldy, International Emergency Economic Powers Act. It is time to bring our export control regime back into order. I urge my colleagues to support passage of H.R. 1786.

In one area of particular interest, I want to clarify my view that we have significantly constrained, although not prohibited, the Presidential authority in the area of nonagricultural commerce from imposing foreign policy controls where there are existing contracts. This bill reflects significant constraints but not prohibitions on such Presidential authority.

□ 1440

Mr. BONKER. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore. The Chair will advise the gentleman from Washington that he has 1 minute remaining.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield?

Mr. BONKER. I yield to the gentleman from Texas very briefly.

Mr. COLEMAN of Texas. I thank the gentleman for yielding.

Mr. Speaker, the only question I had from the chairman was whether or not the amendment which was dropped out of the conference last year that was added in 1983 by this House would not be prohibited; that is, the utilization of computer terminals at ports of entry into and exiting from this coun-

try for utilization by the Department of Commerce. They could still do that with this legislation?

Mr. BONKER. The gentleman is correct.

Mr. Speaker, I yield the balance of my time to the gentleman from Florida [Mr. GIBBONS].

Mr. ROTH. Mr. Speaker, I have 1 minute remaining, and I would like to yield that time also to the gentleman from Florida [Mr. GIBBONS].

The SPEAKER pro tempore. The gentleman from Florida [Mr. GIBBONS] is recognized for 1½ minutes.

Mr. GIBBONS. I want to thank both gentlemen for yielding me this time.

Mr. Speaker, I want to say that I have carefully watched and closely watched the development of this legislation. It is an excellent, workmanlike job. All of us have some complaints about every piece of legislation, but when you see what we started with, you will have to commend these two gentlemen and their committee for the fine work that they have done.

Some complaint has been made about the personnel involved in this. Let me say that we are operating an industry at the border that is vastly larger and is growing each year by leaps and bounds. The Department of Commerce and the people who monitor our laws at the border are administering a business that essentially did about $50 billion worth of business a few years ago, and today they are doing $600 billion worth of business at the border, the Department of Commerce and the Customs Service. There is no way you can carry on any kind of function like that with lesser personnel unless you are just going to say there are no laws; we will have laws but not enforcement.

There is already too much complaint that there is not adequate enforcement of our laws at the border, and that is true to some extent, but there is no way you can cut out more law enforcement and have better law enforcement. It is just not possible. You have to open crates, you have to look in trucks, and you have to examine, and people have to be there, and they have to know what they are doing.

● Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of section 126 of this act, which directs the President to undertake a comprehensive review of the issues and related data concerning possible changes in the existing incentives to produce crude oil from the North Slope of Alaska.

Since 1973, Alaska North Slope crude oil has been subject to an export ban, resulting in inefficiencies in transportation to east coast refineries and increased change of environmental damage from tanker traffic, the leading source of oil spills in the world. Additionally, the State of Alaska and the Federal Government have lost hundreds of millions of dollars in revenue due to the existence of the ban.

This section would direct the President to consider the following impacts of lifting the export ban:

Impacts on energy and national security interests of the United States.

The role of lifting the ban on international energy policymaking;

The impact on jobs in the maritime, oil and other industries;

Impacts on refineries and consumers;

Impacts on Federal and State revenues;

Impacts upon future explorations and development of oil and gas;

And, the effect on the trade deficit of the United States.

In short, this section requires a comprehensive look at the question of lifting the export ban, and requires he report his findings and recommendations to Congress within 9 months.

I believe the facts will show great benefits to the State and Federal Governments, and that a partial lifting of the ban with certain conditions will prove attractive for Congress. I urge that the members support this important provisions by voting to suspend the rules for consideration of H.R. 1786. Thank you Mr. Speaker.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise to express my support for H.R. 1786, legislation to revise and extend the Export Administration Act of 1979, for the next 4 years.

While this legislation is not perfect, it does resolve some of the most contentious issues that have confronted the Congress for the past 2 years during its consideration of renewal legislation involving export controls.

With bipartisan support, this legislation, which is largely identical to a bill agreed to in conference last year, generally satisfies and strikes an important balance between needed national security and foreign policy controls for high tech strategically significant exports and the needed reforms urged by American industry.

I urge prompt adoption of this legislation so that our exporters can finally function with the certainty of clearly defined ground rules for their exporting operations.●

● Mr. FEIGHAN. Mr. Speaker, I rise in support of H.R. 1786, legislation to reauthorize the Export Administration Act of 1979. This important piece of legislation defines the way in which the President can control American exports for economic, national security or foreign policy reasons. In granting this authority, Congress must consider both our national security and the legitimate interests of U.S. exporters. It must evaluate the effectiveness of export controls and weigh their political and military benefits against their economic costs.

In the past, a reasonable balance between export restrictions and export promotion has not always been achieved. The economic costs of the grain embargo of 1980 and the pipeline sanctions of 1982 far outweighed their political benefits. The U.S. trade deficit for 1984 amounted to $123 billion. We can no longer afford to impose ineffective and costly export controls. We need a more realistic and restrained approach to export restrictions.

With H.R. 1786, which essentially reflects the compromise achieved in conference last year, we have made substantial progress toward balanced legislation that protects our security interests abroad without hurting our business interests at home. This bill will prevent the flow of militarily sensitive technology to our adversaries more effectively by strenghtening our ability to enforce existing export controls. It ensures a more cautious and effective use of foreign policy controls through improved congressional oversight and better defined criteria to be considered before imposing foreign policy controls. Finally, this bill will help promote exports and improve America's image as a reliable trading partner by providing contract sanctity and major improvements in the export licensing procedure.

Mr. Speaker, I am happy with the provisions of H.R. 1786, but I would like to express my deepest concern about one section that has been taken out of the Export Administration bill as passed by the House nearly 2 years ago. H.R. 1786 is without title III, the provisions dealing with South Africa. They were taken out as a sign of good faith on the part of the House to ensure a quick passage of the Export Administration Amendments Act.

I would hope that this fast-track approach, which has indeed produced remarkable progress on this legislation so far, will also be honored by the Senate and result in the passage of an identical version by that body. Furthermore, especially in light of the horrible massacres in South Africa, I would hope that both the House and the Senate act quickly and favorably on H.R. 1460. This bill, which was introduced by the gentleman from Pennsylvania [Mr. GRAY], and which I have cosponsored, includes most of the provisions on South Africa previously contained in title III of the Export Administration bill.

With these reservations in mind, I urge my colleagues to join me in my support of H.R. 1786 to reauthorize the Export Administration Act of 1979.●

● Mr. McKINNEY. Mr. Speaker, I would like to register my support for H.R. 1786, legislation to reauthorize the Export Administration Act of 1979. For more than 2½ years, Congress has worked to revise and extend the Export Administration Act [EAA].

The EAA is complex legislation which is enormously important because it governs the exportation of critical technologies to potential adversaries, promotes foreign policy objectives, and controls exports of strategic materials. One of these strategic materials controlled by the EAA is Alaskan North Slope crude oil.

Last Congress, my distinguished colleague from Michigan, Representative HOWARD WOLPE, and I introduced legislation to amend the EAA to indefinitely extend the export restrictions on Alaskan oil. That legislation received overwhelming support in the House. Some 237 Members cosponsored the bill. We again have introduced similar legislation in an effort to demonstrate our concern over the importance of this portion of the EAA. H.R. 1786 contains an extension of controls on North Slope crude for 5 years and a provision to allow a comprehensive Presidential study on the impact of exporting Alaskan oil. While we believe a permanent export ban would be more desirable, we accept the House-Senate Conference agreement of last session as a sufficient measure to continue the export ban on this vital domestic resource.

Today, the reasons for not exporting Alaskan oil are as compelling as ever. Exporting Alaskan oil to Japan would be a dangerous smoke screen that would mask the fundamental problems underlying our trade inequities with Japan. This illusion of progress would seriously undermine our efforts to reduced Japanese barriers to American manufactured and agricultural goods. In addition, because of the higher cost of foreign imports versus the price of Alaskan oil, exporting Alaskan oil would mean that consumers would pay $1 to $2 billion more each year for petroleum products. Finally, the oil lost through exports would have to be replaced by imports from foreign sources. This would be a tremendous blow to our Nation's efforts to become energy independent.

Currently the controls on Alaskan North Slope crude and the many other provisions of the EAA are administered under the President's emergency authorities of the International Economic Emergency Powers Act. However, these emergency powers have been challenged in court, and will be subject to further legal challenges unless an EAA bill is promptly enacted. Therefore, I commend the members of the House Committee on Foreign Affairs for expeditiously reporting this reauthorization measure, and urge the support of the entire House on this matter. Passage of H.R. 1786 will ensure that the United States can effectively achieve its foreign policy aims, safeguard national security, and facilitate commerce.●

● Mr. FASCELL. Mr. Speaker, I would like to acknowledge the efforts of those Members of the House who have worked so diligently to resolve the differences which have made the renewal of the Export Administration Act such a lengthy and arduous process.

First, I would like to commend the chairman of the Subcommittee on International Economic Policy and Trade, Mr. BONKER, and his ranking member, Mr. ROTH, for devoting the better part of 2 years to guiding and staying with the difficult and complex process of moving a bill through the House and then negotiating with the Senate. They have done a masterful job and the House owes them a debt of gratitude. They have been supported in this process by the other members of the subcommittee who also have devoted considerable time to bringing to the House a finished product.

The chairman and members of other committees have also played an important role along the way. Members of the Committee on Ways and Means and the Committee on Armed Services served on the conference committee and helped produce the compromises. Some of those conference agreements led to jurisdictional issues with other committees in the House. I would like to express my personal appreciation to the chairmen and staffs of those committees—Chairman PEPPER of the Committee on Rules, Chairman DINGELL of the Committee on Energy and Commerce, and Chairman RODINO of the Committee on the Judiciary—for their willingness over the last several weeks to work with us in finding means to recognize and respect their jurisdictional interests while still permitting the expedited consideration of this bill. At this point I would like to insert in the RECORD an exchange of correspondence with Chairman DINGELL and Chairman ROSTENKOWSKI.

Mr. Speaker, this bill has been carefully drafted and the differences have been resolved, and I urged its support by the Members of the House.

COMMITTEE ON WAYS AND MEANS,
Washington, DC, March 22, 1985.

Hon. DANTE B. FASCELL,
Chairman, Committee on Foreign Affairs, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing with regard to H.R. 28, the Export Administration Amendments Act of 1985, which the Committee on Foreign Affairs ordered favorably reported on March 21. Section 121 of that bill authorizes the President to impose import restrictions to enforce national security export controls under certain circumstances.

Through the cooperation of your Committee with conferees from the Committee on Ways and Means, this Senate provision was incorporated last year into H.R. 4230 as an amendment to the Trade Expansion Act of 1962 and passed by the House.

Since this same provision as amended is now contained in H.R. 28, the Committee on Ways and Means will not seek sequential referral of the legislation, with the understanding that waiver in this instance in no way establishes a precedent or prejudices our jurisdiction over this section of the bill.

I appreciate the consideration that you and other Members of your Committee have given to the views of our Members on this and other Export Administration Act issues and wish you success in completing satisfactory Congressional action on this important legislation.

Sincerely yours,

DAN ROSTENKOWSKI,
Chairman.

MARCH 28, 1985.

Hon. DAN ROSTENKOWSKI,
Chairman, Committee on Ways and Means, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter foregoing the right of the Committee on Ways and Means to sequential referral of H.R. 28, or the likely subsequent clean bill.

Section 121 authorizing the imposition of import restrictions to enforce national security export controls does properly fall within the jurisdiction of the Committee on Ways and Means, and the decision of the Committee not to seek sequential referral will in no way derogate from the jurisdiction of that Committee.

I greatly appreciate your cooperation in expediting consideration of the Export Administration Act extension bill.

With best wishes, I am,

Sincerely,

DANTE B. FASCELL,
Chairman.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, April 2, 1985.

Hon. DANTE FASCELL,
Chairman, Committee on Foreign Affairs, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: As you know, on March 14, 1985, I requested sequential referral of H.R. 28, the Export Administration Act Amendments of 1985. Several aspects of the bill involve matters within the jurisdiction of the Energy and Commerce Committee. On March 28, 1985, a clean bill, H.R. 1786, was introduced, incorporating Committee amendments to H.R. 28, and containing the same provisions of great interest to my Committee.

I understand your interest in a speedy process that would restore the legislative basis for U.S. export controls, which lapsed last October. Fashioning compromise language that may be acceptable to both House and Senate negotiators has taken considerable time and required the exceptional skills of the Members of your Committee. I sincerely appreciate your efforts and your desire to complete the process as quickly as possible.

In the interests of maintaining an accelerated schedule for this important legislation, I would agree not to seek referral of H.R. 1786 to the Committee on Energy and Commerce provided that the following changes were made in the bill and that the Foreign Affairs Committee explicitly recognized the shared jurisdiction of this Committee over these matters.

Section 126 of the bill directs the President to conduct a broad "review of the issues and related data" concerning "possible changes" in the existing "incentives" to produce crude oil from the North Slope of Alaska. It is clear that this section impacts heavily on domestic laws and policies that are matters within the jurisdiction of the Energy and Commerce Committee. The lan-

guage of section 126(b) should be amended to include a reporting requirement to, and consultation with, the Committee on Energy and Commerce.

Section 203(a) of the bill requires a study of Federal programs for the barter of commodities for foreign produced materials and products. Such materials and products clearly could include petroleum and petroleum products which would affect domestic energy supplies. The language of 203(a) should be amended to include consideration of the study by the Secretary of Energy. Section 203(b) of the bill creates a broad, new Presidential authority for a barter program. The section should be amended to ensure that such action conform to existing law by striking the phrase "Nowwithstanding any other provision of law." In addition, a new subsection should be added which would require the Government to conform with applicable law when storing, distributing, or using petroleum or petroleum products acquired under this section. Finally the Secretary of Energy should report to the Congress on the effects on energy security and energy supplies of any action taken under this section to acquire petroleum or petroleum products.

Section 201 of the bill authorizes funds to the Department of Commerce to carry out export promotion programs. In so doing, the section defines export promotion to include "any activity of the Department designed to stimulate or assist United States business in marketing their goods and services abroad." Certain of the programs and activities funded by section 201 involve the jurisdiction of the Committee on Energy and Commerce. In agreeing to expedited consideration of H.R. 1786, the Committee on Energy and Commerce does not waive jurisdiction over these programs and activities nor its right to referral of similar authorizations in the future.

Provided that the changes identified above are agreed to and the jurisdiction of this Committee is properly recognized by the Foreign Affairs Committee, I will agree not to seek referral under the rules of the House with the understanding that waiver of this Committee's jurisdiction in this instance would not constitute a precedent for purposes of future referrals.

Sincerely,

JOHN D. DINGELL,
Chairman.

COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, April 3, 1985.

Hon. JOHN D. DINGEL,
Chairman, Committee on Energy and Commerce, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for the letter of April 2, 1985, which permits the expedited consideration of H.R. 1786, the Export Administration Amendments Act of 1985.

The amendments to sections 126 and 203 which you have requested will be made by the Committee on Foreign Affairs later today. I concur that the Committee on Energy and Commerce waiving its right to seek referral does not derogate from the jurisdiction of that Committee over matters covered by these two provisions or over certain programs and activities which are authorized under section 201 of the bill.

Mr. Chairman, I greatly appreciate your cooperation and that of your staff in helping to find a way to expedite floor consideration of H.R. 1786 while at the same time respecting the jurisdiction of both the Committee on Energy and Commerce and the Committee on Foreign Affaris.

With best wishes, I am,

Sincerely yours,

DANTE D. FASCELL,
Chairman.●

● Mr. MICHEL. Mr. Speaker, in 1984, the United States suffered a record trade deficit of $123.3 billion. Preliminary forecasts indicate that the trade deficit will reach another record high in 1985.

The weakening trade competitiveness of the United States is exacerbated by the retroactive application of foreign policy export controls which brands U.S. farmers and manufacturers as unreliable suppliers. I can report to you that in my discussions with Soviet leaders last week this was continually brought up as the major obstacle to increased trade with the Soviet Union.

For U.S. exporters, lost sales translate into reduced production, profits and reinvestment; for workers of these firms, they mean reduced wages or greater unemployment. For government at all levels—Federal, State, and local—they mean loss of tax revenues and increased unemployment and social costs.

The inclusion of effective foreign availability and contract sanctity provisions in the Export Administration Act is the only way to restore the reputation of U.S. exporting companies as reliable suppliers and to avoid unfair competitive burdens on U.S. exporters and workers.

I am glad to see that this bill is essentially the same as the conference agreement worked out between the House and the Senate last year. I assume, therefore, that the colloquy defining contract sanctity—which Congressman BEREUTER and I engaged in last October 11 when the conference report came up on the House floor—will continue to be part of the legislative history of this legislation.

This is a sound bill which will hopefully prevent any future grain embargoes or pipeline sanctions. It should restore the reputation of U.S. exporters as reliable suppliers by prohibiting the retroactive application of foreign policy export controls except in the most extreme circumstances.●

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentleman from Washington [Mr. BONKER] that the House suspend the rules and pass the bill, H.R. 1786, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. BONKER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 883) to extend the Export Administration Act of 1979, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 883

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 20 of the Export Administration Act of 1979 is amended by striking out "March 30, 1984" and inserting in lieu thereof "June 15, 1985".

(b) The amendment made by subsection (a) takes effect on March 30, 1984.

MOTION OFFERED BY MR. BONKER

Mr. BONKER. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BONKER moves to strike out all after the enacting clause of the Senate bill, S. 883, and to insert in lieu thereof the provisions contained in H.R. 1786, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to reauthorize the Export Administration Act of 1979, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 1786) was laid on the table.

GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed earlier today in the order in which that motion was entertained.

Votes will be taken in the following order: Senate Joint Resolution 15 and House Concurrent Resolution 110, both by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

HELSINKI HUMAN RIGHTS DAY

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing Senate Joint Resolution 15.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and pass the Senate Joint Resolution, Senate Joint Resolution 15, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 390, nays 0, not voting 43, as follows:

[Roll No. 52]

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

Pursuant to the provisions of clause 5, of rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on the additional motion to suspend the rules on which the Chair has postponed further proceedings.

EXPRESSING SENSE OF CONGRESS THAT TAIWAN SHOULD CONTINUE TO COOPERATE IN THE CASE OF HENRY LIU AND TO CONCLUDE AN EXTRADITION AGREEMENT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 110.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 110, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 387, nays 2, not voting 44, as follows:

[Roll No. 53]

□ 1510

Mr. CRANE changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 528

Mr. STARK. Mr. Speaker, I ask unanimous consent that the name of Repesentative BILL LOWERY of California be removed from the list of cosponsors of H.R. 528.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMMEMORATING 24TH ANNIVERSARY OF BAY OF PIGS INVASION TO LIBERATE CUBA FROM COMMUNIST TYRANNY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 236) commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation being considered.

Personally, many of us support this and commend the gentleman from Florida for putting this legislation together. We thank him for it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 236

Whereas April 17, 1985, marks the twenty-fourth anniversary of the first day of the Bay of Pigs attempted liberation of Cuba by the heroic 2506 Brigade, a battle which entailed three days of fighting at a narrow strand of mangrove, bunch grass, coral head, and sand lying thirty miles from the towns of Giron and Playa Larga and bounded by the Bay of Pigs and the Cienga de Zapata swamp;

Whereas, on such day in 1961, the fourteen hundred gallant and intrepid men who made up the brave 2506 Brigade were ill-equipped but possessing immeasurable spirit, courage, and determination, sought in the tradition of the great liberators Jose Marti and Simon Bolivar to liberate from Communist tyranny the beautiful isle of Cuba and reestablish freedom and democracy for the people of Cuba, that great island lying so close to the United States; and

Whereas the patriotic, noble, and sacrificial effort of the 2506 Brigade to liberate Cuba as in the same patriotic spirit that prompted other courageous and intrepid men to liberate the American colonies from a foreign monarch and establish freedom and democracy in America; and

Whereas the people of the United States proudly commend those courageous warriors who fight for the cause of freedom and justice anywhere in the world and the Congress wishes to express the commendation of the American people to the gallant warriors of the 2506 Brigade who made such an historic effort to establish freedom and democracy in Cuba: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 17, 1985, be commemorated as the twenty-fourth anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Joint Resolution 236, the joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REPUBLICAN PLEDGE TO SUSTAIN PRESIDENTIAL VETO OF LEGISLATION RAISING TAXES

(Mr. BOULTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOULTER. Mr. Speaker, yesterday, my colleague from Florida, CONNIE MACK, and I had the honor of meeting with the President to present a letter, signed by 146 Republican Members of this body, who have pledged to sustain a Presidential veto of any legislation raising taxes.

The magic number—146—is assurance that such a veto cannot be overridden.

I hope that this letter will serve as a warning to any in this body who might want to try to raise the taxes of the American people. Rather than waste time on an effort that is guaranteed to meet with both a Presidential veto and House support of that veto it is time that this body begins actively cutting Federal spending.

The White House and the leadership in the other body have come up with a deficit reduction plan. It may not be perfect, but it is a genuine compromise, and one that should be considered as a beginning. Our options, which have been pointed out by Budget Director Stockman, are clear. Either we start now to reduce Government spending, or we do exactly what the people of the United States voted against last November—raise taxes.

Mr. Speaker, in light of the letter presented yesterday and the votes of the American people on November 6—there is only one choice. It's time to start a massive housecleaning of the Federal budget.

FREEZE CONCEPT FIGHTS THE DEFICIT

(Mr. McKINNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKINNEY. Mr. Speaker, 2 weeks ago, the House had its first major opportunity to use the "freeze concept" as a method of controlling our Nations's deficit. The measure before us, as you recall, was the NASA reauthorization bill for fiscal year 1986. The task before us, however, was to decide whether we would let slide an authorization bill 5 percent over the 1985 appropriation level, or begin to exercise prudence and fiscal responsibility to curb Federal spending. As you recall, Mr. Speaker, the House overwhelmingly decided in favor of the Morrison-Pursell amendment, which I supported, freezing the NASA authorization at the fiscal 1985 level. Three hundred and sixty-nine Members of this House voted to freeze the budget of the agency. This was a major statement—we, in Congress, are going to take seriously our duty to tackle the deficit problem.

This week, we have before us two more authorization bills, one for the National Science Foundation and one for the National Bureau of Standards. These bills contain authorization levels over last year's appropriation levels; 6 percent and 13 percent respectively. As I mentioned on the floor in support of the Morrison-Pursell amendment, if we are going to live up to what we are all saying, "fairness, hold the line, and cut the deficit," we must do so authorization by authorization. With all due respect to the members and staff of the Science and Technology Committee, who carefully and diligently prepared, marked up, and presented us with these bills, the House cannot vote in favor of these authorizations in their present form. We must continue to be serious about addressing the deficit and, once again, call upon the freeze concept.

I have always been and will continue to be in favor of science research and development—but right now we must hold the line. I call upon the Science and Technology Committee chairman and ranking minority member to take into account the sentiment present in this House which demands getting the budget back under control. And, in anticipation of action to impose a freeze at last year's appropriation levels, I believe it would be fitting that the committee itself take the initiative to amend the authorization levels to correspond with the will of this body. The committee members know best the various programs embodied in these authorizations, and they have the expertise to come up with the necessary cuts to bring down costs to last year's levels.

It is inevitable that the House will use the freeze concept this week as a means to fight the deficit. I hope that with the cooperation of the Science and Technology Committee, we are not only able to demonstrate fiscal responsibility, but also are able to ensure maximum effectiveness in the programs authorized by these bills. I invoke the wisdom and determination of this House and urge my colleagues to freeze the authorization levels of the National Science Foundation and the National Bureau of Standards at last year's appropriation levels.

WOMEN PARLIAMENTARIANS WORK FOR PEACE

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, May Britt Theorin, Swedish Member of Parliament and only woman in the world representing a government at the disarmament talks in Geneva, encapsules the spirit of two other great Swedes, Raul Wallenberg and Alva Myrdal.

Raul Wallenberg saw a holocaust going on around him and did everything in his power to stop it. Alva Myrdal has done some of the world's most creative thinking on arms control.

May Britt Theorin sees the possibility of a nuclear holocaust increasing daily, with nothing constructive being done about it, only a constant quickening of the arms race.

This year she decided to gather female parliamentarians from five continents to prepare a statement on the arms race for the July 1985 Nairobi World Conference To Review and Appraise the Achievements of the United Nations Decade for Women. Women will end the decade in worse shape economically than they began it and in a world where the chance of a nuclear holocaust has increased, not decreased. To better the position of women and children, the arms race must be stopped. I will place in the RECORD today the statement that resulted from the Stockholm seminar. Representative BARBARA BOXER suggested a permanent World Women Parliamentarians for Peace Group, and the delegates enthusiastically accepted it. The group is now permanent.

In this year, the 40th anniversary of the Hiroshima, and the end of World War II in Europe, women parliamentarians joining together to promote peace and disarmament is good news.

The statement of the women parliamentarians follows:

JOINT STATEMENT ISSUED ON 12 APRIL 1985 IN STOCKHOLM BY WOMEN PARLIAMENTARIANS FROM 15 COUNTRIES AND ALL CONTINENTS INCLUDING CONGRESSWOMEN SCHROEDER, SCHNEIDER, AND BOXER OF THE UNITED STATES

As women parliamentarians—representing 15 countries from all continents and of differing political systems—we are unified in our concern for peace and disarmament. We come together four decades after the founding of the United Nations, and at the end of the United Nations decade for women, to be evaluated in Nairobi but also four decades after the second World War and the nuclear bombing of Hiroshima and Nagasaki.

Facing a world rife with conflict, bristling with arms and riddled with hunger and malnutrition we view these anniversaries as a time for concrete progress in stopping the arms race—a fundamental obstacle to peace, equality, and development. This is the interrelated agenda of the Nairobi Conference.

Women have so far had inadequate influence on decision-making concerning war and peace, military budgets and structures, disarmament negotiations and resolution of conflicts.

For true equality to become a reality for women, the sharing of power on equal terms with men is vital. Women should fully participate in all efforts, including negotiations, to strengthen and maintain peace and to promote international co-operation, détente and nuclear and conventional disarmament. Governments must implement this by institutional, educational and organizational changes.

Achieving peace, security, disarmament, economic and social development is an indivisible task. As women parliamentarians, we are keenly sensitive to this reality. We call on all women to join us in the task of making governments realize this and to counter the negative economic consequences of the arms race.

We consider that the concept of peace includes not only the absence of war, violence and hostilities at international and national levels, but also social justice and equality for all nations and for all people.

Lack of progress towards disarmament has meant a continued and compounded drain on world resources. It has not been possible to free any amount, however modest, from the unproductive and spiralling arms race for the long-term solution of social and economic problems.

Urgent action is needed to halt the technological escalation of the conventional and nuclear arms race. To achieve this goal we recommend the reallocation of funds to non-military research and development, limits on international arms transfers in general, particularly to areas of conflicts,

and the conversion and redeployment of resources released from military purposes to economic and social aid to developing countries.

Men and women all over the world long for peace and justice. Interdependence between nations is greater than ever. Unfortunately, the search for security has too much been based on national aspirations and armaments, and too little on common efforts towards mutual understanding and international peace. It is our firm belief, that this pattern has to be broken, if humankind is to survive. In the nuclear age, security must be based on common interests instead of confrontation and nuclear deterrence. The technological imperative of the arms race must be replaced by concrete political initiatives for disarmament.

In principle all nations and governments condemn the arms race, but in practice they participate in that race. The dilemma is to find ways of transition from one security system to a different one. As women parliamentarians we fully realize this difficulty, but we cannot accept the existing stalemate, which prevents progress in the necessary disarmament process.

We therefore propose these transitional measures: an immediate moratorium on the testing, production and deployment of nuclear weapons and their delivery vehicles, reciprocally undertaken by the Soviet Union and the United States followed by the other nuclear powers. We also propose negotiations aiming at formal agreements beginning with a comprehensive test ban treaty. We further call for the absolute prevention of an arms race in space. These actions constitute the foundation for agreements on sharp reductions of the immense arsenals of nuclear and conventional weapons.

We urge the Nairobi Conference to support the proposals outlined in this statement, which are aimed at promoting peace, equality and development.

Unified in our concern for peace and disarmament and convinced that the arms race is a fundamental obstacle to peace, equality and development we have formed World Parliamentarians for Peace. The compelling agenda of this network will be the implementation of these and other proposals at the national and international level. We invite women parliamentarians from all continents and political systems to join us in this urgent task.

THE TIME IS LATE—DO YOU KNOW WHERE YOUR CONGRESSMAN IS?

(Mr. MARLENEE asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, a well written editorial in yesterday's Times entitled "Welcome Back Congress" should be addressed and referenced to American voters across the Nation and could well have been entitled, "The Time Is Late—Do You Know Where Your Congressman Is?"

Every voter and more specifically every member of every congregation in America should read the series entitled "The Network." It is well documented and well referenced. Washington's major newspaper, the Times, has done a superb job of exposing how the Sandinistas, the Marxists, and their surrogates are manipulating public opinion, misleading the American people, and using well meaning people and church groups.

I will be submitting into the RECORD from day to day the series documenting the abuse.

After reading this series I would speculate that anger and frustration will elevate to new levels when the American public realizes how foreign ideologies are using our system against us.

While the freedom fighters—Contras—are fighting for true democracy, here at home several misguided groups are attempting to subvert precious U.S. aid to the cause for freedom in Central America.

But missing from the efforts of these groups are calls for Cuba and the Soviet Union to curtail the massive amount of military weapons and ammunition that are flooded into Nicaragua daily. There are no calls for the thousands of Cuban, Soviet, Libyan, PLO, North Korean, and East German military advisers to leave Nicaragua. And there are no calls for Nicaragua to end its support of Marxist guerrillas fighting in the region.

I urge my colleagues not to play politics with freedom. Support the only hope of freedom in Nicaragua.

DISINFORMATION: TWISTED FACTS DISTORT REALITY

(By Arnaud de Borchgrave, Editor-in-Chief)

President Reagan told The Washington Post last week that "we've been subjected, in this country, to a very sophisticated lobbying campaign by a totalitarian government—the Sandinistas. There has been a disinformation program that is virtually worldwide, and we know that the Soviets and Cubans have such a disinformation network that is beyond anything we can match."

The Post in particular, and the liberal media in general dismiss the very notion of Soviet and Soviet-proxy disinformation as a manifestation of mindless anti-communism. In a column headlined "Sandinista Disinformation?"—the question mark was designed to discredit the president's irrefutable statement of fact—The Post's deputy editorial page editor, Stephen S. Rosenfeld, wrote, in effect, "Yes, but so what?"

So a lot, Mr. Rosenfeld.

Vietnamese officials (e.g., General Giap himself) and defectors have confirmed that disinformation operations in the U.S. media and on Capitol Hill played a major role in changing perceptions about that war.

The former justice minister of so-called National Liberation Front of South Vietnam—created and controlled by the Hanoi government—escaped among the boat people. He has testified that clever disinformation operations led us to believe that the 1968 Tet offensive was an unmitigated disaster for the United States.

So pervasive was this perception—this misperception—that President Johnson felt compelled to abdicate a few months later. The reality, according to Truong Nhu Tang, was the other way round. Tet was an unmitigated disaster for Hanoi.

There is every indication that the liberal media and the Congress do not support the Reagan administration's policy in Central America—notwithstanding the endorsement of the bipartisan Kissinger Commission report in January 1984. But there is also every indication that disinformation and Soviet-Cuban-Nicaraguan "active measures" have played a crucial role in laying the groundwork for yet another U.S. strategic defeat.

There are many groups in the United States whose media connections are an open secret. Their mission is to shade, embroider and distort the truth for their own disinformation agenda, while excoriating anyone else who is less than truthful.

These groups have helped nurture an entire new generation of journalists who have made it their duty to transform America's sworn enemies into misunderstood innocents, while at the same time portraying our own leaders as the foes of democracy and freedom.

Apologists for communism in Cuba, Vietnam, Angola, Mozambique, Ethiopia, Nicaragua, Afghanistan and elsewhere have argued that they were driven down the Marxist path of hostility because of abuse by the U.S. government. That this is sheer, unadulterated disinformation is confirmed by communist dissidents and defectors, yet it is still eagerly regurgitated by the liberal establishment on both sides of the Atlantic.

How is it possible that so many intelligent people accept these dangerous misconceptions as the geopolitical gospel? Disinformation is the key. The Washington Times, beginning today and ending Friday, will unravel "The Network" that has been poisoning the lifeblood of democracy.

How does it do this? Quite simply by distorting the data and corrupting the process of understanding in such a way that it leads public opinion to react differently than if it understood the true nature of reality.

It would behoove the Congress to take note before our elected representatives vote yet another resolution that will once again make it possible for the Marxists to steal a revolution from the people, only to impose a totalitarian dictatorship more draconian than the authoritarian regime that was overthrown.

WELL-OILED PROTEST MACHINE AIMS TO KILL CONTRA AID

(By John Holmes and Bill Outlaw)

Intelligence experts call it "The Network"—a massive but almost invisible spiderweb of hundreds of left-wing groups and organizations, linked together by sinewy threads of personnel, ideology and politics, and seeking dramatic changes in the social, economic and political policies of the United States government.

And now, The Network has focused its attention and resources on its latest target: President Reagan's Latin American policy.

Last Thursday night, shortly after President Reagan announced his plans for bringing a halt to conflict in Nicaragua, a coalition of pacifist church groups began to prepare for a program of "nationally coordinated legal vigils and phone-ins" of protest.

Dennis Marker, spokesman for that coalition, which is called Pledge of Resistance, was quoted over the weekend as saying that an "active alert" went out over its 55,000-person telephone network. Members of this network were told to call their congressmen the day after Mr. Reagan makes a future television speech on Nicaragua and urge them to vote against his policies.

This apparently well-oiled protest machine is just a small part of what is called The Network. Over the years, those who organize, operate and manipulate this web have thrown their efforts behind many causes opposed to policies of the administration.

The Network consists of literally hundreds of groups on the left side of the religious and political spectrum. Many are shoebox and telephone booth outfits—small groups of cause-oriented people working in cramped spaces for little or no money. Some, however, are large, well-funded and highly organized.

Most of these organizations claim to be nonpartisan and independent, interested in such noble causes as 'human rights" and "social justice." To a degree, that's true; and many individuals who participate in these activitiesa are motivated out of a genuine sense of righteousness and altruism.

But in many cases, that's not the whole truth.

Wall Street Journal columnist Suzanne Garment pointed out that "there is by now—on the American left—a whole cottage industry using the language of human rights and social justice to delegitimize" the United States' efforts to nurture democratic, anti-communist regimes in Latin America.

"While these organizations portray themselves as 'objective' observers of Latin America, this often is not the case," said Joan Fraley, an analyst writing in the Heritage Foundation's "Policy Review."

"Analysis of Latin American issues is offered mainly by organizations whose fundamental ideological perspective is sharply suspicious of, if not openly hostile to, U.S. policy in this region."

Of course, legitimate differences of opinion and debate are essential to the democratic process. But experts who have observed The Network over many years point out that some of the groups employ questionable tactics, including the planting of disinformation and outright deception—a tactic known as "active measures."

"Anything that advances their cause is, in their eyes, the truth. Anything that retards it becomes an untruth," wrote Auguste Lecoeur, a former high-ranking Communist Party official in France, who was drummed out for protesting the Soviet invasion of Czechoslovakia.

Adds one analyst: "Ever since the creation of the World Peace Council by the Soviet Union in 1949, Moscow has manipulated the slogan 'peace' as a weapon of 'war'."

And some groups in The Network actively cooperate with organizations established by the Kremlin for just these "active measures," proclaiming allegiance nevertheless to the lofty goal of "world peace."

The president himself expressed concern over this aspect of The Network.

"We've been subjected, in this country, to a very sophisticated lobbying campaign by a totalitarian government—the Sandinistas," Mr. Reagan said.

"There has been a disinformation program that is virtually worldwide, and we know that the Soviets and the Cubans have such a disinformation network that it is beyond anything that we can match," the president said in a recent interview with The Washington Post.

Mr. Reagan has proposed $14 million in aid for Nicaraguan resistance. Congress has until late April to act on the president's proposal.

* * * * *

In 1978 Brian Crozier, a London-based, veteran Soviet affairs analyst, called the IPS the "perfect intellectual front for Soviet activities which would be resisted if they were to originate openly from the KGB."

Mr. Crozier later stated that in 1982 the IPS concluded a public arrangement with two Soviet institutions used regularly by the Kremlin for "active measures" against the West.

IPS co-founders Richard Barnet and Marcus Raskin "are both specialists in 'blame-America-for-everything lobby,'" said Rael Jean Isaac, a close observer of The Network, in an interview.

Writing in "Midstream" magazine in 1980, Mrs. Isaac stated, "What IPS is really concerned about is assuring United States withdrawal of support from 'reactionary' regimes worldwide. Once that is done, IPS is quite confident in the ability of 'progressive' forces (backed presumably by 'progressive' arms of Cuba, the Soviet Union, etc.) to achieve victory."

Robert Borosage, IPS director, maintains that allegations of Soviet influence on the institute are "preposterous."

He said the organization has had meetings with the Soviet Academy of Sciences but said these are done to promote an exchange of ideas. Asked about allegations that IPS is strongly influenced by those meetings, Mr. Borosage said "That's ridiculous. It's an open dialogue between two institutes."

He said IPS itself does not take a position on issues, but that institute fellows are free to take a position in their research. He futher stated that efforts to link the IPS to pro-Soviet positions are attempts to "discredit" the organization.

"The IPS, nevertheless, has espoused many Soviet, Cuban and North Vietnamese positions since its creation 23 years ago," said an analyst. "It has acted as a conduit for major Soviet disinformation themes."

Depending on the specific task at hand, members of The Network will work together or separately. Cooperation isn't mandatory, or even easy at times, but they often pool their resources to great effect.

While on the surface separate, free-standing entities, each seems to specialize in a specific area. IPS keys much of its efforts to research; COHA has mastered the art of influencing—and, some say, manipulating—the media.

CISPES and other solidarity groups organize demonstrations and protests on university campuses across the country and around the world. The National Council of Churches, the Interreligious Task Force on Central America and others seek to spread their liberal political gospel in the religious world.

Many of these groups, both politically and religiously oriented, are banding together later this month to stage one of the largest, most overt shows of strength in some time. They will be protesting "Reagan's War In Central America."

Organizations such as the Women Strike for Peace, CISPES, the Mobilization for Survival and the U.S. Peace Council—which the FBI has characterized as Soviet-controlled—are organizing and sponsoring a four-day weekend of activity in Washington, D.C., and around the country beginning April 19.

[When the U.S. Peace Council was set up in 1979 as one of the Moscow-controlled World Peace Council's 137 national branches, numerous U.S. and state congressmen particpated in the founding conference and subsequent meetings.]

The upcoming weekend of activity, according to the groups' literature, will include protests, marches and rallies, as well as "training sessions" for lobbying and civil disobedience, activities that the groups plan to carry out primarily on Monday, April 22.

Similar activities also are planned for New York, Seattle, San Francisco, Los Angeles and other cities. Organizers expect 20,000 protesters for the Washington rally.

But while such demonstrations are the most obvious and blatant shows of strength, the key element and single most important facet of The Network's operation is influencing policy- and decision-makers.

These groups may not see themselves as "lobbyists" and, in the classic sense of gladhanders in three-piece suits who spend their days chatting up congressmen and staff assistants, they are not.

But if "lobbying" can be defined as an attempt at persuasion through education, then there is little doubt that these groups are "lobbyists," and very effective ones at that.

A major reason many of these organizations so vehemently renounce the label of "lobbyist" is legal. Groups such as IPS, COHA and WOLA are non-profit, tax-exempt organizations. That is a highly desirable status that might be jeopardized if they were deemed to be engaged in influencing legislation.

"We don't do lobbying on the Hill," said Larry Birns, COHA's founder and director.

"We've never lobbied. I don't think I've been to Capitol Hill 10 times in the past 10 years."

Reggie Norton, an associate at WOLA, admits that WOLA representatives meet and talk with members of Congress and their staffs, but disagrees that that constitutes lobbying.

"We don't lobby," he said. "I don't see them and say, 'vote against the Contras.' I go in and say this is the situation we saw and a peaceful solution is possible."

And IPS' Borosage stated that institute fellows may talk with a lot of people in Washington about a wide range of issues, but said that these are not pegged to any congressional agenda.

There is, however, little question to conservatives involved in the Latin American question that these groups are lobbying.

"Lobby? Absolutely," said the ASC's Sam Dickens. "They have an extremely effective lobby, particularly with staffers on the Hill."

The Network uses a variety of tactics in their efforts to influence Congress and public opinion. The primary technique in dealing with Congress is the passing of information, at least some of which is held by many conservatives to be biased or misleading.

Mr. Dickens explains that representatives from these groups establish contacts with congressional staffers and supply them with "slanted" information. Some staffers then pass the information to members of Congress.

Often, some of the material ends up in the Congressional Record, in speeches the congressmen give, in mailings they send out, or in articles they write for various publications.

COHA Director Larry Birns boasts that his people prepare as many as 100 Congressional Record inserts each year for various legislators, including, according to Mr. Birns, D.C. Delegate Walter Fauntroy, Rep. James Oberstar, D-Minn.; Rep. Don Bonker, D-Wash.; and Sen. Tom Harkin, D-Iowa.

Some of the individuals with the groups—most notably IPS and COHA—also generate opinion pieces for major newspapers around the world. Articles by IPS fellows can frequently be found on the New York Times and Washington Post's opinion-editorial pages and are picked up by many of America's 1,700 daily papers.

Some media watchdogs have complained that IPS is seldom, if ever, identified in these publications as a radical think-tank on the left. Rather, it is frequently termed a "Washington-based research institute," as the New York Times has called it.

COHA issues scores of press releases each year. Mr. Birns claimed COHA is merely spreading the word, but those on the other side accuse him of manipulating the media by passing his information as straight news.

"COHA is not a human rights group. It is a left-wing foreign policy group that often masquerades as a human rights group," said Elliott Abrams, assistant secretary of state for human rights and humanitarian affairs.

"If you read what they've had to say through the years about human rights violations in Surinam, or Bishop's Grenada, or Cuba—worst of all, Cuba—you will see that they don't care about human rights in left-ist or Communist regimes," he said.

Some groups such as WOLA—which Mr. Dickens describes as "openly supportive of the Sandinista government"—go far beyond the gathering and distribution of information.

"In addition to lobbying, they're [WOLA] taking people to Nicaragua on the guided tour effort," Mr. Dickens says. "They're playing an activist role in getting people to be supportive." WOLA's Mr. Norton maintains that they merely allow people to see the situation in Nicaragua for themselves.

Some of the church-related groups also are heavily involved in this "guided tour" effort, an activity that appears to be growing in popularity throughout The Network.

"Some of these church-related groups seem to think the Sandinista regime is just another form of government," said one analyst. "But even the Sandinista anthem refers to the U.S. as 'the enemy,'" he said. [The verse in question is: "The children of Sandino don't surrender or sell out. . . . We fight against the Yankee, enemy of humanity."]

Much of the left-wing church activity is coordinated through the National Council of Churches, the umbrella group covering 32 major Protestant and Eastern Orthodox churches with congregations totaling 42 million people.

Since the mid-1960s, the NCC has actively campaigned for what it calls "social justice." But, said one observer, "just think of any left-of-center cause and the NCC has been involved."

Through the liberal church network maintains its own agenda, it is extremely similar, if not identical, to that pursued by its secular counterpart. And in many cases, the two groups are tightly interwoven, sharing common goals, projects, ideology and membership.

The North American Congress on Latin America, for instance, was established in the NCC offices in Washington, D.C., and receives financial support from numerous Protestant churches through the NCC's Latin American Division and through specific projects like the Presbyterian hunger program, according to a report by the independent Institute for Religion and Democracy.

And the Heritage Foundation quotes WOLA's 1983 annual report as saying that WOLA received $124,000 from the United Methodist Church.

The IRD has documented mainline Protestant church support for left-wing political activities in the United States and to Vietnam. The United Methodist Board has contributed to the national Network in Solidarity with the Nicaraguan People, which was founded "to support and defend the Nicaraguan revolution," and other solidarity groups that assist the Salvadoran rebels, according to IRD.

In her book, "The Coercive Utopians," Rael Jean Isaac details many examples of the ways in which church groups fund leftists in Central America and around the world. Primary among her tales is that of David Jessup, an AFL-CIO official and member of the United Methodist Church, who studied Methodist contributions and reported to the 1980 General Conference of the Church.

"Most Methodist churchgoers would react with disbelief, even anger, to be told that a significant portion of their weekly offerings were being siphoned off to groups supporting the Palestime Liberation Organization, the governments of Cuba and Vietnam, the pro-Soviet totalitarian movements of Latin America, Asia and Africa, and several violence-prone fringe groups in this country," Mr. Jessup wrote.

Another group, the American Friends Service Committee, has become involved in political controversy.

In December 1984, the Citizens for Reagan submitted a letter to the Internal Revenue Service requesting an investigation of the AFSC and four other groups. CFR stated that the groups were violating the rules governing their tax-exempt status because they were engaged in "substantial lobbying" and political activities in favor of the Sandinista regime in Nicaragua and in opposition to U.S. policy in Central America.

As one observer of The Network put it, "the church lobby is important because they give (the debate) respectability. You can't argue with priests and nuns," he said.

CRISIS IN CENTRAL AMERICA

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, last night, addressing the Nicaraguan Refugee Fund, President Reagan said, and I quote, "The national security of all the Americas is at stake in Central America."

The Public Broadcasting System has produced a series entitled "Crisis in Central America" which illustrates the history of U.S. policy in Latin America beginning about 1900.

□ 1220

The series was produced for Front Line by WGBH in Boston in association with the Blackwell Corp. and made available to the House Broadcasting System by Charles Benton of Chicago.

The first series, entitled "The Yankee Years" will be broadcast today on the House Broadcasting System at 1:30, followed by a 2:20 episode entitled "The Castro Revolution" and then it will be followed by two broadcasts on Thursday at 1:30 and 2:30 respectfully, "Revolution in Nicaragua" and "The Battle for El Salvador."

I urge all my colleagues and all staff associates to prepare for the upcoming debate on the Contra aid and the refugee relief as requested by the President by viewing this series.

[From the New York Times, Apr. 9, 1985]

"CRISIS IN CENTRAL AMERICA," ON PBS

(By John Corry)

"Crisis in Central America" confronts a question it does not explicitly raise: Is the United States responsible for the crisis? The four-part "Frontline" series provides no answer, expecting us to find it ourselves. We can, although we must work at it, perhaps harder than we may wish. The series, beginning on Channel 13 at 9 tonight, continues through Friday.

The episode tonight, "The Yankee Years," begins with flickering old film: it is 1898; United States troops land in Cuba. Interventionism has begun. The Panama Canal is dug. United Fruit reaps its harvests. Marines are sent to Nicaragua. The Central Intelligence Agency manipulates Guatemala. For more than 50 years, American interests flourish.

Tomorrow night's program deals with the Cuban revolution and its aftermath. Nicaragua is examined on Thursday, and El Salvador on Friday. The final image in the series, a freeze frame, is "a crowd of Salvadorans," the narrator tells us, "who came to witness the prospect of peace."

The series, using old film and interviews, is even-handed, determinedly so. For example, a former Marine, who fought Augusto César Sandino, the Nicaraguan rebel, in 1926, says, "I think the natives really favored the Marines." A Nicaraguan says, "We wanted to shoot them, and run them through with machetes." Thus the format: credit the United States, if only for good intentions; then penalize it for insensitivity or something worse. There is balance.

Therefore, "Crisis in Central America" suggests that the United States was neither as malevolent as critics claim, nor as benevolent as apologists insist. The most interesting sequence in the first program looks at an inglorious episode: the Central Intelligence Agency-sponsored coup that overthrew Jacobo Arbenz Guzmán in Guatemala in 1954.

The Arbenz Government, democratically elected, was influenced, but apparently not led, by Communists. Mr. Arbenz began labor and land reform, including the appropriation of 80 percent of the land owned by United Fruit. Secretary of State John Foster Dulles, alarmed, dispatched an envoy, who demanded that Mr. Arbenz remove Communist labor leaders. Mr. Arbenz refused.

Consequently, the Eisenhower Administration decided to remove Mr. Arbenz. Richard Bissell, a former Special Assistant to the Director of Central Intelligence, says in an interview that there "is absolutely no reason to believe" the desire to help United Fruit played "any significant role" in reaching the decision.

The dominant factor was presumably Mr. Dulles' obsession with Soviet expansionism. Whatever it was, however, was incidental. The coup, fabled today, was carried out largely by a C.I.A. radio station that broadcast news of a "liberation" army. The army

was actually 150 Guatemalans in a few trucks and station wagons.

As coups go, this wasn't much. Reasonable people may agree that it was wrong for the United States to intervene, although the principal result was unintended. Mr. Bissell hints at it delicately: "In other situations, in other countries, too much reliance was placed on the method that had been successful."

Possibly, he is thinking of the disastrous 1961 invasion at the Bay of Pigs in Cuba. Meanwhile, José Figueres Ferrer, the former President of Costa Rica, notes that "the leftists have great propaganda machinery" and that the Guatemalan intervention provided the left with a cause.

"The Yankee Years" suffers from omission—it suggests that Central American history began around 1900, which ignores 300 years of wars, revolutions, European adventurism and local politics. But certainly unrest did grow after Guatemala in 1954. Anastasio Somoza Garcia was assassinated in Nicaragua in 1956; Carlos Castillo Armmas, the C.I.A.'s Guatemala heir, was killed a year later. By then, Fidel Castro had landed in Oriente Provinece in Cuba. Two years later, he entered Havana.

"Crisis in Central America" is addressing another foreign policy concern here. It is implicit and unspoken, but it is there: no more Vietnams; no more Cubas, either. Tomorrow night's espisode, "Castro's Challenge," looks at the problem.

Fidel Castro overthrew Fulgencio Batista, a thug. American moderates rejoiced, but too quickly. Cuba soon became a Soviet client. "Castro's Challenge" does not argue that world peace would have been better served with Batista, although it does note that Mr. Castro's ascension led to the Cuban missile crisis, and that Cuba dispatched 30,000 troops to Angola in 1975 and 10,000 troops to Ethiopia in 1978. Batista may have been odious, but he did not export violence.

Moreover, right-wing dictatorships such as Batista's sometimes evolve into democracies, while left-wing dictatorships such as Mr. Castro's do not. More than one million Cubans have fled their country. Does this mean the United States should support right-wing dictators? This is an unpalatable proposition, and "Crisis in Central America" is cautious.

Therefore, we get Fred C. Icklé, an Under Secretary of Defense, raising the possibility that Nicaragua may turn into another Cuba. Hence we should oppose the Sandinistas. We also get Michael D. Barnes, a liberal Democratic Congressman from Maryland, saying that the Administration has chosen the worst possible way to deal with Nicargua: C.I.A. involvement with old allies of the Somozas. If anything, Mr. Barnes says, this will unite the Sandinistas and their allies against us.

It is possible that Mr. Icklé and Mr. Barnes both share a part of the truth. "Crisis in Central America" is often plodding, and sometimes repetitious. Visually, it is not nearly as gripping as "Vietnam: A Television History," the public television series with which it will most often, even if unfairly, be compared. But it does give us a sense of complexity. In an age in which simplistic rhetoric flourishes, that's an accomplishment of note.

"Crisis in Central America" was produced for "Frontline" by WGBH in Boston in association with the Blackwell Corporation, an independent production company. The executive producer for the Blackwell Corporation is Neal B. Freeman.

□ 1520

DESTRUCTIVE ENGAGEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. MATSUI] is recognized for 5 minutes.

● Mr. MATSUI. Mr. Speaker, I rise to speak about the status of our current relations with the Republic of South Africa.

The Government of South Africa, since 1948, has constitutionally promoted racial oppression and white supremacy. Blacks, who make up the vast majority of the population, are denied the basic rights and freedoms that are guaranteed to whites. This includes freedom of speech, assembly and travel, access to a fair trial, and the right to choose were they live or work.

Almost every Member of Congress has shown the courage to speak out forcefully against the South African Government's official practice of apartheid. Clearly the time for words alone has passed and the time for action is upon us.

I am an original cosponsor of H.R. 1460, a bill which expresses the opposition of the United States to the system of apartheid in South Africa. More importantly, this bill requires that certain substantive economic policy steps be taken which will leave no doubt about our Nation's opposition to apartheid. H.R. 1460 will prohibit loans to the South African Government and will place restrictions on new investments in South Africa.

I encourage all of my colleagues to continue to speak out against apartheid and to join me in cosponsoring H.R. 1460.●

PERSONAL EXPLANATION

(Mr. SWINDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SWINDALL. Mr. Speaker, on rollcalls No. 52 and 53, upon which this body just voted, I was unavoidably delayed.

Mr. Speaker, had I been present I would have voted yea on both rollcalls.

GRENADA DOCUMENTS: AN OVERVIEW AND SELECTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. I thank the Speaker.

Mr. Speaker, today I am going to take the second in a series of special orders which use the Grenada Documents: An Overview and Selection, as released by the Department of State in September 1984, as a framework for looking at Marxism, Leninism and its relationship to Nicaragua and the upcoming vote on aid to the freedom fighters.

My purpose in doing this is to lay out the historical record that on the one occasion where we have had actual capture of Soviet documents, that we are aware of a great deal we have learned about the nature of communism and we are aware about what it is they intend, what they say in public, and what in fact they do in private.

To remind the Members of the House, when the United States liberated the Island of Grenada from the Communist dictatorship, we captured for the first time in history all of the documents that a Communist Party and a Communist government, for the first time ever we knew what their secret speeches were, what their secret diplomatic dispatches were, what the secret minutes of their meetings were, what they said in their diaries.

Out of that entire collection of some 35,000 pounds of material, the U.S. Government selected what was regarded by two experts, Michael Ledeen and Herbert Romerstein, to be the most significant documents, including among others a secret speech which I outlined in a special order yesterday called the "Line of March for the Party," presented by Comrade Maurice Bishop, chairman of the central committee, to a general meeting of the party on September 1, 1982.

In the speech by Bishop, he outlines the degree to which the Grenadian Communist Party was systematically a Marxist-Leninist party and was committed to an alliance with the Soviet Union.

Similarly, in yesterday's speech, I introduced a secret speech by Commandante Dayarda Arce, of the Nicaraguan Communists, a speech which was secretly tape recorded and released through the Barcelona newspaper, La Vanguardia.

In this speech Arce, himself, once again outlines the Nicaraguan Communists are in fact Communists. He says, in the opening paragraph, "We Communists." He says at the very end of the speech, "We must take advantage of the change offered by the elections to gain other positive benefits, the unity of the Marxists-Leninists of Nicaragua."

In Arce's speech by a Nicaraguan Communist he refers again and again to Marxism-Leninism and to the fact that the only reason they are pretending not to be Communists is in order to fool the Americans and to fool the American Government and American politicians.

In fact, he specifically says, and I quote: "Our strategic allies tell us not to declare ourselves as Marxist-Leninists, not to declare socialism." The reason I think this is important to

look at is because the fact that a Nicaraguan Communist, in his secret speech, is directly parallel to the Grenadian Communists in his secret speech, that is, if you were to take the Maurice Bishop speech and lay it out side by side with Arce's speech in Nicaragua, you would discover that the formulas are almost the same, that the arguments are almost the same and that in each case they refer to advice they were given by other Communists. In both cases we happen to know the Communist advisers to Nicaragua and the Communist advisers to Grenada were the Cubans and the Soviet Russians.

I think this is important because in framing the debate next week and the week after, as we look at the question of whether or not to help the freedom fighters or whether to participate in allowing the Soviets to establish a military base in Central America, in allowing a Communist Marxist-Leninist dictatorship to establish itself more securely, one question Members of this House have to ask themselves is: What do we know about the nature of Marxism-Leninism and what do we know is probably going on in Nicaragua?

It is particularly important to look at the Grenadian documents, and I would say the average Member of the Congress and the average American citizen that this group of Grenada documents: an overview and selection, is available free from the State Department, is more valuable than 10 trips to Nicaragua, more valuable precisely because a Nicaraguan Communist Party will do precisely what in fact we see in this document the Grenadians doing.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I will be delighted to yield.

Mrs. SCHROEDER. I think one thing we also need to know, Mr. Speaker, is, what do we know about the Contras or the freedom fighters, as the gentleman from Georgia calls them.

I think one of the issues here is not so much who are the good guys and who are the bad guys; I think it is a little vague. My understanding is there are all sorts of data about the Contras that makes one wonder whether they truly are the freedom fighters at the same time. And I think that is where the gentleman might be fuzzing up the facts a little bit because that is obviously what the gentleman is asking us to do, but he is only presenting to us evidence on one side and not talking about the Contras.

Does the gentleman know, for example, that the Contras are going to adopt something like the Declaration of Independence or the Constitution or the Bill of Rights or whatever? If he does, that is entirely contra to what we have heard about the Contras.

Mr. GINGRICH. I think the gentlewoman raises a perfect question and I think it goes to the heart of the whole debate.

In fact, I would say to the gentlewoman, if this were 1944 and we were trying to make the decision whether or not to help the French throw the Nazis out of France, that we could produce a whole series of very accurate horror stories about the French Resistance; that there is no question—and I say this as a historian—there is no question but that partisan guerrillas in Europe did a number of things which, if they showed up on television or if they were witnessed by various church groups, would have been very effective arguments in America; "Why would you help the French Resistance overthrow the Nazis when the French Resistance has committed a number of atrocities?" There is no question they did.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield further?

Mr. GINGRICH. I would be delighted to yield.

Mrs. SCHROEDER. As a fellow historian, let me say that I think there is a good answer for why you would help the French Resistance, and that is that you understood the long tradition in France for a democracy, you understood what they were doing. And that tradition has not been prevalent in Nicaragua. The very tragic problem in Central America is, we have not seen people like Jefferson and Washington and so forth. I think if all of us, if we look at our history, where we have been burned in the United States over and over and over again, is the fact that we are constantly looking at revolutions like they were ours, like they were the wonderful revolutionary forefathers we had when they came to power; people like George Washington, who was offered the kingship and said no. We would not even offer it to politicians today. I think the gentleman is confusing oranges and apples. I am thinking about Contras in a country that does not have the democratic traditions that the French did, and I am saying we both know that all wars are terrible, and guerrilla movements are terrible. I am looking beyond that to the traditions in a particular country.

□ 1530

Mr. GINGRICH. Let me ask the gentlewoman two questions, then, because I think this is the heart of the issue:

In both Afghanistan and Cambodia, members of your party have proposed that we provide aid, covert aid to guerrillas who are fighting against the Soviet Union. Now in both those countries, it has not been conditional aid; in both those countries, in fact, there is no tradition of George Washington—in fact, Afghanistan was for a long time a monarchy.

I am not going to defend a group that frankly I do not know the details of, because I do not think that the choice here is between two evils. My argument is on two counts: First, that Marxism-Leninism is a systematic doctrine in alliance with the Soviet Union for the death of America; and that I can produce for the gentlewoman quote after quote after quote by Marxist-Leninists who say flatly, including an Arce speech, the Nicaraguan, who says flatly that "the war does not relate to Ronald Reagan, that the war will go on no matter what."

So we know, flatly, I would assert to the gentlewoman, that however bad the freedom fighters are, the freedom fighters are not committed to helping the Soviet Union, and the freedom fighters are not the sworn enemies of America.

Mrs. SCHROEDER. If the gentleman will yield further, then let me say if the basis of your argument is that the Marxist-Leninist/Communists are our enemies, which I would agree with, how does the gentleman then explain the administration's position?

Because we have more Communists on our side than the Russians do. We have the Chinese, and we are supposed to be their friends. That perplexes me. How do we do that——

Mr. GINGRICH. I think it is very clear.

Mrs. SCHROEDER. The administration goes to visit them? Somehow they are OK there, and somehow we have to overthrow them in Nicaragua, but we do not know what the people——

Mr. GINGRICH. If I may reclaim my time, because the gentlewoman is again raising an excellent question.

If you look at the history of Maoism in China, you will discover that beginning with Mao, there is a specific repudiation of Soviet-style communism beginning in the late 1950's. You will discover also that the Chinese have rather specifically said to us, "We want to be your ally."

They have given us a variety of listening bases; they have done a number of things that have been reported in the news by which they have said, "We are the strategic allies of the United States against the Soviet Union."

Now, I suspect that if, tomorrow morning, the Communists in Nicaragua were to call President Reagan and say, "We want to kick the Russians out this afternoon, we would like to invite the Americans in; we are going to kick the Cubans out this evening, we would like to replace them with Americans," I suspect we would have no major claim if their immediate security concerns are their right to run a government that happens to be somewhat different from America. It is not

our job to impose democracy everywhere; although I think it is our job to preach democracy.

I would suggest to the gentlewoman that if she would read the Grenada documents, she would discover very systematically that a true Marxist-Leninist party is committed—particularly one which is getting aid from the Soviet Union and consistently votes with the Soviet Union in the United Nations and in every way claims itself to be an ally of the Soviet Union, that a Marxist-Leninist party is by definition led by people who are the committed enemies of America.

Now this is not a question of whether you like or dislike somebody or whether, as Mary McGrory reports, "they smile or don't smile"; this is a question of whether in their own secret documents, they say—and let me quote Arce.

Arce said, in a secret speech—this is a Communist from Nicaragua—

The war will not end on November 4 or January 10, the war will continue with or without Reagan. It may take on other forms, but it will go on. What we are going to do is arm ourselves better in order to continue to develop and to cope with it.

Let me say to the gentlewoman, if a Nicaraguan Communist tells you that their war with America is going to go on even if Mondale had defeated Reagan, does not that give you a hint that maybe they are your enemies?

Mrs. SCHROEDER. The gentleman is misconstruing my position. I am not defending the Nicaraguan Government, and I think that is what the gentleman is trying to say the whole party is doing.

Mr. GINGRICH. Of course you are. Of course you are.

Mrs. SCHROEDER. What I am saying to the gentleman is what I hear you saying is probably the biggest threat in the hemisphere is really Cuba, because Cuba causes an awful lot of these——

Mr. GINGRICH. Yes, it is.

Mrs. SCHROEDER. They are the primary contractor, or the first contractor for the Soviet Union in the hemisphere.

So I am saying to the gentleman, then, why do you not go after the primary source, if that is really the basis of your argument?

The way I feel is, I do not like what I see going on in Nicaragua; I do not like the Nicaraguan Government, but I also have no answers about who the Contras are, and the way I have seen this Government get in trouble before is, suddenly make a problem our problem. I do not think we should make it our problem until we know the side that we are lining up with, and they do not look like a bunch of good guys to me.

Mr. GINGRICH. Wait a second. If the gentlewoman will let me continue for a second—because I think you are really raising the heart of the dialog between the right and the left in this country today.

If, in fact, the Nicaraguan Communists say explicitly they are at war with America, then, as Churchill once said when he aligned himself with Stalin: If the devil would declare war on Hitler, he would say a few kind words about hell.

Then the first issue for the gentlewoman to answer is, if the Nicaraguan Communists are the active, dedicated enemies of America—and I can find you quote after quote in which they say flatly they are our enemies—and if they are systematically allied with Cuba and Russia, is not it our first duty to defeat our enemies?

Mrs. SCHROEDER. But, sir, what you are misconstruing once again is, you constantly want to align me with them——

Mr. GINGRICH. Well, you are.

Mrs. SCHROEDER. I am saying, I want you to tell me who the Contras are, because you are trying to say, "They're so bad, I don't even know who the Contras are, but you must align yourself."

Mr. GINGRICH. Right. No.

Mrs. SCHROEDER. Let me move one step further. If you remember Peter Sellers' great movie, "The Mouse That Roared," his theory was every country should say that, and if we could get the United States all juiced up, then that is how they would get aid coming back in.

Anybody, then, could stand up and say, "We're the enemy of the United States." Does that mean we run in there?

Just in your prior statement, you said we were not to run in and try and control every government in the world. We know that. We are only 4 percent of the population.

Mr. GINGRICH. But in this case, we do not notice—I will continue and yield in a second again, if you would like.

Mr. Speaker, let me say flatly that what they are saying—and I will be very precise about this—what they are saying is, and it is not Nicaragua in isolation. If there was no Soviet Union, this whole dialog would be different, because the Soviet Union is the systematic enemy of freedom, and it is the Soviet Union which is arming, training, and equipping the Nicaraguans at this stage through the Cubans.

Let me say further——

Mrs. SCHROEDER. What if we found out it was the Chinese?

Mr. GINGRICH. Wait a second. Well, let me say further, that this is what bothers me about the gentlewoman's position, and the whole position of our friends on the left: We have documents—this is not something made up. We have documents from Grenada where we know explicitly—it is sitting right here—that they signed secret treaties with the Soviets to ship the arms to Havana, to have the Cubans repack them and send them to Grenada.

Now we know that. Let me continue for 1 second.

Mrs. SCHROEDER. But is not the gentleman asking us to do the same thing in re the Contras?

Mr. GINGRICH. Yes, Yes. I am saying to you, very clearly, that in defense of freedom, one is allowed to do things; you know, a policeman shoots a pistol and a criminal who shoots a pistol are doing the same thing, but they are morally very different.

Let me say to you, because I want to say it very precisely. If you vote to kill aid to the Contras, you are functionally helping the Nicaraguan Communists. Now you are not necessarily favoring them; I am not saying you are pro-Communist, but I am saying that there is no question that the functional effect of your vote is to increase the ability of the Nicaraguan Communists to dominate Central America.

Mrs. SCHROEDER. If the gentleman will yield further to me, if you do not mind, I just want to say that I think that the gentleman should be telling us who the Contras are; I think the gentleman should also be trying to tell us, what effect is this going to have on the whole hemisphere when we have other allies in the hemisphere who are protesting very loudly about this method.

I think that is very serious. I think that we should listen to that.

I also am not sure that I agree with the gentleman's analysis that if the Soviet Union does it, then we can do it, because it is OK.

Mr. GINGRICH. I did not say that.

Mrs. SCHROEDER. I grew up with a mother who said, our Government does not do things like that.

Mr. GINGRICH. Wait a second. I did not say that.

Mrs. SCHROEDER. We are at a higher level.

Mr. GINGRICH. I did not say that. In the first place, as the gentlewoman well knows, in Afghanistan, we do that, and we all know we do that, and it is explicit; that covert aid is legitimate; it is a diplomatic form of behaving which is accepted, which your own party has voted for in the case of Afghanistan.

So it is not a question of whether we do it or do not do it. The question is whether it is wise in Central America.

In the second place, I would say to the gentlewoman, that I am quite willing to define who the Contras are. The Contras are Nicaraguans who are committed to the defeat of the Soviet Union.

Mrs. SCHROEDER. And then what do they plan to do?

Mr. GINGRICH. I am willing, as a first order of debate, to say unequivocally that if my choice is between a Communist dictatorship in alliance with the Soviet Union, and people who are opposed to the Soviet Union building a 12,000-foot airfield for their bombers in our hemisphere, that I favor the non-Communists, period.

Now, if there are second-level problems with that; if we need to apply pressure to them as we have in El Salvador, if we need to do things to get them to straighten their act up, that is the second order; but I will tell you flatly the first order of business has to be to prevent the Soviet Union from establishing a colony in this hemisphere in addition to the colony it already has in Cuba.

□ 1540

Mrs. SCHROEDER. Why is not the gentleman concerned about Cuba? What is the gentleman's plan for that?

Mr. GINGRICH. I am very concerned. If the gentlewoman would like to propose a bill to go with the heart of Cuba, I would be very interested in cosponsoring with her.

Mrs. SCHROEDER. But it is the gentleman who is standing here saying that we should do everything we can to make sure that there is——

Mr. GINGRICH. Well, as a practical matter, if we cannot convince your side to even support anti-Communist steps in an area where it is still in doubt, it is impossible to sustain in this House any serious action against Cuba.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from California.

Mr. DELLUMS. I appreciate the gentleman's yielding.

First, with all due respect to the gentleman, I would like to say that I think that this is a pseudo intellectual discussion that has enormous and frightening implications in the real world. We might be able to talk about this in some classroom off in academia the way the gentleman makes his intellectual assertion. In the real world, we are talking about living and dying. I would like to make two comments in that respect.

First of all, I have respect for the gentleman's right to make any political statement the gentleman chooses to make. But I do not accord the gentleman the right to attempt to characterize the nature of the other person's argument.

If there is one thing you and I must agree upon, it is that the process itself must have integrity. And in the marketplace of ideas, every single individual elected to the Congress has a right to articulate that point of view without being characterized.

Mr. GINGRICH. I did not characterize it. I talked about the functional——

Mr. DELLUMS. This "left," "right," "Communist," "non-Communist," that is a game that gets played here.

Mr. GINGRICH. Well, come on. The gentleman from California has got to be kidding.

Mr. DELLUMS. Will the gentleman let me make my last comment?

Mr. GINGRICH. OK.

Mr. DELLUMS. Then I will back off.

Mr. GINGRICH. All right.

Mr. DELLUMS. First, my argument is, simply: Any one of us is not an individual when we take the floor of Congress. We are people who are articulating a political perspective that has a right to be heard, again as I said, in the marketplace of ideas. I am not willing to take my marbles and walk home because the body does not agree with my point of view. But we have a right to air it without being in any way characterized.

Mr. GINGRICH. Of course.

Mr. DELLUMS. My second point: I would like to go specifically to the question the gentleman raised with my colleague. The gentleman said: Is it not our responsibility or objective, whatever word the gentleman used, to defeat the enemy?

I would say in 1985, against the backdrop of nuclear armaments, billions of dollars in military buildup, no, it is not our responsibility to defeat the enemy. I think we have a larger responsibility, and that is to begin to communicate with people so we move beyond seeing them as enemies. The enemy in Nicaragua is not some political idea. If it were, then it would seem to me that we ought to defeat a political idea with a better political idea, not with a bigger gun, not with a bigger bomb. And that is where I do not support the notion of advancing more money to the Contras, because if you agree that you have a better idea than my colleague, then assert the idea. You do not do it through the barrel of a gun. You do it by alleviating poverty and hunger and disease and inadequate education, and all of the other problems that confront people in Central America.

Mr. GINGRICH. Well, let me say one thing to my distinguished friend: First of all, I do not characterize. If the term "left" or "right" offends the gentleman——

Mr. DELLUMS. It does not offend me. It is just the game that I am used to the gentleman playing.

Mr. GINGRICH. OK. I think it is an important way of distinguishing patterns of thought. But let me continue with my good friend, for a second.

Mr. DELLUMS. I think that I played beyond ideology.

Mr. GINGRICH. All right. The gentleman may, but let me challenge him to look at the documents, because they do not. The fact is, they call themselves Communists, they call themselves Marxist-Leninists. If you look at the speech and you look at the documents, they say to you we are at war.

Let me give you two quotes for you to think about, because it does not do much good for you to believe in civil disobedience and them to believe in machineguns, because they will shoot you while you are civilly disobeying them.

Now, let me walk you through two quotes.

Mr. DELLUMS. I am not sure I understand your assertion.

Mr. GINGRICH. It is not an assertion. You know, Ghandi could only exist in an Anglo-Saxon government in which the Government of England was not willing to kill him. Ghandi in Germany under Adolf Hitler would have been sent to Auschwitz. He would have died in the gas chamber.

Mr. DELLUMS. Will the gentleman yield briefly to me?

Mr. GINGRICH. Let me finish. I will yield in just a minute.

Ghandi in the Soviet Union would have died in a gulag in Siberia, with no one ever hearing of him. Civil disobedience only works in a country which believes in law.

Mr. DELLUMS. But you are building your own straw man. I have not mentioned Ghandi. You are building your own staw man.

Mr. GINGRICH. No, no. I am bringing him up because when you talk about how you do not want to focus on guns, that is fine—let me finish my point here for a second.

Mr. DELLUMS. All right.

Mr. GINGRICH. Two quotes for you to think about: In Arce's speech, he says, as I quoted to the gentlewoman from Colorado, "The war will not end on November 4 or on January 10. The war will continue with or without Reagan. It may take on other forms, but it will go on."

This is a Nicaraguan Communist saying in their minds, in their decisions, they are at war with us.

Let me give you one other quote from the Grenada documents, from the Embassy of Grenada in Moscow, 10th of March, 1983. This is a report by the Grenadians themselves to their own government from the head of their army, who was meeting with the marshal of the Soviet Union, Ogarkov. Let me just read you this quote for you to think about. Marshal Ogarkov said:

> Over two decades ago, there was only Cuba in Latin America. Today there are Nicaragua, Grenada, and a serious battle is going on in El Salvador.

It is clear from that quote that as far as the Soviet Union was concerned they are engaged in a war in the Western Hemisphere, that they won at that time in Cuba, they had won in Grenada until we liberated the island, they thought they had won it in Nicaragua.

Now, all I am saying to you is, you may not want to be at war. They do. You may not want to use code words. They call themselves Communists. I do not know why you are attacking me because they use ideological terms.

Mrs. SCHROEDER. Will the gentleman yield?

Mr. GINGRICH. Let me yield to the gentleman from Pennsylvania, and then I will come back.

Mr. WALKER. I thank the gentleman for yielding, because the other thing that we do not seem to get into this discussion, when we start talking about the fact that we want to reach out and we ought to be talking with nations like Nicaragua, is the fact that in fact we were a part of the overthrow of Somoza, that our Government, participated in the overthrow of Somoza and we were a part of installing the Sandinistas, in the first place.

Having done that, we also provided the Sandinista government with a large largess from the United States over a period of some months, in fact over a period of 12 to 18 months, providing the Sandinistas with more aid than we had given to Somoza in the previous 20 years.

Their reaction at that point was to use the money in building an army; they expanded the army substantially; they invited in the Russians and the Cubans during that same period; they began to coalesce Marxist power within the government at the same time we were trying to provide helpful aid in trying to have a dialog.

Their stance has been clear from the days when even we helped them. And in the meantime we are throwing out the democratic elements of the Sandinista movement that we are attempting to install what they had originally promised. And the gentlewoman from Colorado wants to know who the Contras are. Among the Contras are many of those democratic leaders who were previously Sandinistas, who would still like to reclaim the revolution that the Sandinistas originally promised to the people of Nicaragua. Those are among them. They are not all of them; they are among them.

We ought to at least be aware that in supporting the Contras we are doing the similar kinds of things that we were doing when we were opposing Somoza; we are trying to give to them some of the traditions of democracy that up until now they have not been able to attain. And one of the reasons why they have not been able to attain them is because they are being ruled by Marxist dictators at the present time.

Mr. DELLUMS. Will the gentleman yield for me to make one final assertion?

Mr. GINGRICH. I yield to the gentleman from California.

Mr. DELLUMS. Let me put it this way: Even if we accepted all of the statements that you and my distinguished colleague from Pennsylvania made, even if we accepted that, I am prepared to even go beyond that. Even if we accept all of these paranoiac ideations, I am saying we must now, by virtue of the reality of where war can take us, to the abyss of thermonuclear disaster, I am saying we must be bold enough to think beyond the mundane pedestrian notions of war.

Mr. GINGRICH. I agree with you.

Mr. DELLUMS. And what better place than now should we begin the process of nonviolent, peaceful negotiations?

Mr. GINGRICH. But I say to the gentleman, if you know from the documents——

Mr. DELLUMS. Where else are we going to fight war? How many more Grenadas can there be?

Mr. GINGRICH. Let me pursue this, and then I will come back to the gentlewoman.

I say to the gentleman: At what point would you decide you had to resist? You did not want to resist in Grenada, where we now know for sure they really were Communists. You are telling us not to resist in Nicaragua.

Mr. DELLUMS. Do not put words in my mouth.

Mr. GINGRICH. Would you resist in Mexico?

Mr. DELLUMS. If the gentleman will yield, I resent that. What I said to the gentleman——

Mr. GINGRICH. Why?

Mr. DELLUMS. What I said to the gentleman was this——

Mr. GINGRICH. I am asking you, why do you resent it?

Mr. DELLUMS. Because you have no right to characterize my words.

Mr. GINGRICH. I read your words.

Mr. DELLUMS. I am articulate enough to make my own statement.

Mr. GINGRICH. That is right.

Mr. DELLUMS. What I am saying to you——

Mr. GINGRICH. Were in favor of eliminating the Communist Government of Grenada?

Mr. DELLUMS. What I am in favor of is stopping the Contras.

Mr. GINGRICH. Answer the question.

Mr. DELLUMS. What I am in favor of is the United States, Nicaragua, and other Central American governments sitting down to peacefully and not violently negotiating the circumstances around which they will live, short of the cruelty of war.

Mr. GINGRICH. Listen, I would love to do that.

Mr. DELLUMS. That is what I am saying. We are a powerful Nation.

Mr. GINGRICH. No; we are not.

Mr. DELLUMS. We should be in the forefront of leading for peace, not of projecting war in the world. That is what I am trying to suggest.

Mr. GINGRICH. My point to the gentleman, if I might, is that I am with you.

Mr. DELLUMS. I am sorry, I feel passionately about these things.

Mr. GINGRICH. I understand. I feel as passionately as you do.

I would love to be able to sit down with the Nicaraguan Communists. And what I am trying to report to the gentleman is—and I can cite you specific passages from both the Nicaraguan Communist speech and the Grenadian Communist speech, where they say they are lying to you. They say flatly in the documents we captured, I say to the gentleman from California, they explain how they are lying to you, they are explaining how they are duping you; they are explaining how you fall for it all the time—"you" collectively, not "you" personally. The Americans. They say, quite clearly—let me just give you two examples for you to think about.

Mrs. SCHROEDER. Before you do that, will the gentleman yield?

Mr. GINGRICH. No, not until I finish this.

□ 1550

Mr. DELLUMS. Let us stay on the ground you first asserted and that we are trying to deal with.

Mr. GINGRICH. I am trying to respond to your intervention.

Mr. DELLUMS. You can talk with me as a human being. We do not need the book. You and I can talk about it.

Mr. GINGRICH. No, we cannot talk, and that is exactly my point.

Mr. DELLUMS. Let us talk; let us debate for real.

The SPEAKER pro tempore. The Chair would state to the gentleman from California that the gentleman from Georgia controls the time.

Mr. GINGRICH. I thank the Chair.

My point to my good friend from California is precisely that the book matters because the book has facts in it which destroy the gentleman from California's argument. I wish, like the gentleman from California——

Mr. DELLUMS. Destroys what argument?

Mr. GINGRICH. The book says, unequivocally, the Grenadian documents that we captured say unequivocally, that they were always Communists; they were Communists before they took power; they established a dictatorship from the very first day; they deliberately lied to the Americans, and they did it because they were confident.

He says, and let me give you two quotes.

Mr. DELLUMS. So what are we going to do, go to war with all the Communists and bomb them to stone age? What are you talking about?

Mr. GINGRICH. This is from Maurice Bishop's speech to the Communist Party of Grenada:

It is very significant, comrades, that from the start, from the very first second of the Grenada Revolution, let us say, 4:30 a.m. on March 13, 1979, from the very first second of the Grenada Revolution, what was established was a dictatorship.

He then went on to say, and I cite it. Let me say before I quote, he is saying the reason they included people and established a front that was phony:

This was done deliberately so that imperialism will not get too excited and would say, "Well, they have some nice fellows in that thing; everything all right, and as a result, would not think about sending in troops."

Let me just say that I would suggest that the exact arguments of both my distinguished colleague from Colorado and my distinguished colleague from California fit precisely the reason that the Communists in Grenada were told, and that we have evidence here from a Communist in Nicaragua that they were advised by the Cubans and the Soviets to do exactly the same thing, because they say flatly in here, and I think the quote, frankly, is devastating. The say flatly in here that: "Our strategic allies tell us not to declare ourselves Marxists-Leninists, not to declare Socialism, and the reason is because they are convinced that there are always people in America willing to believe the next story."

Now, in fact from the secret documents in both cases, in Grenada and Nicaragua, what I am saying to my good friend from California, and I say it with great sadness, I wish the world did not exist like this. I wish there were no Soviets; I wish there were no evil people. I wish there was no KGB. But the fact is, we have absolute evidence that in Nicaragua today there is a Soviet alliance determined to destroy the United States of America, and that to say, well, why do we not talk to them, is, I think, incredibly naive.

I yield to the gentlewoman.

Mrs. SCHROEDER. But I think the gentleman, once again, is mischaracterizing what we are trying to say. The gentleman is trying to put words in our mouths, and is trying to look like we are naive, innocent, little pussycats that have no idea what is going on and you are going to bring this quote and show it to us.

I personally am not of any, any misconception that the Sandinistas are doing a terrific job. I want you to know that, so you do not need to read the quotes to me, I understand that.

Mr. GINGRICH. If I can reclaim my time.

Mrs. SCHROEDER. Let me move on.

Mr. GINGRICH. I want to reclaim my time to ask you something. You just made an assertion——

Mrs. SCHROEDER. The gentleman wants to characterize my arguments——

Mr. GINGRICH. No, I want to ask you a question. The issue is not are the Sandinista Communists doing a good job. The issue is are they allies of the Soviet Union, and is their goal the defeat of America?

How would you characterize that?

Mrs. SCHROEDER. I have absolutely no question that they have become allies of the Soviet Union. Whether they are going to defeat the United States, a little, tiny country——

Mr. GINGRICH. As allies of the Soviet Union.

Mrs. SCHROEDER. It becomes a little silly.

Mr. GINGRICH. Why?

Mrs. SCHROEDER. I do not think that we can say that they are planning to invade; I do not think that is happening. But let me move forward. Our allies in that region that are Spanish-speaking, that share their historical and linguistic background are all saying that we should not be backing the Contras.

Now, are all of our allies dupes?

Mr. GINGRICH. That is simply not true. If I may reclaim my time, I want to say to the gentlewoman——

Mrs. SCHROEDER. The Contadora process has been going on——

Mr. GINGRICH. I say to the gentlewoman the Governments of El Salvador, Honduras, and Costa Rica, which are the closest three countries, all favor our aid to the freedom fighters. The President of Costa Rica was up here yesterday, a country that has no army, asking for help for the freedom fighters. Now, will the gentlewoman retract her statement? You were factually wrong.

Mrs. SCHROEDER. I am talking about the Contadora process, which are our largest allies in the region.

Mr. GINGRICH. Will you retract your statement? You are factually wrong. Factually, that is not what you said is not correct.

Mrs. SCHROEDER. I am saying our major allies in the region engaged in the Contadora process do not think backing the Contras is correct, as far as I am aware.

Mr. GINGRICH. That is not what you said. Will you concede that the three countries closest to Nicaragua are all supporting——

Mrs. SCHROEDER. No, I have not seen statements from them.

Mr. GINGRICH. You have not seen statements from Honduras, El Salvador? If I get the gentlewoman statements from the three governments——

Mrs. SCHROEDER. Look, first of all, it makes no difference. The gentleman just enjoys——

Mr. GINGRICH. Of course it does.

Mrs. SCHROEDER. Let me tell what I think you are into: You are into what America is into. You know, we all have got to prove we are not wimps.

Mr. GINGRICH. I am not trying to prove that.

Mrs. SCHROEDER. So the main is to go down and show how macho we are. What I am trying to say is that there is a rule of thinking that there is a way to deal with Nicaragua by not making them such a big deal. You are making them a big deal.

Mr. GINGRICH. I say to the gentlewoman I wish there was some plausible reason to believe there was hope for what you just said. I have no interest in being macho or being wimp. I do know that since you have conceded that Nicaragua is an ally of the Soviet Union, that the Nicaraguan Communist Government, in alliance with the Soviet Union, is a threat to America.

The minute you agree that they are allies of the Soviet Union, then that 12,000-foot runway is a totally different issue because now you have Backfire bombers potentially. Now you have a totally different capacity for infiltration.

Mrs. SCHROEDER. If the gentleman will yield, that is ridiculous.

Mr. GINGRICH. Why?

Mrs. SCHROEDER. The gentleman knows that the Soviet Union is the superpower and not Nicaragua. The gentleman is suddenly saying that the Soviet Union is suddenly the equivalent of Nicaragua?

Mr. GINGRICH. Wait. No. See, this is why the lady might think some people come to the conclusion she is naive. Let me talk through it again, since you raised that issue yourself.

If Nicaragua is the Soviet Union's ally, and you have said it is, and if the Soviet Union is committed to the destruction of the United States, and every piece of evidence we have is that they are——

Mrs. SCHROEDER. And the Soviet Union builds one runway in Nicaragua, I should go buy a night light and fund the Contras? Come on.

Mr. GINGRICH. I do not know why you are exaggerating. What I said was, at that point, that runway, in addition to Cuba, becomes an increased threat to America. That it is the Soviet Union that transfers the Nicaragua issue into an issue of concern to Americans.

Mrs. SCHROEDER. Let me come back and say why the Soviet Union, I think, has been so quick to come in there, OK? If we want to deal with Nicaragua, the best way to do it, I think, is lower our voices and try to do it quietly and try to do it through the Contadora process.

Mr. GINGRICH. Why?

Mrs. SCHROEDER. Because I think all the countries in this hemisphere feel that they are shoved in a bathtub with an elephant; that is, the United States.

The way you get to be really popular and probably stay in power for ever and ever is to find some way to have

the President of the United States and the entire U.S. Government single you out. Then you become a big deal because you have got the elephant's attention.

It seems to me that if the United States wants to be as constructive as they can in trying to figure out how to bring Nicaragua around to a true democracy as we want it, then we should lower our voices; we should work with the neighbors; we should do what we can to try and change the situation so it is not fertile ground for the Communists to till. That is the way——

Mr. GINGRICH. I know that it bothers some of my colleagues if I actually use books and make reference to documents, but if I could cite the Embassy of Grenada in a secret dispatch from the Soviet Union. This is from Moscow, July 11, 1983.

By itself, Grenada's distance from the U.S.S.R. and its small size would mean that we would figure in a very minute way in the U.S.S.R.'s global relationship. Our revolution has to be viewed as a world-wide process with its original roots in the great October Revolution. For Grenada to assume a position of increasingly greater importance, we have to be seen as influencing at least regional events. We have to establish ourselves as the authority on events in at least the English-speaking Caribbean and be the sponsor of revolutionary activities.

Now, I would say to the gentlewoman: I do not know what more evidence you can ask for. Here is the Grenadians who are getting a small amount of money from the Russians, saying they get the money in return for undermining other countries. They happen to mention as their job taking out Surinam and Belize.

I am suggesting to you that if we had the same document in Nicaragua, we would discover that the Nicaraguan Communists have been told by the Soviets their assignment is Central America. All of the historical evidence is on the side of the analysis that I am describing. You cannot find a single piece of historical evidence on your side.

Mrs. SCHROEDER. The historical evidence on my side is that when there is not fertile ground for the Communists to till, they have nothing to sell.

Second, when we have alliances with our allies, it is the same thing. So that they have us fight our enemies. I mean, alliances are built on that.

□ 1600

Mr. GINGRICH. If I may reclaim my time, I would just say to the gentlewoman that there is no way that that analysis stands up historically. They did not say here we are only supposed to go and sell revolution in countries that want it; they said our assignment is "X." They said our assignment is given to us by the Soviet Union, and if you read this book you discover they are trained by the Cubans.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

Mr. Speaker, in respect to the gentlewoman's last statement where she said basically that Marxism only flourishes where there is fertile ground and we should not produce the fertile ground, I was reflecting on Poland and Afghanistan and wondering how unfertile the ground has to get before there is a chance of having real change there.

Mrs. SCHROEDER. Could I answer the gentleman?

Mr. HUNTER. Let me finish, and then I think the gentlewoman will have plenty of time here.

I remember when the gentleman from California [Mr. DELLUMS] brought Maurice Bishop before the House Armed Services Committee and we had an informal meeting with Mr. Bishop. I think every member of the committee thanked the gentleman from California for allowing us to talk with Maurice Bishop, to have a dialog with him, and he was, No. 1, a very articulate gentleman, very intelligent. I think he was educated in Great Britain.

I reflected on Maurice Bishop the night that I heard that Maurice Bishop had been machinegunned by his fellow Marxists, and I reflected on the gentleman's statement about the need to produce a marketplace of ideas and the way you change governments is by having a better idea. It occurred to me that Mr. Coard and General Austin, who essentially effected the assassination of Mr. Bishop, along with many very innocent townspeople, were not articulate; they did not have better ideas. What they had were essentially automatic weapons and they had Mr. Bishop and his friend up against a stone wall and they machinegunned them.

In reflecting on that, it would appear to me that the gentleman should at least agree that what we did in Grenada was the right thing and that, in fact, they had a system that could not possibly be condoned by the United States, and that the very ideas that the gentleman is a champion of, the ideas of free debate, of having the best idea win, not necessarily the best rifle or the best army or the best military.

All these ideas were defeated by simple brutal force in Grenada, and I would ask if the gentleman could yield to the gentleman from California in basically answering that question? Were we not right in Grenada in doing what we did?

Mr. GINGRICH. I yield to the gentleman from California.

Mr. DELLUMS. I thank my colleague for yielding.

I think that the point you make of Maurice Bishop, who was an articulate person who came here to talk, was shot down by the use of brutal force, makes my point. At some point we have to, as human beings on this planet, in this country, in this body, get beyond the barbaric notions of the use of violence and war as a way of solving our differences.

What I have said to the gentleman in the well, and what I say to you is, even if we accept your fears, I am saying, do we solve those problems by picking up the gun and beginning to go down that road toward greater violence that ultimately will end up with the exchange of thermonuclear weapons blowing us all off the planet, or do we find some more rational and intelligent way to address our differences and that is what you have not addressed.

That is the only point I make. Even if I accept your assumption, tell me why sitting down to negotiate is not superior to continuing to finance Contras and engaging in war?

Mr. GINGRICH. The question I would pose to the gentleman——

Mr. DELLUMS. You just pointed out that violence is insane. That is what I am trying to say.

Mr. GINGRICH. No, violence is not insane. Would you say, then, the American invasion of France was insane; that the defeat of Adolf Hitler was insane?

Mr. DELLUMS. We are not talking about war in World War II terms. We are talking about a generation of global strategic nuclear war capability.

Mr. GINGRICH. Nobody on our side is suggesting anything——

Mr. DELLUMS. We are not talking about M-1 rifles. We are talking about MX missiles and Trident submarines, cruise missiles, Pershing missiles, Trident missiles, B-1 bombers. That is what we are talking about.

Mr. GINGRICH. That is precisely where I do not understand the gentleman's position. Not a single dollar of the aid to the freedom fighters will go to nuclear weapons, and it will go precisely to rifles. Not a single dollar of the aid to the freedom fighters——

Mr. DELLUMS. Why is it necessary to fight it out? Why can we not sit down around the table to negotiate? Answer that question.

Mr. GINGRICH. I am trying to answer the gentleman. Let me tell you why.

Mr. DELLUMS. Why is killing people more superior than talking with them, even if you have a difference of opinion like you and I. We are not shoting guns at each other. We are firing words and ideas.

Mr. GINGRICH. They are shooting at us, if I might reclaim my time. The reason I keep bringing out the Grenada Documents, and the book which is

available to every citizen to look at, is because when you read the Grenada Documents you discover, for example, when did your friend, our friend, a decent man, an articulate man who came up here and said, "Gosh, I would really like to talk to you," when did Mr. Bishop become a Communist? When did he decide he was going to set up a Marxist-Leninist party? Not because of Ronald Reagan or Jimmy Carter or Gerald Ford.

He said in April 1974: "That is when we decided in theory and in principle that we should build a Leninist party." Intellectually, that means——

Mr. DELLUMS. You stepped away from my question again. You are very smooth at that.

Mr. GINGRICH. I am not stepping away.

Mr. DELLUMS. Tell me why it is more superior to wage war than it is to sit down to negotiate? Our credibility is on the line.

Mr. GINGRICH. I will tell you: Because Marxist-Leninists believe deeply, as the Nicaraguan Communist said in this secret speech, they believe deeply that they are at war with you, and while you are sitting and negotiating with them, they are systematically building their airfield, their secret police, their army, they are setting up guerrilla movements in other countries, and they are glad you are talking so they can fight.

Mr. DELLUMS. Do you think we should be negotiating with the Soviet Union?

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I would be glad to yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

Mr. Speaker, my point was, and I think this answers the gentleman's point head on, was that the only time that we had free elections, when an intellectual can stand up and can talk on the soap box on the election trail is today, after the Americans have gone in. I do not think anybody on this earth would claim that under General Coard and Mr. Austin you could have any type of a democracy, so the point was you had a very brutal government that assassinated a gentleman that the gentleman from California knew very well, who was articulate, who was intelligent, and he completely stifled any intellectual debate. So you could have waited a thousand years, in my estimation, and if you had a succession of Coards and Austins ruling Grenada, you would have never had that free and fair debate, that exchange of ideas that you speak about. It was only when armed Americans landed on the island and set up a system in which people could get up on that soap box and run for office, I talked to some of the people who were in exile who were going back down to run as politicians. They did not have much chance, but they said, "We have a little chance and now we can go back and express our ideas and we may have a chance of winning."

What is what the gentleman likes to promote. That is what I like to promote. But that was not possible until American Marines and Rangers landed on October 25 in Grenada.

Let me make one last point. The Contadoras were mentioned by the gentlewoman from Colorado. Why can we not listen to the Contadoras, she asked? Why can they not have an effect on the situation?

I think we all have to agree that since Fidel Castro came to power, the Contadoras are afraid to death of Cuba. I have been in Mexico City. I have looked at a great many of the statements made by Mexico City media, a great many statements made by their official government. Their unofficial statements to us that are made in some confidentiality are much, much different, I would say to the gentleman, and to the gentlewoman from Colorado if she were here, than the statements that appear in their official press releases.

You have a country like Colombia that just had one of its cabinet assassinated by the drug trade in Colombia. That country is barely able to control its own revolution right now. It is not able to stifle its own drug trade that is sending literally tons of cocaine and other addictive narcotics into America's youth. They cannot win that war. How can they possibly have a real effect on Nicaragua or on Cuba, especially when they are very, very much intimidated by those countries?

I would invite the gentleman from California to engage in some off-the-record discussions with Mexico, because Mexico, in my estimation, is very, very worried about instability brought on by Nicaragua. They are treading on eggs right now. We cannot expect any support from them, I think rhetorically, in the newspaper, in the official media or coming from their administration. They are scared to death.

So for us to take this group of countries that are absolutely scared to death of Cuba and of Nicaragua and say we are going to let them negotiate something out is just not being realistic.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield briefly, and I will just make one last brief remark?

Mr. GINGRICH. Let me just yield to the gentleman from Pennsylvania [Mr. WALKER] and then I will come back to you.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I think the gentleman from California raises a good point with regard to violence. I think anybody who believes fundamentally in democratic ideals says that we are far better off talking within the political process. The fact is, though, that our adversaries are tyrants who believe that the effective use of violence works very well.

□ 1610

So they are very willing to use violence, sometimes very narrowly, sometimes on a broad scale, in order to send us the kind of messages the gentleman from California [Mr. HUNTER] just referred to. The nations of Central America are scared to death of Cuba because they know Cuba is willing to use violence. The neighbors of the Soviet Union are scared to death of the Soviet Union because they know that the Soviet Union is willing to use violence.

It would be fine to say that we can always talk those things out. In fact, the President has proposed in Nicaragua that we try a process of talking for 60 days, and the Nicaraguans themselves have rejected that as a concept.

It seems to me we have got to understand that there are tyrants in this world who are perfectly willing to use violence to their own advantage.

Now, the question is, when you put the umbrella of thermonuclear war over that, how often are you willing to back away from their violence under the theory that it could lead to thermonuclear war and thereby give up a little bit of your alliance or a little bit of your freedom? How long can we back away because the threat posed by them is that someday they might use those horrible weapons? The fact is that that is exactly what they are saying to the world at the present time, that "if you don't do what we say and if you don't negotiate on our terms, the threat is that the world could go to nuclear holocaust."

I think for people who love freedom that means they can chip away at Afghanistan, Cambodia, Vietnam, Nicaragua, and Grenada, and they can continue to chip away at freedom across the world in order to advance Communist tyranny. That is what the gentleman from Georgia is talking about, and it seems to me that violence is not something we have to address. Violence in our context has to be used only in defense, but it seems to me that that defense is an extremely important ingredient toward preserving freedom.

Mr. GINGRICH. Mr. Speaker, let me make one point, and then I will yield to the gentleman from California. I want to make this point while he is on the floor, and I will be glad to come back another day if he would answer it later after he thinks about it.

I do not know if you have read the Line of March speech by Maurice Bishop, but in that speech he says three things that, if I were in your position, would bother me a very great deal, given your moral position, which I think is a very sincere one. He says, first, that they had always been, since 1974, Marxist-Leninists, and that means a very specific set of ideas which the Soviets train people in which involves dictatorship.

He said, second, that he was an absolute dictator who locked people up whenever he wanted to without rule of law. And he said that very specifically.

And he said, third, that they systematically lied to America.

Now, it would seem to me that those of our friends in this House who honestly believed in Maurice Bishop and who honestly tried to explain how we could talk to the Grenadans had to answer the question: If you were fundamentally wrong about the nature of their party, the nature of their dictatorship, and the legitimacy of their behavior, why should we think you are right about Nicaragua?

Mr. DELLUMS. May I respond to that? Will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, I want to respond to some other points first. If you want to set that particular theme up, then you and I can have at it for an hour on that theme alone.

Mr. GINGRICH. All right.

Mr. DELLUMS. Let me make a couple of quick comments.

First of all, it is not a moral position, as if this is some bleeding heart position. I assert my position because I believe that we have now achieved a level of danger in this world that peace is an imperative, not an alternative. I think the world is becoming a very dangerous place.

I think we have to stop fighting proxy wars in Third World countries. My colleague said, "I hate to see places where there are Communists and the KGB." I hate to see poverty, hunger, disease, starvation, and inadequate education.

Mr. GINGRICH. Wait. Wait.

Mr. DELLUMS. These are problems that grip the world that I would like to resolve. These are my priorities.

Mr. GINGRICH. Wait a second. Let me reclaim my time.

Mr. DELLUMS. Let me finish.

Mr. GINGRICH. No, I want you to tell me something because you have made an assertion that is very important here.

If you do not stop the Soviet Union in Afghanistan, if you do not stop the Soviets in Nicaragua, is there any country where you would fight them?

Mr. DELLUMS. What I am saying to you is that I think we have got to sit down around the table and negotiate our differences.

Mr. GINGRICH. No, but they are not going to negotiate with you. If they think you will give in everywhere——

Mr. DELLUMS. Let me make this assertion.

Mr. GINGRICH. Where would you fight them?

Mr. DELLUMS. Let me just finish this, and then I will back all the way off to the moral initiative.

Mr. GINGRICH. Where would you stop them? Where would you fight them?

Mr. DELLUMS. If you push this point to its logical extreme, what you are advocating is war, and I do not want to kill our children and our children's children because you want to play some macho game.

Mr. GINGRICH. Wait a second. I do not want to play some macho game.

Mr. DELLUMS. Let us sit down around the table and negotiate in peace.

Mr. GINGRICH. Where would you stop them? If you would not stop them in Nicaragua and you would not stop them——

Mr. DELLUMS. Let us sit down at the table in Geneva where they are sitting at the table now and let us start backing away from total ignorance and total annihilation. That is what we need to do.

Mr. GINGRICH. Wait. But they are invading Afghanistan.

Mr. DELLUMS. Let us use our intellectual capability and the power of our politics, not the power of our bombs.

Mr. GINGRICH. Let me explain it to you. They are invading Afghanistan, their puppet is invading Cambodia, they have troops in Nicaragua, and we have absolute proof here that they are systematically setting up guerrilla wars. So you are negotiating in Europe. You sit at a nice table while they conquer the world.

Where would you stop them? If you would not stop them in Nicaragua, would you stop them in Guatemala? Honduras? Mexico? Where are you going to stop them?

Mr. DELLUMS. First of all, from a historical perspective, where we have said to the Soviet Union, "This is our sphere of influence. Don't move in that," they meticulously stayed away, where they said our sphere of influence——

Mr. GINGRICH. Would you accept a resolution declaring the Monroe Doctrine intact, that our sphere of influence includes the Western Hemisphere?

Mr. DELLUMS. I think when we start playing spheres-of-influence games, that is when we divide the world up into a whole lot of——

Mr. GINGRICH. But you mentioned spheres of influence. Wait. You are the one who mentioned it. You cannot have it both ways.

Mr. DELLUMS. That is when we divide the world up into a whole lot of chauvinistic, paternalistic, parochial divisions that have led up to the cold-war mentality that has dominated our foreign policy for over 40 years, and the cold war is a simplistic, naive, dangerous way to view the world.

Mr. GINGRICH. Wait.

Mr. DELLUMS. That is how I am challenging you.

Mr. GINGRICH. I say to the gentleman from California, since you are the one who has raised the term, "sphere of influence," if you would not stop the Soviets in Afghanistan and you would not stop them in Nicaragua, tell me a country you would try to stop them in.

Mr. DELLUMS. What I am saying to you again, I repeat one more time, I would like to stop where both countries are now, in Geneva, and begin the process of trying to normalize our relations.

Mr. GINGRICH. Wait a second.

Mr. DELLUMS. We cannot continue this intensity and this stress in the world. Otherwise we will blow up the world. I am not macho enough to want to blow up the world. I do not play that game.

Mr. GINGRICH. Wait a second. Let me reclaim my time.

Mr. DELLUMS. I am an advocate of peace, and I would challenge you to the last breath I have that war is insane, whether it is in Nicaragua or whether it is anywhere else in the world.

Mr. GINGRICH. Mr. Speaker, let me reclaim my time.

Mr. DELLUMS. I want the gentleman to understand that. We should have learned something in Vietnam. Fighting proxy wars is not in our best interest.

Mr. GINGRICH. Wait a second. There is a Nicaraguan speech in which a Nicaraguan Communist says—and I want to repeat the quote because I want the gentleman's comment; this is a Nicaraguan Communist, this is not one of us, this is a Nicaraguan Communist—"The war will not end on November 4 or on January 10. The war will continue with or without Reagan. It may take on other forms, but it will go on. What we are going to do is arm ourselves better in order to continue to develop it and to cope with it."

Now, if you know that the Soviets are pouring weapons into Nicaragua and you know the Nicaraguan Communists say they are at war with us and you know that every evidence we have is that they are being trained by the Cubans and the Soviets to eventually take over all of Central America and you know from the Grenada documents that the Grenadian Communists in their own secret dispatches talk specifically about being assigned by the Soviets to take over two countries, I would say to the gentleman—and I am all for talking in Geneva, but

I am also for stopping the Soviet Union in Central America while we talk in Geneva—where would you attempt to stop the Soviet Union if they are determined to launch this kind of secret war?

Mr. DELLUMS. That is absurd.

Mr. GINGRICH. Wait. Why is it absurd?

Mr. DELLUMS. Let me ask you this: How can we have as a nation credibility to say to nations in the Middle East, where the problems are magnified by religion, culture, history, et cetera, "Go to the table and negotiate" when we are financing Contras here and are not willing to go to the table? Either we believe in that process or we do not.

Let us say to the world that we will get down around the table and negotiate the circumstances around which we will live with each other.

Mr. GINGRICH. What if they will not negotiate?

Mr. DELLUMS. How can we say that to the Middle East if we cannot say it to ourselves?

Mr. GINGRICH. Does the gentleman understand that in both the Nicaraguan and Cuban cases we have documents in which they say in effect that it is their job to lie to us while winning the war? Do you understand that this is exactly like Adolf Hitler?

What they are saying to you is that "We will be glad to negotiate with you as long as we get to win all the wars while we are negotiating."

How many countries are you willing to give up?

Mr. DELLUMS. Let me take that out a little further. Are you saying we should not negotiate at this time?

Mr. GINGRICH. No, I say we should do both. We should defend the freedom fighters and we should negotiate, but we have to teach the Soviet Union——

Mr. DELLUMS. Would you negotiate with me if I was financing this guy to shoot your brains out?

Mr. GINGRICH. Sure, of course I would if I thought the danger was nuclear war. We negotiated with the Soviets while we were in Vietnam.

Mr. DELLUMS. How can you do both?

Mr. GINGRICH. Because we did it.

Mr. DELLUMS. How can you go about negotiating with people while you——

Mr. GINGRICH. Wait a second. All of our major treaties with the Soviet Union in the 1970's were signed when we were fighting in Southeast Asia. In fact, it is precisely when you tell the Soviets that they cannot run over you, it is precisely when you tell them you are not going to let them win their cheap wars that they are willing to negotiate. The Russians are much more——

Mr. DELLUMS. Will you drop nuclear bombs on them while we are in Geneva and bring them to the table?

Mr. GINGRICH. Do you deny what I just said, that in fact all the major treaties in the 1970's were signed while the Americans were in Southeast Asia? That is a historical fact.

Mr. DELLUMS. What this gentleman cannot get over is the amount of human suffering and the amount of human misery and death that took place at that time. I cannot be cavalier enough to say, "Well, let's finance the Contras and kill off the people in the countryside, and eventually we will have peace and drive them to the table."

Mr. GINGRICH. Wait.

Mr. DELLUMS. You are killing human beings, taking human lives, and the American people ought to be beyond that.

Mr. GINGRICH. Wait a second. In other words, are you saying it was Eisenhower and Roosevelt who were at fault because Hitler ran the gas camps?

Mr. DELLUMS. Go back through history and take me up to today.

Mr. GINGRICH. All right. That is what I tried to do.

Mr. DELLUMS. Let us talk about now.

Mr. GINGRICH. This document proves conclusively that in your lifetime today, in this hemisphere, the Communists were setting up a dictatorship that was allied against the United States and that was committed to the destruction of America.

□ 1620

Now, this document proves that. It proves it beyond any reasonable doubt.

Mr. DELLUMS. Mr. Speaker, if the gentleman will yield, what I am saying is that for a while there are going to be people in the world who disagree with us philosophically.

Mr. GINGRICH. They are trying to kill you.

Mr. DELLUMS. But what I am saying is, is war the answer? The gentleman has not answered me. If the gentleman is going to be honest and say war is the answer, then we can debate.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield.

Mr. WALKER. The question can be rephrased. Is peace at any price the answer? Is peace at any price the answer?

Mr. DELLUMS. OK. What is the price in Central America? Let us discuss that.

Mr. WALKER. The question is, it seems to me, whether or not you are going to allow the concept of violence to govern all your actions in a way that peace at any price becomes your goal.

I would say that that has the potential where you know that there are people documented who are willing to use violence against you, that that ultimately ends up destroying freedom.

Now, that is a key question in all this, whether or not you allow those people to overcome you.

Mr. DELLUMS. When did the people of Nicaragua violate us? Did they drop a bomb on us? What did they do? Did Nicaragua invade us? Unless I was on a break somewhere, I did not get the word.

The SPEAKER pro tempore. The gentleman from Georgia controls the time.

Mr. GINGRICH. Mr. Speaker, I will be glad to yield to the gentleman from Pennsylvania and then I will come back.

Let me say before I yield—I am about to run out of time, but I am told that the gentleman from Minnesota [Mr. WEBER] has some time. We would be glad to continue this dialog. We do not mean to cut anyone off.

I will yield to the gentleman from Pennsylvania, then we will go back.

Mr. WALKER. Well, the point I am making, the gentleman from Georgia has documented here today that our adversaries are willing to use violence. They see themselves as arming for war.

The question is if you take what I hear the gentleman from California saying to us, it then becomes a question of whether or not you stand up against that question, and the gentleman is saying no, that violence is so bad that what we have to do is negotiate, even though they are fighting while they negotiate. They are fighting in Southeast Asia. They are fighting in Afghanistan. They are fighting in Central America.

The SPEAKER pro tempore. All time allowed the gentleman from Georgia has expired.

A REVIEW OF THE EVENTS IN INDIANA'S EIGHTH DISTRICT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado [Mr. STRANG] is recognized for 30 minutes.

GENERAL LEAVE

Mr. STRANG. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks on the subject of this special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. STRANG. Mr. Speaker, I rise today sadly to discuss again the tragedy in Indiana's Eighth Congressional District. By way of review, Mr. Speaker, I would like to summarize some events that happened on November 6 and since then in the Eighth District of Indiana to try to show, Mr. Speaker, and to show my colleagues in the

House that an enormous injury and wrong has been done and that an extremely dangerous precedent has been set by this body.

Basically, Mr. Speaker, on election night, November 6, 1984, press results in the race for Congress in Indiana's Eighth District indicated that Republican Richard McIntyre was leading Democrat Frank McCloskey by more than 100 votes. Then tabulation errors were discovered in two counties during the 10-day period provided by Indiana law for the correction of errors.

On the day after the election, November 7, the county clerk retabulated the results in Vanderburgh County before providing certified totals to the Indiana secretary of state. The retabulation added almost 200 votes to Mr McCloskey's total, indicating a 72-vote lead districtwide for Mr. McCloskey.

Two days later, on November 9, it was discovered that Gibson County had also made a tabulation error, a simple and obvious machine counting error. Two precincts had been counted twice, incorrectly inflating McCloskey's margin by 111 votes.

The correct tabulation in Gibson County, Mr. Speaker, gave McIntyre a 39-vote districtwide lead based upon election night returns.

Correction of the Vanderburgh County error was made before the certification was sent to the Indiana secretary of state. The Gibson County clerk, however, had already sent a certificate bearing the incorrect totals. Although admitting the error, the clerk, a Democrat, refused to correct the certificate. Although admitting the error, he refused to correct the certificate.

McIntyre filed a mandamus action to require the Gibson County clerk to correct the error. The action was pursuant to a specific statutory remedy to correct certification errors, Indiana Election Code, section 3126-7, and was entirely apart from Indiana's statutory recount process.

The Indiana secretary of state was notified of the action filed by McIntyre. He decided to delay certification of the winner in the eighth district pending resolution of the Gibson County error under the statutory remedy.

McIntyre also was granted a temporary injunction by the Marion County Court in Indianapolis to prevent the secretary of state from certifying McCloskey based on the incorrect totals.

Mr. McCloskey opposed the Gibson County mandamus action on the grounds that only a recount could correct the mistake.

The judge in Gibson County dismissed the mandamus action and ordered a recount to begin.

McIntyre appealed the dismissal.

The Indiana State Supreme Court on November 29, 23 days after the election, decided the issue in favor of the McIntyre position to correct the election night errors and against the McCloskey position to rely exclusively on a recount.

The State supreme court ordered the Gibson County court to accept jurisdiction and recognize the statutory mandamus remedy and to decide upon the request for a mandamus order to correct the election results separately from the recount; however, the county recount was completed by the time the Gibson County court reassumed jurisdiction, officially acknowledged error in the county returns and granted the mandamus on December 10.

The Gibson County clerk then sent a corrected certificate to the Indiana secretary of state which verified the original tabulation error, but also reflected the results of the recount in which McIntyre lost five votes by other tabulation corrections.

McIntyre now led McCloskey, Mr. Speaker, by 34 votes.

During this same time, McCloskey had filed a complaint before Judge Brooks in the U.S. district court in Evansville seeking two injunctions. First, he requested an order directing the Indiana secretary of state to certify him the winner by 72 votes based on incorrect totals, arguing that the secretary must certify a winner based on the county certificate then in his possession, no matter how clearly erroneous these totals were known to be.

Second, McCloskey sought an order to prevent the conducting of the recounts requested by McIntyre.

Mr. Speaker, we have the example of a former Member of Congress requesting the secretary of state of the sovereign State of Indiana issue a certificate based on tabulation errors that were known to both parties to be incorrect. We find that astonishing.

Judge Brooks denied both injunctions after a lengthy hearing during which both McCloskey and the Indiana secretary of state testified. Upon receipt of the corrected Gibson County totals on December 13 and as required by Indiana law, the Indiana secretary of state immediately issued a certificate naming Richard McIntyre the winner.

Mr. Speaker, when we arrived here on January 3 to take our oath of office, the first thing we did was to vote for our leaders. Mr. McIntyre was allowed to vote in that process. In that election we elected a Speaker and we elected a House minority leader.

Immediately thereafter, a resolution was offered before this body to deny the seat to Mr. McIntyre. This seat came after a long and legal and careful process in the State of Indiana and this body exercised a heavy-handed cold-blooded evisceration of the corpus politic of the sovereign State of Indiana.

□ 1630

They did it in front of an entire nation.

The danger here, Mr. Speaker, as I see it, is that in exercising this kind of unilateral, heavyhanded unfairness, a kind of political apartheid, we have set into motion a set of forces which indicates that this House can question any election of any Member, this House can say to any of the sovereign States, "We don't like your procedures; we are going to recount. We don't care what your law says; we are going to have a recount."

Right now there is a recount going on in the State of Indiana. This recount, regardless of its outcome, is in total contravention of the laws of the State of Indiana.

There is no real contest. There never has been a contest in Indiana because there has only been one certified winner, Mr. Speaker, and that is Mr. McIntyre.

The contest is between Mr. McIntyre and the U.S. House of Representatives. There is no precedent for that in 200 years.

Mr. GINGRICH. Will the gentleman yield?

Mr. STRANG. I will be most delighted to yield to my colleague from Georgia.

Mr. GINGRICH. Let me first of all say that I think the points the gentleman is making are so accurate, the degree to which the Democrats in this House have acted are so outrageous that it is interesting, I hope the House has taken note of the fact, that the very distinguished chairman of the Republican Congressional Campaign Committee, the gentleman from Michigan [Mr. VANDER JAGT], was scheduled to debate the very distinguished Democratic Member who I will not name because he is not on the floor, and that that debate was canceled, and that the very same Democratic leader on four occasions recently turned down an opportunity to debate another Republican on this issue. And it is understandable, if you look at the case of the McIntyre situation, that there is no real ground for anything except the seating of the Member who has won an election and has won the recount and has been certified.

But I would ask the gentleman one thing because I know he has had a very distinguished career as a legislator in Colorado. I would just wonder, since I was only just a history teacher and I never got to serve in the State legislature, I wonder if the gentleman could share with us what his reaction would be to somebody who voted on a State election and voted to try to run clean elections in Colorado, and was trying to take care of Colorado, what would the gentleman's reaction be to the idea that the Democrats in the

House of Representatives could step in, and by a 2-to-1 party vote, usurp the entire election law of Colorado and simply eliminate everything the gentleman's legislature had done; how would the gentleman feel about that as a State legislator?

Mr. STRANG. I thank my colleague from Georgia.

Mr. Speaker, I would respond to him that as a former State legislator I am appalled that the U.S. Congress would usurp unto itself powers that are not allowed or even recognized in one of the sovereign 50 States. The State of Indiana has a set of rules and procedures which they have followed meticulously and scrupulously, and they have sent this Congress their Representative from the Eighth District of Indiana.

This Congress has refused to seat him. Even during the process while they are going through a fatuous exercise of a recount in contravention of Indiana law, we have refused to seat him.

State legislatures do not understand that. State legislatures are charged with the responsibility of adhering to the constitution of their States and seeing that those constitutional imperatives and prerogatives are observed.

We as a body take an oath to the Constitution of the United States and we think that is serious business. And for this body to pick up the reins and to defy one of the States who has sent us one single certified winner, the loser has never contested the election, I might point out, Mr. Speaker, never contested the election, is an appalling exercise of sheer raw power.

As we look at the situation, Mr. Speaker, I am reminded of something that occurred to me about 2 months ago when I was at this podium. It is a dilemma that one gets, Mr. Speaker, when one is shoeing a mule. I do not know how many of my colleagues have ever had the privilege of shoeing a mule, if privilege it can be deemed. But I have.

Sometimes when you are shoeing a mule, Mr. Speaker, you feel that hind leg tighten up and you know you are in trouble because you can stay there quite a while and hold that leg up in the air, but you cannot hold it up the rest of the night. And you know when you put it down he is going to kick you.

I think, Mr. Speaker, that is the kind of dilemma that the majority party has got itself in with the McIntyre issue, and I would like to offer to work with them to help put that mule's foot down on the ground and get them out of the way when he kicks.

The serious problem of having a body who has already voted against Mr. McIntyre's interests, being the body that is the judge of Mr. McIntyre's interests in the State of Indiana, they have voted against him by 2 to 1, places them in an impossible position. We believe in a trial by jury in this country. In this case the jury was stacked and the same stacked jury is now charged with dealing with the same question on which they have voted in the negative once before. That is almost an impossible charge.

I admit that our colleagues on the House Administration Committee are above reproach. I think they have set themselves a dubious task.

Mr. COBEY. Will the gentleman yield?

Mr. STRANG. I would be happy to yield to my colleague from North Carolina.

Mr. COBEY. I appreciate the gentleman from Colorado yielding, and I appreciate the fact that he has come to the well of the House continually to speak out against this injustice that is going on in this country, this unconstitutional act that has no historical precedent.

I note and want to note today that this is the 104th day since January 3 of this year that the people of the Eighth District of Indiana have not been represented. Yesterday we passed the deadline for filing of income taxes. This is a duty of all of our citizens, to file their income tax and pay their taxes as of April 15. Truly we can say that the people of the Eighth District of Indiana are being taxed without representation, the very thing that our Revolution was fought over, that we broke away from the mother country and formed our own United States.

We are told continually that this process will come to an end soon. We passed the promise 45 days. Two weeks ago we said that the votes would be completed and tabulated within a few days. Then we were told another week and then another week. We are told this morning by the distinguished chairman of the task force that again our hopes that the people of Indiana would be represented are dashed again. We thought that the process would come to an end this week. We are told now that the process will not be over until perhaps next week.

But can we count on that or is this going to go on and on and on?

Mr. STRANG. If the gentleman will yield back for just a moment, the point the gentleman raises, Mr. Speaker, is that 500,000 people in the Eighth District of Indiana have been denied representation in this body while they have had to watch from the sidelines as people voted on farm bills, on MX, on all kinds of issues that affect their future. They have not had representation and, in fact, the proposal from this podium that they be permitted to waive income taxes for the period for which they were not represented has a good deal of merit.

I think the gentleman raises an extremely good point. If the gentleman will let me continue for a time I would like to read, Mr. Speaker, an editorial in the Denver Post of April 1, Denver, CO.

SEAT THE CONGRESSMAN

Nearly five months after voters in Indiana's 8th District narrowly elected Republican Richard McIntyre to Congress, they remain taxpayers without representation. Ruling House Democrats, including Colorado Reps. Pat Schroeder and Tim Wirth, rallied behind defeated Democratic incumbent Frank McCloskey to prevent McIntyre from taking his seat.

Democrats have defended this naked abuse of the electoral process because the initial returns showed McCloskey won by 72 votes. But one county made an error—admitted by both parties—in reporting votes. When the totals were corrected, McIntyre was the winner by 34 votes.

Next, a full recount by special county commissions again named McIntyre the winner—by 418 votes. The Democrats then argued McIntyre didn't deserve to be seated because during the recount, Indiana officials tossed out some 5,000 ballots, many from Democratic areas. But the vast majority of those ballots were disqualified by local commissions controlled by Democrats.

Next, with a gesture of contempt toward the taxpayers, House Democrats ordered that both candidates would receive a congressional salary although neither could represent the district until a special commission of two House Democrats and one Republican completed yet a third recount. Since both Democratic commissioners had already voted against seating McIntyre, that's a bit like asking Fidel Castro and Mikhail Gorbachev to "impartially" evaluate Ronald Reagan.

Historically, in such disputed elections, the House has seated the apparent winner while the legal process of investigation and recount unfolds. That's what should have happened in this case. If a fair, bipartisan commission—not a stacked one—ultimately determined McCloskey had indeed won, he should then have replaced McIntyre.

With a 70-vote House majority, Democrats hardly need to worry about losing one seat. But in their blind frenzy to protect one of their own, they've trampled on the rights of 500,000 Hoosiers to a voice in Congress. Schroeder and Wirth should stop abetting this cheap partisan charade and, along with the rest of the House, vote to seat McIntyre.

□ 1640

I yield to the gentleman from North Carolina.

Mr. COBEY. I thank the gentleman for yielding.

I appreciate the gentleman reading that editorial. None of us has said that the House should not exercise its constitutional duty to investigate any election that they think there are irregularities involved. But the point that we have been making ever since January 3 is that the duly elected and certified person in that race, who is Rick McIntyre, should be seated. I am concerned about the fact that this departs from all historical precedent and in a sense sets a new precedent. I hope that the Governor on behalf of the

people of Indiana will continue to pursue this in the courts so that not only can justice be done in the sense of Rick McIntyre being seated but that the precedent will not be set for years ahead that no other duly elected and certified Member will not be seated pending an investigation.

Mr. Speaker, I appreciate the gentleman coming to the well and pointing this out again. I hope that this injustice will be corrected by next week and that we do not have to subject the people of the Eighth District to this kind of unconstitutional situation of not being represented but being taxed.

I thank the gentleman.

Mr. STRANG. I thank the gentleman for his comments.

Mr. Speaker, by way of conclusion this Member would beg this body to exercise the kind of fairness which is basic to our country as a people and to our country as we are made up; fairness, fairness: Seat Mr. McIntyre.

Mr. Speaker, I yield back the balance of my time.

SHOGUN POLITICS: EXPORT EVERYTHING YOU CAN; BUY ONLY WHAT YOU REALLY NEED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDO. I thank the Speaker.

Mr. Speaker, I am not going to take 60 minutes. I do want to congratulate my colleagues for a most interesting debate which preceded my remarks. It was most interesting and made the time move very fast.

Mr. Speaker, once again, the voices of sirens, those beautiful sea nymphs that led Ulysses and his crew into dangerous waters, are lulling us into believing that calm waters lay ahead, even though we know the sky will turn dark, the seas will boil and we'll be pushed onto the rocks of disaster.

For those who don't know, I am referring to the latest announcement by Japan that it is ready and willing to provide a more open marketplace for American manufactured goods.

Quite frankly, I applaud Japanese Prime Minister Nakasone for his willingness to put his political future in jeopardy by urging the Japanese people to "buy American," but at the same time, I harbor little hope for success.

For those who may not be aware of the Prime Minister's recommendations, let me just highlight the key elements in the package.

First, the Government will implement an "action program" within 3 years to improve market access and will increase investment and industrial cooperation for developing countries.

Second, the Government of Japan will ask its people and companies to make their best effort to import and buy more manufactured goods, while the quasi-governmental Export-Import Bank of Japan will reduce interest rates on import financing.

Third, tests for technical standards on telecommunications equipment will be conducted by a neutral, impartial and independent agency.

Fourth, when technical standards are established or amended, the Government will ensure that interested parties are informed of schedules and plans.

Fifth, further consultations will be held with the United States and other industrialized nations about eliminating tariffs on electronic equipment.

Sixth, foreign clinical test data will be accepted on some pharmaceuticals and medical equipment. Insofar as pharmaceuticals are concerned, the foreign test data will be acceptable ony for those used outside the body in diagnosis rather than treating illnesses.

Seventh, cargo containers used by American shippers will be allowed on Japanese roads "under certain conditions."

Eighth, Japan will promote the liberalization of its financial and capital markets as well as the internationalization of the yen.

I could add a few other items, but those I have mentioned are fairly illustrative.

For example, the last item mentioned, the liberalization of Japanese financial markets and the internationalization of the yen were supposedly part of an agreement reached between this administration and Prime Minister Nakasone last year. The implication is that we are no further along in Japan's movement toward these goals today after almost a year of waiting for action.

If you read the various accounts detailing the items cited by Prime Minister Nakasone, you find words such as consultation, negotiation, and consideration.

To me, those words mean that while an expression of good faith has been made, we are a long, long way from realizing the ultimate goal and that there could be a number of snags in the interim.

Just a moment ago I applauded Prime Minister Nakasone's efforts to ease the trade tension between our two nations. I believe he is sincere in his desire to prevent an all out trade war. At the same time, I fear that he may not be able to deliver. I fear that, as in the past, the Japanese Parliament and perhaps even the Prime Minister's own party will rebel against his recommendations, leaving us in the same position as we are now. I fear that the Japanese will continue their practice of shogun politics.

How many times in recent years have Japanese leaders sought to mollify our anger at the overwhelming imbalance of trade by offering us assurances that they would open their markets to our manufactured goods, would eliminate the hidden and not so hidden, barriers to our products, and would come to the negotiating table ready and willing to make firm decisions?

How many times have we seen the end result be no change in the system?

The answer, of course, is too often.

I know that I will be accused of "Japan bashing," I can accept that. But, really, my anger is less directed at the Japanese for wanting to protect their markets, their companies, and their employees, than it is at our own Government for failing to do the same.

Let me just cite a few examples of what I mean. Shortly after the current administration agreed to let the quota limits on Japanese car imports lapse, Lee Iacocca of Chrysler Motors said that instead of going ahead with plans to expand operations in the United States, he would seek to increase the number of Japanese-made cars already being made for Chrysler. That cut, an estimated $2 billion, will cost the United States some 20,000 new jobs.

In the current issue of Business Week, Robert Galvin, the chief executive of Motorola, Inc., is cited for his efforts to encourage this administration to set realistic limits on imports that undercut his product line. At the same time, however, Galvin indicates that Motorola's present work force, which is currently 30 to 35 percent offshore, could shift to 50 percent in the next few years.

How does Galvin explain it? He says, simply, "We will do that to survive. But that survival includes a process of defection. We are defecting from this country."

How much clearer must we state the issue? At what point will we decide that enough is enough?

Everyone seems prepared to blame the United States for its problems in trade. Our industries are too old and outdated to compete favorably, some say. Our unions have pushed the cost of labor up to the point where labor costs cut too deeply into profits, say others. Our Federal deficit and the strong dollar make it more difficult for us to compete in the world's markets, is the response from still others.

No one can doubt the validity of those arguments. But, even taken together, they are not enough to account for the tremendous and increasing trade imbalance.

Just look at the figures. The current account, the broadest measure of trade because it includes goods and services, for 1984 showed a deficit of $101 billion, almost 2½ times the 1983 deficit of $41 billion.

The merchandise deficit for 1984 was $123 billion, a new record. And, given the figures for January and February of 1985, the picture is going to look a lot worse. In January, the merchandise deficit was $10.3 billion; in February, $11.4 billion, roughly a 10-percent increase over January.

Even assuming there is no change from month to month for the rest of the year, the merchandise deficit would be above the $130 billion mark for 1985. And most experts are estimating a 1985 deficit closer to $150 billion.

And why do we focus our attention on Japan? For two reasons. First, the largest share of the deficit with any single nation is with Japan—$36.8 billion in 1984. And look at the product imbalance. The Japanese sold us $13 billion worth of new cars; $5.5 billion worth of office and data-processing equipment; $5.1 billion of electrical machinery and parts; $5.4 billion in miscellaneous manufactured goods; $4.8 billion in consumer electronics; $4.3 billion in telecommunications equipment; and $3.5 billion in steel mill products.

And what did we ship to Japan? $4.7 billion in grain; $4.5 billion worth of ores; $3 billion in chemicals; $2.8 billion in industrial machinery; $1.5 billion in light manufactured goods; $1.4 billion in other manufactured goods; and $1.1 billion in office machines.

Apparently the Japanese don't mind accepting our natural resources.

The second reason for the focus on Japan is the restrictive policies, both stated and unstated, that limit the entry of American goods into the Japanese market and, at the same time, exclude the goods of others nations, including and especially the developing nations of Asia and the Pacific Basin.

And that means, as I noted in my remarks to this body on March 6, that those nations ship their excess production to the United States, the most open market in the world.

Some of us might wonder why the other industrialized nations aren't suffering from as heavy a burden as we. Well, it's fairly easy to understand. The nations of the European Economic Community, according to a report in the Wall Street Journal of April 8, take a hard line when it comes to imports, especially from Japan.

Before the Europeans give away a share of their markets, they want something in exchange. They wouldn't accept a deal such as this administration's in dropping the "voluntary" quota on cars without getting a major concession in return.

An anonymous common market official is quoted in the article as saying:

> We have had lots of political messages (from Japan) that have made us look up and say, "things are changing, but the goods are never delivered."

And that's the whole point of my standing here before you today. We have been here before. We have listened to the Japanese promise to open their markets. We have watched our representatives in negotiations with them, heard the words, but in only a rare instance or two have we seen any real action.

Mr. Speaker, I am not suggesting that we close America's doors to foreign goods. That would be tantamount to suicide. All I am suggesting is that we practice some control, that we be somewhat more judicious in the quantity of foreign goods entering this country.

When Lee Iaccoca decides that a planned investment of $12½ billion is trimmed by nearly 20 percent, that is cause for alarm because it means that those dollars will be going abroad, putting profits into someone else's pockets and putting some other nation's workers on jobs that could have been here in the United States.

The 20,000 jobs that experts believe will be lost as a result of Chrysler's decision may seem like a drop in the bucket when we talk of millions unemployed.

But when that is added to all the other jobs in this country that have been lost because American manufacturers have been driven out of business by subsidized and dumped foreign goods or because American businesses moved their operations offshore because that was the only way they could compete, then it's a whole different ball game.

Bob Galvin of Motorola, even though he says he might have to move more of his operations offshore, doesn't really want to do that. He speaks firsthand about the difficulties of breaking into the Japanese market, being denied permission to invest in Japan, especially after encouraging Japanese companies in the United States.

As Galvin says, "The present administration has refused to recognize the problems of unfair competition from abroad, but especially from Asia." As he put it in the article in Business Week, "By failing to stand up for American industry, the American Government is letting American industry walk out of this society."

Mr. Speaker, we cannot afford this type of policy. We can neither afford the loss of these industries to offshore locations nor the loss of those jobs here, nor the loss of the investment capital and the taxes that would be used to reduce the deficit.

Bob Galvin deserves some credit for speaking his mind. Unfortunately, the people who are listening to him are the same people who have been concerned about this problem for a number of years.

Galvin suggests that the United States impose a 20-percent surcharge on all imported, manufactured goods for a 3-year period.

Of Course, there is another alternative. Ben Wattenberg, a columnist for the Washington Times and a senior fellow at the American Enterprise Institute, recently offered his own program for eliminating the trade deficit between the United States and Japan. Although Wattenberg's suggestion is obviously done as a tongue-in-cheek thought, I repeat it for those of you who might not have seen it.

As Wattenberg says it:

> What we need is elementary; a device to lower the budget deficit, lower the trade deficit, send the Japanese a message, and make taxes simpler. My all-purpose solution: "The fair, flat, Japanese defense tax.'"

Wattenberg notes that while the Japanese spend only about 1 percent of their gross national product for defense, the United States spends about 6 percent of its GNP for defense purposes.

Wattenberg says:

> That's not fair. After all, the United States defends Japan. We have pledged our armed forces and our nuclear retaliatory ability to let the world know that Japan is off limits • • •
>
> For many years we have urged the Japanese to raise their defense budget. Each year they say they will; each year they do very little • • •
>
> Our policy should be this: "OK, we understand your problem, Japan. Just pay us the money."
>
> The Japanese GNP runs about $1 trillion a year. If they spent an additional 5 percent per year of that on defense—the same rate we spend, that is—it would cost them an extra $50 billion. Under my plan we would levy a flat tax of $50 billion on Japan.
>
> Such a payment would meet the current target of budget-deficit reduction. It would curtail our trade deficit with Japan by an immediate $50 billion. Finally, some of the bonus could be used to cut American taxes • • •

Mr. Wattenberg offers another alternative as well, Mr. Speaker. He suggests that Japan could just contract with the United States for defense purposes at a flat rate of $50 billion a year.

While Mr. Wattenberg is pulling our leg, Mr. Galvin isn't, even though both seem to recognize the importance of the problem this country faces.

Perhaps an answer to some of the problem has been offered by Sam Walton, chairman of Wal-Mart Stores, a 753-unit chain of stores that operates primarily in rural communities.

Mr. Walton is concerned by the rate at which his smalltown customers are losing their jobs as factories around the country close or cut back on production because of imports.

And, rather than add to the rhetoric, he acted. He has decided to emphasize American-made products in his stores.

One positive example of Mr. Walton's decision affects Lasko Metal

Products of West Chester, PA, a manufacturer of portable electric fans.

Over the past 10 years, Lasko, because of import competition, had reduced its employment rolls by 30 percent. "A recent Wal-Mart order for 400,000 fans," says Lasko, "will put them back where they were."

Perhaps it is jingoistic to encourage "Buy American" programs here in the United States, but why is it so different for us to encourage consumption of domestic goods over imports when other countries have the same kinds of policies?

There is a growing trend among American manufacturers to use American-made products and parts, wherever and whenever possible, but I hope it isn't too late. I hope some of those industries that are happily becoming extinct can be saved.

Perhaps what we need in this country is a new policy—similar to the one we have for preserving wildlife species that are on the verge of extinction—that would provide special protection for industries that were in danger of extinction because of imports supported by Government subsidies as well as those dumped in this country at cut-rate prices.

After all, Japan used that concept in reverse when it provided special import protection to new and developing industries that its government had decided were worth the investment for the future.

Perhaps we must decide now what our investments for the future of our economy should be—and then we must do something about it.

Until we do something, let us not be lulled by the siren song. As much as I would like to believe Prime Minister Nakasone, I have doubts that he will be able to deliver. I also believe the Japanese are underestimating the concerns of the Congress and the people of the United States.

A recent interview in USA Today with Kenichi Ohmae, managing director of McKinsey & Co. in Tokyo, underlines that point. According to Ohmae, the Japanese believe their markets are open to American companies and, therefore, have trouble understanding what our complaints are.

Ohmae points to several American companies that are producing goods in Japan and marketing those goods there. The key to success in the Japanese market, according to Ohmae, is being based in Japan.

But that really doesn't solve the problem. It merely means more offshore production and a comparable loss of American jobs.

And, Mr. Speaker, if Americans aren't working, it means they can't buy goods, whether domestic or imported.

But the real answer is quite simple. All the Japanese have to do is truly put in action the recommendations of Prime Minister Nakasone—and put them into action quickly.

As Douglas MacArthur II, a former Ambassador to Japan, said in a recent commentary in the Christian Science Monitor:

> For those in Japan who claim that the problem is not Japanese protectionism but the "failure of Americans to understand the Japanese market" and "to try hard enough," the answer is simple: "Then you have nothing to fear in lowering your unfair trade barriers."

And to Mr. MacArthur's answer I would add only this: And follow the rules insofar as exporting Japanese goods to the United States.

THE CENTRAL MIDWEST INTERSTATE LOW-LEVEL RADIOACTIVE WASTE COMPACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. MADIGAN] is recognized for 10 minutes.

● Mr. MADIGAN. Mr. Speaker, I am pleased to join today with my distinguished colleagues from the States of Illinois and Kentucky in introducing the central Midwest interstate low-level radioactive waste compact. This legislation is needed to put the central Midwest compact into effect, and I hope Congress will act expeditiously on this matter.

In 1980, Congress enacted the Low-Level Waste Policy Act, which established the Federal policy that each State must be responsible for providing the capacity for disposing of the low-level radioactive waste generated within its borders. This law also recognized, however, that such waste can be best managed and safely stored if done on a regional basis. Accordingly, the Low-Level Waste Policy Act authorized States to enter into regional compacts to develop regional disposal facilities for low-level radioactive waste.

The legislation I am introducing today is the regional compact that Illinois and Kentucky have entered into. This compact will not become effective, however, until it has been ratified by Congress. I understand that several other regional compacts are similarly awaiting congressional attention.

Mr. Speaker, it is time for Congress to address this matter. As has been explained by my distinguished colleague from Arizona [Congressman MO UDALL], we must act on the regional compacts this first session if we are to avoid a political crisis and possible disruption of low-level waste disposal next year.●

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I continue in my advice to the privileged orders of America, in this case. I have explained at the outset, earlier, that this is a takeoff on one of the most intriguing personalities in the history of America, Jowel Barlow, who was a chaplain in George Washington's Revolutionary Army.

He was truly a revolutionary. His writings reflect that he would be very much a revolutionary today. Of course, we live in a day and time in which the Tories are in control in our country. Had many of our leaders acted correspondingly in that day and time as today, they would have been the conservatives of the day; they would have been the Loyalists; the Tories, upholding th· sovereignty of King George the Thi.d. So that I have advisedly selected Jowel Barlow's admirable approach at that period of time, which coincided with the French Revolution and the tremendous fear that that spread throughout Europe and the kingdoms of Europe from England to Spain, very much like the Russian Revolution in 1917 did and has continued to spread fear, sometimes quite irrational fear, among other realms and jurisdictions of the modern world.

His full title was "My Advice to the Privileged Orders of Europe for the Need of Revolutionary Change." This is exactly what I am asking in the course of these pleas to my colleagues, whom I consider to be in that class or category of highly privileged Americans. The only difference being that in this day and time the question is whether we reaffirm those basic tenets that gave rise to the Constitution, which is the charter, of course, of our Government. Or whether through abdication, we, almost on the eve of the 200th anniversary of this form of government.

We have not quite had, as I have said repeatedly, our bicentennial in that request. That is the 200th anniversary of the founding of this form of government. Because that will not be until 1989. In fact, that will be the bicentennial of the First Congress in 1789; March 4, in New York City.

The issues, as small and struggling as those Thirteen Colonies were then, we are speaking about a nationhood that did not have too many more than 3 million citizens. The issues were very basic, as they always have been throughout mankind's history, and they are today. I have used this as sort of a predicate in order to address the main, immediate issues, plus some of the underlying, long-term issues that our generations following us will have to confront.

First and foremost, I have discussed the question that has led, amazingly,

to our country going back to a status that was true during the colonial period, in which the merchantile system prevailed. That is, the mother country controlling the economy of the Colonies through the merchantile system, whereby all of the finished goods, the manufacturing processes and all, were retained in the mother country and to the mother country. So that this was one of the underlying but basic causes of the American Revolution.

As to the outward form that the Revolution took, and the immediate cause, the massacre in Boston and the like, those were things that triggered off all of these churning and boiling feelings, and sentiments, and resentments that had been building up. The Stamp Act; the various Tax Acts; all of which were predicated in upholding the merchantile system, whereby the Colonies were producers of raw goods, if any, or were consumers of all of the processes and products that the manufacturing elites in England and in other European countries were producing.

Our country has been, up to now, a creditor nation. It has also been, particularly since about the time of Teddy Roosevelt, a sort of a creditor nation. We are now a consuming or a dumping ground, and we have just heard one of my illustrious colleagues from Pennsylvania discuss some of the problems in what we now call the Rust Belt, it is not now the producing area of the world. It is now the unemployment capital of our country. We have there more persistent, long-term unemployment than anywhere else. No nation, no society can long endure with that as a sufferance, without recognizing, through a strict class structural ossification the fact that America has reached that point that Thomas Babbington McCollough referred to about 110 years ago after his visit to America and was asked by an English journalist what he thought of those boastful, prideful Americans that talk about egalitarianism, that is, equality. Equality in opportunity for economic well being as well as equality before all of the political, judicial processes.

He said: "Well, it remains to be seen, America has the frontier as a safety valve."

But I appeal to the 20th century, in about a century, when America has by then has then filled with teeming people, very much like present teeming Europe, then I appeal to the future to see if the Americans have found a different result from the European experiment or result. In other words, stratification of social classes.

We forget, and I see it never reflected, even in what some very preeminent authors write, in bringing in our so-called allies, the fact that there is a profound chasm of difference between our set up and theirs.

□ 1720

There is not any intellectual in Europe. There has not been any writing that does not speak very much like the Arab finance minister who, at the height of the embargo on oil and watching very much our discomfiture because of political reasons, that he said:

> Well you Americans, with your libertinage, with your type of freedom that you have which is so violative of any kind of discipline, it is about time that you receive some and learn the lessons of the other part of the world.

We forget that in these countries if you are the son or the daughter of a laboring man, if you are a hod carrier's son, the chances that you will become a doctor, or a dentist, or a lawyer, or a professional, or go into business for yourself, whether it is in England, or France, or West Germany, or Spain are nil. They are just not there. You have an accepted class structuralization that America was filled by people who escaped from that with the promise of equality before the law, equality for economic opportunity, if the citizen was law abiding, hard working, honest, and toiling for his livelihood.

Today America has reverted in a matter of 4 years from a creditor nation position to a debtor. We have reverted to the mercantile system, and we are now preempted as a producer. We are the consumer dumping ground for the world's products whether they be Japanese, even Chinese, where the Chinese favored nations status that this Congress gave China has put heavy pressure on our textile industries in this country. Anybody who has anything to do with a clothing manufacturing or a garment shop in his district, just ask the manager of that district what has happened just within the last 3 to 5 years with respect to China and its impact.

With respect to the other, whether it is steel, whether it is farm products that now for the first time we are not having a favorable balance of trade. As a matter of fact, this is the most calamitous issue of all, and yet no discussion on it, and that is that for the first time in the history of this country or any other nation, our imbalance in trade, or what they call the international account, that is, the imbalance of trade and interest payments, is of such magnitude that I predict sheer disaster, and because of the interdependence of the world, not only for the United States but for the rest of the industrialized world.

There will be a summit next month, but you hear no discussion about that, any more than you heard any discussion about what is known as the ECU, the European currency unit, or the European Monetary Fund, the EMF. Yet both of these were announcements after the 1979 economic summit meeting in Bonn, Germany, where the President will be going next month for the same purpose, a so-called economic summit meeting.

Since there has been no debate in Congress, in fact, I have been the only Member of the Congress, either in the House or in the Senate, who has even referred to European currency units or the European Monetary Fund.

Let me tell you what it means, my colleagues: It means that now Europe is in a position where it can dictate to the United States what it is going to do about substituting, as a generally accepted currency, ECU for the dollar. In 1979, perhaps, it sounded a little bit outlandish, even though the communique that was issued by President Carter, Helmut Schmidt at the time, Giscard D'Estaing of France, and the others, had only one line at the end of the communique that referred to the European currency unit or the European Monetary Fund, ECU or EMF. But today those countries, the 6 or the 10, depending on what you want to call them, the group of ten, or the 6 basic European countries in the European Common Market, have more gold as reserves than the United States for the first time. What that simply means is that the United States and its leadership in monetary and fiscal matters, and this is wholly an executive branch question, the Congress has delegated most of this to that one person we call our Chief Executive, and he, erstwhile working through the Secretary of the Treasury, but today that is just the tail of that dog and the one that really wags that is the Federal Reserve Board, because the Federal Reserve Board is supposed to be the fiscal agent of the U.S. Treasury, but the way it is working today and for some time now, it is the other way around. It is the U.S. Treasury that is there as a sort of a lap dog of the Federal Reserve Board.

The Federal Reserve Board was intended and it was written into the law when the Congress created it that it would be accountable to the Congress and the President, but it is not today, so it is making monetary policy. It is making fiscal policy. And now, as the present Chairman of the Federal Reserve Board told me when I questioned him when he appeared before the Banking Committee, which I have belonged to since I came to the Congress 24 years ago, said they will determine even the social issues, what should be the allocation of credit, even Government resources, in these all-important questions of social services into which is dumped everything from Social Security to disability, for veterans and everybody else.

It is Mr. Volcker who is determining that, and that is what he said when he appeared before the committee and I challenged him, and I said:

But your policies are actually dictating this. You are saying the Congress ought to cut the budget, but you are telling us exactly where and how, according to your priorities.

And whose priorities are those? Are they that of the elected representatives of the people? No; they are those policies representing the wishes and the demands of the most powerful financial banking industry in the world, because the Federal Reserve Board is in the lap and is the lap dog and is controlled by six or seven of the principal banking institutions in this country, from Chase Manhattan to the First City National. They are the ones sitting on the Open Market Committee that determines the interest rates which presently are flagellating at the highest real interest rate in the history of our country with respect to long-term mortgage interest than at any time in the history. They are the ones who are determining that. It is not the Congress. It is not the executive branch. It is not the Secretary of the Treasury.

As a matter of fact, the Constitution says that it is the Congress that shall coin the money and provide the currency.

□ 1730

But you look at your dollar bill in your pocket and you will see that it says, "Federal Reserve Note." It does not say, "Treasury Note," as they used to. As I have said repeatedly here, when I came to the Congress 24 years ago, at least four out of the five dollar bills I would have in my pocket said "Treasury Note," not "Federal Reserve Note."

Now, what does that mean? What it means is that it is the Federal Reserve that has arrogated to itself this power. Also, with this equivalent power that goes with it and transcends the national sovereignty, it has become in turn a "patsy" when it comes into competition with these crafty, knowledgeable, 400-year-experienced bankers in Zurich, in Germany, in Paris, and, above all, in London. And now you have the ridiculous situation where our country for the first time since Teddy Roosevelt's time is a debtor nation.

When Teddy Roosevelt decided that we would build the Panama Canal, we did not have the resources to build it. The French had failed, but we had to go to France to get the capital. It was about $40 million, which at that day and time was a tremendous sum. We had to go to foreign capital markets in Europe.

Of course, when World War I came around, we were the only creditor nation, and we were the only creditor nation in World War II. But not any longer, as of less than 3 years ago. We are now a debtor nation. Our entire financial system is teetering, depending on the whims of fickle foreign investors and speculators. Then the Congress went along and, over my objections, agreed on so-called private ownership of gold in 1976, about January 1. The act was going to be effective then; it was actually approved in 1975. And it was against all reasonable warnings, and privately the then-Chairman of the Federal Reserve Board said I was right, but he did not have the guts. Why? Because all of those fellows, every one of them, are errand boys for these powerful bankers who, in the meanwhile, have sold out the American people and their interests, just as Jefferson warned in his time, as Jackson did in his, as Lincoln did during the last week he was alive, and as Woodrow Wilson last did in 1917.

We are now completely in the control of these interests. They are the ones who are shaping and molding the policies, including the issue of war and peace today.

So my advice to the privileged orders is that whether this has happened or whether we are back in the days of the kingdoms, you cannot produce or you cannot sell out the people's interests without ultimately having to confront the day of reckoning.

And I say, why wait? Why not do now what we should have done at least 2½ decades ago at the latest? Is it too late?

I have been privileged to travel throughout the country in the last 3 years as chairman of the largest subcommittee in the entire Congress, one which has been the most heavily impacted in its jurisdiction by this administration's thrust in its so-called programs, the Subcommittee on Housing and Community Development. I have been into the rural areas, and I have seen the lamentable situation just 1 hour and 15 minutes' drive from the Nation's Capital where the growing season will be beginning in a few weeks. If you will go with me, I can take you there and you will see the worst living conditions for migrant workers that you can find in any of the underdeveloped nations that we say we are much better than—including the poorest country in Central America, Honduras. All you have to do is get in your car go up here to the Eastern Shore. I have been there.

I have been to the teeming metropolises where we have been building up explosive, dangerous social situations. I have been to the coast way out in the West. I have been to the Middle West, in rural and urban areas, and the thing there that is inspiring is the people themselves.

Now, the fact is that if it is too late, it is not because the American people are not willing to do what it takes to be done, but it is simply that they have not been given any kind of leadership or basic information as to the nature of the issues on which they can base a knowledgeable decision or use as criteria.

But what is this that has led to this creditor nation becoming the supplicant and debtor nation? What has led the great producer, the arsenal of democracy during war, to become the dumping ground of the other countries, from Japan to West Germany, and, as I say and repeat, even China? Has it not become a basic abdication of principle? Has it not become a betrayal of the basic American participatory democracy based on representative republican government? I think it has.

□ 1740

I think it is. I think that the people have lost control up to now of these vital decisionmaking elements which I do not think could happen until just relatively recently in the so-called post-World War II era, forgetting that World War II has not ended. There is no peace treaty giving a final resolution to the conflict known as World War II.

As a matter of fact, we, of all the countries involved, have the greatest stake in that situation which we have not had the courage to confront either through incompetence or the lack of vision or the lack of responsibility.

It so happens that our oath of office calls and summons forth from us far more basic discharge of that oath than what I have been forthcoming. Our oath simply says, "I shall discharge this office well and effectively and, of course, loyally." I do not think so.

When we answer the question, how come this to pass, how come at this critical juncture of our development we are in this dilemma? The answer is astounding. It is that we have not even bothered to remember history, not even relatively recent history, the interim period between World War I and World War II.

We are doing the same thing. We hear all this talk today about, well, but you have got to consume those products so that those countries will have the means with which to pay their debts and they have got to have a favorable balance of trade. Well, what is a favorable balance of trade for one and not an unbalance for another?

This was the same thing that operated after World War I and in which the geopoliticians—later called Hitlers, but actually antedating Hitler—the German geopoliticians, financial wizards such as Dr. Hjalmar Schacht, who really was an American and came here and was able to raise tremendous funds. Some of our principal financial corporations were major backers of

Hitler and even after the war when we look at the history of the so-called de-Nazification programs, you will find it is a sorry mess because these very same interests came back, regrouped, and they absolutely prevented de-Nazification and the cartels reappeared, except they are not called cartels any longer. But over in Basel, Switzerland, where you have the so-called International Bank for Settlements of which the United States is still not a member, but now has to hat-in-hand, as our leaders of finance had to do just recently, and will go as sheep to be shorn to the economic conference next month in which they will be told, "Look, we are going to put bone and fiber as well as blood and flesh on this little skeleton up to now known as the European currency unit and the European monetary fund."

What that means then is that they are formally anchoring down the demise of the American dollar.

What does that mean to you and to me? Well, you do not have to be an expert to know. What we have vauntingly boasted as the American standard of living and as the chairman of the Federal Reserve Board told me, he said, "Well, some Americans are going to be adversely impacted in their standard of living."

And when I asked him, "Which Americans?" I wish you could have been there. He seemed to think I had insulted him. Well, you know what Americans. That is, you and me. That is anybody but the David Rockefeller classes who are the ones really running this country at this time, because the fate of this country is predicated on an economic well-being that is rooted in whether or not you have a viable participatory democracy.

So how come this pass? Well, we ignored history. We ignored that that same scheme was concocted by Dr. Hjalmar Schacht. The same thing was said then. If we do not lend them the credit, they will not be able to buy our products, overlooking the fact that when we extended credit, say, to Germany then, the German financiers then loaned some of that money to the Russians, to the Russian struggling Bolshevik government in order that it could finance some of its 5-year plans and other things.

We have done the same thing in the post-World War II era, except it was refined. The names of some of the countries, of course, have disappeared since World War II and are different, but the essential formula is the same and the essential result is the same.

What some of the European leaders so critically and so arrogantly have dismissed as Uncle Sap—not Uncle Sam, but Uncle Sap—so that where are we here in this Congress at this point. Well, my advice is, let us reaffirm the basic revolutionary principles, still revolutionary as exemplified in the first five, six or seven words of the Preamable of our Constitution, which says, "We, the people", not "I, the President" or "We, the Congress" or "We, the Judiciary." It says, "We, the people of the United States, are the ultimate sovereign."

Now, when you say that nowadays, they call you a Socialist. They call you a Communist and yet this is what the struggle is all about throughout the world, because at the same time that the world has grown, it has shrunk and we are not going to be able to continue to have the margin or leeway of time for fundamental errors in this world of the 1980's. We might have been able to temporize in the middle twenties, the 20th century, but not now. We cannot afford the luxury of crass misperceptions of what that real world is to the south of us, what that real world is across the seas, whether it is the Pacific or the Atlantic.

Hearing the so-called discussions—I will not call them debate—there has not been any genuine debate. People are afraid in America today because the issue will be, like the President was trying to put it last night, "Are you unpatriotic? Are you for communism or against it? Are you loyal or disloyal to your leader?"

Not is this program right or wrong, is this policy right or wrong, is this issue to be discussed as it ought to be with full-blown debate? Not at all. We have had a deterioration. We have had a decadence of discussion in and out of the most solemn discussion body, such as the Congress.

Why is that? Again, we come back to what I hear so often. Look, it is fine to be a statesman, but remember, you have got to get reelected every 2 years.

The tragedy of all this is that it reflects a basic lack of faith in the judgment and the discernment of the average American citizen.

Let me say to you by way of advice to my fellow privileged members of the order in the United States, the people are way ahead of us. Yes, we got elected and some of us have been elected and reelected and elected and reelected; but I, for one, want to say that I have never forgotten where I come from or why I am here and that is that enough of a cross-section of citizens of all kinds, from all classes, of all colors, were reasonable minded, soberminded, responsible and just plain hardworking Americans and we gave them an issue and we fought the issue. We did not talk a fight. We have fought a fight and the people can tell the difference. That is all I can bear testimony to, but when I hear all the excuses, all the sophistry as to why even though it is a calculated course of disaster, it cannot be done differently.

The historian, Barbara Tuchman, just finished and published a book that I would recommend, "The March of Folly," it is titled. She is intrigued and develops this tremendous thesis:

> Why throughout history from the Trojan War to the Vietnam War do governments and heads of governments despite all of the known facts and the logic involved will persist in a course that is unproductive of good for the government and its people, is counter to the best interests of the people, yet steadfastly persistent in a calculated course for catastrophe.

As she says:

> In government this has happened more often than no, whereas in other realms of human activity the average seems to be different.

Well, that was the first part of the subject matter; that is, if we are going to base such a thing as a $315 billion defense budget, and as I have said ad nauseum, I do not consider this a defense budget. I consider it a war budget. The President has been illegally conducting war, not once, but more than once. Presently it is a war in Central America where he now is spending several million dollars a day, at the same time that he is asking us to tax the American people for the greatest exponential increase in so-called defense or military spending, while he is asking us to cut out housing.

It is all right to give other countries $500 million—half a billion dollars—so that they can construct housing for their citizens, but it is a budget buster. You are a spender recklessly spending the money if you advocate holding on to the national housing programs on assisted housing for the poor and the moderate income that today now constitute the majority of the American people.

□ 1750

No, if you want $250 million for a modest program to try to shelter the homeless, that is budget-busting. But if you have $500 million, some of it never to be repaid, some of it to be repaid after a 40-year period at 1 percent, it is OK to give it so that housing can be built from the Middle East to the Far East and in between and in some of those countries to the south of us. I think that is a perversion of priorities.

I have always felt charity begins at home. There is an old saying in Spanish that I will not repeat in Spanish because, in the first place, I think that it is in a certain way not proper, and it is difficult to convey the significance except to those that speak the language. But what it simply says is that you can be a great light out in the street, a great beacon of light, while at home you are total darkness. That is exactly what is happening to us on this level, the most vital level, because no matter what we do domestically, I will tell you, my colleagues, you can cut out all of the so-called social spending right now, this budget can cut out housing, it could even cut out

Social Security, and everything else that you call social spending, nondefense, and you will still have a deficit of over $35 billion.

Why is that? Why? Why did our country suddenly evolve this monumental, monstrous domestic deficiency known as the national deficit, and which the President says we have to look forward to for the next at least and possibly 5, but at least the next 3 fiscal years, $200 billion or more?

This is while completely overlooking the $140 billion deficit in international trade where our agricultural products had been the only source of our keeping an economic balance there, and even a little surplus now and then. But that is gone. That is gone.

This is why the farm crisis. The immediate triggering was what? The fact that China reneged on its purchase of 6 million metric tons of wheat. It reneged last year. We had the immediate consequences.

Where is the farm crisis in the wheat bill? Who talks about that?

That was a celebrated deal that the President made, some of it in secret, which he still has not divulged to the American Congress or the American people. And that is what was the secret deal with the Communist Government of China.

If it is all right to enter into a deal with that Communist country, what is wrong in letting a meager government that happens to have two or three so-called Marxist-Leninists in its government in Nicaragua? I fail to see the difference. If we are going to go to war, as we are already, if we are going to further commit our youth and our treasury to those jungles of Central America because we want and demand ideological purity, then I say all is lost, all is lost.

But I think that if any one of my colleagues goes out and really, really discusses it with the people, he will find that they have entirely different notions about that.

But in the meanwhile, what is happening here to us? We know what is happening now to the farm bill. We know what has happened to the rust bill. We know what is in the making is the other, because the average interest rate at which a little businessman must borrow money in order to finance a little meager inventory—and I am talking about real small businessmen. I am not talking about the U.S. Chamber of Commerce definition of a small business. I am talking about a real small businessman in America, that corner cleaners, the grocery store that still has mom and pop or the private little grocery store in the neighborhood. I am talking about the little car dealer that is trying to stay alive and is still a meager little agency. I am talking about the other real small business men that you and I deal with in our ordinary American life. They have to pay usurious, exorbitant rates of interest. They cannot stay in business.

We have more businesses going out and have for the last 1 year and 3 months than we had during the Depression. Of course, there are more businesses and there are more American people now than during the Depression. But what does that mean? It means that we will be like we were during the Vietnamese war, that as long as it was that poor kid, the one who could not afford to go to college, or he could not afford to go to Harvard and take that very sophisticated course on how to duck the draft that got drafted and died in Vietnam.

What good did it do? My voice was the same in 1965. I was the first to get up here on floor. Sure, there was no TV coverage, but I still got up and I reported in August 1965 that those in the line of action, or apt to be in action, or had been in action in Vietnam in August 1965, over 45 percent were draftees.

Who got up in the Congress and said it is wrong to conscript an unwilling American into an undeclared war outside of the continental United States? I was looked upon as a radical even though I did not get up and double my fist and say "Hey, hey, LBJ, how many babies have you killed today."

But among the administration circles then and the Presidential circles, I was kind of questionable, of doubtful loyalty because I was raising these issues. I still am.

Oh, there may not be a draft going on now, but it is there. It is waiting in the wings. And its reimposition along the same unjust lines, it is there, it is the potential. Nobody wants to address that issue now. Nobody wanted to even then. It was in 1967 when the Draft Act came up for extension that I got up in the well of this House and offered a little simple amendment—really, it was not necessary—but it was my way of reminding my colleagues that when that original Draft Act was first passed by one vote in 1941 before December 7, the only reason they finally got that one vote was that they had to put a clause in there that said that notwithstanding any provisions of that act, no unwilling American could be conscripted against his will to serve outside of the continental United States, except a declaration of war by the Congress, or otherwise expressly provided so by the Congress. I say that is still an issue. I certainly thought so. And when I brought up the statistics that over 45 percent of those we were asking to die, or be maimed and hurt, were draftees, where were the pros? They certainly were smart enough to know where to stay out of it.

Who cared? It was not until later when the draft had used itself and the casualties started coming in, the near 100 a week, then all of a sudden it looked as if some of those exemptions would have to be cut out, and it looked as if that upper middle class young man was about to be called in, that you started getting telegrams and letters from corporate chiefs saying "Hey, Mr. President, what are we doing here now? We had better think it over."

Well, we are doing the same thing economically. The only difference is this: These invisible unemployed, most of them now have been unemployed for more than 18 months, they are invisible right now but they now amount to 10 million plus. Well, you say that is a drop in the bucket. Well, so was that number who were in Vietnam in 1965. It was a drop in the bucket according to some comments I heard from my colleagues.

I remember at a White House briefing that President Johnson called, and he was saying, "I am getting all of this criticism from the hawks, and I have my own Senator from Texas, John Tower, saying 'Bomb Haiphong' and 'Mine Haiphong' and then I have over here Senator Church," and he pointed to Senator Church who was present, and he said, "They want me to go easy or pull out."

□ 1800

"And you just heard the Joint Chiefs of Staff of the Navy point out what was involved and the casualties are coming." One of my colleagues got up and said, "Mr. President, what are you worried about? Why that figure of 65, last week, was, shucks, much less than the total traffic fatalities in our country for the same period." That was the reasoning.

Well, the rest is history, but we are on the verge of repeating the errors. We have learned nothing, as I have said we are like the Bourbon kings of old; we have learned nothing and forgotten nothing. Amazing, in the days of so-called democracy which were not even dimly visualized at that time, when the men wrote the most revolutionary words in the history of mankind, those first seven words in the preamble of the Constitution, "We the people of the United States in order to form a more perfect union, insure domestic tranquility"; it said "We the people." That was really revolutionary because every government in the world was ruled by divine right, kings or czars or potentates; and it still is the most radical revolutionary word today.

Let us go to the second phase of my advice to the privileged orders and my colleagues, what you are about to emerge into south of the border.

It has been so remote to the overwhelming preponderant number of Americans. When we have the question of immigration laws and reforms,

every one of our acts has been out of fear, an inordinate fear. Never has it been based by the overwhelming preponderant majority of these members as a reality along the border or for that matter along our shores. We forget, because of the publicity given the southern borders, that more than 40 percent of the illegal flow of immigrants into this country is not across the Mexican border.

We have one of the heaviest Asian illegal immigrations into this country and yet it is relatively unnoticed or unreported. Yet in shaping the laws here there is oblivion as to: First, the immediate thing; and second, the underlying cause. Nobody talks about why. And what can the resources of the Nation do, both short-term and long-term? I have not heard any discussion.

I have offered bills as I have said repeatedly to my colleagues in the RECORD, in this well, if I have gotten up often, if I have been critical and if I have said so of fundamental policies and programs, I have also always offered suggestions, either through resolution or a bill or an amendment. And for over 18 years, well more than that, because 1965 was the famous day in August that the Congress approved and sent to the President, who, with great fanfare, went and signed the bill at the foot of the Statue of Liberty, the great immigration law that was supposed to end every problem in 1965.

I got up right here in that seat and was the only voice raising an objection to an amendment offered then by a Minnesota Representative, for the first time placing a quota on Western Hemisphere countries. I asked him the rationale. He said, "We want to treat every country equally." I said, and this is all in the RECORD, it is not what I am saying now, an afterthought, I said, "Do you mean you want to put Mexico and the United States, or United States, Mexico, and Canada, the only two contiguous nations fate has decreed will share this part of the North American continent, you want to put them on an equal footing with Iceland?" And he answered from that well, "Yes, indeed."

I knew it was no use. We were in a state of mind, you cannot reason, you cannot debate when you are in that state of mind. And I predicted, I said, "Well, I will appeal to the very near future before you will see a real problem, because it is folly, it is. Anybody who knows the reality of the history of that part of our country and the reality of circumstances." So subsequent to that when the problem did begin to emerge and you began to have those that just could not or were not about to wait the lawful quota list in Mexico, they started crossing the border. I then introduced, especially when the economic situation in Mexico reached the fact and the proportion where it is today, 50-percent unemployment, 50-percent rate of inflation and with the labor force getting an average, each year, of a number that exceeds by about 1,000 percent the ability of the Mexican economy to absorb. I then proposed what I have proposed every Congress since then, including this one, a bilateral development bank tailored on the private banking system. It is not going to be one of these governmental things, that would be targeting the border area on our side. Since 1982 and I amended it, so it would have jurisdiction of the 200 miles of our border inside, because we now have often 20-percent unemployment along the Mexican border, you have many businesses that have gone out with the financial pressures in Mexico. So, the development bank would provide resources and would concentrate, of course, on the Mexican side, on the basis that for every job we help create there we have one less illegal coming over here.

But up to now we are still struggling with it. I think this has to be addressed. I think unless and until we have a bilateral effort, not only on economic but on immigration matters generally, the situation will never be controlled, even minimally restrained. I have studied this matter throughout the world, whether it was in Europe or France, Germany and Spain. Of course in those countries they do not have to worry about constitutional rights. So their treatment of their imported Italian workers, Algerian workers, some Spanish workers, has been horrible. But they have the same problem. They used them in a time of need, and they did not know how to get rid of them so they kicked them out willy-nilly. We have a lot of resentment, persistent hatred. I had a call in San Antonio and I had two letters from individuals who said, "What are you worried about, the illegals? If you want to stop it just shoot them when they try to cross the border."

Well, if we want to go that way, that is one thing. I am assuming though that we have not been taken over by the Nazis yet, that our system of Government is not predicated on that which we went out and fought and shed blood to keep away from our shores.

So I am predicating it on humanitarian and civilized interaction between civilized governments. What I have said is very simple. Unless and until the U.S. Government and Mexican Government get together on a bilateral understanding, nothing is going to happen. This has been true in those countries where you have this phenomenon. It has been true in Hong Kong where you had the nearest parallel. Mainland China was sending in thousands of illegals just massing in Hong Kong, using up public facilities, eating up their resources and it was not until some 6 or 7 years that finally the mainland Chinese Government came in and joined the Hong Kong Government that they finally managed to control the situation, even though Hong Kong had and still has strict identification card requirements. Every person in Hong Kong must carry an I.D. card. But I have seen the similarity in problems, and how it was not until both governments involved had a directly bilateral understanding in an attempt to try to resolve the problem, that you really did. But our current problems are based on the very, very erroneous and outmoded and failed policies of the past, where we could have Calvin Coolidge sending the Marines to Nicaragua, occupying that country for 9 years, leaving the heritage of the Somoza regime that we imposed and kept for 40 years and also building up their National Guard, the soldiers to keep it in power. The very name Sandino evokes their constant reminder that they were invaded. Sandino was the resistance leader of that day.

□ 1810

And what did you have then? You had Mexican presidents. They were revolutionary presidents like Elias Calles, sending Mexican mariel to help Sandino resist the Marines. It took us 9 years then.

We have invaded Nicaragua six times in the 20th Century. So we have got to remember that those policies, they worked then because it was a more primitive existence at the time. They will not work now. The world has changed. It has changed all over, but it certainly includes Latin America.

When we talk about a general term such as Latin America, we are really confusing the issue. What we are on the verge of is the conduct of direct American intervention. Logistically and practically speaking, there is not a professional military that will tell you that it will take less than 100,000 of our troops.

Then what have you got? Let us assume we knocked out the Sandinista regime. Who is going to govern Nicaragua? Do we think that we can impose successfully the so-called Contras or rebels, 85 percent or better of whom are ex-Somozistas? Bitterly hated to this day?

What it will involve now is our American soliders going in very much like in Vietnam, where the solider was compelled to kill men, women, children, peasants, grandfathers, grandmothers, because they are all armed. If the Sandinista regime were afraid of its people, it would not have turned out the profusion of arms to every hamlet, to every peasant, to every housewife in Managua itself. If you visit Managua and you go into the in-

terior of the city, you will see sandbag locations, you will see barracks and complete setup to foist any invasion.

They fully expect an American invasion, and I can see why, because we are on the threshold of that. We have not invested $2 billion in just 2½ years just to train Salvadoran troops in Honduras. And I hate to see this because I believe it is unnecessary. I believe that I was impelled to speak for the first time, even though my name is what it is, I have never considered myself an expert; why, my goodness, I do not even consider myself an expert of local politics in San Antonio. Much less those of Mexico or any other country south of the border.

I have been charged with knowledge, information that is of impeccable nature that led me to speak out for the first time on April 1, 1980, and the President was not Ronald Reagan; it was Jimmy Carter. My message was identical, the same. My recommendation was the same as it is now.

If I had my way, even now, I would pull every American soldier out. Instead of the M60 tanks that we sent down there last week or so from the Texas National Guard, I would send water tanks. Instead of soldiers, I would send doctors, nurses, teachers. I would stimulate the religious missionaries that have been there: Protestant, Catholic, who have been murdered by the very forces we have financed in El Salvador and in other places.

I would pull them out, because I think we would be way ahead. If we would not do that, then I think we could do more good if we were to take those $2 billion plus that we have already spent in this venture since the buildup 2½ years ago, and I would convert it to $1 bills, and I would put them on C-130's and I would just bomb the country with dollar bills.

This is what I told one of President Johnson's chief advisers in 1968, and they almost threw me out of the plane. I think that if we had done that, we probably would be better off than what it turned out to be.

I say that if we ignore the fundamentals that are involved, whether it is these all-important questions of the economy, of the international trade, of our financial institutional setups which, as I have said, may be beyond redemption.

How are the people, even through the Congress, going to regain control of their financial future? Are we going to have to get up in arms and knock out the Federal Reserve? That would be ridiculous. I would not advise it; if we reach that point, then there is no use talking about anything.

I am still hopeful that the Congress will not continue to abdicate its responsibility in that respect. I am still optimistic and hope that perhaps before catastrophe, we can even have a congressionally mandated audit of the Federal Reserve Board, which you cannot get today.

As far as I know, the Federal Reserve Board does not have an inspector general. I found that out when I brought out what I consider to be one of the most insidious things happening in America history, and that was the leaking of confidential information by the Open Market Committee, which developed and inured to the enormous profit of many financial institutions.

MRS. ONIE B. CURTSINGER

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to and in memory of a longtime friend of mine, Mrs. Onie B. Curtsinger of Fancy Farm, KY, who died on January 16 of this year at the age of 87.

Mrs. Onie Curtsinger was a lifelong Democrat. She was a respected, influential lady in her native town of Fancy Farm in Graves County, KY.

The widow of Lucian J. Curtsinger, Sr., since World War I, she was commissioned a Kentucky Colonel many years ago and devoted much of her life to politics and good government.

Mrs. Onie Curtsinger was an active member of the St. Jerome Catholic Church in Fancy Farm and was also a member of the American Legion auxiliary. I cannot say enough about this great lady who is missed dearly by her family and many friends. If all people were as devoted to and conscientious about our country and our future as Onie Curtsinger, America would be an even better place to live.

Surviving are her son Lucian J. Curtsinger, Jr., of Wingo, KY; her daughter, Mrs. Mildred Hayden of Fancy Farm, KY; a sister, Mrs. Maybelle Willett of Fancy Farm, KY; and seven grandchildren and three great-grandchildren.

My wife Carol and I extend our sympathy to the family of this outstanding Kentuckian who was an inspiration to those of us who knew her.

REPORT ON TRAVEL SEMINAR CONDUCTED BY CENTER FOR GLOBAL SERVICE AND EDUCATION, AUGSBURG COLLEGE, MINNEAPOLIS, MN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. WEBER] is recognized for 60 minutes.

Mr. WEBER. Mr. Speaker, in a very few days this House will be asked to vote on an important issue, perhaps the most important foreign policy issue that this Congress will be considering. That being aid to the democratic resistance forces known as the Contras in Nicaragua.

This subject, of course, has spurred a great deal of discussion in the House itself and across the countryside.

One of the main sources of information being given to Members of Congress today from the populace at large comes from individuals who have recently traveled to Central America, particularly to Nicaragua, mainly with American church groups.

I had the opportunity to visit Central America, including a visit to Nicaragua recently, on a factfinding tour with our colleague from California, BOB DORNAN.

One of the things we found down there from the people in Nicaragua, particularly the people in the Catholic Church, was a deep concern about the biased nature of the information given to American church groups visiting Nicaragua.

In this special order what I would like to do is introduce a report submitted to me by one of my constituents and by another woman living in the State of Montana on a tour that they took of Nicaragua sponsored by a Lutheran church group.

I commend it to my colleagues because I think that it shows that we should be somewhat skeptical of the information conveyed to our constituents and the American public as a whole on the tours that they take of Central America under the auspices of certain churches.

This is the report on the travel seminar conducted by the Center for Global Service and Education of Augsburg College, in Minneapolis, MN, submitted to me by Linda Westrom of Elbow Lake, MN, and Jane Otten of Montana; two of the women that were part of this trip. It was submitted to me on March 20, 1985.

□ 1820

Mr. Speaker, I would like to begin by reading into the RECORD the introduction and summary of the report so that my colleagues can have I think a taste of the kind of information that is available to them in this report:

INTRODUCTION AND SUMMARY

The travel seminars sponsored by the American Lutheran Church Women and organized and conducted by the Center for Global Service and Education, Augsburg College in Minneapolis, are not objective educational experiences designed to aquaint women with the problems of Central America as they are purported to be. They are instead two weeks of intensive anti-United States pro-Sandinista indoctrination.

The purpose of this report by Linda Westrom of Elbow Lake, Minnesota, and Jane Otten of Bigfork, Montana, is to record our experiences on one such seminar in the hope it will alert others about the true nature of these trips.

We were part of a group of twelve women who participated in the Travel Seminar entitled "Mexico, El Salvador and Nicaragua—

Women in Mission: A View from Latin America" conducted November 7 through 21, 1984. We met for the first time at the airport in Mexico City where the group came together. Upon getting acquainted we discovered we had similar motivations for being there. We had some knowledge and considerable interest in the area and we had a desire to discover which of the many conflicting reports about it were true. We also shared some skepticism about the presentation in the Center's brochure which states the goal of the Seminar was: "to introduce participants to the reality of poverty and injustice in Latin America, to examine the root causes of these conditions and to reflect on our responsibilities as Christian women in alleviating hunger while working for social and political change."

The women in our group come from Ohio, Minnesota, Iowa, South Dakota and Montana. Most were leaders in their churches, and they were all sincere and genuinely concerned about Central America but they had little or no background knowledge about the area, its history, its people or United States policy there. What little information they had, had been sent by the Center prior to the trip and it supported the organizers' bias. In other words the group was susceptable and open to influence by the tour leaders and the instructors along the way.

The group assembled in Mexico where we spent five days at Augsburg House in Cuernavaca. From there we went to El Salvador where we stayed at the Alameda Hotel in San Salvador. We remained there three days and were hosted by members of the Resurrection Lutheran Church. We spent the remaining six days in Managua, Nicaragua, where we lived at another Augsburg House.

The staff of the Augsburg Houses were our instructors. They were U.S. citizens . . . capable and articulate young men and women who acted as our guides, interpreters and teachers and who demonstrated aside from their concern for the poor a deep commitment to Liberation Theology and the Marxist Revoluntionary movement.

During the two week period our group was subject to incessant thinly disguised indoctination. The root cause of poverty in Central America was the United States and its evil capitalistic system. The socio-political system which would rescue the area would come from the Marxist revolution as exemplified by the Sandinistas and validated by Christianity as defined by Liberation Theology. President Reagan was pictured as an evil man comparable to Herod seeking to kill the infant Jesus.

There was no balance. There was no attempt on the part of the trip leaders to represent U.S. policy or U.S. support of the area. We were exposed to a total of 45 speakers of which only 7 spoke from a pro U.S. perspective and we were conditioned to distrust them before and after they spoke to us.

Joel Mugge, the Center's director, acknowledges this slanted perspective. In a Minneapolis Tribune interview he admitted the program "does have a bias," and "The staff in general sees policies of the U.S. government as too militaristic and too interventionalist." This we found to be a remarkable understatement!

During the several "reflection and evaluation" sessions in the course of the trip our instructors urged us to report what we saw, what we heard and how we felt when we returned home. Since our view of the trip is probably very different from the other participants and not what the Center expected from us, we are pleased to comply with their request by writing this joint report about what we saw, what we heard and how we felt.

Mr. Speaker, at this point in the RECORD I will insert the body of the report by Linda Westrom and Jane Otten:

MANIPULATION AND INDOCTRINATION

Early in the trip, and even before it started, we realized the participants might be subjected to some manipulaiton and indoctrination

One technique was to make us feel insecure and apprehensive and to put us in a defensive frame of mind.

"LINDA. In a pre-trip orientation meeting held at the Center Headquarters at Augsburg College in Minneapolis they emphasized how we would be feeling during the trip. We were encouraged to vocalize our "fears" and to record them in our journals. We were then given the assurance that they were in touch with the State Department and it it seemed unsafe we would not go into these countries. (It is ironic that the Center staff trusted the State Department in matters of our physical safety but did not trust its motives or polices relative to Central Amercia) . . . We were warned particularly about El Salvador. We were told that the Bible is considered subversive material there . . . We were told that we would probably be followed while in the country; that our hotel rooms might be bugged and our belongs searched. We were urged to be as inconspicuous as possible while there . . . Furthermore the staff warned us that we probably would be body searched in the U.S. Embassies we would visit . . . We were told we would be asked by customs upon our return whether or not we had visited any farms and we should answer no because we would not be on a real farm. We did visit a real farm despite what they said."

The staff people leading our group made no effort to conceal their own feelings during the trip. In fact it seemed they deliberately revealed and exaggerated them in order to influence our own feelings. For example, they seemed genuinely apprehensive about our stay in El Salvador. In retrospect we understand why, since by predisposition our group was hostile to the government and the authorities probably knew it and would have been justified in keeping tabs on us. In any case, our guides succeeded in building tension and apprehension in us while we were there. By contrast we were surprised at how much they relaxed into a state of near euphoria as soon as we arrived in Nicaragua. We did not share the feeling but it was clear they felt they were among friends and as a consequence so did the majority of the group. Thus they manipulated the group's "feelings" to be negative about El Salvador and positive about Nicaragua.

Another early technique used by the Center staff was to make us feel dependent upon the staff personnel.

JANE. I arrived at the Mexico City Airport with a lady from Missoula, Montana, and one from Rapid City, South Dakota. We met briefly with some of the others and then the three of us were guided by our trip leader via subway and bus to Cuernavaca. It was during the rush hour and we made four subway changes; we were given no map and no destination address and we were conspicuous as North Americans. My Spanish was very rusty and we were travel weary and feeling the change in altitude. We felt disoriented, isolated and apprehensive and our dependence upon our guide was quickly established. We were completely in her hands. It seemed to me that the whole episode may have been calculated and if so it certainly was effective."

The Center organized full itineraries for each country which allowed only short periods of time on our own. However, the language barrier and unfamiliar environments still kept us dependent on the staff.

A technique throughout the trip was incessant anti-U.S. rhetoric. When we arrived at Augsburg House in Cuernavaca the Center's hostility toward the United States government and the current administration became immediately evident. The staff was in despair over the results of the U.S. elections. They held an orientation session during which they directed us to their library which clearly reflected their leftward bias. The bulletin board contained posters and clippings which supported the Marxist revolutionaries and denigrated the U.S. One especially colorful poster depicted U.S. helicopters carrying bombs with the caption, "Herod searches for the baby Jesus to kill." Ronald Reagan was equated with Herod several times during the trip.

Another technique was used throughout the trip was setting aside a period in the evenings for what they called "reflection time." During these sessions they always encouraged discussions putting emphasis on our "feelings" rather than on facts. These seemed to be directed conversations which led to the conclusions they desired. For example, when there were comments about the material the Center had given us, the staff confided that this was material we would not otherwise see. From this, one lady in our group concluded that the U.S. press accounts of the situation was what the State Department wanted written. The staffers agreed with her conclusion and no one quarrelled with it.

We often had a period of worship in the morning when we read passages from the Bible and sang hymns. During these sessions we were sometimes encouraged to use the feminine pronoun "she" in referring to God.

The most overtly manipulative technique our trip leaders employed was to plant preplanned questions with us before we met with agencies likely to represent views favorable to U.S. policy and unfavorable to the revolutionaries. During the trip we listened to 38 speakers representing the anti-U.S. position and only 7 who were pro. Preplanned questions were used only when we were to hear pro-U.S. speakers. This procedure was followed before we visited officials of the "institutional Church" (meaning non liberation theology church), the U.S. embassies in El Salvador and in Nicaragua and the newspaper La Prensa in Managua.

In meetings before these visits we were encouraged to think of questions to be asked. Questions were suggested and individuals were urged "to take responsibility for asking them." Although the questions were generally perceptive and courteous they were clearly designed to embarrass the speaker or to put him on the defensive.

These visits were followed by another meeting during which we reviewed the questions and analyzed the answers. Whatever had been said that might support the U.S. position was derided, discredited, or somehow neutralized. For example immediately following our visit to the embassy in Nicaragua we met with Nora Astorga. She is the woman, quite glamorous, who lured a

Samoza general into her bedroom where he was brutally murdered. As a result she became a revolutionary heroine of the Sandinistas. Later she was proposed as the Nicaraguan ambassador to the U.S. but was rejected. Several of our group, at the urging of our guides, naively reviewed what we had been told at the embassy and asked her to comment. This gave her a chance to discredit everything we had been told.

On occasion when one of our group confessed to being confused by the conflicting testimony, a staff member always was ready with an answer which reflected the Center's bias. They seldom allowed a question to remain open lest that suggest there might be some validity in the other view.

Throughout the trip they tried to get us emotionally involved. One of the most flagrant examples occurred in Managua where the group attended a parish church service by a Marxist priest named Uriel Molina. (We found out later that he leads Centro Amtonio Valdivieso, one of the orgnaizations which propagate Liberation Theology.) At the end of his service during which he talked about solidarity, he invited the North Americans present to gather around the altar, join hands and sing "We Shall Overcome." The two of us did not participate.

We found that it is extremely difficult to maintain a balanced perspective after being exposed to these combined techniques for a period of two weeks. If we had not had each other to talk to we might have begun to question our own positions even knowing what they were trying to do to us. We feel it is virtually impossible for anyone who is naive and uninformed, and trusting of the Center, not to succumb to this type of brainwashing.

ROLE OF LIBERATION THEOLOGY

Both of us had heard a great deal about Liberation Theology before we made this trip but neither of us fully realized its importance to the foment in Central America. It is clearly being used in three ways:

1. To attack and discredit both the traditional church and the United States in these countries.

2. To encourage activism among people who historically have been apolitical.

3. To justify Marxist-Leninist revolutionary doctrine.

We were exposed to generous doses of Liberation Theology during the trip. In our introductory lecture to it, our instructor admitted it was controversial and then extolled its virtues—she never touched on its shortcomings. At first it sounded reasonable and even compelling and it seemed that it might have a part to play in Latin America. But as we heard more about it, its strident overtones of anti-capitalism, anti-church, pro-Sandinista, and pro humanism became painfully apparent, and it quickly lost its appeal. In fact, it become apparent to us that Liberation Theology is counterfeit Christianity. Like any counterfeit it masquerades as the genuine article, its deception carefully hidden, and it is apt to be accepted at face value by the unwary. The obvious contradiction is the fact that Liberation Theology which purports to be a Christian movement, is being used to advance the cause of an atheistic ideology. In his book "Christians Under Fire," Humberto Belli sums it up very well when he writes:

"In practice the revolutionary Christians do not preach to Marxists in order to attract them to Jesus Christ, but to Christians in order to attract them to Marx. The conversion of Christians to Marxism is indeed the main evangelistic thrust of the (Liberation Theologists)."

U.S. Christians should look at Liberation Theology from all perspectives and examine it closely before they jump on the bandwagon. We found that the pro-L.T. speakers we heard did not hesitate to misrepresent the meaning of the scriptures.

"LINDA. Liberation Theology was introduced to us right away in Mexico . . . the theme of 'the poor versus the rich' was hand fed to us. They used a misquote of the scriptures, 'Money is the root of all evil,' as justification for this theme because it fit their thesis. The correct quote, 'The love of money is the root of all evil,' does not, so they represent the popular corruption as being scriptural . . . One of the guest lecturers in Mexico, a Sister Dolores, stated emphatically that the verse in Matthew which states that Jesus came to preach good news to the poor does not refer to 'the spiritually poor,' but to the 'materially poor.' She also stated that 'the rich cannot be Christians' . . . Another guest lecturer on L.T. we heard in Mexico was an ex-priest, Gerardo, Tijissen who claimed to have served 'caring and concerned parishioners who happened to be socialists' in Chile. He was expelled from that country because he participated with his parishioners in a 'peaceful land take-over.' He now heads a Christian Socialist group. He had also been expelled from Peru and Ecuador and admitted that Archbishop Posadas Ocampo of Mexico now wants him out of that country. During his lecture he said, 'Cuba is the freest country I know and the most politically active' . . . Small wonder he is not welcome anywhere."

Our instructors made the claim that the purpose of the Base Christian Communities organized by the Liberation Theologists is to teach people to read the Bible and understand the scriptures. We feel that would be a wonderful goal if that were it, but we soon learned that it does not end there. The technique employed in the Base Communities is group study of the Bible in an informal atmosphere "without students or teacher." According to our Center guides it follows a standard fixed procedure:

First they read a Bible verse

Then the group discusses it and relates it to a current situation

Finally, they agree on a concrete action to be taken by the group

When they reconvene, they review the old lesson and critique their action before reading a new lesson.

This procedure obviously can be innocent and useful in everyday living, but in practice it is used to organize political activity which carries added force because of its alleged linkage with the Scriptures. It obviously can be a manipulative tool. (Incidentally the same technique was used on our group throughout the trip.)

Despite the claim that there are no teachers or students, clearly these are organized, well structured and directed gatherings. The question is who directs them and to what purpose? The answer is that people committed to supporting the Marxist-Leninist revolutionaries direct them to win activist converts. This was confirmed for us in Nicaragua by a Salvadoran priest, Fr. Pedro Decleary, who told us that the three questions they ask as they study the Bible verse by verse are:

(1) Where did Jesus go and what did he do?

(2) Who opposed Jesus and why?

(3) Who do we see today doing what Jesus did?

He indicated that they solicit the following answers to these questions:

(1) He went among the poor to liberate them.

(2) The rich, powerful, and educated opposed Him.

(3) Today the Sandinistas are doing as Jesus did.

It seems to us that these answers are worse than inaccurate . . . they are a perversion of the scriptures. Comparing the Sandinistas to Jesus would be funny if it were not for the fact that this sacrilege is being represented as the truth to innocent, semi-literate people who are excited about the Bible for the first time in their lives.

Humberto Belli in "Christians Under Fire" refers to this kind of activity as being a subtle form of religious persecution. He writes:

"When one speaks of religious persecution, one usually thinks of churches being seized, Bibles being confiscated, Christians facing mistreatment because they do not repudiate their belief in Jesus Christ. But there are more disguised ways in which a government can attempt to curtail the influence of religion in society and undermine its citizens commitment to their religious beliefs, leaders, and institutions. It is this kind of anti-religious policy that the Sandinista government is, in fact pursuing. Indeed, the Sandinistas have developed in innovation in the field of anti-Christian persecution: anti-Christian policies often carried out in the very name of Jesus Christ."

We know this sort of thing is happening. We know because we were told that it was, over and over again by our tour leaders and instructors. What we find hard to believe is that the same approach is being used to capture the support of sincere U.S. Christians like the women in our group. It is one thing to misrepresent the scriptures to semi-literate people just getting acquainted with the Bible but quite another to do it with people who have been raised with the scriptures and who are supposed to know them. Nevertheless that is what is happening and the frightening thing is that some supposedly knowledgeable people are accepting these misrepresentations.

It seems to us that people on these travel seminars lose their objectivity. They become so emotionally involved with the relatively poor conditions in Central America that they lose sight of the larger picture. Of course we believe that is exactly what the Center for Global Services and Education hopes will happen.

"JANE. It seems obvious that the Soviet-Cuba axis is pursuing the long term objective of communism which is the strategic isolation of the United States and that it sees opportunity in fishing in the troubled waters of Central America. However, it knows that to be successful it must conceal its true aim from the American people and thus it obscures the issues and casts for support from innocent people. Through experimentation it has developed tackle called Liberation Theology, which seems to catch some fish. the bait is Christianity, the hook is poverty, but the line is Marxist revolution and the net is totalitarian control of these strategically important countries. Like real fish, the innocents that are caught are not aware of the fisherman, his net or his line until they have taken the bait and swallowed the hook. Then it is too late."

The women who were with us on this tour were victims of this sort of trap because they are compassionate, caring people and were overwhelmed, smothered, by what

they say and what they were told. They lost their objectivity and seemed not to have sufficient background knowledge or political awareness even to recognize the distortions presented to them, much less to resist or challenge them.

IMPRESSIONS OF COUNTRIES AND PERSONALITIES

Our visits to the three countries, Mexico, El Salvador and Nicaragua, left us with some vivid impressions worth noting. Each country has a unique character. While they share a common language and cultural origin, their geography, history, ethnic influences, educational structure and present circumstance are very different. As a consequence their people and their societies are quite different.

It surprised us therefore, to be exposed to the identical message in each country. There was almost no variation in what the Center's speakers had to say from country to country. It was the same condemnation of United States policy, the same enthusiasm for the work of "the people churches," and the same defensiveness about the Sandinistas. With the exception of the seven pro-U.S.-policy talks we heard, the speakers could have been interchanged with out varying the message.

This reinforced our early suspicions about the program and eventually convinced us they were well founded. However, for those women who had given their trust to the Center, or who had no background knowledge of Latin America, or who were overwhelmed by the shock of being in unfamiliar environments, the repetition of these messages seemed to be convincing. Having lived with them for two weeks and undergone the same indoctrination we can understand why they were deceived.

Jane, who had lived and travelled in Latin America, observed that the people we met through the Center activities lacked the warmth and friendliness that she had come to associate with Latin Americans. They seemed too intent on delivering their message. Somehow they treated us more as couriers than as concerned people. The exception was in Nicaragua where we met some people who were not associated with the Center.

The following paragraphs record some of the more revealing experiences, activities and personalities encountered during the trip.

IN MEXICO

We visited a public market which was interesting and fun. The Mexicans were used to tourists so they have a lot of souvenir items for sale. Bargaining is part of the game and they are obviously very good at it. The market seemed to exemplify small scale free enterprise at its best. There were no signs of social unrest or discontent there.

We were exposed to a number of Mexican feminists while there. We visited CIDHAL, womens training center where a spokeswoman told us "the popular causes" were advancing through women. She linked exploitation of women with capitalism and indicated their belief that women were better off in Cuba. She also talked about abortion rights which "President Reagan was trying to prohibit." She said that the Mexican government and the U.S. government were involved in massive sterilization programs without telling the women they were being sterilized. She was very conspiratorial and said she was taking a risk talking to us as the U.S. was supplying funds for family planning because it was afraid women were having babies to fight guerilla wars. . . . Another woman, Irene Ortiz, spoke to us on a different occasion. She linked the feminist movement to the class struggle indicating the rights of women must challenge not only the social structure but also the democratic system. She indicated that men and women must strive together against class exploitation and that the solutions cannot come from the upper or middle classes. She also condemned feminists who get elected to high office and then fail to struggle for laws "to help women". . . . We also heard from leaders of a group which is organizing domestic servants. Its intermediate aims are better pay and vacation time but its ultimate aim is the eliminaton of domestic servants.

The Mexican Bishop Posadas Ocampo was one of the people who spoke to us who did not condemn the United States for its involvement in Central America. He warned against Liberation Theology. He had recently met with Pope John Paul II who he said, "Sees with clear eyes all that has been done in Christian Liberation as he himself is an example of it." He said the church has the Pope's support for evangelism but not for Marxism or violence. "The Church says, be careful. Do not deviate from Him who brings the love of God."

We got the feeling that the poor people of Mexico were bettering their lot through Bible study . . . not from the directed Liberation Theology type study but from the fact that they were actually reading the scriptures. We feel the truth of the scriptures can survive any effort to bend it or misuse it and that if people really read the Bible they cannot long be misled.

IN EL SAVADOR

The public market we visited in San Salvador was a treat. Like the market in Mexico bargaining prevailed but it was less geared to tourists. The people were bright and friendly and had attractive wares for sale.

We visited four refugee camps in El Salvador. They are operated and supported by the Lutheran and Catholic churches. All but one seemed to be well run under difficult circumstances. The exception was an extremely crowded facility in which the refugees were confined in a partially completed church building. It was operated by nuns and we wondered why the church or government did not provide better facilities. We were told tht the church did not want help from the government. The uncharitable thought crossed our minds that perhaps miserable conditions made better revolutionaries. . . . By contrast the largest camp, Fe Y Esperanza, located about one hour's drive north of San Salvador was complete with a school, a chapel, a health clinic and workshops where they manufactured shoes, furniture and mended clothing. A characteristic of all the refugee camps was that they only housed women, children and elderly men. There was an explanation; all the young men were either in the army or with the guerrillas. Naturally the government would be suspicious of young male refugees and might well assume they were guerrillas, so one can understand how there is some tension between the camps and the government. One important fact remains, however, and that is the refugees in these camps were from areas where there is guerrilla activity and the people have fled to escape a dangerous situation.

We also visited an orphanage which housed very young children. We were told that the operators were reluctant to place the children for adoption because they believed some of the children were not really orphans but were brought there for safekeeping by their parents who presumably are involved with the guerrillas. We were told that the orphanage was "harassed" with ongoing investigations by government authorities.

We visited the headquarters of "Mothers of the Disappeared" in San Salvador and were surprised by the reaction of women in our group. We were prepared for a very emotional experience because of the horror stories we had been told but it turned out to be the opposite. The office was located at a very noisy downtown street corner and the people there were laughing and behaving quite naturally. It appeared that the tragic tales had been related too many times. It was a shock to the women in our group to find themselves unmoved by the testimonies.

We had heard that San Salvador was a dynamic, bustling city and that its people were hardworking and businesslike. We found this to be true although the guerrilla threat has obviously taken its toll. There is tight security and the economy is down. But the people are alert and interested and we were treated well and felt comfortable there despite the warnings of our tour leaders.

IN NICARAGUA

The public market in Managua was a dramatic contrast to those in Mexico and San Salvador. The vendors seemed apathetic and indifferent and there was nothing attractive to buy. Our guides blamed "the war" for this condition but it should be remembered there is a parallel war situation in El Salvador.

We visited a cooperative farm near Managua which was operated for Salvadoran refugees. One hundred fifty people lived there. It was in a pleasant rural setting with neat houses and a few pigs and cows and some vegetable gardens. It was obviously meant to be a show place for visiting groups like ours. We were impressed until we looked more closely at a large, tidy cabbage patch in which three men were spraying the plants. They could have saved the time and effort because they were too late. . . the leaves of the plants were so riddled with holes they were lacey, and the plants had not headed and obviously would yield no cabbages. Later away from the tour we would hear, "It was just like the government. . . there is nothing there."

We visited the state-owned Helanica Textile Factory where a spokeswoman appealed to us to tell the people in the U.S. that they did not want war. "All we want is peace. Tell your men not to come here to fight because they also will die." . . . She asked, "Why is President Reagan fighting us? Communism? We don't know what it is." . . . but she went on to say, "We have good relations with Cuba and the Soviet Union and they will help us fight a war to survive." It was difficult to determine whether or not she believed what she was saying was true, but there is no doubt she wanted us to believe it.

The same no war theme was repeated by the Minister of Education, Fernando Cardinal, the Jesuit Priest who was recently "fired" by the Vatican. He told us that in the event of a U.S. invasion of Nicaragua, 50,000 young men would die in Managua alone and, "They will ship thousands of cadavers back to the United States." . . . Like most of the speakers he reassured us of their love for us and emphasized that they were Christians and only wanted peace. He

went on to say that we, "North Americans had re-elected a crazy man. If things do not change, you must warn him. We love peace but we will dedicate ourselves day and night to kill." . . . Cardinal's message was mostly threats. Nevertheless our American guide indicated his great admiration for him. . . . During this session Cardinal told us he sometimes spoke to groups like ours two or three times a day and that nine out of ten of them represented protestant churches.

The forced relocation of the Moskito Indians was "justified" by another priest, Justinian Liebl. Despite the fact that the Sandinistas have subrogated the Moskitos' local government, deprived them of their fishing industry, cut down their fruit trees, destroyed their livestock, and broken up their churches, he claimed the Sandinistas were "only protecting the Indians from the Contras." He did admit, however, that the FSLN had alienated the Moskitos after the "triumph" in 1979.

We were exposed to a number of different speakers in Nicaragua. Each had different focus in his presentation but they all had common themes which reoccurred with great frequency. One such theme was that "the Sandinistas are trying to create a new human being and a new society" which is a universal humanistic theme . . . They also talked about "solidarity" as they did in Mexico. But the word changed meanings—in Mexico it meant spiritual unity with the congregation, but in Nicaragua it clearly meant support of the Marxist regime.

Nicaraguans were not our only contacts which promoted the pro-Sandinista anti-U.S. themes. Jack Nelson, the Center's manager in Managua, did also. Incidentally, there were several anti-U.S. revolutionary posters displayed on the walls there as there were in Mexico. Nelson is the author of a book "Hunger for Justice," (Orbis Press) in which he applauds China and Cuba for their wonderful humanitarianism. He claims these countries have no unemployment, they have wonderful health care and no illiteracy (despite evidence to the contrary in the Mariel refugees). Nelson held these countries up as a shining example for the U.S. and promoted to us a program for our country which included: organic farming, cancellation of the farm debt (since farmers had to buy expensive machinery to disperse chemical fertilizers), and redistribution of land in the United States. In Managua he told some of us that he felt there should be a legal limit on what an American can earn. It was shocking to hear such nonsense from a fellow American.

We did have a few contacts which were pro-U.S.A. One was Cesar Rivas of the newspaper La Prensa. His talk was one of the ones which was discredited before and after by the staff personnel, but it nevertheless was a refreshing change from what we had been hearing. "It is strange," he said, "that intelligent people cannot see what kind of people the Sandinistas really are." He also talked about the invasion rhetoric indicating that the Sandinistas had been playing the theme of "imminent invasion" for five years.

Another pro-U.S.A. contact was not on the itinerary. We were able to get out on our own on two occasions in Managua where we met several people through friends of Jane's family. These people had nothing to do with our tour and had a very different view of what was happening in the country. We showed one woman our itinerary and recounted what we were being told. She introduced us to a friend and repeated what we had said. They reacted half in amused disbelief and half in anger and assured us, "It was all lies!" . . . They indicated life in Nicaragua had been pretty good for about one year after Somoza was deposed, but had gotten steadily worse and now everyone was worse off than when he held power. They showed their ration cards which entitled them to one pound each of beans and rice per person per week. If they did not claim their ration on the appointed day, they forfeited it. . . . We asked about the election which had been held a few days before our arrival. They indicated it had been a show. The high turnout was a result of the threat of loss of ration cards of people who did not vote. One woman said that many did not mark their ballots and many wrote obscenities across it. (Later an election official admitted to us that there could have been some excesses in the use of threats) . . . Since many families had had their young men conscripted for military service, they were somewhat reluctant to criticize the government, but they seemed not only willing but eager to tell us the facts. They chuckled about the Pajaro Negro, the local name for the U.S. spy planes. Our guides had led us to believe that the population was terrified by them, but these people indicated that most Nicaraguans not only joked about them but cheered them.

To us these people were credible, as were the spokesmen at our embassies, Cesar Rivas at La Prensa and the anti-Liberation Theology church people we heard, despite the staff's effort to discredit them. Together they opened a different door for us and made us aware that there was, after all, another side of the story which was worth pursuing. The efforts of our guides to dismiss the opposing view as nothing more than State Department propaganda only served to confirm our belief that they themselves had something to hide. We are convinced that what the Center represents as reality is not reality at all and that one would come closer to the truth if she were not a captive of the Center's controlled and directed seminar.

Mr. Speaker, I would like at this point read into the RECORD the conclusions—and they are fairly brief—that these two women came to in the course of their trip to Central America:

CONCLUSIONS

One cannot participate in this kind of "Seminar" and remain neutral and uninvolved. She must take a stand. Either she "buys" the package being pushed by the Center or she rejects it. If she rejects it, she is compelled to question the motives of the Center's leadership and personnel.

We reject their package and we do question their motives. We are convinced that the Center is working against the best interests of the people of Central America and of the United States. Looking back objectively, reexamining the agenda, the events themselves and our own impressions and feelings, have led us to some firm conclusions, which are as follows:

First, the travel seminar is designed, organized and conducted to overwhelm the participants with information which supports the anti-U.S. pro-Sandinista bias of the Center for Global Service and Education.

Second, it became obvious to us that the poor, illiterate and semiliterate people of Mexico and Central America are being manipulated by the left to build hatred and fear of the U.S. and build trust and approval of Marxism-Leninism. Women's movement organizations, Liberation Theology, so-called literacy campaigns, as well as Nicaraguan government propaganda all support these efforts.

Third, Liberation Theology, which is a perversion of Christian principles, is being used extensively not only to ensnare the suffering people in the revolutionary movement but also to corrupt well intentioned people, such as the women of our group who are genuinely concerned about conditions in the area, into support and approval of the "revolution."

Finally, over the course of the trip and after visiting these countries we gained the strong impression that reality in Central America is not as it was painted for us by our tour leaders. While Liberation Theology and the revolutionary movement may be encouraging some division, fear and hatred in these countries, we got the feeling that their influence is really somewhat superficial and more important in the minds of the liberal activists than to the people in these societies. Central Americans, even the uneducated, are not stupid and may not be as easily led as these liberal activists apparently believe. It seems to us that freedom, opportunity and a better future are the real goals of the people and that the kind of revolution as represented by the Sandinista government in Nicaragua is neither providing nor intends to provide any of these.

Our first three conclusions seem to be sustained by the nature of the materials we have received from the Center since our return. See especially:

Attachment #4 in Addenda which provides a list of Resources used by the Center. It includes well-known left wing organizations.

Attachment #7 which provides names and other detail on the Regional Network "clusters" being established by the Center. Note that it states, "You can depend on your cluster coordinator" for among other things, "specific contingency plans for your area in case of invasion."

Attachment #8 which discusses a "Public Hearing on U.S. Policy toward Nicaragua" organized by the Center on March 9. The interesting thing here is the list of the sponsoring organizations.

We really did not need the material mentioned above to give us confidence in our conclusions. If we had any doubts at all, it was dispelled at the end of the trip when the staff urged us to organize in opposition to U.S. policy in Central America; to call for an end of aid to El Salvador and the Contras; and a "hands-off" policy in Nicaragua.

It concerns us that these people are working against the best interests of our country and the people of Central America. It concerns us more, however, that they are doing it under the protection our system extends to religious institutions, in the name of Christianity while they attack its fundamental principles.

Mr. Speaker, at this point I include in the RECORD the addenda to the report:

ADDENDA

Materials supplied before Seminar:

1. Itinerary, Attachment 1.
2. List of Contacts, Attachment 2.
3. List of Participants, Attachment 3.

Materials supplied after Seminar:

1. Center for Global Service and Education Resources, Attachment 4.

2. Central America Audio Visual Resources, Attachment 5.
3. Periodicals to be Familiar With, Attachment 6.
4. Regional Network and Cluster Coordinators, Attachment 7.
5. Public Hearing Announcement, Attachment 8.

ATTACHMENT 1

ITINERARY: ALC WOMEN TRAVEL SEMINAR, NOVEMBER 7-21, 1984

Center staff: Mavis Lund.
Cuernavaca staff: Brad Burkhartzmeyer, Richard Wood, Cindy Ofstead, Mary Clark.
Manague staff: Jack Nelson-Pallmeyer, Sara Nelson-Pallmeyer, Ann Dohrmann.

WEDNESDAY, NOVEMBER 7

Afternoon: Arrive in Cuernavaca by subway and bus (small groups).
7:00 p.m., Dinner.
8:00 p.m., House and program orientation.

THURSDAY, NOVEMBER 8

7:45 a.m., Worship.
9:00 a.m., Introduction to Liberation Theology—Cindy Ofstead.
11:30 a.m., Field trip—Village of Coatetelco; Susana (barefoot doctor); Ricardo and Agripina (campesinos).
Picnic on Lake Coatetelco.
Pyramids of Xochicalco.
6:00 p.m., Reflection.
Evening free.

FRIDAY, NOVEMBER 9

7:45 a.m., Worship.
8:30 a.m., Visit Angela at La Estacion, a squatter settlement.
10:30 a.m., Reflection.
11:00 a.m., Bishop Juan Jesús Posadas Ocampo, Cathedral of Cuernavaca Padre Onisimo.
12:00 noon, CIDHAL, Centro para Mujeres (women's organization for education and documentation).
Latin American History from a Woman's Perspective—Guadelupe García Velasco.
Discussion—Edna García.
3:30 p.m., Walking tour of Cuernavaca: The Cuernavaca Quest.
7:30 p.m., La Casa Hogar: The Reality of Domestic Servants in Mexico: Herlinda; Graciela; Rosa; Carmen; Irene Ortiz.

SATURDAY, NOVEMBER 10

7:45 a.m., Worship.
9:00 a.m., Reflection.
9:30 a.m., Irene Ortiz, Education and Alternatives for Women in Latin America.
3:30 p.m., Girardo Thijssen—Christianity and Socialism.
7:30 p.m., Introduction to El Salvador—Brad Burkhartzmeyer Introduction to Nicaragua—Richard Wood.

SUNDAY, NOVEMBER 11

7:00 a.m.-12:00 noon, Attend various masses; Iglesia San Anton—with Rich; Iglesia Alta Vista—with Cindy; Iglesia Plan de Ayala—with Mary (J & L); Cathedral—celebration of 50 years of ordained priesthood for former Bishop Sergio Méndez Arceo.
9:00 a.m., Breakfast.
Afternoon free.
4:00 p.m., Adela Jiménez—Forming and Utilizing Base Christian Communities.
7:30 p.m., Sister Dolores—Christian Catechetical Education.

MONDAY, NOVEMBER 12

7:45 a.m., Worship.
9:00 a.m., Evaluation and travel procedures for El Salvador.
10:00 a.m., Depart for airport.
2:00 p.m., Flight to San Salvador, Taca International #211.
4:00 p.m., Arrive in San Salvador. Check in at Alameda Hotel.
7:00 p.m., Dinner at the home of Pastor Medardo and Abelina Gómez Wake at Resurrection Lutheran Church.

TUESDAY, NOVEMBER 13

8:00 a.m., Visit Comunidad Fey Esperanza (Faith and Hope Refugee Community), Visit Comunidad La Reina (The Queen Refugee Community)—Terry Steinert.
2:00 p.m., Independent Commission of Human Rights.
4:00 p.m., Committee of Mothers and Families of the Politically Imprisoned, Disappeared and Killed of El Salvador Monsenor Oscar Arnulfo Romero: Carmen Campos (mother).
6:00 p.m., Dinner and discussion with Society of Women of Resurection Lutheran Church: Abelina C. de Gómez, Cecilia Alfarro.

WEDNESDAY, NOVEMBER 14

8:00 a.m., Visit San José de la Montaña (Catholic refugee camp).
11:00 a.m., Metropolitan Cathedral of San Salvador and tomb of Archbishop Oscar Arnulfo Romero.
12:00 noon, Shopping at Mercado Ex-cuartel (artisan market).
3:00 p.m., American Embassy: Pat Butenis, staff assistant to ambassador; Vitorio Brod, political officer; Bastiaan Schouten, acting director, U.S. AID (Agency for International Development); Ambassador Thomas R. Pickering.
6:00 p.m., Visit Centro de Convivencia Infantil (Baptist orphanage)—John Lamb.
7:30 p.m., Supper of Pupusas, Planes de Renderos.

THURSDAY, NOVEMBER 15

9:00 a.m., Visit La Roque (Catholic refugee camp).
10:00 a.m., Tutela Legal (Archdiocese human rights group): Alan Martell, social secretariat.
3:00 p.m., Depart for airport.
5:00 p.m., Flight to Managua, Taca International #311.
6:10 p.m., Arrive in Managua, Dinner and house orientation.

FRIDAY, NOVEMBER 16

7:00 a.m., Worship.
8:00 a.m., Hilanica Textile Factory.
9:15 a.m., La Prensa: César Rivas, Chief of correspondence.
10:45 a.m., Eje Ecuménico: José Miguel Torres, director.
3:00 p.m., Fr. Fernando Cardenal, Minister of Education.
5:00 p.m., Margarita Navarro; Batahola Norte and women's sewing coop.

SATURDAY, NOVEMBER 17

7:00 a.m., Worship.
8:15 a.m., Justiniano Liebl, CEPA.
10:15 a.m., VidioNic: Wolf Tirado, Film: Nicaragua: the other invasion.
11:00 a.m., Salvadoran Refugee Collective, crafts.
1:30 p.m., Visit main plaza (National Palace, Cathedral, grave of Carlos Fonseca), Shopping.
3:30 p.m., CISAS, Health Care in Nicaragua: María de Zúniga, Ana Quirós.
5:00 p.m., Reflection.
7:30 p.m., Base Christian Community-type Bible Study: Padre Pedro Decleary.

SUNDAY, NOVEMBER 18

7:00 a.m., Worship.
8:00 a.m., Visit an El Salvadoran refugee cooperative.
11:00 a.m., Mass at the Archdiocese of Managua: Archbishop Obando y Bravo.
3:00 p.m., Swimming (??) at a lake near Managua.
5:00 p.m., Mass at Iglesia Santa María de Los Angeles: Rev. Uriel Molina.

MONDAY, NOVEMBER 19

7:00 a.m., Worship.
8:00 a.m., Field trip to León—Los Lechecuagos (rural village), Colegio María Eugenia de Jesús, Women's sewing cooperative, Health clinic, Hermana (sister) Leyla.
Indio Viejo (prostitute training center: sewing school and restaurant) Bonina Roja.
Prison #21, from time of Somoza.
Gladys Baez, delegate elect to the Council of State.
Project Minnesota/León: Elizabeth Sander.
8:00 p.m., Reflection.

TUESDAY, NOVEMBER 20

7:00 a.m., Worship.
8:00 a.m., Visit Ciudad Sandino: Sister Bea Zaragoza.
9:45 a.m., Consejo Supremo Electoral: Roberto Euentaz.
11:00 a.m., The Nicaraguan Economy: Jack Nelson-Pallmeyer.
2:30 p.m., American Embassy: Susan Clyde, public affairs consul.
4:00 p.m., Nora Astorga, Nicaraguan Foreign Ministry.
5:30 p.m., Reflection, Closing Worship and Eucharist.
7:00 p.m., Dinner at Los Antojitos restaurant.

WEDNESDAY, NOVEMBER 21

5:30 a.m., Depart for airport.
8:00 a.m., Flight to San Salvador, Mexico City, Dallas, etc.

ATTACHMENT 2

TRAVEL SEMINAR RESOURCE LIST—THE CENTER FOR GLOBAL SERVICE AND EDUCATION

MEXICO RESOURCES

Brad Burkhartzmeyer, Apartado 116-B, Cuernavaca, Morelos, 62190 Mexico; 52-731-25641.
Richard Wood, Apartado 116-B, Cuernavaca, Morelos, 62190 Mexico; 52-731-25641.
Mary Clark, Cindy Ofstead, Apartado 116-B, Cuernavaca, Morelos 62190 Mexico; 52-731-25641.
Ricardo & Agripe Nabor, Calle 5 de Mayo, Coatetelco, Morelos, Mexico.
Irene Ortiz, Apartado 297, Cuernavaca, Morelos, Mexico; 52-731-57007.

CENTRAL AMERICA AUDIOVISUAL RESOURCES

This relatively short list of audiovisual resources has been compiled by the Center for Global Service and Education. Not all films have been previewed by the Center, so we suggest that you preview films before use. Asterisks are placed by highly recommended AVs. Addresses of offices where films are available are at the end of list. For a more complete list of audiovisuals, send for a Guide to Films on Central America, Media

Network, 208 West 13th Street, New York, NY 10011. $2.

GENERAL

*Americas in Transition, 29 min., 16mm, 1981.

What are the influences that sway the politics of Honduras, El Salvador, Guatemala and Chile? What role has the U.S. played in the past and present and what role will it play in the future of these countries? This film examines the causes and effects of change in Latin America today. *Narrated by Ed Asner.* Available from: APH, $8 rental. AFSC, $5 rental. MCC, price negotiable.

*Struggle and Hope, 28 min., videotape, 1982.

Account of 25 ALC members travels through Mexico and Nicaragua, their perceptions of the struggle and hope in these countries' peoples; and, the telling of their own spiritual awakening, which surprised, challenged and renewed these ALC members. Produced by ALC Media Services Center. Available from: APH, $4.

*Power for Change, 25 min., videotape, 1982.

A dialogue between Christians of the United States and Latin America about changes in Central America. They share their reflections on new understandings of political and theological ferment in the region. Produced by ALC Media Services Center. Available from: APH, $4.

Dollars and Dictators, 30 min., filmstrip, 1981.

Examines the role of the U.S. in Central America, including descriptions of corporate, government, and financial involvement. Available from: AFSC, $5. RC, $25/week.

*In Pursuit of Refuge, 30 min., filmstrip, 1982.

Tells in their own words and music the story of people who have been forced to flee the war-torn countries of Guatemala and El Salvador. Available from: APH, $4. CROP, nc.

*Born from the People, 22 min., filmstrip, 1983.

Introduction to the history of five Central American countries and background for understanding 1983 U.S. church policy statements on U.S. role in Central America. Produced by Presbyterian Church. Available from local Synod or Presbytery office or CROP.

*Sanctuary, 58 min., 16mm, 1983.

Describes the world wide plight of refugees, following families from Central America, Southeast Asia, and Africa in their search for safety. Produced by Church World Service. Available from: APH, $8.

Central America: Roots of the Crisis, 25 min., slides and cassette.

Historical overview from the point of view of those who are most affected by the crisis—peasants, workers, students and churchpeople. Produced by and available from AFSC.

*Excuse Me, America, 50 min., 16mm.

A portrait of the struggle for nonviolent social change and a look at the United States from the perspective of Dom Helder Camara, Archbishop in Brazil, Cesar Chavez, Dorothy Day and Mother Theresa of Calcutta. Available from: *APH,* $8 and CROP.

EL SALVADOR

*Roses in December, 55 min., 16 mm, 1982.

Moving examination of the situation in El Salvador and the work of U.S. lay missionery Jean Donovan, slain in 1980. Available from: CROP, nc.

Grave of an Unknown Salvadoran Soldier, 28 min, filmstrip.

Depicts the plight of Salvadoran refugees who flee into neighboring Honduras. It shows the murder of one refugee as a microcosm of the conflicts in Central America. Produced by Church World Service. Available from: MCC.

*Seeds of Liberty, 30 min., 16mm, 1981.

Examines the deaths of four American missionaries in El Salvador on Dec. 2, 1980. Explores through interviews with military, government, and church leaders in El Salvador and the U.S. Available from: *APH,* $8.

GUATEMALA

Guatemala: I Carry Your Name, 25 min., slide/tape set, 1984.

Provides an excellent background to the current crisis. Special attention is given to the nearly one million Guatemalans made refugees from the repressive policies of their military government. Produced by Take 4 with P.E.A.C.E. for Guatemala. Available from: Oxfam, $15.

Adios Guatemala, 22 min., 16mm, 1983.

Powerful and moving film which depicts the plight of Guatemalan refugees living in camps of Chiapas, Mexico. Provides an understanding of the historical and political situation which has caused hundreds of thousands of Guatemalans to flee their country. Available from: AFSC, $10.

Witness to the Slaughter: The Church in Guatemala, 22 min. filmstrip.

Portrays base communities of the church uniting to challenge status quo of oppression. Produced by National Council of Churches. Available CROP, nc.

Todos Santos Cuchumatan: Report from a Guatemalan Village, 41 min., 1982, 16mm.

Illustration of historical changes and response of indigenous peoples to introduction of cash cropping. Available from CROP, nc.

Guatemala: The Gathering Storm, 29 min. video or slide/tape, 1983

Introduction to Guatemalan history and reasons behind fighting there. Good photography and music. Available from Oxfam; AFSC, $10.

HONDURAS

*Honduras: On the Border of War, 25 min., slideshow/tape set, 1983.

Describes the strategic importance of Honduras, and examines role of banana corporations, the country's internal politics, and the growing opposition within Honduras. Available from: HIC, price negotiable. *APH,* $4.

In Their Own Words, 12 min. slideshow/tape, 1982.

Drawings by refugee children and narrative by a school teacher in the camp. Available AFSC, $10.00.

Seeds of Revolution, 30 min., 16mm, 1980.

A provocative documentary about hunger, land reform, multinational agribusiness and the military in Honduras. Follows a worker-controlled cooperative as it became a symbol of hope throughout Central America for agrarian reform. Available from: MCC; HIC.

NICARAGUA

Nicaragua: The Hopeful Revolution, 20 min., filmstrip, 1980.

Traces events which led up to the resurrection and compares the revolution in Nicaragua to the American revolution. Available from CROP, nc.

Nicaragua: Report From the Front, 32 min., 16 mm., 1983.

Documentary on U.S. foreign policy as it is played out on the Nicaraguan-Honduran border. Actual filming with contras and Nicaraguan military. Available from CROP, nc.

Thank God and the Revolution, 50 min., 16 mm. 1981.

Compares Christian ideals and practices with those of the revolution. The interviewees—ranging from an American nun living in Nicaragua to leading government officials—stress the similarity between revolutionary and Christian values. Available from: APH, $8. Oxfam, $30.

In Nicaragua: Where Everybody's Learning, 20 min. side/tape, 1984.

This slide set for grade school children looks at the new school system in Nicaragua. Also, it introduces a school supplies material aids program. Available from: AFSC, $25.

*Nicaragua: The Other Invasion, 16 mm. and videotape, 30 min. 1984.

Documentary on the changes in health care with the resolution. Emphasis on the east coast. Available from APH, $8.

ADDRESSES

American Friends Service Committee (AFSC), Rm. 370, 407 So. Dearborn, Chicago, IL 60605.

TIPS: USING FILMS FOR ORGANIZING AND EDUCATING ON CENTRAL AMERICA

(Reprinted with permission from: Media Network, 108 West 13th Street, New York, NY 10011, 212-620-0877.)

(The Media Network is an organization which supports alternative films for grassroots organizing and education.)

Anyone who has ever used a good film, videotape, or slideshow can attest to media's ability to actively engage an audience, stimulate thought, educate, and inspire. Films can bring together events, ideas and experiences in a dramatic way that leaves a lasting impression. They can provide a common experience for a diverse group, spark interest in an issue, and provide a catalyst for discussion and action.

However, no film can effect change on its own. Films need to be placed in a context and audiences need encouragement to take their first impressions further. Planning a discussion after a film showing provides people with an opportunity to analyze or criticize what they've seen, have their questions answered, and explore possibilities for action.

Here are some tips to help in putting together a successful, dynamic event:

In working with organized groups to set up film programs, it is crucial to sit down with representatives of any group beforehand to figure out the audience's needs, the goals of the event, and possible program options. Many groups will not have the issue that is being addressed as their primary focus, while others will be unfamiliar with the issues, or will not automatically share the film's point of view. Plan programs to fit the interests and experience of each group, whether it's a church group that might decide to offer sanctuary to refugees, a high school class studying US history, or a neighborhood meeting called to urge local

residents to support an end to US aid to military dictatorships.

Many of the films in this guide are available from secondary sources in addition to their commerical distributors. This guide contains a list of low-cost film libraries that carry some films on Central America (see page 13). But there are many others across the country that also have small film collections available on a local basis. If you are operating on a low budget, check to see if a local university, public library, church group, or solidarity group has a copy of the film you want.

Depending on the audience you are trying to reach, it may be important to exercise some care in choosing a location for your program. One group in Santa Rosa, California, which aims to reach new audiences, emphasizes that its programs have been most successful when held in a neutral or public setting, like a library. Remember that an auditorium in which seats are fastened to the floor is not conducive to group discussions, although it is adequate for a question-and-answer format.

Every film has its own point of view. Each one deals with some aspects of an issue but leaves out others. You may disagree with certain parts of it, or think some elements are inadequately stressed. With things in Central America changing constantly, almost any film will need to be brought up to date. Without fail, the person who leads the discussion at your program should see the film beforehand in order to plan questions that will stimulate a dynamic discussion, and to be prepared for the audience's reactions. Many potential disasters have been averted by previewing films.

Begin the program with an introduction that not only explains who you are, but that also notes some of the strong points or limitations of the film you are about to show, or that sets up a connection between the film and the circumstances of the audience's lives. Even a bad film can be saved by an introduction that poses a provocative question, focuses on one good aspect, or posits the film as an example of a way of thinking that can be challenged. Placing the film in a context makes it easier for the audience to focus its reactions afterwards. If a discussion after the film is not possible, a good introduction can at least direct the audience's attention during the film itself.

Make sure to designate a discussion leader or moderator for your program who will encourage active participation and keep the discussion focused.

As a discussion leader, when the film is over, start by referring directly to the film and involving the audience directly. Useful questions are: "What struck you most in the film? What is your first reaction to the film's content?" Many of the films on Central America are highly emotional. Allow people in the audience to express their emotions. Draw out their arguments, and ask whether they agree or disagree. Be prepared to take people's immediate reactions one step further. From here you can proceed to ask the questions that will help you move toward your program's goals.

It is always useful to have back-up material on hand with facts and figures for people who have questions or want to know more. It is also a good idea to have flyers or other written information that will tell people how to get involved, where to go next, and what they can do to help.

Afterwards ask the audience for evaluations of the program and suggestions for future events.

ATTACHMENT 6

PERIODICALS TO BE FAMILIAR WITH

Amnesty International Newsletter. Address: Amnesty International Publications, 1 Easton Street, London WCIX 8DJ, United Kingdom. Rate: $12.50/yr. (monthly). Amnesty International has an international reputation for its work with human rights. Their newsletter frequently has articles on Latin American governments which are guilty of human rights violations.

A Voice of the Voiceless. Publication of MICAH (Michigan Interchurch Committee on Central American Human Rights), 1812 Mt. Elliott, Detroit, MI 48207. Rate: Donation Requested. Coverage includes current events in Central America, U.S. policy, etc.

Barricada International. International Weekly newspaper of the Sandanista National Liberation Front In Nicaragua. Address: Barricada International, Apartado 576, Managua, Nicaragua, Central America. Rate: $24/yr. (weekly) Request English or Spanish Edition.

CALC Report. (Clergy and Laity Concerned). Address: 198 Broadway, New York, NY 10038. Rate: membership $20/yr. ($7/yr. for students and limited income). Clergy and Laity Concerned is a religionsly based network of people working together on issues of peace and justice. The CALC Report reviews international and domestic news, and carries organizing notes and resource lists as well. They frequently have stories related to Latin America and U.S. foreign policy in this region.

Coalition Close-Up. Address: Coalition for a New Foreign and Military Policy, 120 Maryland Ave. N.E., Washington, DC 20002. Rate: $20/yr. (quarterly bulletin and other materials), membership. The Coalition unites 46 national religious, labor, peace, research and social action organizations working for a peaceful, non-interventionist and demilitarized U.S. Foreign Policy. Publishes background resources, action guides, voting records and legislative updates.

COSCA. (Committee of Solidarity: Central America). Address: 2706 Gaines St., Davenport, IA 52804. Rate: $12/yr. (monthly newspaper). Contains Central American Chronicle which notes day by day occurrences in Central America, and in Washington with regard to U.S. Policy.

Envio. Publication of the Instituto Histórico Centroamericano. Address: Central American Historical Institute, Intercultural Center, Georgetown University, Washington, DC 20057. Rate: $25/yr. (monthly) Request English or Spanish Edition. Provides excellent analysis of the current situation in Nicaragua.

GIST. A quick reference aid on U.S. Foreign Relations published by the Bureau of Public Affairs, U.S. State Department, Washington, DC 20520. (You can request the Latin American Editon). No Charge.

Honduras Update. Honduran Information Center, 1151 Massachusetts Ave., Cambridge, MA 02138; (617) 497-0150. Rate: $12/yr. (monthly). Summarizes and analyzes news on Honduras drawn from a variety of sources, many of which are not widely available in the U.S.

Institute for Religion and Democracy Newsletter. A project of The Foundation for Democratic Education, Inc. which sponsors various educational projects in support of democratic values and institutions. Address: 1000 16th St. NW, Suite LL50, Washington, DC 20036. (202) 822-8627. Rate: $25/yr. (membership), $15/yr. subscription only.

Inter-Religious Task Force on El Salvador and Central America. (IRTF). Address: 475 Riverside Drive, New York, NY 10115. (212) 870-3383. Provides information, coordination and organizational skills toward shaping a foreign policy based on peace and justice. Works with locally organized committees and churches and prepares background material, legislative alerts, worship aids. Newsletter is $15/yr. (monthly); with action alerts, $20/yr.

Latinamerica Press. (Spanish Edition: *Noticias Aliadas).* Address: Latinamerica Press, Apartado 5594, Lima 100, Peru. Rate: $40/Yr. (a weekly news report). Latin America Press is a news and documentation service working to help fill the information gap that continues to hide the real Latin America. It offers good information on the role of the church in Latin America.

MesoAmerica. Address: MesoAmerica, Institute for Central American Studies, Apdo. 300, 1002 San Jose, Costa Rica. Rate: $30/yr. (students, $20/yr.) MesoAmerica's regular coverage includes economics and politics, as well as the human realities of the people of Central America, all within the perspective of the particular histories of these countries.

NACLA. (North American Congress on Latin America). Address: 151 W. 19th St. (9th floor). New York, NY 10011. Rate: $18/yr. (bi-monthly). Focuses on a particular Latin American country each time. In addition, the magazine contains a great deal of interpretive material designed to help the reader better understand the socio-political themes that are within the current events relevant to each country.

National Catholic Reporter. Address: National Catholic Reporter Publishing Company Inc., P.O. Box 281, Kansas City, MO 64141 (or call 1-800-821-7926 toll-free). Rate: $23/yr. (weekly Newspaper). National Catholic Reporter is an independent Catholic newsweekly. Aside from having excellent coverage of the Catholic Church, it consistently has articles about countries in Latin America and other Third World countries. They have staff writers contributing regularly from all parts of the world.

New Internationalist. Address: 113 Atlantic Ave., Brooklyn, NY 11201. Rate: $22/yr.; $39/2 yrs.; $54/3 yrs. The New Internationalist exists to report on the issues of world poverty and focus attention on the unjust relationship between rich and poor worlds; to debate and campaign for the radical changes necessary within and between nations if the basic needs of all are to be met and to bring to life the people, the ideas and the action in the fight for world development.

Nicaragua Update. Publication of NICA (Nicaragua Interfaith Committee for Action), 942 Market St., Room 709, San Francisco CA 94102. Rate: $10 donation requested. Articles on Nicaragua and Central America with particular emphasis on church and religious issues.

Update: Latin America. Address: Washington Office on Latin America, 110 Maryland Ave., NE, Washington, DC 20002. (202) 544-8045. Rate: $14/yr. (bi-monthly). The Washington Office on Latin America was established in 1974 by a coalition of religious and academic groups with a profound concern for the economic, political and social conditions in Latin America. The office serves as a liaison between Latin Americans and the U.S. institutions affecting foreign policy, such as churches, the press, non-governmental organizations and the executive & legislative branches of the government. Update is their bi-monthly publication.

REGIONAL NETWORK

As the number of travel seminar participants grows and expands throughout all areas of the United States, regional clusters are being developed. At present, there are 12 clusters in 11 states. The cluster coordinators are listed on the reverse side. New clusters will be developed in Pennsylvania, Illinois and Nebraska.

Each cluster will take on a style of its own, depending on the coordinator, the individuals and the geography of the area. some things for which you can depend on your cluster coordinator are:

Names of other travel seminar participants in your region;

Names of addresses of organizations in your area which focus on Central America and Mexico;

Specific contingency plans for your area in case of invasion;

Help with resources such as current publications and audiovisuals; and

Support for your "re-entry" and the follow-up work you may do.

Some clusters may gather together for further study and to listen to updates if there are recently returned alumnae. Some may want to sponsor events; others may participate in action. One cluster is setting up a speaker's bureau and is going to churches and community organizations to solicit speaking engagements.

The coordinators are there to help this network grow, but are not assumed to be the only ones doing this. Everyone who is interested needs to take initiative. The coordinators may try to contact all who are in their cluster. If you are in a cluster and have not been contacted, call the coordinator yourself. If you are in an area with no coordinator and would be interested in this important work, please let me know.

Please use the network. It has a center in Minneapolis as well as with all of you. It will be what we make it to be. If you have suggestions or requests, call Meredith Dregni, 612-330-1791.

TRAVEL SEMINAR PARTICIPANTS CLUSTER COORDINATORS

PUBLIC HEARING ANNOUNCEMENT

The Center for Global Service and Education, in conjunction with the Central American Resource Center and the other organizations listed below, invites you to exercise your democratic privileges at a

PUBLIC HEARING ON UNITED STATES POLICY TOWARD NICARAGUA

This unique opportunity will be held from 10:00 a.m. to 12:30 on March 9, 1985 in room 112 at the Minnesota Capitol.

Minnesotans are urged to enter into a dialogue with representatives of our national government. Senators DURENBERGER and BOSCHWITZ and Congressmen WEBER, SIKORSKI, SABO, VENTO, FRENZEL, STANGELAND, PENNY, and OBERSTAR have been invited to listen to Minnesota citizens and then to make five minute responses. This information should help them make crucial decisions on U.S. policy, such as renewal of the covert aid program.

All Minnesotans who have traveled to or lived in Nicaragua are requested to testify and to bring verbal and written accounts about their first person experience and how this has shaped their opinion about United States policy toward Nicaragua. Verbal testimonies of one to five minutes will be given. A reservation for time must be made by March 6 by calling (612) 330-1791. Eleven copies of written testimony are requested; one for each representative and one for the record of the hearing.

The hearing is open to the public. Child care will be available for a small fee. For reservations, call or write Rachel Lord, 2323 Talmadge Ave. S.E., Minneapolis, MN 55414, (612) 379-8868. For additional information on the hearing, call Nancy Jones, (612) 938-9043.

SCHEDULE FOR MARCH 9

9:30 am—Informal Gathering, coffee and rolls available.

10:00 am—Public Statements by Minnesota Citizens, by reservation only.

11:00 am—Response by Minnesota Senators and Representatives.

12:00—Open time for questions and statements.

Co-sponsors and endorsers of the Public Hearings are:

Inter-Religious Committee on Central America.

Board of Church and Society of the United Methodist Church.

Women's International League for Peace and Freedom.

Nicaragua Solidarity Committee.

Friends for a Nonviolent World.

Bemidji Friends for a Nonviolent World/Central America Group.

Minnesota Clergy and Laity Concerned.

Women Against Military Madness.

MSTAR (Minnesota Students Together in Action and Resistance).

Bishop Lowell Erdahl, Southeast Minnesota District, American Lutheran Church.

Central America Week Coalition.

Central America Working Group.

Project Minnesota/Leon.

Brainerd Ad Hoc Committee on Central America.

Northfield Peace Network.

Rochester Study Group on Central America.

Witness for Peace.

The Rt. Rev. Robert M. Anderson, Episcopal Bishop of Minnesota.

Fargo/Moorhead Citizens in Solidarity with the Central American People.

St. Cloud Area Interfaith Committee on Central America.

Northern Sun Alliance.

Minnesota Trade Union Coalition for Peace.

National Chicano Alliance.

Minnesota Fellowship of Reconciliation.

Church and Society Committee, Presbytery of the Twin Cities Area.

Bob Killeen, Subregional Director, UAW.

Mr. Speaker, I commend this report to my colleagues. If they are seriously interested in casting an objective vote on the question of aid to the democratic resistance forces in Nicaragua, they need to know more about the nature of the trips being sponsored by many American church groups and non-church-related groups to Central America. This church group, this trip which was reported to me by these two women, is typical, I believe, of many of the church organization tours through that part of the country. As I said, a great concern about these trips was expressed to Congressman DORNAN and myself by Archbishop Obando y Bravo in Managua, as well as many other people in Nicaragua and throughout the Central American region. In a later special order I intend to spend more time talking about their observations directly.

Mr. Speaker, I yield back the balance of my time.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON THE BUDGET REGARDING CURRENT LEVEL OF SPENDING AND REVENUES FOR FISCAL YEAR 1985

(Mr. DERRICK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. DERRICK. Mr. Speaker, pursuant to the procedures of the Committee on the Budget section 311(b) of the Congressional Budget Act of 1974, and as chairman of the Budget Process Task Force, I am submitting the official letter to the Speaker advising him of the current level of spending and revenues for fiscal year 1985. As chairman of the Budget Committee's Budget Process Task and Force and on behalf of Chairman WILLIAM H. GRAY III, I intend to submit the current level of spending to the House on the first Wednesday of each month that the House is in session or more often as legislation is ratified. When there have been no changes since the last report to the House, I will submit a letter stating such.

The current level is used to compare enacted spending after the start of a fiscal year with the aggregate ceiling on budget authority, outlays, and revenues established in a second budget resolution and enforced by point of

order pursuant to section 311(a) of the act. The term current level refers to the estimated amount of budget authority, outlays, entitlement authority, and revenues that are available (or will be used) for the full fiscal year in question based only on enacted law.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by section 4(b) of House Concurrent Resolution 280. Enforcement against possible breaches of the spending ceiling under section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1985.

The intent of the section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by section 4(b) of the resolution is to protect a committee that has stayed within its own spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on House Concurrent Resolution 280 were printed in the CONGRESSIONAL RECORD, September 25, 1984, H. 10190 (H. Rept. 98-1079, page 32).

Since the last filed current level on February 7 (H. 384), three pieces of legislation have affected current level: House Joint Resolution 181, Appropriations for the MX Missile; H.R. 1239, Urgent Supplemental Appropriations for Emergency Famine Relief and Recovery in Africa; and H.R. 1866, Federal Supplemental Compensation Phaseout.

As chairman of the Budget Process Task Force, I intend to keep the House informed regularly on the status of current level.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending.

Pursuant to Committee Rule 10, I am herewith transmitting the status report under H. Con. Res. 280, the First Concurrent Resolution on the Budget for Fiscal Year 1985. This report reflects the adopted budget resolution of October 1, 1984, and the current CBO estimates of budget authority, outlays, and revenues.

As with last year, the procedural situation with regard to the spending ceiling is affected this year by Section 4(b) of H. Con. Res. 280. Enforcement against possible breaches of the spending ceiling under Section 311(a) of the Budget Act will not apply where a measure would not cause a committee to exceed its "appropriate allocation" made pursuant to Section 302(a) of the Budget Act. In the House, the appropriate 302(a) allocation includes "new discretionary budget authority" and "new entitlement authority" only. It should be noted that under this procedure neither the total level of outlays nor a committee's outlay allocation is considered. This exception is only provided because an automatic budget resolution is in effect and will cease to apply if Congress revises the budget resolution for fiscal year 1985.

The intent of the Section 302(a) "discretionary budget authority" and "new entitlement authority" subceiling provided by Section 4(b) of the resolution is to protect a committee that has stayed within its spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached for reasons outside of its control. The 302(a) allocations to House committees made pursuant to the conference report on House Concurrent Resolution 280 were printed in the CONGRESSIONAL RECORD, September 25, 1984, H. 10190 (H. Rept. 98-1079, page 32).

The attached tables compare actual legislation to each committee's 302(a) allocation of discretionary budget authority and of new entitlement authority.

With best wishes,

Sincerely,

WILLIAM H. GRAY III,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 280

REFLECTING COMPLETED ACTION AS OF APRIL 3, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate Level	1,021,350	932,050	750,900
Current Level	1,015,965	933,359	750,739
Amount Under Ceilings	5,385		
Amount Over Ceilings		1,309	
Amount Under Floor			161

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and that exceeds $5,385 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate in outlays for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.

FISCAL YEAR 1985, BUDGET AUTHORITY

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, April 4, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for those items contained in the most recently agreed to concurrent resolution on the 1985 budget (H. Con. Res. 280). This report for fiscal year 1985 is tabulated as of close of business April 3, 1985, and is based on assumptions and estimates consistent with H. Con. Res. 280. A summary of this tabulation is as follows:

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level	1,015,965	933,359	750,739
1985 Budget Resolution, House Concurrent Resolution 280	1,021,350	932,050	750,900
Current Level is:			
Over resolution by		1,309	
Under resolution by	5,385		161

Since my last report the Congress has cleared Appropriations for the MX Missile, H.J. Res. 181, urgent supplemental appropriations for Emergency Famine Relief and Recovery in Africa, H.R. 1239, and the Federal Supplemental Compensation Phaseout Act, H.R. 1866.

With best wishes,

Sincerely,

RUDOLPH G. PENNER.

PARLIAMENTARIAN STATUS REPORT HOUSE SUPPORTING DETAIL, FISCAL YEAR 1985 AS OF CLOSE OF BUSINESS APRIL 3, 1985

[In millions of dollars]

	Budget authority	Outlays
I. Enacted:		
Permanent appropriations and trust funds	651,994	579,636
Enacted previous session	543,411	534,273
Offsetting receipts	−184,669	−184,669
Enacted this session		
Total enacted	1,010,735	929,240
II. Entitlement authority and other mandatory items requiring further appropriation action:

Amount remaining:		
Over ceiling		1,309
Under ceiling	5,385	

Note.—Detail may not add due to rounding.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LELAND (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. ACKERMAN (at the request of Mr. WRIGHT), for April 16 and 17, on account of official business.

Mr. BILIRAKIS (at the request of Mr. MICHEL), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. MEYERS of Kansas) to revise and extend their remarks and include extraneous material:)

Mr. PASHAYAN, for 60 minutes, April 24.

Mr. KOLBE, for 60 minutes, April 17.

Mr. LUNGREN, for 5 minutes, April 17.

Mr. STRANG, for 30 minutes, today.

Mr. MADIGAN, for 10 minutes, today.

Mr. EMERSON, for 60 minutes, April 24.

Mr. WALKER, for 60 minutes, today.

Mr. DORNAN of California, for 60 minutes, April 18.

Mr. RUDD, for 60 minutes, April 23.

Mr. WEBER, for 60 minutes, today.

Mr. WEBER, for 60 minutes, April 17.

Mr. WEBER, for 60 minutes, April 18.

(The following Members (at the request of Mr. COOPER) to revise and extend their remarks and include extraneous material:)

Mr. MATSUI, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HAYES, for 5 minutes, today.

Mr. FRANK, for 60 minutes, April 17.

Mr. MARTINEZ, for 5 minutes, April 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mrs. MEYERS) and to include extraneous matter:)

Mr. GINGRICH.

Mr. COURTER in two instances.

Mr. LENT in two instances.

Mr. DANNEMEYER.

Mr. MACK.

Mr. CLINGER.

Mr. WOLF.

Mr. PORTER.

Mr. GEKAS in two instances.

Mr. BROOMFIELD in two instances.

Mr. PURSELL.

Mr. GREGG.

Mr. MCGRATH.

Mr. GROTBERG.

Mr. BATEMAN in two instances.

Mr. MICHEL.

Mr. LEWIS of Florida.

(The following Members (at the request of Mr. COOPER) and to include extraneous matter:)

Mr. FUSTER.

Mr. TORRICELLI.

Mr. OBERSTAR.

Mr. UDALL.

Mr. ASPIN.

Mr. FLORIO.

Mr. BARNES in two instances.

Mr. HAMILTON.

Mr. KANJORSKI.

Mr. FORD of Michigan.

Mr. GUARINI.

Mr. YATRON in two instances.

Mr. FRANK.

Mr. BROOKS.

Mr. ACKERMAN.

Mr. FASCELL in two instances.

Mr. COELHO.

Mr. SOLARZ in four instances.

Mr. MILLER of California.

Mr. KOLTER.

Mr. HALL of Ohio.

A SENATE BILL AND JOINT RESOLUTIONS REFERRED

A bill and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 661. An act entitled the "George Milligan Control Tower"; to the Committee on Public Works and Transportation.

S.J. Res. 47. Joint Resolution designating the week beginning November 10, 1985, as "National Woman Veterans Recognition Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 52. Joint Resolution to designate the month of April 1985 as "National School Library Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 63. Joint Resolution to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 67. Joint Resolution to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 90. Joint Resolution commemorating the 75th anniversary of the Boy Scouts of America; to the Committee on Post Office and Civil Service.

S.J. Res. 94. Joint Resolution to designate the week beginning May 12, 1985, as "National Digestive Diseases Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 109. Joint Resolution to designate the week of April 14, 1985, as "Crime Victims Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. WEBER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 30 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, April 17, 1985, at 12 o'clock noon.

OATH OF OFFICE, MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

"I, A B, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Member of the 99th Congress, pursuant to the provisions of 2 U.S.C. 25:

CATHY (Mrs. Gillis) LONG, Eighth Louisiana.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports and amended reports of various House committees and delegations traveling under authorizations from the Speaker concerning the foreign currencies and U.S. dollars utilized by them during the third and fourth quarters of calendar year 1984 and the first quarter of calendar year 1985.

JIM WRIGHT, Chairman, Apr. 4, 1985.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1028. A letter from the Secretary of Agriculture, transmitting the fiscal year 1984 annual animal welfare enforcement report, pursuant to Public Law 89-544, section 25 (84 Stat. 1565); to the Committee on Agriculture.

1029. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend and extend the authorization of the Food Stamp Act of 1977, as amended; to the Committee on Agriculture.

1030. A letter from the Executive Associate Director for Budget and Legislation, Office of Management and Budget, transmitting notification that the appropriation to the Internal Revenue Service for "Investigation, collection and Taxpayer Service" for fiscal year 1985 has been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriations, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

1031. A letter from the Executive Associate Director for Budget and Legislation, Office of Management and Budget, transmitting notification that the appropriation to the Financial Management Service [FMS] for "Salaries and Expenses" for fiscal year 1985 has been reapportioned on a basis that indicates the necessity for a supplemental estimate of appropriation, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

1032 A letter from the Comptroller General of the United States, transmitting a review of the President's fifth special message proposing 226 new rescissions, pursu-

ant to 2 U.S.C. 685 (H. Doc. No. 99-55); to the Committee on Appropriations and ordered to be printed.

1033. A letter from the Comptroller General of the United States, transmitting a review of the President's sixth special message for fiscal year 1985 proposing 16 new rescission proposals, 9 revised rescission proposals, 21 new deferrals of budget authority, and 8 revised deferrals of budget authority, pursuant to 2 U.S.C. 685 (H. Doc. No. 99-56); to the Committee on Appropriations and ordered to be printed.

1034. A letter from the Secretary of Housing and Urban Development, transmitting the Department's quarterly report on HUD-owned multifamily project negotiated sales; to the Committee on Appropriations.

1035. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting a report of real and personal property held by the Department of Defense as of September 30, 1984, pursuant to 10 U.S.C. 2701(b); to the Committee on Armed Services.

1036. A communication from the President of the United States, transmitting his determination that the authority available to the Export-Import Bank for fiscal year 1985 is more than sufficient to meet the current estimate of the needs of the Bank, pursuant to 12 U.S.C. 635e(a)(2)(A)(ii) (97 Stat. 1257) (July 31, 1945, chapter 341, section 7(a)(2)(A)(ii)) (H. Doc. No. 99-54); to the Committee on Banking, Finance and Urban Affairs and ordered to be printed.

1037. A letter from the Secretary of Housing and Urban Development, transmitting a report entitled, "Report on the Reorganization of the Administration of the Congregate Housing Services Program (CHSP)"; to the Committee on Banking, Finance and Urban Affairs.

1038. A letter from the Director, Office of Dependents Schools, Department of Defense, transmitting the annual test report for school year 1984-85 for the overseas dependents' schools administered by the Department of Defense, pursuant to Public Law 95-561, section 1405(b); to the Committee on Education and Labor.

1039. A letter from the Secretary of Education, transmitting a copy of regulations in connection with final funding priorities for the National Institute of Handicapped Research, pursuant to GEPA, section 431(d)(1) (88 Stat. 567; 90 Stat. 2231; 95 Stat. 453); to the Committee on Education and Labor.

1040. A letter from the Secretary of Education, transmitting a draft of proposed legislation to extend and amend the Higher Education Act of 1965, to establish a financial assistance program emphasizing student self help, to improve access to postsecondary education for the neediest students, to enhance the equity and effectiveness of Federal programs in support of higher education, to improve debt collection activities and default recoveries, to reduce collection costs and program abuse, to increase flexibility and simplify higher education programs, and for other purposes; to the Committee on Education and Labor.

1041. A letter from the Undersecretary, Department of Labor, transmitting a draft of proposed legislation to authorize adequate appropriations for the President's Committee on Employment of the Handicapped; to the Committee on Education and Labor.

1042. A letter from the Assistant Secretary for Legislative and Intergovernmental Affairs, Department of State, transmitting notice that the President has authorized the furnishing of up to $5 million in assistance from the emergency refugee and migration assistance fund for unexpected urgent refugee and migration needs of the U.N. High Commissioner for Refugees, the International Committee of the Red Cross, and other agencies, as appropriate, for programs in Africa, pursuant to 22 U.S.C. 287b; to the Committee on Foreign Affairs.

1043. A communication from the President of the United States, transmitting a bimonthly report on progress toward a negotiated settlement of the Cyprus question, pursuant to 22 U.S.C. 2373(c); to the Committee on Foreign Affairs.

1044. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a) (92 Stat. 993); to the Committee on Foreign Affairs.

1045. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Thomas R. Pickering, Ambassador and Extraordinary and Plenipotentiary-elect to Israel, and members of his family, pursuant to Public Law 96-465, section 304(b)(2); to the Committee on Foreign Affairs.

1046. A letter from the Director, Office of Legislative Affairs, Agency for International Development, transmitting an accounting of the amounts obligated and expended in Nicaragua for the period July 1, 1984, to December 31, 1984, from funds made available under section 724(e) of the International Security and Development Cooperation Act of 1981; to the Committee on Foreign Affairs.

1047. A letter from the Director, Office of Management and Budget, transmitting a report on formula approaches to Federal budgeting, pursuant to Public Law 98-369, section 2906 (98 Stat. 1209); to the Committee on Government Operations.

1048. A letter from the Administrator, Health Care Financing Administration, Department of Health and Human Services, transmitting notice of a new Federal records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1049. A letter from the Chairwoman, U.S. International Trade Commission, transmitting a report of the commission's activities during 1984 under the Government in the Sunshine Act, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1050. A letter from the Administrator, Federal Aviation Administration, transmitting the Federal Aviation Administration's semiannual report on the effectiveness of the Civil Aviation Security Program covering the period July 1 through December 31, 1984, pursuant to Public Law 85-726, section 315(a) (88 Stat. 415); to the Committee on Public Works and Transportation.

1051. A letter from the Assistant Secretary for Legislative and Intergovernmental Affairs, Department of State, transmitting a report on the extent to which the actions of the Government of Haiti are consistent with the three provisions contained in subsection (b) of the Foreign Assistance and Related Programs Appropriations Act of 1985, pursuant to Public Law 98-473, section 540(c); jointly, to the Committees on Appropriations and Foreign Affairs.

1052. A letter from the Administrator, Agency for International Development, transmitting the Agency's annual report for fiscal year 1984 on equal employment opportunity and recruitment in the Foreign Service, pursuant to Public Law 96-465, section 105(d); jointly, to the Committees on Foreign Affairs and Post Office and Civil Service.

1053. A letter from the Assistant Secretary for Legislative and Intergovernmental Affairs, Department of State, transmitting a draft of proposed legislation to amend the United States Institute of Peace Act, and for other purposes; jointly, to the Committees on Foreign Affairs and Education and Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MOAKLEY: Committee on Rules. House Resolution 128. Resolution providing for the consideration of H.R. 1617, a bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes, (Rept. No. 99-41). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. House Resolution 129. Resolution providing for the consideration of H.R. 1210, a bill to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes (Rept. No. 99-42). Referred to the House Calendar.

Mr. FUQUA: Committee on Science and Technology. H.R. 1617. A bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes; with amendments (Rept. No. 99-43). Referred to the Committee of the Whole House on the State of the Union.

Mr. FUQUA: Committee on Science and Technology. H.R. 1210. A bill to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes; with amendments (Rept. No. 99-44). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FASCELL (for himself and Mr. BROOMFIELD) (by request):

H.R. 2044. A bill to amend the Arms Control and Disarmament Act in order to increase the authorization for appropriations for fiscal year 1985; to the Committee on Foreign Affairs.

H.R. 2045. A bill to amend the Arms Control and Disarmament Act in order to extend the authorization for appropriations, and for other purposes; to the Committee on Foreign Affairs.

By Mr. FORD of Tennessee:

H.R. 2046. A bill to amend title XVI of the Social Security Act to provide a special increase (over and above the regular cost-of-living adjustment) in the Federal benefit standard under the Supplemental Security Income Program; to the Committee on Ways and Means.

By Mrs. BENTLEY:

H.R. 2047. A bill to authorize appropriations for the restoration of Fort McHenry; to the Committee on Interior and Insular Affairs.

By Mr. BOSCO:

H.R. 2048. A bill to prohibit temporarily certain hard mineral leasing in the Gorda Ridge Outer Continental Shelf area, to require a report on the effects of such potential leasing, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

By Mr. DELLUMS:

H.R. 2049. A bill to establish a U.S. Health Service to provide high quality health care and to overcome the deficiencies in the present system of health care delivery; jointly, to the Committees on Energy and Commerce; Armed Services; Banking, Finance and Urban Affairs; the District of Columbia; Education and Labor; the Judiciary; Post Office and Civil Service; Veterans' Affairs; and Ways and Means.

By Mr. DYMALLY:

H.R. 2050. A bill to give to the Board of Parole for the District of Columbia exclusive power and authority to make parole determinations concerning prisoners convicted of violating any law of the District of Columbia, or any law of the United States applicable exclusively to the District; to the Committee on the District of Columbia.

H.R. 2051. A bill to change the appointment process for judges of District of Columbia courts, and for other purposes; to the Committee on the District of Columbia.

H.R. 2052. A bill to establish an office of the attorney general for the District of Columbia and to transfer prosecutorial authority for local offenses and custodial responsibility for prisoners convicted of local offenses to the District of Columbia government; to the Committee on the District of Columbia.

By Mr. FRANK:

H.R. 2053. A bill to amend title 10, United States Code, to waive contributions to the military survivor benefit plan in the case of certain persons whose military retired pay is reduced because of an offsetting increase in compensation paid to such persons by the Veterans' Administration due to an increase in disability rating; to the Committee on Armed Services.

H.R. 2054. A bill to amend the Internal Revenue Code of 1954 to exempt from the communications services excise tax telephone facilities designed for individuals who are deaf or hearing impaired; to the Committee on Ways and Means.

H.R. 2055. A bill to amend the Internal Revenue Code to change certain accounting rules related to inventory, and for other purposes; to the Committee on Ways and Means.

H.R. 2056. A bill relating to the duty on certain knives (commonly known as snap blade tools) having movable blades; to the Committee on Ways and Means.

H.R. 2057. A bill entitled: "The Energy Tax Reform Act of 1985"; to the Committee on Ways and Means.

H.R. 2058. A bill to amend chapter 203 of title 18, United States Code, to provide specific law enforcement authority for members of the Federal Protective Service, and for other purposes; jointly, to the Committees on Public Works and Transportation and the Judiciary.

By Mr. LEHMAN of Florida:

H.R. 2059. A bill to provide funds to the State of Florida to acquire certain property in the State of Florida for park and recreation purposes; to the Committee on Interior and Insular Affairs.

By Mr. LENT:

H.R. 2060. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for commuting expenses incurred on public mass transit; to the Committee on Ways and Means.

By Mr. LUNGREN (for himself, Mr. HYDE, Mr. HANSEN, Mrs. VUCANOVICH, and Mr. KINDNESS):

H.R. 2061. A bill to clarify the meaning of the phrase "program or activity" as applied to educational institutions that are extended Federal financial assistance, and for other purposes; jointly, to the Committees on the Judiciary and Education and Labor.

By Mr. MADIGAN (for himself, Mr. MAZZOLI, Mr. MICHEL, Mr. ROSTENKOWSKI, Mr. NATCHER, Mr. SNYDER, Mr. GRAY of Illinois, Mr. ANNUNZIO, Mr. HYDE, Mr. RUSSO, Mr. HOPKINS, Mr. PORTER, Mr. EVANS of Illinois, Mr. ROGERS, Mr. PERKINS, Mrs. MARTIN of Illinois, Mr. BRUCE, and Mr. GROTBERG):

H.R. 2062. A bill to grant the consent of the Congress to the Central Midwest Interstate Low-Level Radioactive Waste Compact; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. PERKINS:

H.R. 2063. A bill to continue until June 30, 1989, the present exclusion of bicycle component parts which are not reexported from the exemption from the customs laws otherwise available to merchandise in foreign trade zones; to the Committee on Ways and Means.

By Mr. STANGELAND:

H.R. 2064. A bill entitled: the "Modified Agricultural Debt Recovery Act of 1985"; to the Committee on Agriculture.

By Mr. RODINO (for himself, Mr. FISH, Mr. CONYERS, Mr. FRANK, Mr. BERMAN, Mr. BOUCHER, Mr. SCHUMER, Mr. GEKAS, Mr. SWINDALL, and Mr. COBLE):

H.J. Res. 240. Joint resolution to designate the week of April 14, 1985, as "Crime Victims Week"; to the Committee on Post Office and Civil Service.

By Mr. LEWIS of Florida (for himself and Mr. MICA):

H. Con. Res. 117. Concurrent resolution to express the sense of Congress that no limitation should be placed on the Federal income tax deduction for interest paid on a residential mortgage; to the Committee on Ways and Means.

By Mr. CONYERS:

H. Res. 130. Resolution expressing the sense of the House of Representatives that the amount and timing of the annual cost-of-living adjustment currently provided under the Social Security Act should be preserved; to the Committee on Ways and Means.

By Mr. CLINGER:

H. Res. 131. Resolution expressing the sense of the Congress that legislation which would further restrict eligibility for, or access to, Federal student financial aid should not be enacted; to the Committee on Education and Labor.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

78. By the SPEAKER: Memorial of the Legislature of the State of Kansas, relative to Federal grain grade standards; to the Committee on Agriculture.

79. Also, memorial of the Legislature of the State of Arizona, relative to the ratification of a proposed amendment to the Constitution of the United States; to the Committee on the Judiciary.

80. Also, memorial of the Legislature of the State of North Dakota, relative to the continuation of the Small Business Administration; to the Committee on Small Business.

81. Also, memorial of the Legislature of the State of Maine, relative to funding for the Small Business Administration; to the Committee on Small Business.

82. Also, memorial of the Senate of the Commonwealth of Puerto Rico, relative to the provisions of Section 936 of the Federal Internal Revenue Act; to the Committee on Ways and Means.

83. Also, memorial of the House of Representatives of the State of Kansas, relative to the personal taxation of nonbusiness travel on business aircraft; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of Colorado:

H.R. 2065. A bill for the relief of Charles Che-Li Shen; to the Committee on the Judiciary.

H.R. 2066. A bill for the relief of Ching Jeanne Shen; to the Committee on the Judiciary.

By Mr. SHUMWAY:

H.R. 2067. A bill to validate conveyances of certain lands in the State of California that form part of the right-of-way granted by the United States to the Central Pacific Railway Co.; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 528: Mr. LOWERY of California.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

83. By the SPEAKER: Petition of the City Council, New York, NY, relative to the Job Corps; to the Committee on Education and Labor.

84. Also, petition of the City Council, New Bedford, MA, relative to International Flag Week; to the Committee on Foreign Affairs.

85. Also, petition of the City Council, New York, NY, relative to the Supplemental Compensation Program; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1617

By Mr. PURSELL:

—At the end of the bill, add the following new section:

LIMITATION ON TOTAL AUTHORIZATION

SEC. 13. Notwithstanding any of the preceding provisions of this Act—

(1) the total amount authorized to be appropriated to the Secretary of Commerce for activities and expenses of the National Bureau of Standards under sections 2, 3, and 4 shall not exceed the total amount appropriated for activities and expenses of such Bureau for fiscal year 1985;

(2) the amount authorized to be appropriated to the Secretary for activities of the Office of Productivity, Technology, and Innovation under section 9 shall not exceed the total amount appropriated for activities of such Office for fiscal year 1985; and

(3) the amount authorized to be appropriated to the Secretary for patent licensing activities of the National Technical Information Service under section 10(b) shall not exceed the total amount appropriated for patent licensing activities of such Service for fiscal year 1985.

EXTENSIONS OF REMARKS

JOE HARP

HON. CHARLES McC. MATHIAS, JR.
OF MARYLAND
IN THE SENATE OF THE UNITED STATES

Tuesday, April 16, 1985

● Mr. MATHIAS. Mr. President, Joe Harp, one of Maryland's finest newspapermen, has stepped down from the Hagerstown Herald-Mail after 59 years, and all of us who have read the newspaper over the years will miss his deft touch.

Joe Harp began his long and distinguished career back in the "old days" when editors wore green eye shades, when newsroom decor duplicated the sets in "The Front Page" and when reporters kept their hats on inside as well as out of doors. But Joe presided over the transition from those days when news was sent by Morse code to the high speed computer technology of today.

Joe started his career as a cub reporter and ends it after stints as reporter, city editor, managing editor, executive editor, and consultant. And he carried out each of his duties with care and professionalism. As the Herald-Mail wrote in a goodby editorial:

It's well-nigh impossible to sum up Joe's career or Joe the man. He is and was simply one helluva newspaperman.

He has seen it all, and he has written about it all honestly, clearly, and fairly.

He started out bright and ended up wise.

Slow to burn, quick to laugh, he has given balance and ballast to the turmoil that is a newsroom.

In truth, The Herald-Mail is losing an irreplaceable talent and resource.

I am happy to report that although Joe is gone from his editorial duties, he will not be forgotten. I, for one, intend to spend many more years sharing in the wisdom of Joe Harp.

Some of Joe Harp's many accomplishments were described recently in the Herald-Mail. I ask that the article be printed in the RECORD.

The article follows:

"MR. HERALD-MAIL"—FOR 59 YEARS, JOE HARP KEPT PULSE WITH THE NEWS

(By Gloria Dahlhamer)

It's odd to think that a possible toothache could lead to a career spanning six decades.

But if young Joseph Moody Harp hadn't had a dental appointment on March 25, 1926, he never would have applied for a job at The Herald-Mail Co. It was only because he had to travel into Hagerstown from his Smithsburg home to see the dentist that he decided to check out a reporting job his brother had told him about.

Tomorrow, Harp will leave that job he applied for so offhandedly—59 years later to the day.

He is, he says with a lopsided grin, "finally retiring after retiring."

Harp is probably Hagerstown's longest-running news show. He began his career with The Morning Herald as a "very cub" cub reporter. He ends it after stints as reporter, city editor, managing editor, executive editor, and consultant.

Now 77, he says it's time to hang it up and "let the young regime take over."

It won't be easy.

Even though he "retired" in 1980 at the mandatory retirement age of 72, he has remained at his desk as a consultant, daily supplying from his prodigious memory all that Hagerstown history that occurred before most of today's crop of reporters was born.

When he moves out tomorrow with his scarred Underwood typewriter, he'll take with him enough memories to write a book.

His family hopes he will.

"My kids have been after me to write a first-person account of my years as a journalist," he says. "Maybe I will. Maybe I'll fix up a little office at home and put it all down for them."

There'll be one heck of a lot to put down. For 59 years, Harp has been at the center of every major event in Washington County. He has recorded the county's passing parade from Prohibition to Moral Majority. Like the Biblical preacher in Ecclesiastes, he's found there's not much new under the sun. Today's events have a precedent somewhere in his memory.

As he contemplates the final "30" to his threescore years of reporting, he recalls that he wasn't overly impressed by newspapering when he started.

As he remembers it, he had been graduated less than a year when his older brother Jerry, returning from his job in Hagerstown, told him he'd heard there was an opening at The Morning Herald.

"I had to go to town for a dental appointment," Harp says, "so I figured what the heck, I'll go see about it."

He talked to Sam Phillips, who was then general manager of The Herald-Mail Co.

"Sam asked me if I'd mind working at night. I told him I'd work any hours. He said, 'Okay, get on upstairs.'

"I went to the dentist, then I came back and started to work."

Harp says he doesn't remember much about his first day on the job. He surmises he didn't do much.

"When I first came, I was lost. I didn't like it. I started right out looking for another job. I even applied at a bank."

He never heard from the bank, and somewhere along the line he started liking the newspaper business.

One of his first assignments was to cover a piano recital for Dixie White, who was then The Herald's women's editor. "She said I did a pretty good job," Harp recalls, "so I guess that's when I started liking it."

When he began what was to be a long and colorful journalistic career, The Herald boasted an editorial staff of four. The late C. Neill Baylor was managing editor. Preston Usilton was assistant editor, Ms. White handled women's news and feature stories, Frank Colley was sports editor. Harp was the reporter.

"There are a lot of great stories when you are the reporter," he says. "Of course, when something doesn't get reported, it's your fault."

Harp started working for $15 a week. It took him two years to get a $2.50 raise. He worked six nights—Sunday through Friday—and remembers he got plenty ticked off when he was told to work the seventh day covering the long-standing Tilghmanton (jousting) tournament. He soon discovered seven days was to be the norm rather than the exception.

When he joined the fourth estate in the former Herald-Mail building in the first block of Summit Avenue, the newsroom was located on the third floor. It was a scene right out of "Front Page."

"We all wore green eyeshades . . . and hats indoors and out."

Reporters relied on shoe leather and the telephone to get all the news fit to print. Mostly shoe leather, Harp says. A telephone call to any other exchange in the county was a long-distance call at 10 cents a hello. "Management discouraged excessive use of the phone."

Harp moved up the ladder to full reporter status when Usilton, who was making $35 a week, asked for a raise and was turned down. Usilton quit and Harp took over his beat; covering city and county government, the courts, the jail, the county hospital, the weather.

"You personally covered everything," he says.

Newsmen didn't carry compact, spiral-bound reporters' notebooks like they do today. "You kept most of it in your head," Harp says. "The rest you jotted down on the back of an envelope."

He recounts the times he sat through long, late-night City Council sessions with an envelope in his pocket and a paperback whodunit propped up in front of him. Once, he says, he went through a book from cover to cover in one meeting, but had an accurate story in the next morning's paper.

"You learned how to glean the wheat from the chaff," he grins.

It's a lesson he's never forgotten. He still writes briefly and to the point, from memory and a few scribbled notes on the back of an envelope.

In all his 59 years as a newsman he has followed one philosophy: "If something happens today, write about it today and get it in the next edition of the newspaper."

Hitting the next edition sometimes was a hassle.

He remembers the night Roleigh Poffenberger was murdered in Keedysville. Sports editor Frank Colley was the only local reporter who owned a car, and Harp and Colley cruised the county most of the night trying to get information.

"Nobody was talking," Harp says, "and we finally went to press with only a brief account of the killing."

But he stuck with the story and when two boys confessed to the murder, he had a front page streamer. After they were tried and sentenced to hang, he kept them in cigarettes and they kept him in copy.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

He wrote the final chapter from the Maryland Penitentiary where he watched their execution.

"I didn't want to go," he confesses, "but Sheriff Joe Baker accused me of being a sissy, so I went with Baker and Deputy Bob Miller.

"I witnessed the first execution thoroughly. The second got only a glance. Miller fainted. When they trap door dropped, you knew it."

Harp says news was easier to gather in the pre-World War II days. Hagerstown was smaller, news-makers were more approachable, and folks weren't so quick to sue.

"People trusted the press," he says. "We earned that trust and often it was implicit."

He chuckles over the era when magistrates were also acting coroners. "When Dick Sweeney was magistrate, I often went along with him in his capacity as coroner. Dick didn't like to look at dead people. I'd look to make sure they were dead, and he'd sign the death certificate."

In his long career, Harp was only sued twice. Neither case went to trial.

Each decade of the veteran journalist's career has its own brand of reminiscences. In the Prohibition era of the 1920's, it was the revenuers who tipped him to his best stories. "They'd call me when they were going to raid an illegal still, and I'd go along," he says. He remembers one raid in particular, when he was mistakenly identified as the snitch and almost shot.

In the 1930s it was the weather that made memorable headlines: the blizzard of '32 and the flood of '36. Harp says they were probably the two biggest stories of his career.

When the blizzard hit in 1932, Hagerstown was completely cut off from the rest of the world. Nothing moved—neither cars nor trolleys nor trains nor news. Roads were blocked and hundreds of travelers stranded. Telephone and telegraph lines were down. News of what was happening here couldn't get out, and news of what was happening elsewhere couldn't get in.

Harp heard about an amateur radio operator living on Maryland Avenue. He trudged almost a dozen city blocks through drifted snow to reach the operator, who transmitted word of the city's plight to the outside world. His signal was picked up by KDKA in Pittsburgh, and the radio station read an assortment of national and international news over the air which Harp and other editorial staffers copied down and ran in the next day's paper.

When the Potomac overflowed its banks in 1936, threatening to wash Williamsport off the map, Harp hitched a ride to the river town in a police cruiser so he could survey the damage and write a first-hand account. What stands out in his memory is not the devastation of the raging waters, although that is sharp enough, but the toll bridge operator who made a fortune off sight-seers.

"The son-of-a-gun charged them to get on the bridge and then charged them again to get off."

The most tragic story he ever had to write occurred in the 1930s, when a busload of Williamsport High School students was struck by a train in Rockville. Many of the students were killed.

"I was sitting in Mark Beck's restaurant on North Potomac Street, having a snack when I heard the news," he says. "I rushed back to the office and called a teacher who lived in the Hamilton Hotel. She fainted, and I had to get somebody to go over there and revive her."

He and other reporters spent hours talking to school personnel and parents, piecing the facts together. "But we had the story by presstime."

Reporters were often the bearers of bad news in the early years of the century, he says, remembering the time he reported on the death of a man who was struck by a car while fixing a flat on his own automobile. The man lived on West Antietam Street, just around the corner from The Herald-Mail, and Harp was delegated to tell the man's wife she had just been widowed.

"The police didn't do that sort of thing in those days," he says. "It was either the newspaper or the undertaker."

The 1940s are marked in Harp's memory by America's involvement in World War II. He and Editor Baylor were in Baltimore on Dec. 7, 1941, when the first news of the Japanese attack on Pearl Harbor was broadcast.

"We drive back to Hagerstown as fast as we could to get an extra on the streets," he recalls.

There was another extra at war's end when church bells tolled in jubilation across the city, and joyous crowds surged into Public Square to dance in celebration.

Harp recalls Gen. Dwight Eisenhower's visit to Hagerstown on the presidential campaign trail in the 1950s, the assassination of President John F. Kennedy in the '60s, the Vietnam War, Nixon and the Watergate era of the '70s.

For much of his working years, he put in 14-hour days, working from shortly after noon when The Daily Mail went to press to 2 or 3 o'clock in the morning when The Herald hit the streets. It was life in the fast lane before wage-and-hour laws, before health insurance and pension plans and Social Security.

In 1945, he was made managing editor of The Morning Herald and gave up reporting to edit other people's copy. He was named executive editor of both The Herald and The Mail in 1960, a post he held until he "retired" to become consultant to The Herald-Mail Co.

Genial, soft-spoken, unflappable, Harp has been "Mr. Herald-Mail" to generations of Hagerstown's reading public. Not just because he's been employed by the company for so long, but because he's always been on the job.

To him, there is a distinction between the two. "You can't find out what's going on out there without being out there," he says.

He still shows up at City Hall and the courthouse. He still chats with police officers and government administrators. Folks big and little still come into his office to pass the time of day and pass on a little news.

He's always been a workhorse . . . reliable, dependable. As a longtime Herald reader says, "You just always counted on having Joe Harp with your morning cup of coffee."

But there's more to Joe Harp than this morning's headlines.

As a young man, he played trombone with a touring dance band called The Dagmar Castilians. Later on, he joined the Sunday school orchestra at Zion Reformed Church. It was not unusual to hear the strains of "Rock of Ages" wafting from the Herald-Mail newsroom at 3 a.m. as he practiced for Sunday services. He still is a music lover, with tastes that run "from the sublime to the ridiculous." He favors the classics and Dixieland jazz.

He used to cover vaudeville shows at The Maryland Theatre and the old Academy, and more than once had his free pass "lifted" because he panned an act he didn't consider up to snuff. Once he appeared in a Potomac Playmakers production of "The Barker." Often he junketed to Baltimore or Washington or New York to catch the Broadway shows.

Back in the 1950s, when The Herald and The Mail produced four daily newscasts for WJEJ Radio, Harp regularly did the midnight broadcast from his office. Once he lost his manuscript and ad libbed the entire news show.

The son of a salesman, Harp was born in Cavetown, "in a house right beside the Reformed Church where I was baptized." The family moved to Smithsburg when he was 5 and he attended the Smithsburg school, where all 12 grades were housed in the same building. He graduated in 1925 with a smattering of Latin and French, but no typing. He learned the "three-finger system" which has been his trademark for 59 years from Frank Colley.

He was married in 1941 to Alice Himelright.

"We'd been dating for two years and talking about getting married," he muses. "We went on a fishing trip over in Frederick County with Harry Fridinger and his wife and Harry said there'd never be a better time for us to get our marriage license, so we did—at the Frederick County Courthouse.

"Harry paid for the license," he chuckles.

Alice Harp died in 1979.

Harp has two sons: Joseph Jr., who lives with his wife and two sons in Columbus, Ohio, where he's a salesman for Honda, and David, a photographer for the Baltimore Sunday Sun Magazine who lives with his wife and two daughters in Baltimore.

He has a brother, Admiral Edward Harp (Ret.) living in San Diego, whom he visits every year.

Although it was his brother who actually went to sea, Harp has carried on a long and lively love affair with boats and the water. He has paddled the Potomac and fished from its banks, and sailed East Coast waterways with his son David. The walls of his office are dotted with seagoing paraphernalia.

In the "old days," he participated in the annual baseball games between the Newsies and the Police. The game was always played in fun, at least in theory, although Harp says it produced some real rivalries on occasion. Many of the games were long and drawn-out, and there's a tale that he deliberately put an end to one protracted game by dropping a fly ball in right field at Municipal Stadium. He won't say yea or nay.

"A newsman," he says, "writes the news. He doesn't make it."●

THE SECOND ANNUAL MAYORAL CONFERENCE ON ALZHEIMER'S DISEASE—NEW YORK CITY CONTINUES AN IMPORTANT TRADITION OF COMMITMENT AND ADVOCACY FOR VICTIMS OF THIS DREADED DISEASE AND THEIR FAMILIES

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BIAGGI. Mr. Speaker, as an original member of the House Select

Committee on Aging, it is a great honor for me to place into the CONGRESSIONAL RECORD important segments of the Second Annual Mayoral Conference on Alzheimer's Disease conducted on November 3, 1984, in New York City.

I am proud to note that the New York City Department for the Aging in cooperation with the mayor and other city agencies as well as private and voluntary organizations have established an important partnership committed to providing genuine assistance not only to victims of Alzheimer's but also support help to their families or those providing care.

Perhaps the best example of this working partnership was the establishment of the New York City Alzheimer's Resource Center operated by the New York City Department for the Aging with a tremendous assist from the Brookdale Foundation. Together they have initiated the first and only municipally funded center of its type in the Nation.

Alzheimer's disease is a progressive, degenerative brain disease. It afflicts between 1.2 and 4 million Americans a year and is now the fourth leading cause of death. The cost for caring for a victim of Alzheimer's is estimated at between $17,000 and $50,000 a year. Most of this cost is borne by family members.

As we work on a governmental response, we must combine our efforts both at funding research to work at uncovering the causes on this disease but we must also provide adequate funds to provide critically needed support services for victims and their families. New York City has demonstrated great leadership in this regard and I would like to now insert excerpts of the Alzheimer's conference for the review of my colleagues. These include excerpts from the speeches of Mayor Edward I. Koch, Commissioner Janet S. Sainer, of the New York City Department for the Aging, Peter V. Rabins, M.D. assistant professor of psychiatry at Johns Hopkins University School of Medicine, Yasmin Kahn, vice president, Board of Directors of the National Alzheimer's Disease and Related Disorders Association, Marian Roach, author "Another Name for Madness," and Lonnie E. Wollins, Esq., president of the Greater New York Chapter of the Alzheimer's Disease and Related Disorders Association. Finally I would also like to acknowledge the significant contribution of Randi Goldstein, director of the New York City Alzheimer's Resource Center.

EXCERPTED REMARKS BY MAYOR EDWARD I. KOCH AT SECOND ANNUAL MAYORAL CONFERENCE ON ALZHEIMER'S DISEASE IN NEW YORK CITY

This conference bids to be of great significance and is indicative of the importance that each and every one of us here today places on finding the answer to Alzheimer's and on uniting our efforts on all fronts to help Alzheimer's patients and their families.

I want to extend a special welcome to the many experts and dedicated people who are with us today. Time doesn't permit going down the entire list, but I want you to know that I see you out there, and I'm personally grateful for your participation, as is Janet Sainer, commissioner of the New York City Department for the Aging.

We are indebted to Lonnie Wollin, president of the Greater New York Chapter of the Alzheimer's Disease and Related Disorders Association whose vital association works closely with the New York City Alzheimer's Resource Center to effect better linkages between Alzheimer's patients and families and appropriate services and programs in the city.

I'm proud that our city has worked in partnership with the Brookdale Foundation to initiate the only municipally funded center in the Nation. It is our hope that other cities will emulate our effort.

I'm delighted to welcome Dr. Peter V. Rabins, assistant professor of psychiatry at Johns Hopkins University School of Medicine and co-author of "the 36-Hour Day".

Yasmin Kahn, vice president of Board of Directors of the National Alzheimer's Disease and Related Disorders Association, member of the Advisory Board of the New York City Alzheimer's Resource Center, consultant to the Alzheimer's Disease Program at Boston University School of Medicine, president of the International Federation of the Alzheimer's Disease and Related Societies, Inc., national council member of the Salk Institute.

And Marion Roach, author of "Another Name for Madness", and also dedicated caregiver.

The topic of caregiving occupies an important place on today's agenda.

As we know, it is estimated that there are more than 70,000 victims of this devastating disease just in our city alone—and 2,000,000 across the Nation.

Thus, it is imperative that we win this war. I commend Randi Goldstein for her ceaseless efforts as director of the New York City Alzheimer's Resource Center, on behalf of those who need counsel and referral and I pledge the city's continued involvement in this endeavor and my personal, enduring concern. I look forward with great interest to the findings that will be forthcoming from today's conference.

EXCERPTED REMARKS BY JANET S. SAINER, COMMISSIONER OF THE NEW YORK CITY DEPARTMENT FOR THE AGING

This year, the New York City Department for the Aging and our cosponsor—the Greater New York Chapter of the Alzheimer's Disease and Related Disorders Association, have dedicated this mayoral conference to the family care givers and care providers of New York City, for you are the ones that the city and ADRDA would like most to help. Together we are dedicated to finding the most effective ways to assist the Alzheimer patient, and particularly their families who daily serve in such selfless and significant ways.

I wish, on this occasion, to thank the Brookdale Foundation and the City of New York, under the mayor's leadership, for helping to fund the New York City Alzheimer's Resource Center, making it the first and only such municipally sponsored center in the Nation. The Department for the Aging is proud that we have been given the responsibility and honor of undertaking the job of helping to ease the burden that all those whose lives are affected by Alzheimer's disease face.

I would like to extend my thanks from all of us, and our deepest appreciation, and also to the Greater New York Chapter of ADRDA, co-sponsors of this conference. To Randi Goldstein—and for her tireless efforts in responding to the needs of Alzheimer's patients and their families. Randi and her staff work devotedly to produce, for example, the updated resource directory—to convene workshops and seminars—to coordinate this conference—all to help to give greater access to available programs and services in the city—and to further more thorough knowledge about Alzheimer's disease to the public—in cooperation with the Greater New York Chapter of the Alzheimer's Disease and Related Disorders Association, we mutually strive to reach out in as many ways as is humanly possible to those whose lives are affected by Alzheimer's disease.

I'm happy to be able to report to you that in this upcoming year we will be expanding our services by providing individual counseling to family caregivers—and that we will be intensifying our outreach with a highly visible publicity campaign—our goal is not to let this disease continue to be what it is so commonly called "the hidden disease".

EXCERPTED REMARKS BY PETER V. RABINS, M.D., ASSISTANT PROFESSOR OF PSYCHIATRY, JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE, JOHNS HOPKINS HOSPITAL

CARE OF ALZHEIMER'S DISEASE VICTIMS—WHAT CAN BE DONE NOW?

While Alzheimer's disease is sometimes spoken of as an untreatable disorder, this is not true. It is true that we cannot change the ultimate course of the disease but there are many elements of it which can be treated. I will highlight five of these.

1. Evaluation and information

The evaluation serves several purposes. It determines whether there is a treatable cause of the thinking impairment and identifies the specific symptoms of dementia from which the patient is suffering. Such a determination is crucial since it is a focus on these symptoms which can make a difference.

The initial assessment should also include time for the clinician to discuss the disease with the famiy. Many questions about future course or genetics often arise.

This evaluation should also focus on the patient's remaining abilities. One goal of treatment is to ensure that the ill person remains as active as possible and identifying remaining strengths is one way to ensure this.

2. Symptom management

A focus on specific problems leads to solving them. Helping families identify the problems and then search for potential solutions can be an important contribution of the professional.

3. Family emotionaal support

The majority of people with Alzheimer's disease are cared for by their families. They must face the physical burden of care of an ill person as well as the emotional effects of seeing a loved one deteriorate. Emotional support of them can help them emotionally adapt to caregiving and can lessen problems in the home.

4. Good general medical care

Patients with dementia frequently suffer other medical disorders for which treatments are available. When these other conditions are treated the demented person's thinking may well improve and some of the behavior problems diminish or disappear. Therefore, good medical care is essential. Minor infections such as bronchitis or urinary tract infections can lead to a significant deterioration of thinking and behavior which can improve dramatically when these seemingly minor insults are treated.

5. Longitudinal care

Most dementing illnesses are progressive. Therefore symptoms change over time. Both the patients and their families need professionals who can periodically reassess the person and the situation. This can identify newly developed problems and sometimes problems which have been resolved. A professional who intermittently sees an individual can often see new issues that are not obvious to a person who has been living with the patient day by day.

This care over time can also provide different emotional supports when they are needed.

Finally, care over time can help a family decide if and when a nursing home placement is appropriate. The factors which go into the decision of placing a loved one in a nursing home are not well understood. While many people believe that problems such as incontinence are the main predictors, my experience and a minimum amount of research suggest that it is actually a more general feeling of being overwhelmed and exhausted. A better understanding of the problems that lead to nursing homes might help us construct better health care systems to support people at home. But even more importantly, this might help us understand and accept the fact that nursing homes are a necessary part of the care of people with dementia and that professional support in making this decision can have positive impact on their emotional health and can sometimes lead to better physical care of the dementia victim.

EXCERPTED REMARKS BY YASMIN AGA KAHN, PRESIDENT OF THE INTERNATIONAL FEDERATION OF ALZHEIMER'S DISEASE AND RELATED DISORDERS SOCIETIES, INC.

Many of you in the audience are family members of Alzheimer's victims, so I don't have to describe to you what it is like to live with an Alzheimer's patient. The fact that you are here demonstrates you are aware of the devastation brought about by the progress of this illness.

Progress—what a strange word to use. If years of slow degeneration, progressive debilitation, and increasing dependency are what is called progress—then I've used the right word.

Before my mother Rita Hayworth was diagnosed as an Alzeheimer's victim there were sad indications that her memory was slipping and that she was becoming disoriented.

I remember one day I found her facing a mirror. I was standing behind her watching. She looked in the mirror, looked at me, looked back at herself and then again at me and asked "Who are you?"

Those were days when she could still verbalize. When my mother's condition was finally diagnosed, I become determined to do something about this nightmare that has already stricken 2 million Americans. I felt that joining a national effort would be the most effective way of accomplishing any real results.

With the help of organizations like the Alzheimer's Disease and Related Disorders Association, I am able to say Alzheimer's is no longer unknown. It is nationally and internationally acknowledged as a tragic, consuming affliction, and great steps towards finding a cause and cure have been made.

We know that medical research is gradually beginning to unravel the puzzle—and that our educational efforts have alerted young professionals to the danger Alzheimer's disease poses to our Nation.

These are now more support groups around the country which are providing much needed comfort, guidance, information, and daily help to families who are suffering from this devastating illness. City, State, Federal agencies and legislatures, are working to channel more resources into the fight. These funding sources are now beginning to take a hard look at the long-term needs of today's patients and their families.

The United States Congress is recognizing how desperately relief is needed for the daily care of these patients. Legislation was just passed directing the Medicare Program to review its current policies and come up with recommendations for addressing these needs. The preliminary report will include the possibility of finding sources of financial aid for families from other Federal programs. We are hopeful that Congress will take quick action and that private insurers will broaden their coverage to include respite care, because most medical insurance policies do not pay for long-term care. It is essential that medicare and insurance companies take some of the burden of the "36 hour day" from those of us whose lives have been so tragically altered by this disease.

When such important events as this annual mayoral conference take place and the Senate "Labor and Human Resources Subcommittee on Aging" holds special hearings on funding Alzheimer's research and respite care—I know I can sincerely use the word "progress" with a positive meaning.

EXCERPTED REMARKS BY MARION ROACH, AUTHOR OF "ANOTHER NAME FOR MADNESS"

A year and a half ago I published an article in the New York Times Sunday Magazine. The headline read "Another Name for Madness." It was about my mother. Six years ago my mother's doctor told me that he thought my mother was senile. I thought she was going mad. We were both wrong. My mother is one of the more than 2 million victims of Alzheimer's disease in this country and according to recent statistics, she is one of the fifty thousand victims living in New York City. What I called madness began as forgetfulness—her keys, the phone number at the house we lived in together, and developed into severe depression, vast memory lapses, confusion and a lack of her previous articulate nature. She groped for words, for familiar phrases.

But I called it madness. A lot of people criticized me for the title of that piece. When I decided to write a book about her illness, the publisher insisted that the title be "Another Name for Madness." I fought the title both times, but here I am before an assembled group which knows about this disease, and the title couldn't be better.

How old was I when I first heard the sentence "ignorance is bliss?" We apply it so much. But it is not blissful to be ignorant when someone you love is dying of something you do not understand. Worse, it is not blissful to be ignorant when you can help someone you love. How old are we when we hear "the truth hurts?" What I ignorantly and painfully called "madness" has a proper name and we, the caregivers of the victims of this dreadful killer, know what it is—Alzheimer's disease. And the truth hurts. It hurts more each time we feel it. The truth I refer to is the truth of separation.

As caretakers of victims of this frightful disease we know that this is a disease of separation.

A very smart man, my friend, my mother's doctor, Barry Reisberg said, "when the communication stops, the grief for the family begins."

I wrote in my article that "grief is a mute sense of panic." I wrote that almost a year to the day before Dr. Reisberg said that about grief and communication to me, and at the time, it was a desperate, but misunderstood, feeling for me.

This is a disease during which those who care most get less and less advice from those who know better than anyone else about how awful the disease is. The Alzheimer's victim becomes less and less able to reveal the panic as he or she gets more sick and the care takers are left so very alone and ignorant unless they find help.

In the early stages of my mother's illness, I called it "Madness." I was ignorant, yes, but I was also hiding.

My mother's name is Allene. She is a decendant of Ethan Allen, the Revolutionary War hero, and everyone of her paternal side had Allen in his or her name. Allene was very smart, independent, willful and witty. Just as she could toss out phrases and be clever, she could toss on clothes and be beautiful.

She became a newspaper reporter, a wife, a mother, a girl Scout leader, visting nurse volunteer and after my sister and I were grown, she went back to school and got her masters degree in education, and became a teacher at a bilingual school on the Lower East Side of Manhattan.

In the progression of her disease she became frightened, angry, paranoid, hostile and incompetent. She became completely dependent on the aid of others, repetitive, confused, agitated. She stopped reading. She speaks rapid gibberish. She has no memory. She has to be bathed, fed and dressed. She now lives in a nursing home, where this total care is provided. My mother is fifty five years old. I put her in a nursing home two months ago.

In the course of this disease we have all learned to push courage into the unknown and we have despite the panic, the loneliness, the total despair, pushed our courage that one step further again and again.

Right from the start the victim and the family must accept the truth of this disease and accept the care available. Learn to label drawers, to be patient, to aid as long as you can until you have to do the tasks yourselves, to distinguish between teaching helplessness and prolonging ability.

There is something to cleave us together beyond this bond of sadness. I have made more than several true friends in my family support group at N.Y.U., in ADRDA, at the mayor's office. We come together because we have someone we love who is a victim. Sometimes we walk away from our meetings hurt and depressed.

This is our second mayoral conference. This is national Alzheimer's month. Our New York City chapter of our national organization has grown. Our mayor truly cares.

We have books available to us. We have family support groups. We have research, funded, but not by enough money.

We think our connection is unique. Together we are a powerful political force, meeting in the greatest city in the world, and believe me there is no war to be won.

We have a nationwide ADRDA network that flourishes. Last year, in this city we set up an Alzheimer's resource center from which everyone who has called it, has benefitted.

Another cliche: "Necessity is the mother of invention." Take strength in that. But let us not rest on our laurels. There are sometimes overpowering, horrible aspects of this disease.

Someone said to me last year, with a shake of her head, "God, I never know what's going to happen next."

My mother always said to me that women shouldn't quote themselves, but here I go: I replied, "Thank God."

Good or bad, I don't want to know.

Our obligation as caregivers is to meet each seemingly unconquerable next stage of this disease and grab the help available.

A year ago, no one could have told me that my mother would be in a nursing home. My mother was living in an apartment my sister and I bought for her, with twenty-four-hour a day, seven-days-a-week care at the sum of four thousand dollars a month. My father is dead. We exhausted his life savings, then my mother's, and then our salaries. Save today, and fight and seek the way to save those we can tomorrow.

EXCERPTED REMARKS BY LONNIE E. WOLLINS, ESQ., PRESIDENT OF THE GREATER NEW YORK CHAPTER OF THE ALZHEIMER'S DISEASE AND RELATED DISORDERS ASSOCIATION

At the official opening of the Alzheimer's resource center, I quoted an international author and I think it deserves repeating here—that author has a sign of his desk which reads—"if you say it cannot be done, you are probably right, you cannot do it." And thank God that the author is also the mayor of New York City. It is that attitude and leadership that encourages the commissioners of the city; a city which came from bankruptcy, to perform and excel. Specifically Commissioner Janet Sainer, whose finger is on the pulse of the elderly of New York City, whose hard work, dedication and guidance helped to create the resource center.

Through the combination of Brookdale Foundation and City of New York tax levy funds, with the mayor's commitment and generosity, under the able direction of Randi Goldstein, and with the assistance of the Greater New York Chapter of the Alzheimer's Disease and Related Disorders Association, the center was opened in March of 1984 and I am happy to report the success of its operations. In less than a year, the center is serving over 100 clients per week. Many of the calls are family members referred by the ADRDA who need specific help from city agencies. This is humanity.

In addition to the provision of information and referral, the center is co-sponsoring seminars and helping to develop a speakers' bureau.

Yet still I was relentless in my desire to keep her in the community. Jacob Reingold, who runs the Hebrew Home for the Aged in Riverdale called me, just by chance at that time, and reminded me that I had promised to come and see his facility. We walked and talked and spent four hours together.

Mr. Reingold took both my hands and said, "You've done a good job, your sister and you. You've protected your mother. She's safe. But when the nurse gets finished cleaning, dressing and feeding your mother, do you really think the nurse has a lot of time to talk to her? Come, Marion, try a nursing home. See what we in the field of caring can do."

Four months later I put her in a home. I brought a form from NYU which releases her brain to autopsy when she dies. It was the hardest thing I've ever had to accept.

Yet in two days' living in the nursing home, my mother, for the first time in six months initiated a conversation. She recognized me for the first time in three months. She is happy, cared for, stimulated, safe and clean.

She speaks to me, and you know, she's better off, because there are people who are working so very hard for us and them.

Get help. Ask. The idea of the next step may be frightening, but you have come this far, and so some part of you must know that there is more care, more hope, more help available.

My mother is supposed to be in the prime of her life. She is suffering from a disease that we used to think of as a natural part of aging. There is nothing natural about it. It is a horror, and it is here until we attack it in earnest. Let's not accept it and be ignorant. Let's provide the best care for those we cannot * * *.

The awareness of Alzheimer's disease is almost universal—both locally and nationally. We are reaching and helping more and more people. When ADRDA started in 1978-1979 we may have seen 5 articles per year on Alzheimer's disease and most of those were in medical journals. In 1984 hardly a week goes by without 1 or 2 such articles—and of course, there's the hope that in my lifetime there will be an announcement of a treatment or a cure.

Of course I read with great interest of the Darthmouth announcement of the implant, but I am very cautious. It is not the answer. It is experimental. It is a small sample and it will need extensive further testing—but it is an important step in basic research, and hopefully someday there will be a treatment that will postpone the onset of this terrible disease.

What this tells me is that the media and voluntary health organizations such as ADRDA must expand and cooperate with our government, with the people of New York City, New York State and the Federal Government to fund and encourage research—to help families to care for victims—to improve the victim's quality of life until Alzheimer's is no more.●

ARLINGTON COUNTY MEDICAL SOCIETY'S ADOPT A HOSPITAL PROGRAM—SANTA ANA, EL SALVADOR

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. WOLF. Mr. Speaker, after I returned from a trip to El Salvador last year and shared my concerns about the critical shortage of medical supplies and equipment for El Salvador's civilian population with the Arlington County, VA, Medical Society, the society sent its own factfinding team to Santa Ana, El Salvador, and returned to organize a program to adopt the hospital there.

I commend their work as a fine example of American generosity and concern for the needy worldwide and I would like to bring this program to the attention of my colleagues with the hope that the medical societies across the Nation would also initiate similar adopt a hospital programs.

San Juan de Dios Hospital in Santa Ana, El Salvador, is a government-run hospital serving the indigent civilian population and treating primarily women and children. With 900 beds, it draws from a community of approximately 200,000. It is the largest hospital of its kind in the country. Tragically, this hospital is faced with severe shortages of basic medical supplies such as surgical gloves, sutures, and instruments, as well as blood pressure cuffs, wheelchairs, stretchers, and cribs.

Project Santa Ana is a humanitarian effort sponsored and supervised by the Arlington County Medical Society to gather supplies and funds for San Juan de Dios Hospital in order to upgrade the quality of medical care it provides. In addtion to collecting medical supplies and funds, Project Santa Ana will provide a biomedical engineer to evaluate necessary equipment repairs and train local people to maintain the hospital's equipment.

The activities in El Salvador are coordinated by the Santa Ana Rotary Club. The Rotary Club and other service organizations are now attempting to remodel the hospital's emergency room and have provided rudimentary equipment to the rehabilitation department. As various hospital departments are upgraded, the need for necessary medical supplies becomes even more obvious.

The following article from the American Medical News discusses the development of the project in detail. Since this article was printed, the medical society has shipped an additional 30,000 pounds of medical equipment to Santa Ana, including incubators, wheelchairs, surgical instruments, lamps, x-ray equipment, and room lights. Most of these supplies were donated by the Arlington Hospital, Northern Virginia Doctors Hospital, the National Hospital, and several doctors who are members of the Northern Virginia Medical Society. The Rotary Club (district 760) which includes the Arlington chapter donated about $4,000 to cover administrative costs of the project.

The long-term future of El Salvador depends upon the ability of its people, particularly its children, to survive the current turmoil. The availability of adequate medical care for the entire civilian population is necessary to ensure this survival. I am proud to

have constituents in my district working to meet this need. The efforts, made by the Arlington County Medical Society, are ongoing. Those interested in knowing more about the project should contact Patricia Murray with the Arlington County Medical Society, at 4615 Lee Highway, Arlington, VA 22207, 703-528-0888.

VIRGINIA PHYSICIANS ORGANIZING TO HELP EL SALVADOR HOSPITAL

(BY CAROL CANCILA)

The physicians in the darkened conference room at the Arlington County (Va.) Medical Society watched quietly as the color slides taken at a struggling hospital in war-torn El Salvador forced the realities of abject poverty and severe medical need home to suburban Virginia.

The slides, taken by Virginia pediatrician Cathy Casey, MD, spoke poignantly, needing little explanation but the fleshing in of medical details: A malnourished baby, a fly resting on his stick-like thigh, lay in a crib without sheets. Surgical gloves protruding from a tub of rusty water waited to be resterilized.

Rusty instruments lay on an OR tray before gynecological surgery, and a thin, naked toddler—clothes and diapers and nonexistent in the hospital—sat silently alone, with no toys, on a mattress covered only with a green plastic sheet.

The setting was San Juan de Dios Hospital, a government-subsidized 900-bed obstetric and pediatric center that serves the entire southeastern region of El Salvador as well as Honduras. In a country the slides showed to be beautifully lush, with tropical flowers and jewel-blue lakes, life also means unrelenting poverty for most of the people who come for treatment at San Juan de Dios with no money and only a little hope.

Until this summer, the 400 members of the Arlington County Medical Society never had heard of San Juan de Dios. A link between the society and the hospital was developed when U.S. Rep. Frank Wolf, a Virginia Republican who had been active in quietly sending down food and supplies to El Salvador, told several medical society members about the struggling hospital.

The medical society decided to send its own fact-finding mission to El Salvador, and in early June, three physician volunteers—Dr. Casey, 36, a pediatrician; Philip Borges, MD, 34, a urologist; and Javier Vasquez, MD, 36, a general surgeon—left their practices for a week to tour the hospital and meet its staff.

"I had never been to Central America. I really had no idea what to expect," Dr. Casey said of her interest in the mission.

Dr. Borges, who had the advantage of speaking Spanish, never had been in the country either and was intrigued by the prospect.

Although both physicians insisted they went down with few expectations and a lot of questions, they returned, they said, determined that they and the medical society should do what they could to help.

"For any of us, working without CAT scanners and lab tests would be unthinkable," Dr. Casey said. "From our perspective, the need there was just unbelievable."

"No, I didn't come back feeling guilty," Dr. Borges said. "I did come back feeling very fortunate. I think it would take an American doctor a long time to adjust to the hardships there, and to be efficient practicing medicine under the circumstances.

The physicians learned, as Dr. Casey's slides illustrate, that the problems affecting health care in El Salvador are great and complex, and while San Juan de Dios is located in the southeast—as far removed from the war in the northwest as is possible—the war continues to affect the hospital and the medical services it can provide.

Occasionally the physicians saw war-related casualties at San Juan de Dios, including a wounded child shown in one of Dr. Casey's slides, but said they saw no fighting in the area while they were there. The effect of war, however, was felt daily at the hospital in its severe shortage of medical supplies.

Medical supplies in El Salvador are scare, and the war diverts the available supplies to hospitals where soldiers and war wounded are treated. That diversion leaves little for low priorities—a primarily women's and children's hospital, such as San Juan de Dios.

The Slides tell the hospital's story well, Dr. Casey and Dr. Borges agreed. The story is one of a low concrete building, connected by a labyrinth of walkways and gardens. Inside, the dank green walls and lack of light suggest that this is a place to survive, but not to thrive.

Despite the humid tropical heat, there is no air conditioning, and insects swarm through open windows and doors—which also allow dogs and cats freely to wander the wards.

Everywhere there are severe shortages of the most basic equipment—no or few blood pressure cuffs, beds, sutures, or stretchers.

In the emergency room, patients wait stoically, while the injured or ill are brought in on rusted stretchers, which have no linens. The few hospital sheets available still are ironed by hand, Dr. Casey said, and linen turnaround is slow.

In the examining rooms, "everything was reused," Dr. Casey emphasized. "Gloves were resterilized six to eight times. Most everything we consider disposable, they reuse. They would take I.V. bottles and tubes, sterilize them, and then reuse them as hookups to catheters to collect urine."

"They do have an autoclave and the sterilization is adequate," Dr. Borges said. "It's just what they do have is in short supply."

Lack of air conditioning is a problem particularly in the operating room, which has an air conditioner that is inoperative most of the time. "There are no screens, so flies are everywhere," Dr. Casey said. The hospital's usual problems with lack of light bulbs were particularly reflected in the O.R., where physicians finally installed Toyota headlights instead of regular bulbs.

"The headlights, of course, made it terribly hot. The doctors would just be drenched with sweat," Dr. Casey said. The heat problem did not adversely affect the sterile atmosphere needed during surgery, Dr. Borges added, but it raised the concern that could be a problem with physicians literally sweating over a patient during surgery.

Surgery often is performed with old, rusty instruments, which, "although they don't look nice, are fine if they're sterilized," said Leonard Weyl, MD, chairman of the medical society's relief fund for San Juan de Dios.

"But the problem of the equipment in general is that it is old and deteriorated," Dr. Casey said, "The oxygen tanks—and they were always tanks, never wall units—were rusted. The rubber was often rotted away on the anesthesia machines."

Common surgical procedures at San Juan de Dios included repair for a prolapse of the uterus and surgery for complications from septic abortions. Because abortion is illegal in El Salvador, women are forced to go to back-alley abortionists, who simply insert an object and leave it there, knowing it will eventually cause an infection that will then require proper medical care for the botched attempt. Luckily for these women, Dr. Casey said, antibiotics seemed to be readily available.

Speculums in these wards were almost non-existent, Dr. Casey said, as were comfortable facilities for childbirth. One delivery room had a warmer bed for the baby, Dr. Casey said. The hospital performs few cesarean sections, and has few resources for high-risk births or premature infants.

Bilirubin lights and oxygen are available, but the oxygen, which runs through a tube over the baby's head into an isolette, is not measured or controlled, which can lead to a risk of hypoplaxia. "Basically, the conditions we saw were a lot like American hospitals in the 1930s and '40s," Dr. Casey said.

In the children's wards, the common problems were malnutrition, infectious diseases, diarrhea and trauma. There are 250 pediatric beds, but no toys, except for a rusty swing set with no swings. Babies toddle through wards or sit in beds all day long. Often they are naked, because of the shortage of diapers.

"We saw children with polio, malaria, diphtheria. I saw an 8-year-old and a 12-day-old baby with tetanus," Dr. Casey said. "The immunization is poor. And the government health units that had been providing immunizations have been disrupted by the war."

Equipment in the orthopedic ward also was dilapidated. In one slide, Dr. Casey pointed out, an orthopedic pin holding a small boy's fractured arm in traction was held together with tape. The hospital does have an intensive care unit, so-called because each bed has a blood pressure cuff and there is an EKG machine that works.

But there were no monitors in this ICU, the blood bank often was disrupted because of electrical shortages, and because the bank has no centrifuge, only whole blood could be given.

At a more basic level, back in the kitchen, meals are prepared in huge vats. There is little refrigeration, only enough for meat and dairy products, which are few. "Nutrition in the hospital is very poor, although it is much better than what most of the people get at home," Dr. Casey said. On most of the days the physicians visited, the hospital served meals of tortillas with and egg and potato mixture.

The lack of proper equipment leaves the hospital with no choice but to perform only adequate or often less than adequate care, a situation that is probably more frustrating for the physicians and nurses than their patients. Although new equipment cannot eliminate the poverty and health care catastrophes of San Juan de Dios, it can help reduce the suffering and make the hospital more comfortable and humane, the physicians say.

"For example, it was not uncommon to see patients doubled up in hospital beds," Dr. Borges said. "It was a little startling to see it for the first time, lined up head to toe."

"And how many hospitals here have beds they can't use?" asked Dr. Weyl, chairman of the relief fund.

After their trip, the physicians, armed with Dr. Casey's slides, reported back to the medical society. Recently, the society voted to support the massive relief drive—Project

Santa Ana—to help the poverty-stricken hospital. So far that has translated into about $7,000 in medical supplies already donated and an additional $150,000 to be shipped in medical equipment donated by area hospitals.

"We have just been amazed at the response, not only from our own doctors, but from hospitals in the area as well," Dr. Weyl said. "We still face some obstacles, like the high costs of shipping the supplies there, and we are hoping to find some shipping businessmen who might be able to help us out with that. We are excited about this and very committed. And we see this as just the beginning."

This month and next, Dr. Casey will show her slides throughout Virginia—to the medical society auxiliary, which has already pledged $500 to the effort; to the Medical Society of Virginia; to the local Rotary; and she hopes, to other medical societies, in hopes of soliciting more support for Project Santa Ana.

Already, she said, the response from area Virginia hospitals has been warm. Arlington Hospital, National Orthopedic Hospital, Washington Hospital Center, and Holy Cross together donated nearly $150,000 in beds, furniture, toys, catheters, linens, soap, surgical instruments, and other equipment. "So much of this equipment the hospitals couldn't use or had a surplus of," Dr. Casey said. "They were very eager to help."

Given their short but already encouraging progress, the physicians involved in Project Santa Ana are determined to see it through, and say they hope to encourage other hospitals and physicians to join their drive, or "adopt" their own struggling hospitals.

"There are so many other hospitals in developing countries, in Africa, in southeastern Asia, in other Central American countries that need our help," Dr. Weyl said. "We are not trying to sound self-serving. But we think there is a lot of interest, particularly from younger doctors who are very eager to get involved in these kinds of projects."

Despite nearly overwhelming support, some fellow physicians are skeptical. "There were some who said, 'Why do we need to go down there? We should take care of our own right here,'" Dr. Weyl said. "You really can't compare the situation in this country with what it's like down there. We're talking about a complete lack of resources."

Others suggested that the medical society might appear to be politically motivated in their choice of an El Salvador hospital, a question the physicians vehemently deny.

"There is nothing political about it," Dr. Weyl said. "We are working with the local Rotary to help provide equipment for the hospital. We are not working at all through the government. We made it clear when we talked to the former ambassador that we do not want to get politically involved. That's why we chose San Juan de Dios—because it is so remote."

Because of the concern that the new resources being sent to San Juan de Dios must be used efficiently, the medical society also plans to send a biomedical engineer to the hospital periodically to assess the equipment and to train other workers to repair it properly. The medical society will monitor the progress of the hospital through the local Rotary Club, whose members sponsored the physicians during their stay and invited them to stay as guests in their homes during their week visit.

For Dr. Casey and Dr. Borges, who saw Santa Ana and San Juan de Dios firsthand, "it was a great experience," Dr. Casey said. "I think we're both glad we had the opportunity to go."

Would they go back? "Yes, to visit," Dr. Borges said. "Not to practice."

For more information about Project Santa Ana, call the Arlington County Medical Society, (703) 528-0888. The address is 4615 Lee Highway, Arlington, Va. 22207.●

COL. CHESTER E. WHITING

HON. CHARLES McC. MATHIAS, JR.

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

Tuesday, April 16, 1985

● Mr. MATHIAS. Mr. President, recently the former director of the U.S. Army Field Band and a distinguished Marylander died. Col. Chester E. Whiting organized the Army Field Band in 1946 and during his 40-year military career distinguished himself and received many commendations and awards.

After retiring from the Army in 1960, Colonel Whiting taught school in the Prince Georges County school system and was appointed to the school board there and served until 1980. During that time he oversaw the desegregation of the county's schools and provided cool-headed leadership at a time of great change and uncertainty.

Mr. President, I insert the obituary of Col. Chester E. Whiting from the Washington Post into the RECORD:

[From the Washington Post, Mar. 2, 1985]

CHESTER WHITING, EX-P.G. SCHOOL BOARD HEAD, DIES

(By Joseph D. Whitaker)

Chester E. Whiting, 84, a retired Army lieutenant colonel who was founder of the U.S. Army Field Band and the chairman of the Prince George's County school board when a massive and controversial busing plan went into effect in 1973, died of cardiopulmonary arrest March 21 at Walter Reed Army Medical Center. He lived in Takoma Park.

For 40 years he was military musician. During his career he also was a teacher and school administrator in Maryland and his native Massachusetts. A mild-mannered man who was nonetheless capable of pointed remarks, his work in Prince George's was done when the county was still in transition from a rural farm area to a heavily populated group of suburban communities. Whatever his personal views may have been, Col. Whiting provided cool-headed leadership when it was needed to comply with federal court desegregation orders.

Col. Whiting, a Boston native, graduated from the New England Conservatory of Music. Prior to World War II, he was director of instrumental music in the public schools of Malden, Mass.

He also was in the Massachusetts National Guard, and from 1924 to 1940 he led the band of the 110th Cavalry. When the war began, he went on active duty in the Army and was sent to the Southwest Pacific. There, he organized the band of the American (Infantry) Division, which was activated in 1942 in New Caledonia.

He served with the division in the Northern Solomons and the Philippines. In combat, bandsmen act as stretcher bearers for the wounded and perform other duties, but they still keep up their musical skills and turn out for parades and other ceremonies in quiet times. Col. Whiting wrote several marches during this period.

In 1944, he was ordered to Washington to form the Combat Infantry Band, which traveled throughout the country selling War Bonds.

After the war, Col. Whiting decided to stay in the Army. In 1946, he organized what became the U.S. Army Field Band. The unit is based at Fort Meade, Md., and the colonel led it on tours in this country and Europe. Sometimes it played music he wrote himself.

Col. Whiting retired from the Army in 1960 and went to work as a music teacher in the Prince George's County school system. In 1967, he was appointed to the county school board by Gov. Spiro T. Agnew. In 1973, the board became an elected body. Col. Whiting continued to serve until 1980, when he was defeated.

His service spanned the years in which the county's black population was increasing rapidly. School desegregation was a difficult and emotional issue. Col. Whiting favored neighborhood schools and in 1971 and 1972 he joined a majority of the board in voting against full desegregation.

But in 1973, when a federal court ordered extensive busing to carry out a previously mandated desegregation plan, he moved ahead with it. He became chairman of the board in that year and he said the court's edict was the law of the land. He characterized the adverse reaction of some officials and parents as "hysteria."

Col. Whiting's military honors include the Bronze Star and two Legion of Merit medals. He was a past president of the American Band Masters Association.

His marches include "The Doughboy and Marine March," "The Caduceus March," and "The Schoolboards of America March." He also wrote an autobiography called "The Baton and the Pendulum."

Survivors include his wife, Helen B., of Takoma Park; a daughter, Susan E. Whitting, and a stepdaughter, Phyllis H. Boyd, both of San Francisco; a brother, Frank, of Elkin, N.C.; three sisters, Margaret G. Foster of Merrimack, N.H., Florence E. Gilman of Tecumseh, Mich., and Dorothy E. Blamire of Ogunquit, Maine; two grandchildren, and four great-grandchildren.●

PROTECT AND PRESERVE THE SEAFOOD INDUSTRY

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BATEMAN. Mr. Speaker, recently I had the privilege to address the annual meeting of the Virginia Seafood Council in Williamsburg, VA.

The seafood industry is an integral element of the Virginia economy and a significant part of the livelihood of thousands of people in the First Congressional District on and around one of America's great natural resources, the Chesapeake Bay. As such, it was a

pleasure to participate in this program and to share the views and ideas of representatives of this industry on ways to protect and preserve the seafood industry and to speculate on the future of seafood activities in Virginia.

The keynote speaker for the program, the Honorable W. Tayloe Murphy, a member of the Virginia House of Delegates, made an excellent presentation on the state of the seafood industry in Virginia, the clean up of the Chesapeake Bay, and discussed what government should be doing to assist this industry. His remarks included some ideas on what role the Federal Government should play in the seafood industry and I would like to share them with my colleagues.

It might seem totally unnecessary for me to begin this talk by telling you how important I believe the seafood industry of Virginia to be. But the fact of the matter is that I do believe it, and I believe the people of the Commonwealth need to be reminded as often as we can that it is important both in its size and in its relationship to the fisheries of other States and the United States as a whole. Standing alone it is important in terms of its monetary contribution to the Virginia economy and in the number of jobs it provides. In 1983, according to the Marine Resources Commission, Virginia ranked third among the States in the total poundage of its commercial fisheries harvests. Only Louisiana and Alaska were larger. Because menhaden accounts for about 80% of the commercial catch, the Commonwealth ranks only eighth in dockside catch value. Nevertheless, that figure is approximately $85 million. Moreover, some 14,000 people are employed full and part-time in the harvesting and processing of commercial fisheries in the Old Dominion.

The impact of the Virginia Seafood Industry on the State's economy is quite significant. Leonard Shabman and Thomas Johnson of Virginia Polytechnic Institute and State University have estimated that, on the basis of its interaction with other segments of the Virginia economy, the total State output associated with the Virginia Seafood Industry for 1979 was $216,000,000 and the value added to the State economy from the sales of these products was $109,000,000. The seafood industry's contribution to domestic products in the coastal area of the State was estimated to be about 1.25% of the total. Shabman and Johnson considered that percentage very important in the highly urban Tidewater economy.

Having established the importance of the Virginia Seafood Industry both to the Nation and the State, let us examine some trends within the industry, the relationship of those trends to other industries and the State of the environment, as well as the activities of various governments. In making this examination my major emphasis will be on the Chesapeake Bay because the bay has proven more sensitive, and hence, has been more heavily impacted by man's activities than the offshore fishery.

As anyone associated with the seafood industry knows, natural fluctuations in fisheries stocks can have a profound effect on all segments of the industry, as can competition from foreign producers and even from recreational fishermen. Of particular importance have been the trends in decreased harvests of freshwater-spawning fish such as shad and striped bass and decreases in oyster harvests. These trends are even more disturbing when compared with the stable or even increased harvests of marine-spawning fish such as menhaden and bluefish.

The EPA Chesapeake Bay Program found a strong relationship between these trends and trends in water quality and the deterioration of other resources in the bay and its tributaries. Since the 1960's submerged aquatic vegetation such as eelgrass and widgeongrass has declined in abundance and diversity throughout the bay. This trend has moved progressively down the estuary in severity. The amount of water in the main stem of the bay that has low, or no dissolved, oxygen has increased about fifteenfold between 1950 and 1980. Now, from May through September in an area reaching from the Bay Bridge at Annapolis to the Rappahannock River, much of the water deeper than forty feet has no oxygen, and is, thus essentially devoid of life. High concentrations of toxic chemicals, particularly organics and heavy metals, are found near centers of population and industrial facilities. In one instance the commercial fishery of an entire river, the James, was destroyed by the careless and willful discharge of the pesticide Kepone.

The causes of this deteriorating water quality are many but they ultimately boil down to increased inputs of nutrients and toxics into the waters of the bay and its tributaries through the various activities of man. Inefficient agricultural practices result in increases in non-point source runoff of nitrogen and phosphorous. Uncontrolled runoff from urban and suburban areas results in excessive amounts of nutrients and toxics being flushed through storm sewers. Insufficient treatment of municipal and industrial wastes result in point-source discharges of these same nutrients and toxics. Antequated and poorly designed waste treatment systems also overflow and during heavy rainfalls the systems themselves are bypassed, flushing raw sewage into the streams. All of these human activities result in degraded water quality from the standpoint of the living resources that are harvested by the Virginia Seafood Industry.

In order to correct these problems of inefficiency and inadequacy in waste management, governments—both State and Federal—have attempted to implement regulatory programs to curb pollution and to effectively manage the living resources themselves, but often with less than adequate success. Because of the close connection between the living resources and water quality, the seafood industry has a higher stake than most in the regulatory programs of the State and Federal governments.

And so it is important that you ask: "How are we doing in restoring and protecting the bay's environment, on which our industry depends?"

It seems, in my experience, that most assessments concerning the environment are mixtures of good news and bad—of optimism and pessimism. The Chesapeake Bay is no exception. Perhaps this phenomenon is for the best. If the assessments were too rosy, we would all go home and neglect the work that remains to be done. If they were too bleak, we would throw up our hands and abandon the effort.

It is true that there is a gratifying amount of good news about the bay. If nothing else, the past several years have seen the protection and restoration of the Chesapeake Bay move closer to their rightful places in the national consciousness and on the priority lists of both the Federal and State governments. Through careful study, we have begun to gain the knowledge necessary to understand the bay's complex cycles and processes—knowledge that is absolutely necessary if we are to remedy present problems and avoid future ones.

On a more intangible but equally important level, protection of the bay has become a goal that transcends philosophical and political boundaries. You may find some differences in the details, but there is no "conservative" or "liberal", "republican" or "democratic" position on the bay's place as a national treasure, or in the importance of restoring and maintaining it for ourselves and our posterity. The bay is so important, and its plight is so obvious, that it has become one of those rare subjects that generates almost automatic consensus.

This awareness and commitment have already begun to pay dividends. Support for an ambitious set of programs, called the Virginia Bay initiatives was indeed bipartisan. The Governor's original proposal to spend $6 million in the 1984-86 biennium was increased by the 1984 general assembly to $13.3 million. This year's general assembly has just added an additional $3.3 million. Clearly there is concensus on the need to clean up the bay.

But before we indulge too heartily in self-congratulation, we should remind ourselves that in most campaigns the easy victories come early, and may fade as quickly as they came. It is the details, not this big issues, that bring most glorious causes to a sputtering, ignominious halt. And only those who have the patience, resolve and ability to stick around after the opening fanfare and tackle the details will see the fruits of victory.

Unfortunately, the details tend to be unpleasant, lacking in drama, and impossible to resolve without hurting someone's percieved interest.

Past campaigns to "save the bay" have run aground on the details. The effort stopped being fun, and as individual groups which, in the abstract, supported the effort, scrambled to protect their interests, the consensus crumbled like a sand castle at high tide.

In regard to the current "initiatives" we have now reached the "details" stage, and if the effort is to succeed, we must keep a few fundamental principles in mind. These principles apply in any situation where human activity affects the natural environment. And whether you like them or not, and no matter what your personal views or interests might be, they cannot be avoided.

The first, and most important of these principles can be summed up in the phrase, "There is no free lunch." Surprisingly, it was not until the beginning of the last decade that the proposition became sufficiently self-evident to affect national environmental policy. All of our major environmental laws rest on that principle, although their implementation may not honor it in every case.

What it means is simply this: Everything you do that affects the environment imposes a cost, and that cost must be paid by somebody—if not by you, then by someone else.

For years, however, we cheerfully operated under the assumption that where the environment and natural resources were concerned, we could operate outside the laws of nature and economics.

Thus, in the "good old days" cities disposed of their sewage for "free." Factories poured industrial wastes into the bay and its

tributaries at little or no cost—to them. Unfortunately, even though the cost of such activities did not show up on any ledger book, they were being paid for, with heavy interest.

The downstream municipality forced to find another water supply, the dairy farmer forced to go out of business, the waterman facing condemned oyster grounds, the seafood packer forced to look further and further afield for products to market, the tourist campground and charter business whose customers were driven away by polluted water and depleted fishing—all of them picked up the tab for this "free" activity. But, expensive as the bill was, they picked up only part of it. As a society, we have been getting a pretty good glimpse in the past few years of just how big a bill we will have to pay to bring back what has been lost. The vast sums necessary to restore the bay are nothing more than the accumulated sum of many supposedly "free" lunches, with compound interest.

Our environmental laws and regulations, as burdensome as they sometimes may seem, are intended at their most basic level to make sure that persons that benefit from a particular activity pay the full cost of that activity. For example, if a manufacturer is required to install pollution control equipment to protect water quality, that becomes part of his cost of doing business. The cost is borne by the users of his product rather than by those who happen to live and work downstream. Likewise, if a municipality raises its sewer rate to pay for the upgrade of its treatment plant, that increase simply reflects the cost that would otherwise be shown in the degradation and ultimate loss of other uses of the receiving stream.

It is necessary to keep this in mind, as programs to protect the bay begin to pinch. As complaints about cost come in from this group or that group, and as legislators begin to backpedal, fearing the reaction from various constituencies, remember that each exemption, each exception, simply transfers a cost from someone whose responsibility it should be, to someone else. Each time this happens, we grant a subsidy to the favored group just as surely as if we took money from the public coffers and handed it over. Only this type of subsidy is even more dangerous than the monetary kind, because it is paid in a currency that is not replaceable—the very life and health of the bay. Thus, for those whose livelihood depends on the bay, this type of subsidy is fatal. It can be paid only at their direct expense and ultimately, at the price of their ruin.

Another principle that we must keep in mind as we grapple with the details, or hard issues, is that of the commons. Simply stated, the law of the commons decrees that, if each user of a finite resource follows his natural tendency to maximize his benefit from the resource, the combined effect of these individual and seemingly rational actions will destroy the resource. This is true whether we take resources from the commons or put destructive wastes into it. Thus, we agree to restraints on our freedom to use the bay, in the form of conservation laws and environmental regulations, so that we can continue to enjoy its benefits. But, to the extent that anyone is allowed to take from the commons more than it can support, he will diminish the fair share of everyone else, including, eventually, himself. This principle is inexorable, and failure to heed it will lead sooner or later to the bay's destruction.

A third and related principle is that, where the natural environment is concerned, we can never do "just one thing." Every action will have consequences that radiate from it like ripples on a still pond. Some of these are easily foreseeable: some not. Who would have guessed, when DDT was introduced in the 1940's, that in spite of its benefits it would lead to the near extinction of the osprey—that magnificent creature that comes so close to capturing the spirit of the bay itself?

Most activities that affect the bay are of little apparent consequence in themselves—a subdivision here, a road there, a new field cleared from woodland—but as they are added together they have the effect of an avalanche that starts with a few pebbles rolling down a hillside. We can not make decisions by simply trying to determine the effects of individual acts. We have to look at an activity in the context of everything else, including not only our own activities, but the cyclical "wild cards" that mother nature throws in from time-to-time. There are simply too many of us doing too many things in the bay's vicinity to continue with the notion that our individual actions make no difference.

All of these principles that I have mentioned work whether we like them or not. That they have been working all along is demonstrated by the all-too-obvious evidence of the bay's decline.

The most insidious thing about these principles is that they are not always obvious to the individual making day-to-day decisions.

Furthermore, their voluntary observance is not usually in the individual's immediate self-interest. Thus, we must accept the fact that well-designed and evenly-enforced laws and regulations are necessary if the bay is to survive. In some cases, financial incentives may be preferable to regulatory restrictions, but in any case, we cannot rely on platitudes or on appeals to good will to accomplish the job. After all, if protection of the bay were that simple, it is not likely that we would be taking the time to worry about it. That is not to say that along with concrete, effective programs we do not need to expand our concepts of personal responsibility for the bay and for the protection of the environment on which our lives and livelihoods depend. Without an understanding and acceptance of that responsibility, there will never be the kind of mutual support and the willingess to forego some personal gain for the sake of a larger goal, that is necessary to such an undertaking. Too often, unfortunately, we tend to think of conservation as something that someone else will take care of, or that we can accomplish by recycling our newspapers and beer cans and by contributing a few dollars to the Chesapeake Bay Foundation. Not that those things don't help, but they do not discharge our responsibility, either. As one noted conservationist has said, "In our attempts to make conservation easy, we have made it trivial." We need to realize that it is not easy, that it will cost us, but that the investment will be generously—though perhaps slowly—repaid.

A few moments ago I spoke of the principle embodied in the phrase, "There is no free lunch." By now Federal, State and local governments ought to be aware that the lunch isn't free. But, unfortunately, they all want someone else to pick up the check. It is necessary that all levels of government contribute their energies and resources to the effort, and not expect a bailout from the next level up or down. Local governments should not use cutbacks in Federal funding as an excuse to avoid their clear responsibilities to treat their sewage adequately. The State government should not hide behind politically safe but outmoded concepts of local autonomy to avoid dealing with areawide problems such as nonpoint source pollution and nutrient removal. And the Federal Government must acknowledge the fact that "federalism" consists of neither dictation, at one extreme, nor indifference, at the other.

Of course, the problem is that officials at each level of government prefer not to be the ones responsible for the painful, and thus unpopular, decisions. It is easier to call upon someone else to take the responsibility, and then to blame him when the problem continues. That is human nature. But our system of government was not designed to amplify those characteristics of human nature: It is supposed to provide a vehicle for overcoming them so that the public interest is served in spite of our perverse human traits.

As long as each level of government looks on the others as a convenient place to lay blame, the bay's decline will continue despite annual infusions of money from Washington, Annapolis, Harrisburg and Richmond. Until each unit of government accepts its responsibility as a necessary part of a combined function, all the studies and recommendations in the world won't help.

What can each level do? To start with, the Federal Government can acknowledge, openly and without ideological embarrassment, that as part of the Federal system, it has a rightful role in the protection of our environment. Only the Federal Government has the resources to undertake the planning, research, standards-setting and technical assistance that make possible the determination and attainment of long-range, national goals. Without the continued active presence of the Federal Government, protection of the bay is impossible. After all, it wasn't until the enactment of national legislation and the assumption of an active Federal role in the early 1970's that we saw a reversal in the serious and accelerating decline of our environment.

On the other hand, the Federal Government needs to resist the temptation to think that it knows best when it comes to the details of administration and enforcement. It also needs to keep in mind the value of consistency. It can not change the groundrules every few years and expect anything worthwhile to result.

The States, for their part, must not forget that if they want to be treated as equal partners in a Federal system, they must accept the political and fiscal responsibility that goes along with the territory. The States are best situated to administer and enforce most environmental programs. They understand, often far better than Washington does, the particular needs and problems of administering those programs. But "flexibility" doesn't mean license. The States must accept their full responsibility to ensure that the laws they administer are vigorously and evenly enforced. Because there is no free lunch, you don't help industry or your State's economy in the long run by lax enforcement of environmental laws.

Looking in the other direction, the States must also acknowledge their responsibility for managing regionwide problems where traditional mechanisms are demonstrably inadequate. While land use control is traditionally—and properly—a local matter, it will not do to hide behind tradition if that prevents a solution to an obvious problem that transcends local boundary lines.

Local governments, for their part, must accept more of the responsibility for paying the cost of their activities and decisions that affect the bay. The writing is clearly on the wall that Federal support to local governments will soon be sharply curtailed, if not eliminated. While it is tempting to use these cutbacks as an excuse for delay or inaction, localities will have to face the fact that they must find other ways to make up the shortfall. This may mean imposing higher costs on local users, rather than spreading the cost across the entire tax base. But if the localities do not absorb the cost, the bay will.

Local governments, to the extent that they have the authority to do so, must look at the overall impact of their land use control authority and allow protection of the bay equal time with local growth and development. To the extent that localities are restricted in their ability to do so, they should be given the necessary authority by the legislature.

To sum up, we are all in this effort together. Speeches are easy to make. It takes no effort to profess one's love for the bay, and not much more to attend a conference where voices professing concern for the bay are raised in unison. In the past year, we have gone beyond the talking stage and are beginning to see some concrete results. But soon, the shoe will start to pinch. We will all have to accept some significant costs and make some painful choices. Those of us in political life will have to take the risk of making decisions that will be unpopular with some powerful interests and constituencies. But there is no easy way to do it, and there is no way it will be done if responsibility is parceled out only part way. I would like to think, with reason for optimism, that the bay will be seen as worth the effort by everyone involved.●

KEY

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. UDALL. Mr. Speaker, it has become my practice from time to time to list my votes in the CONGRESSIONAL RECORD. I strongly believe that the people of the Second District of Arizona have a right to know where I stand on the issues decided by this body, and I have found that printing my record here is the best way to provide that information.

This is not an all inclusive list. I have omitted noncontroversial votes such as quorum calls, motions to resolve into the Committee of the Whole House, and motions to approve the Journal of the previous day.

The descriptions are necessarily somewhat short, and I am sure that some of my constituents will have additional questions about the issues described here. So I invite them to write me for more specifics.

The votes are described as follows:

KEY

1. Rollcall Number;
2. Number of the bill or resolution;
3. Title of the bill or resolution;
4. A description of the vote;
5. The date of the vote;
6. My vote, in the form Y=yes, N=no, and NV=not voting;
7. The vote of the entire Arizona delegation in the form (yes-no-not voting);
8. An indication of whether the motion or amendment was approved or rejected; and
9. the vote total.

251. H.R. 5798. Treasury, Postal Service and General Government Appropriations, Fiscal 1985. Nelson, D-Fla., amendment to reduce by $147,100 the $1.17 million appropriation in the bill for pension, salary and staff of former presidents. Adopted 347-59: Y(5-0-0), June 27, 1984.

252. H.R. 5798. Treasury, Postal Service and General Government Appropriations, Fiscal 1985. Passage of the bill to provide fiscal 1985 appropriations of just under $12 billion for the Treasury Department, U.S. Postal Service, Executive Office of the President and other agencies. Passed 313-98: Y(3-2-0), June 27, 1984.

253. H.R. 5898. Military Construction Appropriations, Fiscal 1985. Adoption of the rule (H. Res. 532) providing for House floor consideration of the bill to appropriate $8,258,471,037 for military construction projects of the Department of Defense in fiscal 1985. Adopted 366-35: Y(5-0-0), June 27, 1984.

254. H.R. 5898. Military Construction Appropriations, Fiscal 1985. McNulty, D-Ariz., amendment to reduce spending in the bill by $25 million to reflect savings achieved by greater reliance on performance standards in contracting for Pentagon construction projects. Adopted 219-180: Y(2-3-0), June 27, 1984.

255. H.R. 5898. Military Construction Appropriations, Fiscal 1985. Passage of the bill to appropriate $8,258,471,037 for military construction projects of the Department of Defense in fiscal 1985. Passed 347-52: Y(5-0-0), June 27, 1984.

256. H.R. 5927. Debt Limit Increase. Ways and Means Committee amendment to raise the existing public debt limit of $1.52 trillion by $232 billion to $1.753 trillion, an amount estimated to provide sufficient government borrowing authority through June 1985. Rejected 87-332: N(1-4-0), June 28, 1984.

257. H.R. 5927. Debt Limit Increase. Passage of the bill to increase the existing public debt limit of $1.52 trillion by $53 billion to $1.573 trillion, an amount estimated to provide sufficient government borrowing through August 1984. Rejected 138-282: N(2-3-0), June 28, 1984.

258. H.R. 5154. National Aeronautics and Space Administration Authorization, Adoption of the conference report on the bill to authorize $7.5 billion for the National Aeronautics and Space Administration in fiscal 1985. Adopted 298-119: Y(3-2-0), June 28, 1984.

259. H.R. 5753. Legislative Branch Appropriations, Fiscal 1985. Adoption of the conference report on the bill to appropriate $1,551,015,038 in fiscal 1985 for Congress and related agencies. Adopted 253-157: Y(3-2-0), June 28, 1984.

260. H.R. 5899. District of Columbia Appropriations, Fiscal 1985. Daschle, D-S.D., amendment to the Walker, R-Pa., amendment to reduce the funding levels in the bill by 1 percent. Rejected 138-286: N(2-3-0), June 28, 1984.

261. H.R. 5899. District of Columbia Appropriations, Fiscal 1985. Walker, R-Pa., amendment to cut the funding levels in the bill by 2 percent. Adopted 239-186: N(3-2-0), June 28, 1984.

262. H.R. 5899. District of Columbia Appropriations, Fiscal 1985. Walker, R-Pa., amendment to cut the funding levels in the bill by 2 percent. Rejected 151-273: N(3-2-0), June 28, 1984.

263. H.R. 5899. District of Columbia Appropriations, Fiscal 1985. Passage of the bill to appropriate $639,470,000 in federal funds, and $2,317,875,000 in District funds, for fiscal 1985. Passed 308-116: Y(2-3-0), June 28, 1984.

264. H.R. 5680. Federal Pay Equity. Daniel B. Crane, R-Ill., amendment to the Oakar, D-Ohio, amendment, to change the definition of discriminatory wage-setting practices to be examined in the study required by the bill from "comparable" duties and working conditions to "substantially equal" duties and working conditions. Rejected 22-395: N(2-3-0), June 28, 1984.

265. H.R. 5680. Federal Pay Equity. Passage of the bill to require a study of possible discriminatory wage-setting practices in the federal government and to establish a federal employee performance management and recognition system. Passed 413-6: Y(5-0-0), June 28, 1984.

266. H.R. 3678. Water Resources Development Authorization. Shaw, R-Fla., amendment to deauthorize the Cross-Florida Barge Canal. Rejected 201-204: Y(1-3-1), June 28, 1984.

267. H. Con. Res. 332. Andrei Sakharov and Yelena Bonner. Adoption of the concurrent resolution expressing the sense of Congress that the Soviet Union should provide signers of the Helsinki Final Act with specific information on the whereabouts, health and legal status of Soviet dissidents Andrei Sakharov and Yelena Bonner (Sakharov's wife). Adopted 399-0: NV(2-0-3), June 29, 1984.

268. H.R. 5950. Quadrennial Political Party Conventions. Adoption of the rule (H. Res. 544) providing for House floor consideration of the bill to increase the federal contribution to the quadrennial political party presidential national nominating conventions. Adopted 267-136: NV(1-2-2), June 29, 1984.

269. H.R. 5953. Debt Limit Increase. Ways and Means Committee amendment (offered by Rostenkowski, D-Ill.) to raise the existing public debt limit of $1.52 trillion by $232 billion to $1.753 trillion, an amount estimated to provide sufficient government borrowing authority through June 1985. Rejected 109-300: NV(1-2-2), June 29, 1984.

270. HR. 5953. Debt Limit Increase. Passage of the bill to increase the existing public debt limit of $1.52 trillion by $53 billion to $1.573 trillion, an amount estimated to provide sufficient government borrowing authority through August 1984. Passed 208-202: NV(2-1-2), June 29, 1984.

271. H.R. 5950. Quadrennial Political Party Conventions. Passage of the bill to increase the federal contribution to the quadrennial political party presidential national nominating conventions. Passed 226-169: NV(1-2-2), June 29, 1984.

272. H.R. 5174. Bankruptcy Amendments of 1984. Adoption of the conference report on the bill to restructure the bankruptcy courts, bar companies filing for bankruptcy from abrogating their labor contracts without prior court approval, make it more difficult for consumers to declare bankruptcy and cancel their debts, provide expedited procedures for farmers and fishermen to recover their products or proceeds there from when grain elevators or processing plants go bankrupt, and bar the discharge in bankruptcy of debts incurred as a result of

drunken driving. Adopted 394-0: NV(3-0-2), June 29, 1984.

273. H.R. 3678. Water Resources Development Authorization. Hopkins, R-Ky., amendment to require state cost-sharing for the construction of the Falmouth Dam in Kentucky. Rejected 148-196: NV(2-1-2), June 29, 1984.

274. H. Con. Res. 334. Adjournment Resolution. Adoption of the concurrent resolution to provide for the adjournment of the House and Senate from June 29 to July 23, 1984. Adopted 319-9: NV(3-0-2), June 29, 1984.

275. H.R. 3678. Water Resources Development Authorization. Petri, R-Wis., amendment to require non-federal interests to pay certain shares of water project costs during the project's construction, require non-federal interests to pay 30 percent of costs of general cargo ports, and set an annually declining ceiling on obligation of general revenues for inland waterway projects. Rejected 85-213: NV(0-2-3), June 29, 1984.

276. H.R. 3678. Water Resources Development Authorization. Passage of the bill to authorize various water resources development and conservation projects to be constructed by the Army Corps of Engineers. Passed 259—33: NV(2-0-3), June 29, 1984.

277. H.R. 5541. Public Broadcasting Authorization. Dannemeyer, R-Calif., substitute to the Oxley, R-Ohio, amendment to limit the authorized funding for the Corporation for Public Broadcasting to $130 million in each of fiscal years 1987-1989. Rejected 95-298: N(1-3-1), July 24, 1984.

278. H.R. 5541. Public Broadcasting Authorization. Oxley, R-Ohio, amendment to reduce the authorized funding for the Corporation for Public Broadcasting to $186 million in fiscal 1987, $214 million in 1988 and $246 million in 1989; and to reduce the authorized funding for the Public Telecommunications Facilities Program to $14 million in fiscal 1985, $16 million in 1986 and $18 million in 1987. Rejected 176-217: N(2-2-1), July 24, 1984.

279. H.R. 5541. Public Broadcasting Authorization. Passage of the bill to authorize funding for the Corporation for Public Broadcasting at $238 million in fiscal 1987, $253 million in 1988 and $270 million in 1989; and for the Public Telecommunications Facilities Program, $50 million in fiscal 1985, $53 million in 1986 and $56 million in 1987. Passed 302-91: Y(3-1-1), July 24, 1984.

280. H.R. 1580. Aviation Drug-Trafficking Control Act. Mineta, D-Calif., motion to suspend the rules and pass the bill to increase penalties for aircraft pilots and owners who knowingly parciptate in illegal drug trafficking. Motion agreed to 393-1: Y(4-0-1), July 24, 1984.

281. H.R. 5616. Counterfeit Access Device and Computer Fraud and Abuse Act. Hughes, D-N.J., motion to suspend the rules and pass the bill to make it a federal crime to obtain unauthorized access to computers and to set new penalties for trafficking in fraudulent credit cards or bank cards, or cards that are stolen, lost or revoked. Motion agreed to 395-0: Y(4-0-1), July 24, 1984.

282. H.R. Emergency Mathematics and Science Education Act. Perkins, D-Ky., motion to suspend the rules and discharge the Education and Labor and Judiciary Committees from further consideration of the bill and to concur in the Senate amendment to make it unlawful for high schools receiving federal aid to deny use of their building to religious, political and other student groups, if such access is granted to other student groups. Motion agreed to 337-77: Y(4-0-1), July 25, 1984.

283. H.R. 1310. Emergency Mathematics and Science Education Act. Perkins, D-KY., motion to concur in the Senate bill to make it unlawful for high schools receiving federal aid to deny the use of their buildings to religious, political and other student groups, if such access is granted to other student groups; and to authorize funds for fiscal 1984-86 for math-science improvement, asbestos abatement, desegregation aid and other programs. Motion agreed to 393-15: NV(3-0-2), July 25, 1984.

284. H.R. Christopher Columbus Quincentenary. Adoption of the conference report on the bill to establish a commission to observe the 500th anniversary of Columbus' first voyage to the New World. Adopted 279-130: Y(2-2-1), July 25, 1984.

285. H.R. 5973. Interior Appropriations, Fiscal 1985. Adoption of the rule (H. Res. 551) providing for House floor consideration of the bill to make fiscal 1985 appropriations for the Interior Department and related agencies. H. Res. 551 would not have waived points of order against amendments to rescind appropriated funds from the U.S. Synthetic Fuels Corporation. Rejected 148-261: N(1-3-1), July 25, 1984.

287. H.R. 11. Education Amendments/School Prayer. Walker, R-Pa., amendment to the Coats, R-Ind., amendment, to cut off federal education assitance to states and school districts with policies that prohibit silent or vocal prayer in public schools. Rejected 194-215: N(2-2-1), July 26, 1984.

288. H.R. 11. Education Amendments/School Prayer. Gunderson, R-Wis., amendment to the Hunter, R-Calif., substitute for the Coats, R-Ind., amendment to prohibit states and school districts from denying individuals the opportunity to participate in moments of silent prayer in public schools. The Gunderson amendment struck language in the Hunter amendment that would have cut off federal funds to states and schools that prohibit voluntary spoken and silent prayer in the schools. Adopted 378-29: Y(4-0-1), July 26, 1984.

289. H.R. 11. Education Amendments/School Prayer. Coats, R-Ind., amendment as amended by the Hunter, R-Calif., substitute as amended by Gunderson, R-Wis., to prohibit states and school districts from denying individuals the opportunity to participate in moments of silent prayer in public schools: to provide that no person could be required to participate in prayer and to stipulate that federal, state and local officials could not influence the form or content of any prayer. Adopted 356-50: Y(4-0-1), July 26, 1984.

290. H.R. 11. Education Amendments/School Prayer. Goodling, R-Pa., perfecting amendment to the Ford, D-Mich., substitute for the Goodling amendment to reduce fiscal 1985 authorizations for education programs in the bill from $1.7 billion to $947 million. The perfecting amendment was identical to the original Goodling proposal that that Ford substitute would have blocked from coming to a vote. Rejected 169-233: N(1-2-2), July 26, 1984.

291. H.R. 11. Education Amendments/School Prayer. Goodling, R-Pa., amendment as amended by the Ford, D-Mich., substitute, to reduce fiscal 1985 authorizations for education programs in the bill from $1.7 billion to $1.32 billion. Adopted 397-0: Y(3-0-2), July 26, 1984.

292. H.R. 11. Education Amendments/School Prayer. Passage of the bill to reauthorize through fiscal 1989 11 education programs, including bilingual education, impact aid and grants for the education of adults, immigrants and women, and to prohibit states and school districts from denying individuals the opportunity to participate in moments of silent prayer in public schools. Passed 307-85: Y(2-1-2), July 26, 1984.

293. H.R. 4784. Trade Remedies Reform Act. Frenzel, R-Minn., motion to recommit the bill to the Ways and Means committee with instructions to modify the legislation, including elimination of a provision making the use of unfairly priced parts in manufactured goods imported to the United States an unfair trade practice. Motion rejected 128-231: N(1-2-2), July 26, 1984.

294. H.R. 4784. Trade Remedies Reform Act. Passage of the bill to expand the range of unfair trade practices eligible for retaliation by the United States. Passed 259-95: Y(3-0-2), July 26, 1984.

295. H. Res. 558. George Hansen Reprimand. Adoption of the resolution to reprimand Rep. George Hansen, R-Idaho, for failing to disclose his financial dealings as required under the 1978 Ethics in Government Act. Adopted 354-52: Y(3-2-0), July 31, 1984.

296. H. Res. 555. Anne M. Burford Appointment. D'Amours, D-N.H., motion to suspend the rules and adopt the resolution urging President Reagan to withdraw the appointment of former Environmental Protection Agency Administrator Anne M. Burford to be chairman of the National Advisory Committee on Oceans and Atmosphere. Motion agreed to 363-51: Y(2-3-0), July 31, 1984.

297. H.R. 6028. Labor, Health and Human Services, Education Appropriations, Fiscal 1985. Dannemeyer, R-Calif., amendment to cut spending in the bill by $147.5 million through a variety of cost/saving measures. Rejected 182-226: N(4-1-0), Aug. 1, 1984.

298. H.R. 6028. Labor, Health and Human Services, Education Appropriations, Fiscal 1985. Frenzel, R-Minn., amendment to reduce discretionary spending in the bill by 5.9 percent across-the-board, or $1.5 billion. Rejected 144-276: N(3-2-0), Aug. 1, 1984.

299. H.R. 6028. Labor, Health and Human Services, Education Appropriations, Fiscal 1985. Passage of the bill to provide $85,579,931,000 in fiscal 1985 appropriations and $10,568,609,000 in advance fiscal 1986 appropriations for the Departments of Labor, Health and Human Services, Education and other related agencies. Passed 329-91: Y(3-2-0), Aug. 1, 1984.

300. H.R. 6040. Supplemental Appropriations, Fiscal 1984. Walker, R-Pa., amendment to reduce the overall spending amount in the bill by 1 percent. Rejected 184-238: N(2-3-0), Aug. 1, 1984.●

THE NICARAGUANS AND TERRORISM INTERNATIONAL: BIRDS OF A FEATHER

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BROOMFIELD. Mr. Speaker, as our unsuspecting country is treated to a professional public relations onslaught by the Sandinistas, I want to pause and consider the seamier side of

that Marxist-Leninist government. I am deeply concerned about their attitudes toward terrorism and their affiliation with well-known terrorists from various groups around the world.

Few of us know that some Sandinistas were trained in the past by PLO terrorists; some were actually involved in PLO terrorist operations. At the present time, a number of well-known international terrorists are still residing in Nicaragua while others pay courtesy calls to that country. It is reported that a number of international terrorists, wanted on terrorist charges in their home countries, are living in Nicaragua. They include a few former Red Brigade members who may be serving in the Sandinista Army. Other leftists in Managua are fugitive militants, and are granted jobs, identification papers and a safe haven in that country.

As we in the Congress and the free world do as much as we can to confront the brutal hand of terrorism, we should carefully look at the Sandinistas and the kinds of people they refer to as comrades. Let us all judge the Sandinistas by their actions and not by their words.

With these sobering thoughts in mind, I commend his informative article to my colleagues in the Congress.

[From the Miami Herald Mar. 8, 1985]

SANDINISTAS ATTRACT A WHO'S WHO OF TERRORISTS

(By Juan O. Tamayo)

MANAGUA, NICARAGUA.—He is a 5-foot-11, gray-eyed surgeon, treating children in a Managua slum. She is a petite journalist, writing for a Paris magazine. Both are fugitives, wanted in their native Italy for leading left-wing guerrilla gangs.

Two West Germans linked to the Baader-Meinhof Gang are now officers in the People's Sandinista Army. One is in charge of a counterintelligence unit. The other commands an artillery battalion.

And an Argentine Montonero guerrilla, widow of the Argentine rebel who led the commando team that assassinated former Nicaraguan President Anastasio Somoza in Paraguay, is dating a ranking Nicaraguan official trained as a guerrilla by the PLO in Lebanon in the early 1970s.

These are but a few of the left-wing extremists from Europe and Latin America who came to Managua after the 1979 Sandinista revolution, seeking safe haven and a chance to prove their solidarity with the Nicaraguan government.

It is the same kind of revolutionary "networking"—leftist militants call it "internationalism"—that benefitted the Sandinistas during their long guerrilla struggle to topple Somoza.

In the late 1960s, the Sandinistas signed a pact with the Palestine Liberation Organization to train Nicaraguan guerrillas in Lebanon. Somoza was a steadfast supporter of Israel, and Nicaragua was one of the first nations to recognize the Israeli state in 1948.

A former Israeli intelligence agent once based in Nicaragua said at least 150 Sandinistas were trained in the 1970s in Lebanon camps run by the Popular Front for the Liberation of Palestine, the PLO faction most committed to terrorism in Europe and the Middle East.

Veteran Sandinistas say that it was at the PFLP camps that the Nicaraguans first met European leftists—Germans from the Baader-Meinhof Gang and its spin-offs; Italians from the Red Brigades and other radical groups—and began establishing the close personal relationships that persist today.

"The European leftists believe that the Ho Chi Minh Trail and the Quebrada del Yuro run through their countries, too," said one Sandinista official, referring to a key guerrilla supply line in the Vietnam War and the Bolivian gully where famed guerrilla chief Ernesto "Che" Guevara was killed in 1967.

One PLO-trained Sandinista, Patricio Arguello, joined the PFLP's most notorious terrorist, Laila Khaled, in a botched attempt to hijack an Israeli jetliner from Amsterdam to New York on Sept. 6, 1970. Israeli security agents killed Arguello and captured Khaled, who was later exchanged for hostages seized by another group of PFLP hijackers. The Sandinistas have named a geothermal power plant after Arguello.

Another PLO-trained Nicaraguan was Communications Minister Enrique Schmidt, killed in combat with anti-Sandinista guerrillas last November. Schmidt's widow, a West German citizen born in the Basque region of Spain, now works for the Sandinista Front's Department of Political Education. Health Ministry workers say she lectured them last year on the ideology of the Basque Homeland and Liberty guerrilla group, known as ETA, fighting for independence from Spain.

Yet another Sandinista trained in Lebanon is Deputy Interior Minister Rene Vivas. He is now dating an Argentine Montonero guerrilla, the widow of Julio Alfredo Irurzun, head of the Montonero team that assassinated Somoza in Paraguay in September 1980, in what the killers called a show of "revolutionary solidarity" with Nicaragua.

The PLO now has a fully accredited embassy in Managua. And the Sandinista Front has "Fraternal" relations with leftist groups from Italy, West Germany, Spain's Basque region, Argentina, Uruguay, Chile, Paraguay, Peru, Colombia, Libya, El Salvador, Honduras, Guatemala and Costa Rica.

The Italian government on Feb. 8 gave the Sandinistas a list of 22 Italian leftists believed to be living in Nicaragua—about half of them wanted fugitives, the rest described only as "extremists." The Foreign Ministry said it knew nothing about the Italians but would investigate.

Topping the list, obtained by The Herald, is Guglielmo Guglielmi, 39, a one-time Rome surgeon facing five arrest warrants for crimes between 1979 and 1983 ranging from kidnapping to illegal weapons possessions to "participation in armed gangs."

International terrorism records show that Guglielmi, now working at a government-run children's clinic in the Managua slum of Ciudad Sandino, was a top leader of the Unita Combattente Comunisti, a guerrilla band that spun off from the Red Brigades in the late 1970s. He was convicted in absentia last June of kidnapping and sentenced to 22 years in prison.

Also on the list is a 33-year-old Milan sociologist wanted on a warrant charging her with "organizing and leading armed gangs in Italy and abroad." An Italian woman with the same name as the fugitive is a journalist accredited in Managua as correspondent for a Paris-based magazine that specializes in Third World issues.

The fugitive is also described in the international records as a member of a group that helped Guglielmi and three other Italian fugitives move from Paris to Nicaragua after the Italian government accused France in 1983 of harboring more than 200 wanted Italian militants.

The woman journalist in Managua declined comment when two Italian journalists tried to interview her last month. "I am not who you think I am," she said. Her name is known but omitted here because of the absence of proof that the journalist and the fugitive are the same.

Roberto Sandalo, 27, a Red Brigades defector living in Kenya, told Italy's Oggi news magazine last month that five Brigadisti are now serving as officers in the Sandinista army. "That's a lie," Defense Minister Humberto Ortega said last week. "We do not require that type of support to defend our principles and our flags."

Sandinista government sources said two West Germans who have bragged of having been part of the Baader-Meinhof Gang are now serving in the army—one as a captain in an artillery unit stationed at the Montelimar base southwest of Managua and the other attached to a military counterintelligence unit.

A West German known only as "Fitz" has told friends there is a warrant for his arrest in Germany. "Fitz," described as an anarchist, fought in the Sandinista revolution and later worked as an administrator at the government-owned Julio Buitrago sugar mill.

Also living in Nicaragua is Peter Paul Zahl, a well-known West German writer with former links to Baader-Meinhof who spent four years in prison for the attempted murder of a policeman in Cologne, Germany. Friends said Zahl, who is not wanted for any other crimes, is in Bluefields setting up a theater group for the port's West Indian blacks.

Nicaraguan government officials said a handful of Basque ETA guerrillas also lived in Managua until 1983, when Spanish Prime Minister Felipe Gonzalez, a strong Sandinista sympathizer, protested to the Managua government. Several ETA members moved to neighboring Costa Rica and some went to Venezuela, the officials said.

Gregorio Jimenez, 32, an ETA militant wanted by the Spanish government on terrorism charges, was arrested in Costa Rica in September 1983 and charged with plotting to assassinate Eden Pastora, leader of an anti-Sandinista grerrilla group based in Costa Rica.

Costa Rican Justice Ministry officials say Jimenez, still awaiting trial, has confessed that a Managua-based group of ETA rebels planned Pastora's assassination, without authorization from the Sandinistas, but as a sign of "revolutionary solidarity."

Since the revolution triumphed, Nicaragua has also been visited for varying periods by a string of leftist militants from Europe and Latin America, many of them simple political exiles, some of them well-known guerrilla leaders.

Mario Firmenich, head of Argentina's Montoneros, traveled legally through Nicaragua—once staying several days in the home of Interior Minister Tomas Borge—as well as Mexico and Costa Rica before the Buenos Aires government put out a warrant for his arrest. He was detained in Brazil last year and extradited to Argentina.

Two Baader-Meinhof gang members visited Nicaragua in 1980 to express their support for the Sandinistas and explain the

reasons for their own struggle. They sought out three foreign journalists living in Managua and granted them interviews, one of the reporters said.

And Lauro Azzolini, 41, a Red Brigades founder sentenced in absentia to 30 years in prison for the 1978 kidnap-assassination of Italian Prime Minister Aldo Moro, visited Nicaragua in early 1980 and tried to hold a news conference to explain Moro's slaying. Journalists invited to the conference said the Sandinistas blocked it.

Azzolini, alleged to have been the man who killed Moro with a close range blast from a Czechoslovak-made Skorpion machine pistol, was later captured in Italy and is in prison.

THE INTERNATIONAL CONNECTION—NICARAGUA'S NETWORK OF THE LEFT

PLO—A PLO faction trained as many as 150 Sandinista guerrilla fighters in the 1970s, including the late head of the Nicaraguan telecommunications office. A Sandinista, Patricio Arguello, was killed during a Palestinian hijacking attempt. The PLO now has an embassy in Managua.

Red Brigades—Sandinistas reportedly first met members of Italy's Red Brigades in Palestinian training camps. The Italian government has claimed that 22 terrorists and political extremists now are living in Nicaragua, a claim the Sandinistas say they will investigate.

Baader-Meinhof—Sandinista contacts with Baader-Meinhof terrorists also began in Palestinian training camps. Two West Germans now in the Sandinista army reportedly have said they were Baader-Meinhof members. Other Baader-Meinhof members are reported to have visited Nicaragua since the revolution.

Montoneros—Former Sandinista fighter Eden Pastora says 20 to 30 of the Argentine guerrillas joined Sandinistas fighting Somoza. A Montonero commando team assassinated Somoza in Paraguay. Several Montoneros now live in Nicaragua.●

SEX EDUCATION IS THE ONLY ANSWER

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. PORTER. Mr. Speaker, recently the Chicago Sun-Times ran an article entitled "Sex Education is the Only Answer" which reports on a study released by the Alan Guttmacher Institute on the subject of teenage pregnancy. The article raises some very important issues regarding the use of contraceptives by teenagers in this country. I recommend the article to my colleagues.

SEX EDUCATION IS THE ONLY ANSWER

(By Michael J. McManus)

At a recent conference sponsored by the Children's Defense Fund, I heard about three programs that have cut teenage pregnancy rates in half in cities as diverse as Jackson, Miss., St. Paul, Minn., and Houston.

The need for such programs became clear 10 days ago in a report released by the Alan Guttmacher Institute.

Only 14 teens out of 1,000 get pregnant in the Netherlands, but 96 per 1,000 do so in America. The figures for the other countries: Sweden 35, France 43, Britian 45 and Canada 44 per 1,000.

Chances are, every assumption you might make is wrong:

America has higher rates because its high minority population is more inclined to have sex at an earlier age. While black teens are twice as likely to get pregnant as whites (1,631,000 for black vs. 831,000 for whites), our white pregnancy rate is at least double that of other Western countries.

Ready access to abortion here prompts greater sexual activity than it does elsewhere. Actually, abortion is more available and cheaper in the other nations. It is free in France and Sweden, for example, but their abortion rates are half that of the United States.

A thesis that this columnist advanced last fall is also a myth—that the availability of welfare induces poor teens to have babies so they can move out.

In most cases, support appears to be more generous in other countries than that provided under the Aid to Families with Dependent Children.

Americans are more sexually active than Canadians or Europeans, some say. Not so. The median age at which half of teen females have had sex is the same in the United States, France, Britain and the Netherlands, slightly under 18. Sweden's median age is a year younger, and Canada's a year older.

The most important myth is that America's high pregnancy rate is due to greater availability of birth control is more available in other countries and is free or nearly so, but more costly and less accessible in the United States. And fewer American teens use contraceptives, and of those who do use them, they are less likely to use the Pill, the most effective method.

Thus, the heart of America's teen pregnancy problem is that they are having sex without birth control.

European countries believe that government has a responsibility to take every step possible to prevent pregnancies of unwed teenagers—including giving free birth control to sexually promiscuous ones.

That is the heart of the programs in St. Paul, Jackson and Houston. In each city, birth control assistance is given in the schools.

In Jackson, Dr. Aaron Shirley, director of the Jackson-Hinds Comprehensive Health Center, got a report in 1979 that there were 120 student mothers in high school out of a population of 3,000. Only a few students had come to the center for birth control assistance.

So Shirley went to the principal and worked out a unique solution. His center now runs the school's entire health program—ranging from examinations of athletes to testing for hypertension and routine care.

Two questions were added to the form every student must fill out: Are you sexually active? If so, are you using contraceptives?

Students generally answered the form honestly, giving the staff the opening to urge sexually active students to use birth control.

The result? Now there are only 40 student mothers—not 120. Why shouldn't every high school adopt a similar strategy?●

SUPPORT OF VETO OF TAX INCREASE

HON. CONNIE MACK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. MACK. Mr. Speaker, yesterday my distinguished colleague from Texas, BEAU BOULTER, and I went to the White House to express our support to the President for his opposition to new taxes. Representative BOULTER and I delivered a letter to the President signed by 147 Members of this House which guarantees that we will sustain his veto of any legislation raising taxes.

With successive $200 billion plus deficits on the horizon for years to come, we believe Congress must act now to enact substantial deficit reduction measures. Decisions to cut popular problems are not easy, but we have no choice; the continued health of our economy is at stake.

The American public has unambiguously expressed its view that deficit reduction must come entirely from the spending side. Our constituents will not tolerate a citizen bailout of the Government through increased taxes. Accordingly, as the House moves forward in the budget process, none of us should be deceived into thinking that we can avoid these difficult program reforms and eliminations by simply looking at revenue proposals.

The President will not hesitate to veto legislation raising taxes and the signers of this letter have pledged to sustain his veto. Plans for a revenue escape through a hike in taxes therefore have been taken off the table and thrown into the trash can.

Mr. Speaker, attached for the RECORD is a copy of the letter presented to President Reagan.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, March 18, 1985.

Hon. RONALD W. REAGAN,
President of the United States, The White House, Washington, DC.

DEAR MR. PRESIDENT: We wholeheartedly support your commitment to veto any increase in taxes.

The American people expressed themselves clearly in the November election: they oppose any attempt by Congress to tax its way out of the deficit problem.

When you challenged the legislative branch to "make my day," you again demonstrated the political courage necessary to tackle the deficit problem head on. Mr. President, we stand with you all the way.

We, the undersigned members of Congress, join with the American people in support of your veto of any legislation raising taxes.

Sincerely,

CONNIE MACK.
BEAU BOULTER.

REPEALING A USEFUL TAX PROVISION (SECTION 936) IS HARDLY THE BEST WAY TO SIMPLIFY IT

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FUSTER. Mr. Speaker, very soon, both Houses may have to decide on a proposal that would be a disaster both for the United States and Puerto Rico. I refer to the proposed repeal of section 936 of the IRS Code, which provides an essential fiscal incentive to U.S. corporations doing business in Puerto Rico. Section 936 is to most an obscure provision of the code referred to as the "territorial exemption." However, to the 3.5 million American citizens living in Puerto Rico, that arcane language translates into a vital bread-and-butter matter whose elimination would spell disaster to the economy of our island, which is already suffering from a staggering 23-percent unemployment rate.

The repeal of section 936 will cause severe economic and social hardships in Puerto Rico while producing no appreciable revenue gains and a significant net revenue loss for the U.S. Treasury. It would also undermine the U.S. security interests in the political stability of the Caribbean region and place an onerous strain on United States-Puerto Rico relations.

Norman Ture has contributed an enlightening article to the debate on section 936 entitled "Treasury Prepares a Caribbean Austerity Initiative" published in the Wall Street Journal of April 11, 1985. I commended his article to my colleagues' attention in the hope that they will agree with us that the elimination of section 936 from the Tax Code would be untimely, very detrimental to the United States, and, as Ture says: "* * * repealing a useful tax provision is hardly the best way to simplify it * * *".

I insert the entire article into the RECORD:

[From the Wall Street Journal, Apr. 11, 1985]

TREASURY PREPARES A CARIBBEAN AUSTERITY INITIATIVE

(By Norman B. Ture)

A Treasury Department official once calculated on the back of an envelope what the "cost" was of not applying the corporate income tax to Puerto Rican subsidiaries of mainland corporations. It went like this: You figure out what the corporations would pay if they had to pay the tax and, of course, nothing else changed. You assume, that is, that the plant would still be in Puerto Rico, or at least in territory subject to U.S. taxes. Then you divide this number by the number of Puerto Ricans on the payrolls of these plants. You find that it's "cheaper" to give the Puerto Ricans more food stamps.

Ever since this idiot calculation was first made, the Internal Revenue Service has been gunning for Section 936 of the IRS code, the possessions corporation tax credit.

Under this provision, affiliates of U.S. mainland companies engaged in business in a U.S. possession, chiefly in Puerto Rico, may claim a credit against their federal income-tax liabilities with respect to the income produced by these affiliates in the possession. Coupled with the tax holidays granted by Puerto Rico under Operation Bootstrap, qualifying possessions corporations are substantially free of income tax on their possessions source income. The Treasury Department's tax-reform proposal wants to repeal the Section 936 tax credit because it believes that the current possessions corporations tax system is complex, expensive and inefficient.

The complexity in the possessions corporations provisions is, of course, primarily of the Treasury's own making. Treasury is to be commended for acknowledging this complexity, but repealing a useful tax provision is hardly the best way to simplify it. The charge that the credit is expensive and ineffective is based on the Treasury's gross overestimate of the tax revenue it forgoes because of the credit and an equally gross underestimate of the number of jobs that result from the operations of possession corporations in response to the Section 936 credit.

The Treasury Department, not willing to give the Puerto Ricans cold turkey, acknowledges that repeal of the credit will cause disruptions in the possessions, particularly in Puerto Rico. It proposes, therefore, to replace the present Section 936 credit with a "wage credit" that, it asserts, will be more cost-effective.

The Treasury Department is wrong.

The so-called wage credit would be a fixed dollar amount per hour worked by all people employed in the possession by an establishment engaged in manufacturing. This amount would be 60% of the minimum wage applicable to such employees in the first year—1987, decreasing by 10% a year beginning in 1993 until it is completely phased out in 1998. The credit would apply against the federal income-tax liability on the possession source profits of the company. For this reason, It is obviously wrong to treat the wage credit as a subsidy for employment. The credit would reduce the tax on profits, not on wages. It would, therefore, reduce the cost of using capital, although not to anywhere near the same extent as the present credit. It would not reduce the cost of labor.

The proposed wage credit is nothing more than a severe cutback in the existing Section 936 credit. As such, it would do little to reduce complexity, and it certainly would not be more effective in promoting employment. And unless one relies on the Treasury's implicit assumption of inert, non-responsive taxpayers, it won't produce any of the revenue gains so extravagantly estimated by the Treasury Department.

Far more is at stake than merely the tax purity, tidiness or revenue gains that the Treasury presumably is seeking by repeal of Section 936. The combination of Puerto Rican tax holidays and the Section 936 tax exemptions induced a flood of new business investment and business ventures into Puerto Rico from 1948 until the mid-1970's. The resulting expansion of production, employment and income transformed the Puerto Rican economy from a dismally unproductive agricultural society into a highly advanced industrial economy. It has made the Puerto Rican economy the model for economic development and growth originating in the private sector.

When the Reagan administration was seeking to develop a Caribbean Basin Initiative, emphasizing the private sector's responsibility for development and growth-generating activity. It could have done no better than to implement a Section 936 approach. Instead, the Treasury successfully pushed for highly punitive limitations on Section 936 that were included in the 1982 tax increase. The Puerto Rican economy, which had been faltering since the late 1970s as a result of IRS efforts to cancel the tax exemption afforded by Section 936, was stunned; it has yet to share in the mainland's economic recovery. Repeal of Section 936 as the Treasury proposes would be a devastating blow to the island's economy and might well send it tumbling back toward its pre-1948 status as the poorhouse of the Caribbean.

Even if the Treasury and Congress were to be unconcerned about these economic consequences, they would have to be concerned

about the enormous increases in relief outlays of various sorts that the federal government would have to make to attempt to relieve the Puerto Ricans' economic distress. The results would be a significantly greater fiscal burden on the federal government and a far poorer, less productive Puerto Rico in which the unemployment rate would attain unthinkable levels.

As serious as these distressing outcomes would be, they do not tell the entire story. The geopolitical consequences of pulling the rug out from under the Puerto Rican economy should be recognized. Only the most naive believer in the beneficent intentions of Fidel Castro would believe that a Puerto Rico in economic collapse would not entice Cuba to try and foment revolution on the island.

For the Treasury and Congress to consider repealing Section 936 without providing equally effective incentives would not only be unfair but would utterly erode the credibility of U.S. efforts to promote economic development and progress throughout the Caribbean and Latin America.

(Mr. Ture is president of the Institute for Research on the Economics of Taxation. From 1981-82 he was undersecretary for tax and economic affairs in the Treasury Department.)●

HUMAN EVENTS WARNS OF SOVIET STAR WARS

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. COURTER. Mr. Speaker, below is an article from the April 13 issue of Human Events on Secretary of Defense Weinberger's presentation of Soviet Military Power.

As usual, Human Events is right on the mark in picking out the most disturbing aspect of the report: the Soviet lead in the area of strategic defense. The article follows:

While liberals keep insisting that the President's "Star Wars" proposal or Strategic Defense Initiative is threatening to "destabilize" the U.S.-Soviet "balance of terror," the Soviets, Caspar Weinberger revealed last week, have been vigorously pushing ahead with a massive buildup in strategic defenses that dwarfs anything that the U.S. is doing. The defense secretary made his assertions during a briefing on the Defense Department's publication of *Soviet Military Power*, the 1985 edition of its Soviet military power series.

What Weinberger said in remarks televised to some of our major allies—and what the 143-page booklet disclosed—can only be considered alarming. Here are some of their findings:

Who's "militarizing" space? In the past year, says the booklet, "some 80 per cent of Soviet space launches have been purely military in nature, with much of the remainder serving both military and civil functions. This is an increase from 70 per cent in previous years."

The Soviet Union is developing a wide range of high-tech defensive systems, involving laser, particle beams and more conventional technology, much larger than the U.S. effort. They have built over a half-dozen major R&D facilities and test ranges, and they have over 10,000 scientists and engineers associated with laser development. They are developing chemical, gas dynamic and electric discharge lasers, and have progressed beyond technology research "to the development of prototype laser weapons."

The Soviets are also developing defense weaponry using particle beams, strong radio frequencies and kinetic energy technology.

The Soviets maintain the world's "most extensive early warning system for both ballistic missile and air defense." Their operational ballistic missile early warning system includes a launch-detection satellite network, over-the-horizon radar and a series of large phased-array radars located primarily on the periphery of the USSR.

The Soviets, says the booklet, are "continuing a major upgrading of their ballistic missile defense capabilities. The Moscow missile defenses are being enlarged and equipped with a new generation of radars and interceptor missiles. Developments aimed at providing the foundation for widespread ABM deployments beyond Moscow are under way. . . ." Moreover, they are developing a rapidly deployable ABM system; indeed, the "aggregate of the USSR's ABM and ABM-related activities suggests that the USSR may be preparing an ABM defense of its national territory," which would be in total violation of the 1972 ABM treaty.

"All of this emphasizes," Weinberger told reporters in his low-key way, ". . . the very extensive work and resources that the Soviets are devoting to the very defensive systems that they [oppose] and say are so very dangerous if we pursue them. These are the systems that the Soviets are doing everything they can to block the Americans from proceeding in, and it's quite obvious why they are doing that.

"It's because they are not only doing it themselves, but they've made very great progress, and they clearly want a monopoly in this field, exactly as they wanted a monopoly in the intermediate-range weapons, the SS-20, and why they fought and exerted all of the propaganda efforts that they could to block the NATO deployment of the ground-launched cruise missiles and the Pershing II's. The same kind of campaign is under way now, not because of any of the reasons that they assign to opposing the . . . strategic defense program, but because they are doing it themselves and they want to be left alone to do it."●

FILL THE PETROLEUM RESERVE

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BROOKS. Mr. Speaker, under the President's fiscal year 1986 budget proposals, as well as the budget resolution currently being debated in the Senate, our Nation's strategic petroleum reserve would be severely jeopardized. I am very much concerned that the moves to stop filling the reserve and to end construction at the Big Hill storage site represent a pennywise, pound foolish approach to responsible government, and I would like to insert in the RECORD editorials from Business Week and the New York Times which echo this sentiment.

[From Business Week, Feb. 18, 1985]

FILL THE PETROLEUM RESERVE

After what seemed like endless debate, the government started building an emergency oil stockpile in earnest during the late 1970s—shortly before oil prices peaked and the current glut began to develop. That faltering move marked the beginning of one of the more ludricrous government efforts in recent memory. At the outset, the Energy Dept. had no way of retrieving the oil it was freely pouring into underground caverns. Later, it became clear that the department wasn't buying the proper mix of crudes for U.S. refineries. And it turns out the right system to distribute the oil to the appropriate refineries is not in place. The so-called Strategic Petroleum Reserve, in other words, hardly seems worth fighting for. But it is. Congress should rebuff the Administration's proposal to stop building the reserve.

For all its shortcomings, the reserve is the only buffer we have against another oil shock. True, we are now enjoying what seems to be an enduring surplus. But "glut" is a word used all too loosely. If the war between Iran and Iraq were suddenly to spread across the Persian Gulf or if some fundamentalist sect were to touch off a civil war in Saudi Arabia, the glut could quickly turn to a temporary shortage—exactly what a strategic oil reserve is supposed to ensure against.

The Administration's arguments against further purchases are not unreasonable, just superficial. A halt, it says, would cut federal outlays by more than $2 billion a year while intensifying the downward pressure on oil prices. But the incremental pressure on prices would be minimal. As for the alleged dollar "saving," that's questionable on two counts: Avoiding that expenditure is not the same as cutting down on what the government spends for, say, paper or pencils, since the money is buying an asset that may be worth a lot more a decade from now. Further, if that asset does have to be consumed in an emergency, it would instantly pay for itself many times over by sparing all of us the many disruptions we endured in the 1970s.

On balance, a bigger reserve remains a workable and worthwhile target. Needed adjustments in the reserve's mix of crudes should be made immediately, and its distribution problems must be resolved once and for all. Lowering our sights now might well prove penny wise and dollar foolish.

[From the New York Times, Apr. 16, 1985]

KEEP FILLING THE OIL BUFFER

Both the Administration and Congress seem inclined to save money by delaying oil purchases for the nation's strategic reserve. Though the public no longer lives in fear of gasoline lines and no industry seems to be protesting, the proposed moratorium is foolishly shortsighted.

Economics argues for continuing the purchases. But national defense should be an even more important consideration. Emergency oil supplies are as vital to security as the ships that protect our sea lanes.

The strategic reserve was designed to serve as a first line of defense against another oil shock. The Federal Government had planned to acquire 750 million barrels by 1990. Despite a slow start and the opposition of budget-cutters in the Reagan Administration, it has actually acquired 466 million barrels, the equivalent of three months of imports, and held them ready underground for quick pumping. With oil in glut

the world over and no supply crisis on the horizon, the Administration wants to stop buying more oil and use the $2 billion annual saving for other needs.

That confuses a critical investment with ordinary spending. Oil in storage doesn't depreciate. Indeed, if it is one day sold to the highest bidder to buffer another oil shock, the Government could end up with a big profit. Delay in building the reserve is also false economy in the more conventional sense. Accordingly to the General Accounting Office, a stop-start construction policy would raise the total cost of the underground storage system.

In any case, however, this debate over whether we can afford $2 billion a year to fill the reserve seems most peculiar at a time when we spend many times that amount to protect the nation's foreign oil supplies. If, in spite of the oil glut, the ability to get oil from Saudi Arabia is still worth sizable military expenditures, why not supplement that effort with highly reliable economic insurance?

There is no prospect of another major oil crisis anytime soon. But oil is still a depleting resource and there is no easy substitute for it as a transportation fuel. Inevitably, the world oil market will tighten again. The faster the United States completes its reserve, the safer it will be and the cheaper will be its adjustment to a future shortage.●

RALPH GOLDMAN: AN AMERICAN HERO

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. SOLARZ. Mr. Speaker, I would like to pay tribute to the dedicated work of Ralph Goldman who recently retired as the executive director of the American Jewish Joint Distribution Committee. Mr. Goldman has displayed tireless commitment in his lifelong service to Jewish communities throughout the world. His selfless devotion has bettered the lives of countless people, and I would like to take this opportunity to call attention to his fine work.

I personally witnessed his devotion to the diaspora when the Joint Distribution Committee worked closely with my office to arrange for the release of several Syrian Jewish women in 1977.

Mr. Goldman's tact and diplomatic skills were the crucial element in the successful negotiation with the Syrian Government.

The Talmud teaches, "He who has saved a single life, it is as if he has saved the entire world." By that measure Ralph Goldman is a true hero.

A recent article in the Jewish Week further details the accomplishments of Mr. Goldman, and I commend it to the attention of my colleagues.

[From the the Jewish Week, Inc., Apr. 5, 1985]

HE LOOKS BACK ON A CAREER OF SELFLESS SERVICE TO JEWS

(By Adriel Bettelheim)

Ralph Goldman recalls his career with the American Jewish Joint Distribution Committee in short vignettes, the way a veteran diplomat would at a Washington cocktail party.

There was the time when he signed a pact to provide aid to Jews in Poland on a slip of paper he was carrying, because the formal declaration prepared by the authorities there had not arrived on time. "It was all based on good will," he said.

Then, there were the years immediately following the Six Day War, during which he completely overhauled and moved the committee's operations for Tel Aviv to Jerusalem, where the city's municipality renamed the hill where the offices were to be located "Givat Joint"—JDC Hill.

In his 16 years with the JDC, Goldman has also flown tens of thousands of miles, attended banquets with leaders past and present from the eastern bloc and African nations, and today could legitimately claim to be a leading authority on Jewish communities abroad.

Goldman, 70, retired as executive vice president of the relief agency in March, and now acts as an adviser to the JDC's projects in over 30 countries abroad.

Early in his career, Goldman raised money for the JDC while working for a Jewish community center in Boston. The years that followed brought him to Israel, where he coordinated the U.S. Point Four and United Nations Technical Assistance Programs credited with transforming the country from an agricultural to an industrial society.

He recalls with a shudder the lack of high schools and community centers in the country in the 1950s, and how under his direction the United Jewish Appeal's Israel Education Fund raised money to build a network of schools and cultural centers.

"These days, American and world Jewish leaders verbalize the need for Jewish education," he said. "That's a great achievement for the world, because sometimes people forget the Jewish focus."

Goldman is perhaps best known for restoring JDC relief activities in Hungary, Czechoslovakia and Poland during the 1970s and early 1980s through successful negotiations with the governments there. His modus operandi was appealing to authorities on a humanitarian basis, sometimes choosing to ignore selected policies of the particular regime.

"One thing you learn is not to have a monolithic approach and not recognize those governments as only representing one thing." he said. "Some government policy is just that, but they have certain humanitarian standards that say the remaining Jewish communities should have the benefit of services they might not otherwise get."

Such services included providing *shochetim* to slaughter meat and poultry for holidays in Eastern Europe. On other continents, there are matzot for the 43 Jews the JDC has identified in Afghanistan and money for Hebrew schools in Syria.

While some may have critized Goldman's apparent indifference to the goings on in some countries, he said he never lost sight of what he aimed to accomplish.

"When I arrived in Poland in 1981, it was on the day martial law was declared," he remembered. "But I was there as an emissary to help Jews. I had to be concerned with helping them, not with extraneous things. So, I went about my business and didn't make any public declarations."

Goldman, whose credits also include years of work with cultural and civic organizations here and abroad, also used this direct approach to speed relief to Jewish communities in Alexandria and Cairo after Israel and Egypt normalized relations. He was in Ethiopia years before famine put the country on the map, identifying Jewish communities there and sending supplies and educational materials.

Healthy and energetic at 70, Goldman said he always look to the future and still wants an active part in the JDC's operations.

"I'm not a careerist," he said. "I suppose I could have been like some colleagues and gone into a profession, but I was fortunate to have lived at a time when I could spend my life being of service to Jews.

"Some organizations like to talk about statistics," he added. "What I like about this one is that we deal with broad issues, but we never lost touch with the individuals."●

HOUSE RESOLUTION 130 SUPPORTS SOCIAL SECURITY COLA

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. CONYERS. Mr. Speaker, today, I am introducing House Resolution 130 expressing a sense of the House that the Social Security cost-of-living adjustment [COLA] not be reduced, delayed or frozen in fiscal years 1986, 1987, and 1988.

The White House recently demonstrated that Tom Sawyer is alive and well at the Nation's Capitol when it reached a compromise with the Senate leadership on the fiscal year 1986 budget which proposes a 3-year reduction of cost-of-living adjustment [COLA] for Social Security recipients.

If you will remember, Tom Sawyer cajoled other children into whitewashing a fence that he was supposed to be doing. He then stood aside and watched them do his dirty work. In the case of Social Security COLA, President Reagan, after repeatedly promising not to tamper with Social Security benefits, earlier this year practically invited the Congress to do the dirty work of reducing COLA benefits.

Shortly after it received his budget, the Senate declared the President's budget "dead on arrival," and developed its own budget proposal which included a 1-year freeze on COLA payments. The substitute budget proposal subsequently was rejected by the President because it froze defense spending.

After weeks of negotiation, the White House and the Senate leadership announced a compromise budget which called for limiting the Social Security COLA increases for 3 years to the Consumer Price Index [CPI] minus 2 percentage points, with a guarantee that benefits would go up at least 2 percent annually.

The result of the compromise is that America's 36.5 million senior citizens could be on diet COLA for the next 3 years. This includes Michigan's 1.4 million Social Security recipients, and Wayne County's 379,000 in my home State.

In classic fashion of Tom Sawyer, President Reagan, when asked if he was reneging on his promises to senior citizens, said, "How is adding a 2-percent raise reducing it?"

In trying to make the COLA reduction look like an increase, the While House disregarded its own inflation projections of 4 percent in each of the next 3 years. Senior citizens would have received an automatic 4 percent COLA increase rather than the "generous" 2 percent proposed in the White House/Senate leadership compromise budget.

It seems strange that the White House, which only a few weeks ago pulled out all stops in conquering a reluctant Congress in obtaining an additional $1.5 billion increase for more MX missiles now will have us believe that it was forced into accepting a compromise with Senate leaders on the COLA limit.

What's even more suspicious is that the Senate original 1-year COLA freeze proposal would have saved $22.4 billion over a 3-year period while the compromise proposal saves $22.4 billion. That's about as close as 99.9 is to 100.

We all realize that our enormous deficits must be trimmed, and that sacrifices must be made. However, senior citizens are again being asked to contribute a portion of their retirement benefits toward reducing the deficit and increasing military spending.

Senior citizens and the Congress have always been suspicious of the White House's obsession with tampering with the Social Security system which seems to occur every other year under the present administration. In 1981, after ramming through major changes in the Social Security Program in the Ominbus Reconciliation Act, the White House presented Congress with another Social Security package consisting almost entirely of benefit reductions which were supposed to solve the system's financial problems.

Because of adverse reaction from Congress and the public, the White House withdrew the proposal, and then called for a bipartisan commission to come up with solutions. This commission made recommendations to the President, and subsequently, the Congress passed a reform package which will pump $165 billion into the Social Security system by 1989, and make it solvent for decades to come. This was achieved through a combination of adding new people into the program, increasing the Social Security tax rate, raising the retirement age, and reducing benefits.

Democrat and Republican Members of Congress worked together in 1983, in bipartisan spirit, to pass this legislation which provided new life to the Social Security system. The current budget proposal by the White House/Senate leadership to limit COLA increases does not provide a congressional mandate since it was developed by the White House and the leaders of the Republican-majority Senate.

Because of actions taken in 1983, the Social Security system has a surplus of funds now. Under the unified budget concept which consolidated the Social Security trust fund with the Federal budget, the surplus does lower the overall deficit. Consequently, by reducing COLA benefits, a larger trust fund surplus is created which gives the appearance of reducing the Federal deficit.

Reducing COLA benefits from a system which is more than paying its own way overshadows the real reasons for our huge deficits. The Social Security system is not a rogue elephant thrashing through the budget jungle and gobbling up every available dollar in sight. The system does not contribute to our enormous budget deficits. It not only is self-supporting but provides a surplus. Our huge increase in military spending combined with the large tax reduction in 1981 and mounting interest payments have created our current $213 billion deficit.

It should be noted that in the White House/Senate compromise budget, while senior citizens' COLA's are being determined by an inflation minus 2-percent formula, the standard which is being proposed for fiscal year 1986 defense spending is inflation plus 3 percent.

Many of this year's budget reductions are targeted toward cutting or eliminating some of the so-called middle class programs. Too often, Social Security is viewed as a program which primarily benefits our middle class. Yet studies show that two-thirds of those on Social Security receive more than half of their income from the program, and more than one-fourth derive 90 percent of their income from Social Security.

Additionally, a Congressional Budget Office [CBO] analysis of the White House/Senate leadership budget proposal predicts 650,000 additional people to fall below the poverty level in 3 years if that budget proposal were enacted—two-thirds of them would be elderly.

On the average, elderly couples will lose approximately $1,200 over the next 5 years and another $400 in increased Medicare premiums. This does not include loss of income from previous actions taken in regard to Social Security. Older Americans have provided more than their fair share of Social Security reductions in 1981 and 1983.

After numerous promises of no more reductions, many feel they, in plain old simple English, have been "double crossed."

I ask my colleagues to join with me in expressing their feelings about the White House/Senate leadership budget proposal to reduce the Social Security COLA's of America's 36.5 million senior citizens.

The sepcific language of House Resolution 130 reads as follows:

H. RES. 130

Resolution expressing the sense of the House of Representatives that the amount and timing of the annual cost-of-living adjustment currently provided under the Social Security Act should be preserved

Resolved, That no legislation should be considered by the House of Representatives with respect to the fiscal years beginning on October 1, 1985, October 1, 1986, and October 1, 1987, which—

(1) would result in a determination of the cost-of-living increase under section 215(i) of the Social Security Act on any basis other than the Consumer Price Index to the extent provided in such section as in effect on the date of the adoption of this resolution,

(2) would result in an effective date for such increase at a date later than the date provided in such section, or

(3) would eliminate such increase, would result in a limitation on the amount of such increase to an amount less than the amount provided in such section, or would result in a limitation on benefits to an amount less than the amount as increased pursuant to the increase provided under such section.●

WASTE IN THE DEFENSE DEPARTMENT

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FIELDS. Mr. Speaker, today, when we must bring our budget deficit under control, when we also face numerous and threatening challenges to our security around the globe, nothing is more important than making certain that we get the maximum amount of military power and capability out of the defense dollars we spend.

With this in mind, I am pleased to submit for the RECORD the executive summary of a study released last week by Mr. Jesse M. Calhoon, president of the National Marine Engineers' Beneficial Association, a union whose members have served our Nation well in peace and war.

This study documents 104 examples of waste in the Pentagon, waste that is simply due to bad management. These examples, totaled together, cost our Nation between $30 billion and $100 billion each year.

This kind of waste, on this scale, cannot be tolerated. It helps drive up our deficit, and it denies us the increased military capability that this Nation needs. This kind of waste means less tanks, less ships, less fighter aircraft and less pay for our military.

I commend this study to the attention of my colleagues for several reasons. It is not ideological, and it is not partisan. It is a compendium of examples drawn from sources such as the Heritage Foundation, the GAO, past defense officials of both parties and the Grace Commission. It does not address military compensation or retirement. It does not attack specific weapons systems or recommend divisive strategy changes. Yet, this study is still able to identify enormous potential savings. It ought to be taken seriously.

There are few Americans, I believe, who do not now think that it is time to get tough on waste and mismanagement everywhere in our government. This study is fair; it is balanced; and it can assist all of us in identifying in one basic document changes that can give us a stronger defense for the money we spend.

Thank you, Mr. Speaker.

The text of the executive summary follows:

WASTE IN THE DEFENSE DEPARTMENT [1]—MARCH 1985

EXECUTIVE SUMMARY

"There is something about preparing for destruction that causes men to be more careless in spending money than they would be if they were building for constructive purposes."

—The late Senator Richard Russell, former chair, Senate Armed Services Committee

Scores of opportunities exist for cutting billions of dollars from the Defense budget without even beginning to confront the problems of weapon procurement and U.S. foreign and military policy.

The public debate on future cuts in the Defense budget currently focuses on the need for the MX missile, the "Star Wars" Strategic Defense Initiative, and a long list of other weapon systems. The focus remains on hardware, with military policy and strategy at the heart of every debate. Those analysts seeking to cut billions of dollars from Defense often overlook waste in scores of non-strategic areas. Over 100 well-documented cases of waste through faulty process and procedure are presented in this paper. This is not a paper about military policy or military strategy. Elimination of the waste discussed here is not seen as diminishing the mission of the military or reducing its readiness to perform that mission. In fact, greater efficiency and effectiveness should actually enhance the structure and capability of our fighting forces.

A wide-ranging compendium of expert views on the broad range of alleged defense waste and potential savings has not previously existed. For decision-makers in the Congress and Executive Branch of the Government, as well as for concerned individuals from a wide spectum of groups and interests, such a compendium would seem essential. Allegations of waste, especially reported in scandals in defense spending, are common headlines. But it is not possible from these reports to know just how widespread the waste is. The attention of the media and Congressional committees tends to be concentrated on the more spectacular scandals and examples of mismanagement. Less attention is given to the persistent and seemingly institutional inefficiencies that together may account for 20 percent or more of the entire defense budget. Defense Department officials often argue that waste is coming to light because of their own vigorous efforts to root it out. Advocates of a strengthened military fear that attacks on waste are really nothing more than an attack on a necessary military buildup. But other proponents of a stronger national defense effort are equally worried that continuing with "business as usual" at DOD will produce only a marginal increase in U.S. military strength at the cost of hundreds of billions of dollars. This paper is dedicated to the task for developing a more comprehensive view of waste in the U.S. military, so that future expenditures might better be directed toward achieving military goals.

This paper cites 104 separate DOD problems in the different categories—waste in the procurement process, the R&D process, operations and maintenance, the compensation system, and basic management. The 104 items of alleged annual waste range in size from $1 million to over $16 billion. (See Table ES-1 at the end of the Executive Summary.) The largest area of waste, accounting for 40 to 60 percent of the total, was found in the procurement process—not which or how many weapons are purchased, but rather how the purchases are made. Allowing excessively high overhead charges by contractors is alone alleged to cost U.S. taxpayers between $3 billion and $16 billion each year. Other multi-billion dollar problems in the procurement process include the instability in the budgeting and procurement process which leads to uneconomic production rates, the lack of cost-conscious weapons design, early cash outlays due to accelerated payments to contractors, the lack of competitive bidding, and theft by military and contractor personnel.

A second major area of DOD waste is in the R&D process. While over $6 billion a year of alleged waste was documented from expert sources, details about the R&D process are largely cloaked in secrecy for national security reasons, so that careful and detailed scrutiny is difficult at best. While national security certainly requires some secrecy, many have argued that far more details of the R&D budget should be open to the public.

Operations and maintenance (O&M) is the third large area of Defense spending for which data on waste were calculated—for items ranging from problems with automatic data processing to inefficient utilization of depot personnel and resources to subsidies for Pentagon executive dining rooms. Problems in inventory control, maintenance inefficiencies, and energy management made up the largest numbers of O&M categories.

Waste in the Defense Department's compensation system was the fourth major area of calculation. Because any alterations in the compensation system would likely be grandfathered, at least in part, most reforms would take ten to twenty years to produce substantial savings. Such long-range reforms and their potential savings are not included in this paper, but are the subject of a forthcoming paper on reform of the military compensation system—a paper whose primary focus is military retirement. The items discussed in this paper are substantially smaller problems, but nonetheless account for hundreds of millions of dollars wasted each year. These items are mostly concerned with compensation apart from direct salary payments.

The fifth and final major area of waste discussed is basic management. The four subareas of focus are poor consolidation and coordination among the service branches, problems in personnel management, problems with the management of the Military Health Care System, and other problems of basic management. Fifty-seven separate items are included in this chapter.

While it is tempting to focus on the very "large ticket items" of hundreds of millions or billions of dollars per year, many items 1/10 to 1/100 that scale have been included. A $100 million item of waste, for example, may be very easy to overlook in a Defense budget of $273 billion—less than 4/100 of 1 percent—yet it is nearly equivalent to the total FY84 budget authority of the Peace Corps. An important lesson of this paper on Defense waste is that what may easily slip through the cracks at Defense, can be very substantial dollars relative to other aspects of the federal budget. Just the waste from excessive use of aircraft afterburners, and other inefficiences in aircraft thrust management, waste enough fuel each year (over $410 million worth) to fund the School Lunch Program for nearly one year, the Occupational Safety and Health Administration for nearly two years, the Bureau of the Census for more than five years, or the federal Fair Housing Program for 86 years—entire agency budgets covered by an issue that is certainly less than extreme or critical to military managers of aircraft fuel, maintenance and training.

Waste in this report has only been quantified where a published responsible source existed, and no extrapolations were made from waste in one service branch to potential waste in another. Every attempt has been made to eliminate potential overlap among items. All dollar figures are expressed as FY84 dollars. When original source material was expressed in other than FY84 dollars, estimates in this paper were made either as an extrapolation from a previous budget year or by using the inflators developed and used by the Department of Defense. (See Appendix 1 for full description of methodology.)

One should not read this paper with an expectation of undisputed accuracy. One cannot avoid the fact that few details, if any, that are presented in this paper are devoid of controversy. Not only do each of the 104 items contain potential controversial sources or assumptions, but the very process of combining the 104 items into a single added range of total dollars wasted is even more controversial. Every attempt has been made to include the broadest range of experts and political perspectives possible and to make assumptions, where necessary, in as conservative a manner as is reasonable.

No one number in this paper should be considered critical in and of itself. In many instances several sources for an individual item are cited, providing valuable compari-

[1] Prepared on behalf of the National Marine Engineers' Beneficial Association, Jesse M. Calhoon, President; by Ruttenberg, Kilgallon & Associates, Dr. Ruth Ruttenberg, principal investigator.

son and contrast insights for the range of analyses. All numbers have been documented, but because of the complexity of the issues each number can also be considered controversial. In addition, the Defense Department has publicly contested many of the items and specific numbers of published critics. In some cases DOD might argue that an item of management actually affects military strategy, and that military not economic considerations are the prime concern. Some studies have been criticized by non-DOD analysts as well. The 1983 and 1984 publications of the President's Private Sector Survey on Cost Control (sometimes known as the Grace Commission) for example, have been subjected to harsh criticism by many, including the Congressional Budget Office and the U.S. General Accounting Office. The focus of the reader should be on the massive size and pervasive nature of the alleged waste, not on any one expert's quantification or analysis of any one problem.

CONCLUSIONS

Many conclusions can be drawn from the 104 separate items of DOD waste which are reported on in this paper:

Waste is massive and pervasive, and the rapid growth planned by the current Administration may make the problems even worse.

Most problems cited here have been identified and studied for years by a number of experts, but little if any progress has been made.

The controversies over which weapon systems are unnecessary (and, therefore, wasteful) grab the headlines, but do not represent the largest waste at DOD. In addition, because of the bow-wave nature of Defense spending, savings from unnecessary weapon systems would take longer to achieve than savings from elimination of management waste, which recur annually.

The Congress needs to review the Defense budget in a unified way and with its own analysts.[2] All procurement items in the budget should have associated with them, at minimum, the O&M and personnel compensation costs of items procured so that full cost can be the basis for decisions.

While DOD constantly updates weapons, and plans for and procures the most modern and sophisticated ones available, it has antiquated computers and software systems and antiquated research laboratories. Its management organization and compensation systems are virtually unchanged from a generation, sometimes a century, before.

Reform is needed in the military compensation system but it must be based on comprehensive review and must consider the long-run implications of such reform on force composition and the armed forces in general. Other issues needing comprehensive review include the impact on the U.S. economy of Defense activities affecting technology transfer, contracts from overseas equipment and parts, ailing defense industrial base, inefficiencies from production bottlenecks, etc.

NEEDED REFORMS

Many reforms are needed at DOD. Some are quite incremental in nature; others represent radical changes from past practice. Some can be accomplished quickly and internally, others may need longer periods for planning and implementation. All 104 items of alleged waste carry with them implied reforms and necessary changes. The Department of Defense could institute many reforms on its own, through most analysts believe that Exective and Legislative branch action will also be necessary. The White House and Congress may have to take the lead with DOD on other reforms.

Management incentives within DOD should change to emphasize cooperation rather than competition among the service branches. After all, a large part of the raison d'etre of creating the Department of Defense was to establish one coordinated and unified administrative center for military activity. A variety of efforts to apply the concept of coordination should be pursued aggressively. Among them are programs to consolidate activities among the service branches—activities from base consolidation to the creation of one military hospital system. Overlapping duties and responsibilities need to be eliminated where possible. Attempts should be made to reduce interservice rivalry and should include weapon standardization where possible; joint management in base support, logistics, transport, etc.; and an increase in interservice assignments. DOD employees should maintain oversight relationships with DOD contractors, and avoid the tempting role of prospective (post-retirement) employee. Managers who effect savings should be able to reclaim from the U.S. Treasury a portion of those savings for unbudgeted DOD programs. The audit function should be enhanced, and whistleblowers should be both protected and encouraged.

Priority should be given to modernizing and consolidating DOD information systems. One common computer language and effective hardware investment policies are critical. Data which are not critical to national security interests should be available to outside analysts.

Stability and competition for procurement should be achieved. In order to increase the economic efficiency of U.S. weapons procurement, adequate production rates are necessary. Better planning through multi-year procurement and multi-year budgeting as well as weapon standardization (or partial standardization) should be utilized whenever possible. Competition in procurement is necessary to hone down overhead and excess facilities capacity among contractors as well as to ensure lower prices and improved quality of weapons. Competitive bidding, dual sourcing, product warranties, value engineering and a variety of other procedures are necessary to enhance the competitive process.

The primary and critical function of the Department of Defense is to protect and defend the national security of the United States. Review and reform of weapon systems, tactical and strategic programs, deployment of troops, etc. are the first priority of DOD management. But an organization spending, in the public trust, hundreds of billions of dollars a year, and allegedly wasting a large percent of that through management inefficiences must make management efficiency a higher and more pressing priority.

[2] NOTE.—While the Congressional Budget Office annually does a comprehensive review of the Defense Department budget, it is a descriptive review and, according to CBO staff, not intended to be analytical.

TABLE ES–1.—104 AREAS OF ALLEGED WASTE IN THE DEFENSE DEPARTMENT

[In millions of fiscal year 1984 dollars]

Problem	Estimated amount of waste
I. WASTE IN THE PROCUREMENT PROCESS	
1. High overhead charged by defense contractors	$2,822.6 to 16,230.2.
2. Instability in the budgeting and procurement process which leads to uneconomic production rates.	3,991.8 to 9,408.8.
3. Lack of cost-conscious weapons design	2,485.9 to 9,408.8.
4. Lack of competitive bidding	4,437.5 to 5,645.3.
5. Early cash outlays due to accelerated progress payments.	2,000.0 to 5,100.0.
6. Poor productivity among defense contractors	540.4 to 4,704.4.
7. Failure to breakout spare parts procurement	217.5 to 4,044.0.
8. Redundant prime contractor facilities	2,350.0 to 2,820.0.
9. Theft by military and contractor personnel	940.9 to 2,822.6.
10. Not using commercial components and specifications when feasible.	1,320.9 to 2,016.2.
11. Lack of standardization of weapons and equipment.	611.0 to 2,100.0.
12. Lack of specialization in DOD procurement and production functions in the Army.	330.0 to 1,880.0.
13. Prepaying for vacations of contractors' employees.	207.1 to 258.9.
14. Unnecessary DOD and contractor reporting requirements.	216.2.
15. Weak management in procurement of conventional ammunition.	85.7.
16. Overly expensive packaging of training ammunition.	5.2 to 8.8.
17. Unnecessary materials included with ammunition.	2.0.
II. WASTE IN THE R&D PROCESS	
18. Lack of coordination among the branches and poor strategic planning.	2,962.2.
19. Large design teams and excessive data requirements.	2,484.5.
20. Lack of effective discipline on decisions to start new weapons systems.	525.7.
21. Poor control over contract management support services for R&D.	233.5.
22. Inefficient administration of independent research & development program.	103.6.
23. Antiquated Federal laboratories	75.1.
III. WASTE IN OPERATIONS AND MAINTENANCE	
24. Problems with automated data processing	776.6 to 1,767.8.
25. Lack of the most modern technology to diagnose avionics failures.	720.0 to 1,152.0.
26. Inefficient utilization of depot personnel and resources.	529.6 to 882.7.
27. High administrative overhead	653.3.
28. Lack of aircraft thrust/power management	414.2.
29. Excessive procurement of M–1 tanks for training.	223.7.
30. Inefficiencies in maintenance of naval aircraft	190.5.
31. Lack of competitive bids for procurement of petroleum products.	54.6 to 266.9.
32. Poor productivity in maintaining motor pool vehicles.	93.5
33. Unnecessary construction of military housing in urban areas.	72.1 to 103.6.
34. Excessive amounts of Navy material handling equipment.	80.9.
35. Lack of centralized management of consumable items inventory.	77.7.
36. Lost freight claim recovery opportunities	53.9.
37. Poor controls over Government furnished materials provided to contractors.	20.7 to 62.1.
38. Overlap in Marine Corps logistics	9.9.
39. Lack of "reliability-centered maintenance" for Army combat vehicles.	8.3.
40. Subsidizing Pentagon executive dining rooms	2.2.
IV. WASTE IN THE DOD COMPENSATION SYSTEM	
41. Poor management of enlistment and reenlistment incentive bonuses system.	400.2 to 452.0.
42. Poor management of Variable Housing Allowance Program.	349.5.
43. Unauthorized use of meal services	103.6.
44. Unnecessary payments in Aviation Career Incentive Pay Program.	93.0.
45. Duplicate compensation payments for new retirees.	41.1.
46. Poor exchange of pay data between the military services and VA.	7.8 to 19.8.
47. Granting accrued leave pay to recruits who do not complete 6 months of service.	5.4.
V. WASTE IN BASIC MANAGEMENT	
A. Failure to consolidate:	
48. Lack of one common computer program language.	1,500.0.
49. Lack of consolidation of military base support.	383.1 to 1,541.9.
50. Lack of consolidation in depot-level maintenance and management functions.	294.2 to 1,459.3.
51. Lack of control over contract management support services.	429.1.
52. Lack of consolidation of foreign military sales activities.	334.2.
53. Lack of consolidation in military recruiting support operations and advertising.	95.3.

TABLE ES–1.—104 AREAS OF ALLEGED WASTE IN THE DEFENSE DEPARTMENT—Continued

[In millions of fiscal year 1984 dollars]

Problem	Estimated amount of waste
54. Lack of consolidation of contract administration.	93.2.
55. Lack of consolidation of wholesale depots.	51.8.
56. Lack of consolidated activities of Air Force Reserve and Air National Guard.	51.8.
57. Lack of consolidation of traffic management.	20.7.
B. Inadequate personnel management:	
58. Inadequate use of apprenticeship and on-job-training.	2,134.9.
59. Inefficient processing of personnel security clearances.	1,086.3.
60. Poor personnel policy which inhibits length of Army careers, and places added burden on recruitment and training.	590.3.
61. Unnecessary permanent change of station moves.	103.6 to 776.6.
62. Ineffective training programs	415.1.
63. High cost of first-term attrition	302.7.
64. Needlessly high Air Force requirements for strategic airlift crews.	97.8 to 155.6.
65. Poor management of the Troop Feeding Program.	57.8.
66. Excessive raw food costs for troop feeding.	52.3.
67. Not collecting on servicemen's bad debts	36.2.
68. Counterproductive nature of civilian end-strength ceilings.	30.0.
69. Not civilianizing certain Air Force positions.	17.7.
70. Not imposing penalties on "no-show" passengers for military airlift command flights.	16.2.
71. Unnecessary paperwork requirements for temporary duty travel in the Air Force.	15.1.
72. Ineffective Army learning resource centers.	10.6.
73. Use of enlisted personnel as personal servants to top military officials.	4.7.
74. Unnecessary operating costs of the DOD overseas dependent school system.	3.5.
C. Management and problems in the military health care system:	
75. Not recovering the cost of medical care from eligible, inactive beneficiaries covered by private health insurance.	432.3.
76. New construction for hospitals with less than 60 percent occupancy.	295.3.
77. Lack of coordination among the service branches for health care delivery.	243.2 to 308.0.
78. Inaccurate administration of CHAMPUS benefits.	253.8.
79. Lack of emphasis on national supply contracts.	20.6 to 119.8.
80. New construction for hospitals with less than 50 operating beds.	52.9.
81. Health care services provided to ineligible beneficiaries.	44.5.
82. Poor energy management in military hospitals.	29.1 to 53.1.
83. Using physicians to staff executive management positions.	32.4.
84. Poor procedures for recovering the cost of medical care from third-party payers.	20.7
85. Poor management and operations of medical supply depot inventories.	9.6.
86. Not limiting or charging user fees for civil consultations at the Armed Forces Institute of Pathology.	8.7.
D. Other management problems:	
87. Unnecessary military bases	144.9 to 5,177.6.
88. Need to create a procurement audit system.	517.8.
89. Inefficient maintenance and repair program for military housing.	414.1.
90. Air Force inefficient in financial reporting and control.	378.3.
91. Not efficiently identifying disposable land and expediting its sale-Army.	100.0.
92. Inefficient cash managment in the military.	65.0.
93. Lack of economic analysis for construction projects.	45.4.
94. Problems with housing for unaccompanied enlisted personnel.	37.1.
95. Absence of competitive bidding for movement of household goods to Alaska and Hawaii.	20.5.
96. Failure to use shipper associations for less-than-truckload transportation.	14.3 to 38.1.
97. Existence of the military's stunt pilot show.	8.3.
98. Poor management of property leased to foreign governments.	7.2.
99. Anachronistic administrative structure for the Army Corps of Engineers.	5.4.
100. Lack of coordination of programming with the budget review process within the Air Force.	2.6.
101. Less than full utilization of cargo space on military aircraft returning to United States.	2.4.
102. Poor packaging of household goods bound for Alaska.	2.2.
103. Lack of coordination in determining container loading and unloading priorities.	1.1 to 2.7.
104. Existence of the National Board for promotion of Rifle Practice.	0.9

DEFENSE PROCUREMENT REFORM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, April 10, 1985 into the CONGRESSIONAL RECORD:

DEFENSE PROCUREMENT REFORM

What President Eisenhower called the "military industrial complex," President Reagan calls the "arsenal of democracy." To keep it going, the Pentagon spends an average of $28 million every hour of every day of every week. At its best, it produces marvels of technology that arm American servicemen with the world's finest weapons. At worst it prices coffee makers at $7,600 and toilet seats at $600. It is a livelihood for 20,000 prime contractors, and 150,000 subcontractors, who work with 154 separate accounting systems, 7,500 pages of purchasing rules, and 1½ million new contracts each year.

As more and more Hoosiers demand an end to defense waste, I wonder if the system's shortcomings have undermined the national consensus to rearm America. Criticisms of the way the Defense Department buys weapons are easy to find:

A defense inspector general's audit last year found evidence of fraud in 10% of 216 contracts.

If a contractor overcharges the Pentagon, the case may take years. Meanwhile, the contractor suffers no penalties unless fraud is proved.

Thousands of companies receive defense contracts, but just a few contractors are dominant. Last year the top 15 contractors received over 40% of all contracts.

Some contractors are given rent-free use of over $10 billion in factories and equipment paid for by the government.

The Pentagon insures some contractors against their own negligence and pays for inflation.

Since profits rise as costs increase, there is little incentive to reduce costs. The Pentagon cushions contractors from their own errors. One company underbid other companies to win a contract, then found it had bid too low. The company argued that the Army should have caught the mistake. The Pentagon agreed and awarded the company $62,000. This happens all too frequently.

The Pentagon regularly discovers improperly made weapons. Yet, companies that do poorly can earn as much or more than those building first-rate systems. The Air Force paid one company $1½ billion for new aircraft wings after they found the old wings could crack.

Military spending does produce jobs, advance science and technology, and provide goods and services vital to our defense. It stirs a sense of patriotism in many Americans. But defense industries also make big profits. Profit surveys show defense contractors enjoy substantially higher returns than other manufacturers. Their top executives and employees earn far better than average pay. Cost formulas sometimes allow these salaries to boost a contractor's profits still further. Moreover, most of the largest defense companies, taking advantage of accepted accounting practices, have paid little or nothing in federal income taxes.

Controlling the cost and quality of weapon is hardly a new problem. Defense secretaries have sought ways to control costs, with unimpressive results. In looking over the record of procurement problems I sometimes think weapon acquisition is management-proof.

A number of steps should be taken. Until recently, Congressional oversight has been cursory and sporadic. More must be done to understand what works and what doesn't in weapons acquisition. Congress often compounds procurement difficulties by canceling and restricting programs, stretching out funding, and protecting industries in members districts. We clearly need the best management advice we can get on a continuing basis. Beleaguered as they may be with other matters defense secretaries can't delegate this responsibility to deputies. Top Pentagon managers, who now average only two or three years on the job, have to be kept longer. Defense auditors must be thorough and energetic and carry the authority to command attention for their findings. Simply fixing the procedures and regulations of defense acquisition is insufficient. Top political leaders, including the President, must motivate the enforcement of the system.

The Pentagon must award contracts competitively, and discourage the awarding of contracts on a sole-source basis. Competition saves money and produces reliable goods. For too long the defense acquisitions process has not attracted the best and the brightest defense personnel. More emphasis must be placed on finding, training, and keeping the most qualified persons for management careers in defense procurement. Particular attention must be given to assuring that quality and cost contract monitors are skilled and competent.

Since the costs of weapons systems often escalate because of unnecessary changes during development and production, special efforts must be made to reduce the cost of these changes. Management procedures must also be found to improve cost estimates for weapons systems. The Congress, the Defense Department, and the defense contractors must develop a healthier, less adversarial relationship. Uniformed officers will always want the best and the most regardless of cost, but Congress must insist on cost effectiveness. The Congress and the Pentagon must review the profits of defense contractors. Certainly the rules which allow profit from his costs must be changed.

Changing the way the Pentagon buys weapons will be tough. The problem and the solution can be identified; but it will be difficult to make effective reforms. I am convinced that the weapons acquisition must be substantially improved and costs drastically

reduced. Otherwise, the public and the Congress will no longer support the defense program, and our security will suffer.

(Some of the facts in this newsletter were drawn from articles in the Washington Post.)●

FREDRIC DICKER REPORTS FROM THE NICARAGUAN BORDER

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. COURTER. Mr. Speaker, there is a myth, endlessly repeated, which holds that the Nicaraguan resistance is the pawn of Somoza's loyal soldiers. This myth cannot explain why so many former Sandinistas are now with the Contras, not fighting against them. It cannot explain the defection of Sandinista-trained militiamen to the opposition. It cannot explain how the Contra force, so small in 1979, has grown steadily ever since (U.S. aid can supply weapons and clothing, but it cannot supply the will to resist). Nor can this myth explain the large number of teenagers in the Contra ranks. And yet the myth persists.

Please allow me to enter into the RECORD this dispatch from the Central American front by New York Post journalist Fredric Dicker. Its discussion of the composition of the resistance force is a worthy one.

[From the New York Post, Apr. 9, 1985]

FREDRIC DICKER REPORTS FROM THE NICARAGUAN BORDER

ON THE HONDURAN-NICARAGUAN BORDER.—The supreme commander of the largest army battling Nicaragua's Marxist dictators was clearly angry, and I wasn't surprised.

Col. Enrique Bermudez, the 52-year-old bushy-eyebrowned father of three, could tick off painful casualty figures and embarrassingly slim munitions statistics without emotion.

Indeed, he seemed quite at ease speaking by candelight at his hot, dusty, jungle surrounded, mountain citadel called Las Vegas, the scream of insects and incessant chorus in the background.

But when Bermudez was asked about a charge heard all too often these days in Washington, in the halls of Congress—that his Nicaraguan Democratic Force (FDN) army is composed of "a bunch of one-time backers of dictator Anastasio Somoza—his demeanor changed quickly to anger.

"It is Sandinista propaganda and it is, regrettably, widespread in the United States," said Bermudez, who is partly responsible since he earned his officer's rank in Somoza's army.

"Look, of my 54 commanders only 11 served in Somoza's army, mostly below the rank of captain.

"I have the highest rank and I didn't fight in the (1979) revolution. I was in Washington (as the Nicaraguan military attache.)

"I think the Somoza regime was a classic of the kind, with a high-degree of corruption," Bermudez continues.

"During the war there were abuses against the population. Somoza handled the war very badly.

"We're not trying to restore a Somoza-type government.

"We want a democratic government like that in the United States."

Any honest observer—and that includes members of Congress—who thinks the FDN army is composed of Somoza thugs, should spend a few days in Bermudez' camp, as I did.

They'd see thousands of high-spirited volunteer fighting men, 99.9 percent of whom are tough campesino peasants—with no past connections to Nicaraguan politics, much less to the dictator Somoza.

But few Americans—much less congressmen—have gone in search of the truth about the problems which are destroying Nicaragua and threatening all of Central America.

And sadly, it isn't only the myth of the Somoza fighters that is being perpetuated as a result.

The highly-explosive Nicaraguan situation is engulfed in myths.

How else can one explain the widespread publicity given allegations of civilian atrocities committed by the anti-Sandinista fighters?

An estimated 50,000 refugees have fled Sandinista-controlled Nicaragua—population three million—to Honduras.

I saw thousands of them here. I visited and talked with dozens of them.

Over and over again, the stories were the same: Sandinista atrocities including allegations of murder and torture.

Time and time again, I asked myself, "How much sense does it take to realize that people run away from brutality, not towards it."

If the Sandinistas—or for that matter, the Cuban, East German, Russian, Vietnamese, Cambodian, and Chinese Communists—are so terrific, why is it that millions of people always want to get away from them?

Of course, there have been atrocities committed by the anti-Sandinistas.

But they appear to have been the work of remotely-based, widely scattered, and semi-autonomous fighting groups far from the control of Bermudez and other anti-Sandinista leaders (four separate groups are batting the Sandinistas.)

Bermudez concedes the FDN has committed atrocities against Nicaraguan civilians.

But he insists they are isolated incidents strongly condemned (in at least one case by execution), when discovered, by the FDN.

"It is not the rule. It is the exception.

"As a matter of policy we see the people of Nicaragua as the base of our support. Without them, we can't survive."

The Sandinista army, by contrast, is under the iron-fisted control of disciplined communist fanatics, many of whom are "volunteers" from Cuba, South America, and eastern Europe.

When the Sandinista Army commits atrocities—as it did when it murdered hundreds of Misquito Indians on the Atlantic Coast—it is carrying out government policy.●

SOVIET BRUTALITY IN AFGHANISTAN

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BROOMFIELD. Mr. Speaker, the terrible rape of Afghanistan continues unabated. As the Soviet Union tries to annex that once-peaceful country, the Soviet military is now targeting the Afghan people. Innocent men, women, and children are being murdered in cold blood as Soviet units sweep through wide areas of the country, and eliminate all living things in those areas. Unbelievable atrocities are being committed on a daily basis.

When the Soviets invaded Afghanistan in December 1979, the Kremlin claimed its troops had been invited in by the Afghan Government in order to protect that country from so-called "Western designs" on that nation. It is bizarre that the army which marched in is now decimating the population of that country. The puppet Afghan Government and its Soviet backers are reportedly willing to kill millions of Afghans, and drive others into refugee camps in Pakistan, in order to preserve their fledgling Communist state.

The free world watches in horror as the Soviets turn Afghanistan into a captive nation through the brute application of force. Our only hope is that the Afghan freedom fighters will succeed in winning the struggle with the Soviet invaders and regain control of their homeland.

With these thoughts in mind, I commend the following article detailing Soviet atrocities to my colleagues in the Congress.

[From the Washington Post, Mar. 30, 1985]

SOVIET ATROCITIES ALLEGED—AFGHAN REFUGEE DETAILS BURNING, KILLING

(By Joanne Omang)

Soviet troops last week burned more than a dozen remote villages in Afghanistan, killed most of their inhabitants and booby-trapped many of the bodies, according to a report allegedly from the scene.

A State Department official said the report "is probably true, although we have no independent confirmation." The report was quoted yesterday by the conservative Committee for a Free Afghanistan.

Committee spokesman Steven Nimetz said a man, Muhammad Gul, 30, appeared in Peshawar, Pakistan, Thursday claiming to have survived an attack March 17 on his village of Chinar in the Durbaba subdistrict of Nangahar province in southern Afghanistan.

"He said the Soviet troops attacked at 8 a.m. in full force, killing every living thing. This also happened to 14 or 15 other villages around Chinar," Nimetz said. Gul said that, in one incident, 52 women and children tried to hide on a rooftop but were spotted and burned to death when the house caught fire, Nimetz said.

"He said the Soviets came in with large packs on their backs and sprayed a yellow substance into all the homes, ignited the substance and burned everything," Nimetz said.

Bodies were later dismembered and booby-trapped, and the area was mined, Gul was quoted as saying. He reported that an Afghan who went with him to investigate the scene was killed as one of the bodies exploded.

Nimetz said Gul had come to Peshawar to obtain food and supplies for his family, who

had escaped with him and were hungry in the mountains.

Nimetz said Gul could not supply numbers of Soviet troops or of the total dead, and talked only reluctantly to Karen McKay, executive director of the committee who is visiting Peshawar, and to an unidentified journalist there who taped the interview.●

THE ENCRYPTION OF SATELLITE TELEVISION PROGRAMMING

HON. JUDD GREGG

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. GREGG. Mr. Speaker, on March 27, I introduced into the House of Representatives legislation to amend the Communications Act of 1934, with respect to the encryption of satellite television programming.

The purpose of H.R. 1769 is to foster the more widespread availability of television programming transmitted by satellite. The legislation is designed to complement the "satellite television viewing rights" amendments to the Communications Act of 1934, which resulted from provisions of the recently enacted Cable Communications Policy Act of 1984—Cable Act; Public Law 98-549 signed into law by President Reagan on October 30, 1984.

Section 5 of that act amended the Communications Act of 1934 to make it crystal clear that individual home Earth station viewers of unencrypted satellite signals are not in violation of provisions of the Communications Act. In order to avoid frustration of the Congress' desire to encourage widespread public access to satellite television programming, further legislation is immediately needed. A review of the developments in the delivery of video services to American homes crystalizes the need for this immediate action.

When television was first introduced in the late 1940's, it was centered in the Nation's urban capitals. As television became more popular, it reached out for smaller population centers and was thought to have potential to serve rural America. But the economics of television operation prevented it from adequately serving rural America. Television revenues depend on advertising revenues and advertising revenues depend on service to the largest audience possible. Over-the-air broadcast television has not been profitable in areas with sparse population.

With the 1950's came the advent of cable television. Although born in smaller communities, cable television could not fulfill its potential for rural America and it quickly gravitated to densely populated areas. The economics of cable television operation, which center on the laying of coaxial cable to carry television signals, dictate that systems serving communities where houses are located close together will be the most profitable. For most cable television systems, the cost of laying cable in areas where houses are far apart is prohibitive. Therefore, the advent and proliferation of cable television systems still left the rural dweller disenfranchised from the benefits of developments in communications technology which were being provided to the Nation's other citizens.

The beginning of the 1980's witnessed the development of another technology which had the potential to provide Americans with television programming: home satellite Earth stations. For the first time since the beginning of the age of television, a home delivery system was developed which did not rely for its profitability on serving densely populated areas. In this regard, satellite Earth stations are unique amongst the various technologies that had the potential to deliver television programming directly to the home. By receiving television signals from satellites which blanket the continental United States with their coverage, home satellite Earth stations provide a major benefit by serving America's rural population as effectively and as efficiently as they can serve Americans in suburban and urban centers. The home satellite Earth station industry is establishing equality for rural viewers with their more urban counterparts. A basic home satellite Earth station system can be purchased today for less than $2,000. It is a technology which is within the reach of many of those rural Americans who for so long have been disenfranchised from television programming service.

A testament to the reality of rural television delivery is that in 4 years more than 1 million home satellite Earth station receiving systems have been installed throughout the United States. The industry estimates that more than 60,000 of these systems are currently being shipped each month by manufacturers. Moreover, this is largely an American manufacturing and distribution enterprise; the only one of the consumer electronics industries which remains predominantly American.

As the final decades of the 20th century draw to a close, there are still millions of Americans who are unable to receive adequate over-the-air television service; millions more that do not receive basic broadcast transmissions via cable, let alone satellite services; and still millions more receive programming that is technically inferior. By and large, these Americans residing in the more rural areas of the country have too long been the subject of irrational discrimination in the receipt of television programming.

Satellite transmissions which result from the use of scarce orbital satellite positions and scarce public spectrum take advantage of a valuable national resource. For the last 4 years rural Americans have enjoyed the benefit of educational, informational, and entertainment programming. The public benefit that this programming provides to rural Americans must be preserved. Last year's action by the Congress (Public Law 98-549) in clarifying that home use of satellite Earth stations is legal was an attempt to ensure that this technology will continue to serve rural and other Americans.

But several satellite subscription services have announced their intention to scramble satellite television signals. The scrambling of satellite signals can permit the withholding of reception of such signals from Earth station owners. To date, there has been no definite commitment by satellite distributors of motion pictures to provide descrambling equipment or viewing rights to Earth station owners. Immediate encryption may likely foster the selective distribution of television programming to elite groups based on their geographic location, economic status, affiliation with a cable system or any number of criteria which will result in the withholding of service to rural and other Americans. At a time when rural America is finally emerging from the dark ages of television service, encryption of television programming threatens to banish rural America once again to the outer limits. Such a result will not serve the public interest and will not meet the needs of rural Americans.

Section 705(b)(2) of the Communications Act was recently enacted by the 98th Congress to relieve possible inequities in the provision of programming services to satellite Earth station users. These provisions provide incentives and encourage the development of program viewing agreements for unscrambled signals. Scrambling by program distributors, coming right on the heels of the adoption of this national policy, thwarts the congressional intention that fairly negotiated marketplace agreements can ensure the public interest in widespread satellite television programming service at reasonable rates.

One distributor has announced its intention to scramble in the near future and has indicated that it plans to give cable operators exclusive rights to market scrambled signals to Earth station users in franchised cable areas. Such a plan would discriminate against Earth station dealers nationwide and against Earth station users who would be forced to deal through the local cable operator which already has a local franchised monopoly. This would foreclose competition between Earth station dealers and cable operators. Recently, the same satellite television programmer announced plans to force most satellite master antenna

systems [SMATV], which serve multiunit dwellings within cable franchised areas, to purchase the program service from the cable operator instead of directly from the programmer. Such distribution systems discourage competition to the local cable operation and can keep prices artificially high for consumers. The method the programmer will use to enforce the distribution system is the withholding of decoders from customers it does not desire to serve.

Scrambling of signals is not justified at this time to deter unauthorized commercial use of satellite cable programming. The sanctions in section 705(d) of the Communications Act which were also newly enacted by Congress in the Cable Act, provide substantial penalties for unauthorized commercial use of satellite television programming—up to $50,000 in damages plus criminal sanctions. In fact a coalition of cable companies, programmers and distributors [COST] was recently formed to ferret out unauthorized commercial users and it has filed many legal actions nationwide, several of which have already been successful. The judicial remedies now provided in the Communications Act appear to provide a more than adequate system of remedies to aggrieved parties. Therefore, particularly at this junction, when home Earth station users are not assured a right of access to satellite programming, scrambling is unnecessary for protection in the commercial arena.

Scrambling at this time would give programmers the capability to impose discriminatory distribution systems and frustrate the development of marketplace negotiated distributor-viewer/private viewing agreements which may more effectively ensure compensation to the distributor for the viewer's use of its programming. The 1984 Cable Act, for the first time, put into place a framework whereby fair marketplace agreements can be negotiated. A moratorium on scrambling will give these processes an opportunity to develop.

All indications are that immediate scrambling may lead to the withholding of satellite cable programming from rural home Earth station users. There is no plan in place that will ensure continued access to services that intend to scramble their signals. An executive of one satellite program distributor recently stated that "slowly but surely the sky will go dark." Thus, the bill I am introducing today ensures continued access of rural families to a wide variety of programming by prohibiting scrambling for a period of time.

Earth station users now receive satellite programming without charge. Immediate encryption would radically change the situation for rural viewers who are finally receiving access to television. Purchasing an Earth station is still a major investment for most rural families. A denial of access to programming, or the imposition of unreasonable payment requirements on such families, may likely make television programming once again unavailable to these families if scrambling is permitted at this time. Pay television programmers are receiving millions of dollars each year in revenues and profits from the use of the airwaves. They do this without regulation and without the requirement of public responsibility that pertains to broadcasters and others that rule the airwaves. The national public interest mandates that rural Americans finally get their fair share of television programming.

Our 1984 legislation was supposed to ensure viewing rights and Congress now needs to protect these rights. The moratorium will enable the Congress to pursue substantive legislation ensuring that the right of all citizens to Earth station technology is not eroded. It will also give the marketplace a chance to work. If signals are to be scrambled, we want to know that there will be access to these signals on a fair and reasonable basis. We do not have any such assurances thus far. Therefore, I call upon the Congress to take immediate action to prevent scrambling for a 2-year period of time to allow a proper marketplace to develop or for congressional oversight to take its proper course. Unless we are vigilant, a cartel-like operation controlling access and prices could emerge to the detriment of competition and the rights of the viewing public.●

AMTRAK SHUTDOWN MAKES NO SENSE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FLORIO. Mr. Speaker, the administration has proposed the elimination of all funding for Amtrak. This would result in the shutdown of Amtrak's passenger service throughout the Nation

This proposal makes no sense. Amtrak is an important part of our national transportation infrastructure. Indeed, the proposal could cost more than it would save, as the following article from the March 25, Philadelphia Inquirer points out.

AMTRAK WOULD COST MORE TO SHUT DOWN

(By George Bradford)

As federal budget-slashers swoop through the country with their indiscriminate swords drawn, anything not nailed down is a candidate for the junk pile—especially Amtrak. There have been several editorials pleading for clemency to Amtrak because of the valid need for a balanced transportation system. But this is only a small part of the story.

Amtrak's multiple opponents want to end it by eliminating the entire $684 million annual subsidy. They justify this by saying that Amtrak is merely a luxury for the middle class and wealthy. They also act as if removing the Amtrak subsidy will actually cut the deficit by $684 million and not cause hardship for most people. These excuses for axing the passenger rail system are just factually incorrect.

The most important fallacy to correct is the assumption that discontinuing Amtrak's $684 million subsidy will cut the deficit by that amount. This, in fact, is the basis of the whole Amtrak-killing proposal.

The truth is that Amtrak, according to the 1971 statute that created the passenger carrier, is locked into labor protection payments for employees laid off when rail service is discontinued. Thus Amtrak, or the government, must continue to pay these employees a portion of prior salaries for up to six years.

Because Amtrak operations employ over 25,000 people, 4,200 indirectly through other railroads, these labor protection payments in the first year alone are estimated, by Amtrak president Graham Claytor, to be between $600 million and $800 million—possibly more than the full $684 million subsidy. Over six years, the cost would be about $2.1 billion.

Thus the taxpayers could either pay $684 million next year for a nationwide passage rail system, or they could cut out that subsidy, and instead pay at least that amount for 25,000 people to do nothing. Even the most ardent Amtrak opponent would rather have his tax money pay people to run trains than have it pay people to do nothing.

President Reagan, Budget Director David A. Stockman, et al., say that trains do not provide an essential service, but are luxuries for the rich and middle class. Nobody who ever walked, at night, through the passenger coaches of the Crescent to New Orleans, the Silver Star to Florida, or Broadway Limited to Chicago could convince me that those were the rich and middle class sprawled across seats, trying to keep the kids quiet, and shifting around while attempting to sleep until their luxurious arrivals at 2:20 a.m. in Charlotte, N.C., or 2:51 a.m. in Canton, Ohio.

What about providing an essential service? It is true that living in a major city we can fly easily to Washington or Chicago, or from Chicago to San Francisco. But anyone who ever looked at Amtrak's national timetable will be amazed at the plethora of small communities strung out along the Amtrak route lines.

For these relatively isolated places all over the country with little or no air and bus connections, Amtrak is the vital link to the major metropolitan areas along the routes. For example, the California Zephyr is not just carrying people between its endpoints, Chicago and San Francisco. It is simultaneously transporting plain folks—not just the rich—between Ottumwa, Iowa, and Chicago, or between McCook and Omaha, Neb., or between Helper, Utah, and Salt Lake City.

The same comparison can be made on any of Amtrak's long distance routes. But then Stockman has probably never found himself alone in Hinton, W.Va., trying to get back to Washington. If he did, he would gratefully accept a ride on the Cardinal and watch the beautiful West Virginia countryside glide by.

Those who want Amtrak out believe that they can delude the country into thinking

they are saving money and not causing many people hardship. Indeed, it may not pose a hardship for Reagan or Stockman, but the 20 million Americans who rode Amtrak last year cannot be written off so easily. Many of them had no car or couldn't afford to fly, and some just didn't want to fly.

Reagan's quoted subsidy of $34 per passenger was obtained by dividing the 20 million riders into the $684 million subsidy.

The figure, however, is misleading. Actually, passengers traveling longer distances are more highly subsidized than those going smaller distances. The lower-income passengers, who generally travel further, are thus receiving more subsidy than the higher income short-haul riders. This is only fair, but Reagan merely quoted the average of $34 without realizing that the poorer travelers benefit more than others.

Air and highway congestion will increase if Amtrak shuts down. The administrative costs of shutting down stations and disposing of a vast "estate" would be horrendous, especially after investing over $2 billion in improving the Northeast Corridor alone.

Once abanboned, the cost of reactivating a rail system would be prohibitive. Most significantly, according to Tom Wicker in the New York Times, the United States, "once boasting the most extensive transportation network anywhere, will become the only nation in the developed world without a national rail passenger system." I might also add that we would also be the only nation willing to pay $2.1 billion for the privilege of achieving that status.

(George Bradford is a physician and travel writer specializing in rail travel.)●

ADMINISTRATION STATEMENTS ON NICARAGUA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BARNES. Mr. Speaker, President Reagan has accused his critics in the Congress and elsewhere of being victims of a disinformation campaign. But, judging from a recent article in the New York Times, the disinformation is coming from the administration.

Among the points made in the Times report are the following:

The administration claims that Nicaragua's "war machine" dwarfs the forces of all their neighbors combined." In fact, according to the Defense Department's own data, the Salvadoran and Guatemalan armies are nearly as large as Nicaragua's, and the other Central American armies combined are far larger than Nicaragua's.

Despite frequent administration claims to the contrary, administration officials privately admit that they do not believe Nicaragua has any intention of attacking its neighbors.

The administration claims that the Sandinista military buildup began before the U.S.-supported Contra attacks, and therefore cannot be explained by U.S. hostility. However, according to the Defense Department, shipments of heavy Soviet-made arms to Nicaragua began after the Contra attacks started. Also, the Sandinistas announced the creation of a large militia only after 67 Nicaraguan soldiers had been killed by the rebels.

Despite frequent administration claims that Nicaragua's fears of an American invasion are entirely self-induced, in fact Defense Department documents and statements by U.S. officials demonstrate that it is U.S. policy to create Nicaraguan fear of an invasion.

The administration claims that the Sandinistas are pursuing a "revolution without frontiers." But the State Department has conceded that it does not know of any Sandinista official who ever made such a statement.

Administration officials concede that Nicaragua does not in fact have the capability to attack Honduras, since Nicaraguan tanks would be defenseless against modern antitank weaponry and the Honduran air force.

In his speeches, Vice President Bush likes to display a Nicaraguan stamp with a picture of Karl Marx on it. What he does not say is that this stamp is part of a series depicting important figures in history, including George Washington and Pope John Paul II.

Mr. Speaker, we all share serious and legitimate concerns about Nicaragua. But we also ought to share some decent respect for the truth in our political discourse. The House will shortly vote on the President's request for renewed funding for the Contras. To help my colleagues determine their position on that request on the basis of facts and not disinformation, I include the entire New York Times article at this point.

[From the New York Times, March 30, 1985]

NICARAGUAN ARMY: "WAR MACHINE" OR DEFENDER OF A BESIEGED NATION?

(By Joel Brinkley)

WASHINGTON.—The threat that Nicaragua's Army may pose to other Central American countries has become a central issue in the debate over renewed United States financing for the rebels fighting to topple the Government.

The Administration says the army is a juggernaut, far larger than the other Central American militaries and poised to attack its neighbors. But Democrats in Congress and some officials in the Administration say they believe the White House has overstated its case.

At the same time, however, even many of the Administration's critics agree with two of President Reagan's other major concerns about Nicaragua: that many Sandinista leaders are Marxist-Leninists and that they have aided El Salvador's leftist guerrillas.

REAGAN SEES A "WAR MACHINE"

Mr. Reagan has accused the Nicaraguans of building "a war machine" that "dwarfs the forces of all their neighbors combined."

In February, Vice President Bush belittled "some who still insist" that "these Marxists have no extraterritorial ambitions."

In interviews with more than two dozen officials in the White House, the Defense and State Departments, Congress and private organizations involved with Central American affairs, these were some of the main findings:

The Salvadoran and Guatemalan regular armies, with 48,000 and 40,000 troops, are each nearly as large as the Nicaraguan Army, which has 40,000 regular troops and another 20,000 militia members on active duty, according to Defense Department figures. When all the other Central American armies are combined, they are far larger than Nicaragua's. On the other hand, when army troops and militia are lumped together, Nicaragua's military forces are larger than those of any other Central American country, although Guatemala claims to have a 900,000-member Rural Civil Guard.

Senior Administration officials, in speeches and in public reports, have frequently said Nicaragua intends to attack its neighbors. But State and Defense Department officials say unofficially that they do not believe Nicaragua has any such intention.

President Reagan has said that "the Sandinista military buildup began two and a half years before" the United States-backed Nicaraguan rebels took up arms and was not a result of rebel attacks. But Defense Department records show that the first shipment of heavy Soviet-made arms to Nicaragua came many nonths after the first reports of rebel attacks.

Nicaraguan officials have said one reason for their buildup is that they fear an American invasion. Administration officials confirmed that since at least 1983, the United States had used a "perception management" program, as a classified Defense Department document called it, to keep the Nicaraguans concerned that the United States might attack.

White House and State Department officials were unable to verify the accuracy of several quotations that the President and others have attributed to Nicaraguan leaders in support of their assertions about Nicaragua's intentions. In one case, the State Department acknowledged that it knew of no Sandinista official who ever used an often-quoted phrase that Nicaragua seeks a "revolution without frontiers."

Even the Administration's critics agree with several of the President's fundamental assertions about Nicaragua.

Many of them say they are convinced that Nicaragua has supplied arms and other assistance to El Salvador's leftist rebels, although there is disagreement about the scope of that assistance and whether it continues.

Representative Michael D. Barnes, Democrat of Maryland, the chairman of the House Subcommittee on Western Hemisphere Affairs, said that "there is no doubt" about Nicaragua's "support to the left in El Salvador."

Administration critics also agree that many of Nicaragua's leaders are Marxist-Leninists with close ties to Cuba. To some Administration supporters, that fact alone is sufficient evidence of aggressive intent.

There also is widespread concern that Nicaragua could become a Soviet military base. "There's a possibility for air bases and submarine pens," said Senator Richard G. Lugar, Republican of Indiana, the chairman of the Foreign Relations Committee. Soviet and Nicaraguan officials have denied such assertions.

ARMY'S SIZE AND ABILITY IS A MATTER OF DISPUTE

A White House spokesman said Otto J. Reich, Ambassador for Latin American public diplomacy, was the official best suited to outline the Administration's concerns about Nicaragua and the evidence to support them.

In an interview, Mr. Reich described the Nicaraguan Army as "enormous in relation to its immediate environment" and added that "invasion is one of the things we are concerned about."

The Defense Department estimates that the Nicaraguan Army includes about 40,000 regular, active-duty troops and another 20,000 civilian militia members on active duty, for a total troop strength of about 60,000.

The department also estimates that El Salvador has 48,000 troops on active duty, Honduras has 21,000 and Guatemala has about 40,000 for a combined troop strength of about 109,000. Costa Rica has no army but does have a 9,500-man Civil Guard.

Nicaragua also has a civilian militia of 50,000 in addition to those on active duty, and Administration officials sometimes include the militia in their public statements about the size of the Nicaraguan Army.

Carlos Tunnerman Bernheim, the Nicaraguan Ambassador to the United States, said the militia included "all types of people: factory workers, students, women, children and old people."

All of them, he said, "have had some minimal training," adding that they would be issued weapons if Nicaragua were invaded.

A Defense Department official, acknowledging that the militia includes some women and children, said that "we don't know how well trained they are" or how many have arms.

Costa Rica has a 10,000-member civilian militia, Honduras has a 4,500-member, "public security" force and Guatemala claims to have a 900,000-member rural defense force.

Of the assertions of a possible Nicaraguan invasion of its neighbors, Foreign Minister Miguel d'Escoto Brockman of Nicaragua said, "To believe that is to believe that in addition to being evil, we are also insane."

A senior Defense Department official directly involved with Central American affairs agreed, saying that "we don't expect an attack" because "we don't think they would be that stupid."

"That would be the solution" to the Nicaragua problem, he added, because the United States would "most certainly" attack.

Administration officials frequently point to Nicaragua's armor as evidence of aggressive intent. Nicaragua has more tanks than any other country in the region.

In a speech last month, Vice President Bush said Nicaragua had "over 150 tanks." And Government white papers describing a Nicaraguan threat point out that Nicaragua has "heavy ferries to give additional amphibious mobility" to the tanks, as one white paper said. It also noted that Nicaragua's borders with Honduras and Costa Rica are "largely defined by rivers."

Defense Department officials say the Nicaraguans have 110 Soviet-built T-54 and T-55 tanks that are 25 to 30 years old. Col. Lawrence L. Tracy, the State Department's military adviser for Latin American public diplomacy, said the tanks "couldn't survive against modern antitank weaponry." Colonel Tracy is one of the authors of the Government's most recent white paper, issued in March.

Since most of Nicaragua is too hilly for tanks, to be used against Honduras they would probably have to be loaded on flatbed trucks and driven up the Pan-American Highway, Colonel Tracy and others said.

That could be "suicidal," Colonel Tracy said. The Honduran Air Force, which include more than two dozen jet fighters and bombers, "could easily take them out," a senior Defense Department official said, since Nicaragua has "no significant air force to speak of."

Mr. Reagan, in a 1983 session with reporters, said Nicaragua had "fighter planes, bombers and so forth." Defense Department officials say Nicaragua has no jet fighters or bombers or other modern combat aircraft, except about 10 sophisticated Soviet helicopter gunships.

Mr. Reich said, "If all the Nicaraguan tanks were to simply occupy a plain in southern Honduras, they could humiliate the Honduran Army, and the Government could collapse."

But Mr. Reich also acknowledged that the "Sandinista military hasn't shown us much so far" in its war against the rebels.

NICARAGUAN BUILDUP: ORIGIN IS DEBATED

Ambassador Tunnerman, like other Nicaraguan officials, said that "we had to increase our military because we are facing aggression from the contras," as the rebels are often called.

But a senior State Department official contended that "they announced their intentions and were rushing pellmell to buy tanks long before the contras were a threat." Nicaragua denies that.

The first clear statement of Nicaragua's intent was a Government paper called "the 72-hour document." Published in Managua in the fall of 1979, a few months after the Sandinistas came to power, it reported "in detail on an extraordinary meeting Sept. 21 to 23" of the Sandinista leadership, a State Department cable from Managua said. The United States Ambassador called the document "remarkably frank," and Reagan Administration officials frequently cite it.

Of military plans, the document said, "Though we do not wish to downplay the need for a strong military to take care of national defense, we would like to point out that at the present time there is no clear indication of an armed counterrevolution" and "what merits our attention is domestic factors."

At the same time, in 1979 Cuba was sending a variety of specialists to Nicaragua, including military advisers, and a Defense Department official said that showed that the Nicaraguans "had this buildup planned all along."

Bosco Matamoros, an official in the largest rebel group, the Nicaraguan Democratic Force, said recently that armed rebels began attacks in Nicaragua in 1980. That is also when Sandinista officials began complaining of attacks. And in recent interviews, rebel leaders have said they began receiving training and assistance from the Argentine military in 1980.

In February 1981, Nicaragua announced it would form a large citizen militia. By then, 67 Nicaraguan soldiers had been killed in attacks by several hundred rebels, many of them former Nicaraguan National Guardsmen who had been operating out of Honduras for more than a year, press reports of the time said.

Also in February 1981, Defense Minister Humberto Ortega Saavedra asserted that Nicaragua needed a large militia because "there is a danger that the thousands of former National Guardsmen abroad" could find support from the United States.

Months later, in mid-1981, a senior Defense Department official said, Nicaragua acquired its first Soviet-made tanks. Until then, another Defense Department official said, they had been receiving "small arms and light artillery, mostly."

Late that year, President Reagan authorized the Central Intelligence Agency to begin aiding the Nicaraguan rebels.

U.S. HAS STIRRED FEARS OF INVASION

Nicaraguan officials have repeatedly said they are worried about a United States invasion, and since at least 1983 the Reagan Administration has intentionally reinforced those fears, senior Administration officials confirmed.

A 1983 Defense Department document on "Central American initiatives" mentioned a "perception management program" to be "coupled with the activities of" the Big Pine II military manuevers held that August in Honduras. The Defense Department "will take the lead" in the program, the document said, with help from the C.I.A. and the State Department.

A senior State Department official confirmed this week that the program was still in place and said its purpose was to gain concessions from the Nicaraguan Government. "Every time there's an invasion scare, they make some concessions," he said. Another senior official said, "We do our best to keep them concerned."

Statements from the President and other senior officials in Washington raise invasion concerns in Managua. But the most important element of the program, officials said, has been a series of large-scale American military maneuvers in Honduras, beginning in early 1983. From the start Administration officials have said the maneuvers were intended to intimidate Nicaragua.

"One of the central purposes is to create fear of an invasion," a senior Administration official said. The American troops "push very close to the border, deliberately, to set off all the alarms," he added.

Ambassador Tunnerman said that "with 12,000 troops on our border" and a "corresponding escalation of statements from the Government" in Washington, "we have reason to be concerned."

The Defense Department is preparing for large-scale maneuvers along the Nicaraguan-Honduran border that will begin within a few weeks.

The Administration intentionally scared the Nicaraguans in another manner last November, when officials in Washington said a ship docking in Nicaragua might be carrying Soviet fighter planes.

Administration officials said later that no planes had been unloaded. But during the MIG crisis, as Nicaraguans now call it, American surveillance aircraft flying over Managua caused a series of sonic booms, further alarming the Nicaraguans at a time when tensions were already high.

Such planes frequently fly over Nicaragua and other countries without causing sonic booms.

Mr. Reich confirmed that the booms were intended to scare the Nicaraguans. Another senior State Department official said that "there is talk about doing the same thing again."

Central American Troop Strengths

	Numbers are approximate
Nicaragua:	
Regular armed forces	40,000
Civilian militia members now on active duty	20,000
Other civilian militia members	50,000
El Salvador:	
Regular armed forces	48,000
National Guard, treasury police, national police	8,500
Honduras:	
Regular armed forces	21,000
Public security forces	4,500
Guatemala:	
Regular armed forces	40,000
Treasury police, national police	11,000
Rural Civil Guard	900,000
Costa Rica:	
Regular armed forces	None
Civil and rural guards	9,500
Civil militia	10,000

DID NICARAGUA SAY WHAT U.S. SAYS IT SAID?

WASHINGTON.—In a speech last year, President Reagan discounted the Nicaraguan Government's explanations for its military buildup.

The Sandinistas "claim the buildup is in response to American aggression," Mr. Reagan said. "And that is the most cynical lie of all. The truth is, they announced at their first anniversary, in July of 1980, that their revolution was going to spread beyond their borders.

Nicaraguan officials said no such statement was made. And officials at the White House and the State Department said they could not substantiate the President's remarks.

"I think he might have been referring to something said at the second anniversary" of the Sandinista victory, "not the first," a White House official said. "But I'm not sure."

AUTHENTICITY IS UNCERTAIN

The President and other Administration officials often cite quotations from Nicaraguan officials. But American officials acknowledge that the authenticity or origin of some of the quotations is uncertain.

For example, in a 1983 speech President Reagan said that the Sandinistas "make no secret of their goal" and they "preach the doctrine of 'revolution without frontiers.'"

In testimony in 1983 to the Senate Foreign Relations Committee, Secretary of State George P. Shultz was asked for evidence that "the Nicaraguans are contemplating using massive force outside their borders."

Mr. Shultz responded that "the Communist leaders regularly say what their objectives are" and that "the Government of Nicaragua does not conceal what it wants is a 'revolution without frontiers.'"

In the same year, Representative Edward J. Markey, Democrat of Massachusetts, wrote to Mr. Shultz, asking for the source of the phrase. A State Department officer replied, "Administration officials, while not attributing the phrase to individual Sandinista leaders, have used it to characterize Nicaragua's aggressive policy."

REFERENCES TO COSTA RICA

An Administration official said this week that "actually we've had problems" with the quotation and could not verify that anyone actually said it.

Recently, officials have quoted Tomas Borge, the Nicaraguan Interior Minister, as saying that Costa Rica would be "the dessert" in Nicaragua's foreign conquests.

In a speech last week, President Reagan said of the Sandinistas, "Once in power in Nicaragua, they began working for their revolution without frontiers in which small, democratic, unarmed Coasta Rica would be—and I quote their words—'the dessert.'"

An Administration official said this week that the quotation was taken from a 1983 opinion-page column in The Wall Street Journal by Huber Matos Jr. Mr. Matos, the son of a prominent Cuban exile, lives in Miami and works for an organization called Independent and Democratic Cuba.

In an interview this week, he said he heard the quotation while in Costa Rica several years ago. "It was pretty widely known," he said.

But Mr. Matos acknowledged that he had never heard Mr. Borge use the phrase and had never spoken to anyone else who had heard Mr. Borge use it. A State Department official said that "we've been trying to find the sourcing on that one."

In general, an official in the State Department Office of Public Diplomacy said this week, "what has happened is that people have been quoting some of these things from 1981 on, and some of them have become distorted."

A BROAD BRUSH PAINTS STAMPS

Nicaraguan postage stamps honoring Karl Marx, were shown by Vice President Bush in a recent speech to underscore his contention that the Sandinistas had set up a Marxist state.

The stamps, however, are part of a series on world leaders past and present, including George Washington, and Pope John Paul II.●

CALIFORNIA COALITION OPPOSES OCS LEASING MORATORIA

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. DANNEMEYER. Mr. Speaker, a broad-based citizens coalition of California individuals and organizations has come forward to speak out against a continuation of congressional moratoria on leasing for oil and gas development on the Outer Continental Shelf [OCS].

A mailgram signed by the members of the citizens coalition was presented to the Appropriations Subcommittee on Interior on March 22 by Don Cobbs, vice president of the Black Business Association of Los Angeles. A copy of the mailgram was sent to members of the California congressional delegation. Those signing it included State and local elected officials, chambers of commerce, statewide trade associations, and other interest groups.

Mr. Cobbs was joined as a witness at the Appropriations Subcommittee hearing by Larry Luera of the California chapter of the League of United Latin American Citizens [LULAC]; Robert Moeller, president of the Yolo County Farm Bureau on behalf of the California Farm Bureau Federation, and Walter Stanley, State representative in California for the National Alliance of Senior Citizens.

The Interior Appropriations bill for fiscal year 1986 must not contain another OCS leasing moratoria for almost the entire region offshore California. This area is believed to contain some of the most promising acreage in the country for oil and gas reserves.

Among other things, an extension of the moratoria will only hamper our efforts to reduce the trade deficit. This is illustrated by the fact that when we ran up a $123 billion record trade deficit in 1984, purchases of crude oil and petroleum product amounted to $57 billion, or almost one-half of the trade deficit.

Mr. Speaker, so that my colleagues might better appreciate the breadth of interest and support in California for reasonable offshore energy development, I insert the mailgram from the coalition at this point in the RECORD:

LOS ANGELES, CA,
March 19, 1985.

Hon. WILLIAM DANNEMEYER,
House Office Building,
Washington, DC.

In the last year, many California organizations and elected officials have become concerned about the control a few coastal interests are exercising over the Federal Outer Continental Shelf.

Our message is: Environmentally safe and responsible development of America's offshore petroleum resources is vital for this Nation's energy future, national security, and collective economic growth.

Although today there is a surplus of oil in the world, oil production in the United States is declining and oil imports are growing. By 1990, experts say, the United States will be more dependent on OPEC oil than ever.

Given that it takes up to 15 years to develop an offshore oil field, we believe it is essential that the Department of the Interior's Offshore Leasing Program continue on schedule.

We urge you not to include offshore leasing moratoriums in the DOI's fiscal year 1986 budget.

SAVE SOCIAL SECURITY COLA'S

HON. PAUL E. KANJORSKI
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. KANJORSKI. Mr. Speaker, on Monday, April 15, I introduced in the House, House Concurrent Resolution 116, legislation expressing the sense of the Congress that Social Security cost-of-living adjustments should not be reduced or eliminated.

Many senior citizens are understandably concerned about their futures as a result of the recent agreement between the administration and the Senate Republican leadership to cut this year's COLA in half. I encourage my colleagues to reassure their senior citizens that their full COLA's will be paid in full by cosponsoring and working for the passage of House Concurrent Resolution 116.

I would like to share with my colleagues the text of House Concurrent Resolution 116, as well as an editorial from this Sunday's Washington Post, explaining why it makes no sense to cut or eliminate Social Security COLA's.

H. CON. RES. 116

Concurrent resolution expressing the sense of the Congress that Social Security Cost-of-Living Adjustments (COLAs) should not be reduced or eliminated

Whereas more than 36 million Americans depend upon Social Security for their livelihood;

Whereas Social Security benefits are provided through a trust fund separate from general revenues;

Whereas the Social Security trust fund is supported entirely by contributions from employees and their employers;

Whereas the 1985 Annual Report of the Board of Trustees of the Social Security trust fund concludes that the assets of the trust fund are sufficient to pay benefits "well into the next century;"

Whereas Social Security is a fully funded insurance program and not a welfare program;

Whereas Social Security recipients have already made major sacrifices as a result of the passage of the 1983 Social Security Amendments in order to restore the solvency of the Social Security trust fund;

Whereas these sacrifices already include the elimination of the minimum benefit, the taxation of one half of many recipients' benefits and a six month delay in COLAs;

Whereas Social Security cuts already enacted into law will cost retired and disabled persons $100 billion by the end of the decade;

Whereas the average income of Social Security recipients is substantially below the average income for the population as a whole;

Whereas automatic COLA increases have reduced by more than 40% the percentage of senior citizens with incomes below the poverty level;

Whereas a freeze on COLAs could push more than a half a million Americans under the poverty line next year, and as many as 2.3 million by 1990;

Whereas proposals are being seriously considered by the administration and in the Congress to either eliminate or reduce Social Security Cost-of-Living Adjustments; and

Whereas any reduction in benefits would impose a substantial hardship on millions of senior citizens which is unnecessary because the Social Security System is sound and solvent: Now, therefore, be it

Resolved, by the House of Representatives (the Senate concurring), That it is the sense of the Congress that Social Security Cost-of-Living Adjustments (COLAs) should not be reduced or eliminated.

[From the Washington Post, Apr. 14, 1985]

A BAD BUDGET COMPROMISE

When the Senate returns to work this week, it will have to face up to the fact that the much-heralded budget compromise reached between the president and the Senate leaders doesn't offer much promise. It's important, as reassurance to the financial markets, that the budget process didn't bog down entirely. But the details of the compromise make apparent why so few senators, including Republicans, currently support it.

The linchpin of the compromise is agreement by the president to cut the buying power of Social Security and other pension benefits over the next three years. That's not a good idea on any terms—the Congressional Budget Office estimates that the plan would put about 600,000 old and disabled people into poverty. But, with the trust funds in reasonably secure shape, even a more modest curb on Social Security would be hard to justify unless it could be truly argued that the compromise called for broad sacrifices. In fact, the losses are concentrated on the same vulnerable groups that have already sacrificed most even as the deficit has soared.

Neither of the two big beneficiaries of the Reagan administration's fiscal policies are called upon for real sacrifices. All that is asked of the Pentagon is that it slow down the rate of increase in its budget. But the military is actually planning step-ups in its buying: The other day it revealed that the cost of 84 major weapons systems had jumped by another $25 billion, mostly because it now plans to buy more of each.

Nor will taxpayers who pocketed the benefits from the enormous three-year tax cuts be asked for a contribution. Using its still-aborning tax reform proposals as an excuse for inaction, the administration opposes even efforts to stem the growth in tax shelters and other loopholes.

The plan, however, would accomplish many administration objectives that are not measured in dollars alone. Targeted for oblivion are the last vestiges of the War on Poverty—the Job Corps, community action and legal service agencies, job programs for welfare mothers and displaced workers and economic development aid. The savings are relatively trival. But they serve the conservative cause of dismantling federal programs that might arguably provide rallying points or a network of support for the economically disadvantaged and their liberal advocates.

Gone, too, or severely reduced, would be many of the programs through which the federal government has tried to help meet local needs. Revenue-sharing, support for passenger trains and operating subsidies for mass transit and public housing would all be eliminated. Aid for highways and the air traffic controller system would be cut. Federal civilian employment would suffer another big cut—though it is clear that more federal workers are needed for tax collection, drug enforcement, immigration control and policing of hazardous waste and other environmental contaminants. Medicaid help for institutionalized people and other needy persons would suffer another big cut.

Most of these are dubious proposals. They provide no sound basis for the serious deficit reduction program that is still needed.●

REAGAN AND THE ARMENIANS

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. COELHO. Mr. Speaker, as you know, Turkish Prime Minister Turgut Ozal visited the United States a couple of weeks ago. This visit was significant in that it was the first time in 13 years that a Turkish leader had visited the United States, and its purpose was to demonstrate the desire to both governments to improve relations, as well as to bring Turkey's case for more military aid to Congress.

However, in his efforts to provide a warm welcome to Prime Minister Ozal, President Reagan ignored addressing any sensitive issues such as the genocide that was committed against an entire people 70 years ago; namely, the Armenians, in discussions with the Prime Minister or with the press. He did address the issue of the genocide in a prepared response to a question submitted by Hurriyet, the national Turkish paper, in which it asked whether the President approved of congressional action on the so-called genocide of 1915. President Reagan directly responded to the issue of commemorative resolutions which would recognize April 24 as National Day of Remembrance of Man's Inhumanity to Man and commemorate the anniversary of the genocide of 1.5 million Armenians by Turkey from 1915 to 1923 by linking the passage of any resolution of this type to encouraging terrorism against Turks and Turkish-Americans. I thought that this was a sad statement for the many Armenians who survived the genocide and immigrated to the United States as well as the whole Armenian community. Clearly a tragedy, which is well documented and should be commemorated for the sake of those who endured the suffering as well as for future generations of Amrenians, need not be obscured or negated by our government in an effort to improve relations with the present day Turkish government. I think that the editorial below which appeared in the Fresno Bee recently also emphasizes this concern and puts into perspective the efforts by the Armenian community to see that this resolution is passed.

REAGAN AND THE ARMENIANS

Of all the arguments against a congressional resolution for a "day of remembrance" of the massacres of Armenians in Turkey during World War I, President Reagan chose the argument with the least intellectual honesty.

That accounts in part for the angry responses to the statement he made in an interview with Turkish journalists, which coincided with a visit to Washington, D.C., by Turkish Prime Minister Turgut Ozal.

Surely no one was surprised at Reagan's opposition to memorializing the massacres. The State Department has vigorously lobbied against the resolution on the grounds that it would give comfort to Armenian terrorists who have killed Turkish diplomats, and would affront the Turkish government, a NATO ally. Presumably this position has been taken with Reagan's approval.

But it apparently still came as a shock to the Armenian community to learn that Reagan buys into the idea that the day of remembrance, in his words, "might inadvertently encourage or reward terrorist attacks on Turks and Turkish Americans."

That makes the great majority of law-abiding, concerned, responsible people in the Armenian diaspora hostage to a tiny minority whose murderous ways they have condemned without reservation.

The majority sees the congressional resolution as a simple recognition of historical truth in the face of the frustrating refusal by Turkish governments to acknowledge what their predecessors did. This does not pander to vengefulness; just the opposite. Appropriate remembrance of horror allows all sides to put it in its historical setting, which makes it easier to deal with emotionally.

It is unjust to deprive the Armenian community of this symbolic support because of things that are out of their control: the terror, which they have taken pains to decry; and the Turkish government's decision to cling to historical revisionism and make the issue a touchstone of its relationship with the United States.

That relationship is important strategically. But it shouldn't have to be propped up by an evasion of truth.

That's why the repeated failure to move the "day of remembrance" resolution through both houses of Congress sticks in so many throats.●

A TRIBUTE TO LYNN SINGER, CHAMPION OF HUMAN RIGHTS

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. LENT. Mr. Speaker, throughout my 15 years in Congress, I have been an active supporter in the movement to free Soviet Jews. There is one individual who, to my mind, is the heart and soul of this movement and that is Lynn Singer of East Meadow, Nassau County, NY.

Since 1970, Lynn Singer has dedicated her time and endless energies to aiding Soviet Jews suffering persecu-

tion and oppression under the Kremlin's rule. She is past president and currently executive director of the Long Island Committee for Soviet Jewry, Hempstead, NY. Lynn is also the national past president and currently serves as chairperson of the advisory board of the Union of Councils for Soviet Jews. The Union of Councils, headquartered in Washington, DC, is a national grassroots organization with over 50,000 individual members and 34 councils in major cities across the United States and Canada dedicated to the free emigration of Soviet Jews. She is an honorary chairperson of the New York Conference on Soviet Jewry, and was appointed by the White House to the Federal Advisory Committee on Immigration and Naturalization.

On April 25, Lynn Singer will be honored by the Long Island Center for Business and Professional Women and will be presented with the Achiever's Award for Human Rights. This well-deserved honor is fitting recognition for this remarkable woman.

At this time, I'd like to take the opportunity to pay a personal tribute to Lynn Singer and to express my heartfelt appreciation for her outstanding accomplishments and contributions to the cause of freedom and human rights.

Lynn Singer is recognized throughout this country—as well as in the Soviet Union—as a champion of human rights. Through her efforts, countless Russian Jews are now citizens of the free world.

Born into an Orthodox Jewish family, Lynn had long been active in her local community on Long Island. Then came the Leningrad trials of 1970. During these famous trials, a group of Jews and two non-Jews were tried for having plotted to hijack a Soviet airplane to escape to Israel. The trials were a turning point for Lynn who then decided to dedicate her work to the plight of Soviet Jews.

Lynn is untiring in her commitment to restore human rights and freedoms to the victims of the Kremlin's vicious anti-Semitic policies. She makes frequent telephone calls to refuseniks in the Soviet Union, writes letters, sends packages, promotes fundraising efforts. She coordinates speaking engagements for and about Soviet Jews and publishes a monthly newsletter. She briefs tourists and officials visiting the U.S.S.R. on how to contact Russian Jews to bring them news of life outside the Iron Curtain. Her intimate involvement with each family, their problems and needs have earned Lynn the affectionate name "the Jewish Mother" among the refusenik community. Her compassion for her fellow man is limitless.

One of the most critical aspects of the movement's work is its political activity. Lynn has proved to be an essential force in marshalling increased support from Congress for Soviet Jews.

One of her most effective programs is the adopt-a-prisoner of conscience program. Members send letters to the prisoners and appropriate American and Soviet officials to help obtain visas for those denied the right to emigrate. One of the most fulfiling moments during my congressional career was in 1979, when my prisoner of concience, Hillel Butman, was released from Soviet imprisonment after 9 years, was reunited with his family, and visited with me in my Rayburn Building office here in Washington, DC.

Lynn Singer is relentless in her passion to aid these courageous men and women in their struggle for cultural and religious freedom. It can be said without exaggeration that this woman has done more than any one individual to increase public awareness and vigorous support for Soviet Jews.

Lynn Singer's indomitable spirit and determination are an inspiration to those of us who have joined in the valiant fight for freedom and human rights. It is a great honor and privilege to work alongside this outstanding American who has earned the respect and admiration of so many.

On behalf of my fellow Members of Congress, her many friends and colleagues, I extend my warmest congratulations to Lynn on this memorable occasion. And I offer my most sincere gratitude and appreciation for her many years of hard work and dedication as a leader to secure human rights and freedom for all mankind.●

AID FOR THE NON-COMMUNIST RESISTANCE

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. TORRICELLI. Mr. Speaker, in the years since Vietnam, our proper role in world affairs has been a constant source of debate among Members of Congress. There has been no Member of this body, however, who has been a more consistent participant in this debate than Congressman STEPHEN SOLARZ. Through his leadership on the House Foreign Affairs Subcommittee on Asian and Pacific Affairs, Congressman SOLARZ has been active in renewing American commitment to democratic change within Southeast Asia. Mindful of the lessons of Vietnam, he has sought to develop a constructive role for the United States in the region. Congressman SOLARZ' reasoning, which is summarized in an editorial which he recently wrote on the matter of providing aid to democratic rebels in Cambodia, speaks for many of us that serve on his subcommittee. I have chosen to include his essay in the RECORD because I believe it represents a new approach to the problem of Vietnamese aggression in Southeast Asia.

AID FOR THE NON-COMMUNIST RESISTANCE

(By Stephen J. Solarz)

WASHINGTON.—Nearly a decade after its fall to the murderous followers of Pol Pot, Cambodia is still a source of regional tension and international concern. Occupied by 170,000 Vietnamese troops who ousted the Khmer Rouge regime six years ago, Cambodia remains a battlefield where an indigenous resistance movement is fighting to liberate the country from foreign occupation.

The resistance consists of the remnants of the Khmer Rouge, 35,000 troops under the leadership of Pol Pot; and two smaller, but growing, non-Communist groups: the Khmer People's National Liberation Front (KPNLF), led by Son Sann, which has 15,000 troops, and the Nationalist Army (ANS) of Prince Norodom Sihanouk, the former head of state, which has 5,000 men under arms.

The United States has two main objectives in Cambodia: securing the departure of Vietnamese troops and preventing the return of the Khmer Rouge.

The withdrawal of Vietnamese forces would enable the Cambodian people, at long last, to determine their own destiny. It also would reduce the Vietnamese threat to Thailand, an American ally, to whose defense the United States is committed.

At the same time, the United States has a compelling interest, as do the Cambodian people, in preventing the return of Pol Pot to power in Phnom Penh. It was, after all, the Khmer Rouge who carried out a reign of unspeakable terror that took the lives of between 1 and 3 million Cambodians.

The United States has voted for U.N. resolutions calling for the withdrawal of Vietnamese forces from Cambodia and self-determination for the Cambodian people. The United States has no diplomatic relations with either Hanoi or Phnom Penh and has maintained an economic embargo against Vietnam and Cambodia. Yet the United States has never developed a realistic strategy for achieving the withdrawal of Vietnam and preventing the return of the Khmer Rouge.

The Vietnamese are not likely to leave Phnom Penh on the basis of appeals to conscience or compassion alone. Nor are economic and diplomatic pressures by themselves likely to be effective. Vietnam will withdraw from Cambodia only when the price of its continued occupation there increases to the point where it opts for a political settlement rather than a military solution.

Raising that price clearly requires a more effective resistance movement. While the primary responsiblity for sustaining the resistance rests with the Cambodian people themselves, and with the ASEAN nations and China, which have supported it, the United States also has a meaningful role to play. ASEAN, the Association of South East Asian Nations, is comprised of Indonesia, the Philippines, Singapore, Malaysia, Thailand and Brunei.

American assistance to the KPNLF and ANS would show the Vietnamese that the resistance may be more difficult to overcome than they had anticipated. Coming not long after the recent Vietnamese offensive, U.S. aid would also boost the morale of

the resistance movement by indicating that the United States was prepared to support the resistance in its fight for freedom. Finally, it would also encourage ASEAN, which last month appealed to the international community to support the Cambodian people "in their political and military struggle to liberate their homeland from foreign occupation."

But American aid to the non-Communist resistance would serve another critically important purpose. It would help the KPNLF and ANS, if Vietnam ever agrees to withdraw, to prevent the return of the Khmer Rouge to power.

Who, after all, would be able and willing to prevent Pol Pot from reestablishing his reign of repression, should Vietnam actually leave, if not the non-Communist resistance forces?

The United States clearly has no desire or intention to reintroduce combat troops into Indochina. The ASEAN countries failed to lift a finger against Pol Pot when he was in power. And China has been the chief sponsor of the Khmer Rouge.

The best hope of preventing the Khmer Rouge's return to power in the wake of a Vietnamese withdrawal is the Cambodian people themselves, as represented by the non-communist resistance. Yet the KPNLF and ANS must be substantially strengthened if they are to serve as an effective counterweight to the more numerous and ruthless Khmer Rouge.

Some opponents of American aid to the KPNLF and the ANS have contended that, however noble its cause, the non-Communist resistance will never be able to force the more powerful Vietnamese out of Cambodia. The non-Communist forces, to be sure, will never be in a position to drive the Vietnamese out, but with increased material assistance they may be able to substantially raise the pressure on Vietnam, thereby increasing the possibility of a political settlement. Over the past few years, the non-Communist forces have grown from a few hundred troops to over 20,000. As long as the Cambodian people remain opposed to Vietnamese domination, the non-Communist resistance will have a powerful stimulus for the further recruitment.

Other critics have expressed the fear that the Khmer Rouge might obtain some of our aid. This is a legitimate concern. Any American assistance to Pol Pot would be unthinkable and unacceptable. Yet there is no reason we should not be able to prevent the diversion of U.S. assistance to the Khmer Rouge. The resistance forces are comprised of three separate armies in three separate locations, and the Thais have given us explicit assurances that any American support would be channeled exclusively to the KPNLF and ANS forces. Thailand has every reason to keep American aid away from the Khmer Rouge, knowing that a diversion of our assistance to Pol Pot would result in the immediate and irreversible termination of American aid.

We also need not fear that American aid will lead to direct U.S. military involvement in the region. After our searing experience in Vietnam, it is inconceivable that limited amounts of American assistance would lead to the reintroduction of American combat forces into Indochina. The Cambodians have not requested U.S. troops, ASEAN does not want them, and Congress would never permit them.

Finally, a decision to provide assistance to the non-Communist resistance in Cambodia would not, as some have feared, legitimize a resumption of American aid to the Contras in Nicaragua. In Cambodia, as in Afghanistan, we would be supporting an indigenous resistance movement which is opposing foreign occupation. In Nicaragua, by resuming aid to the Contras we would be involving the United States in a civil war as part of an effort to overthrow an internationally recognized government. Furthermore, in Cambodia, our friends in the region have publicly asked us to aid the resistance movement. In the case of Nicaragua, most of our friends in Latin America believe that U.S. support for the Contras is inappropriate and counterproductive.

The people of Cambodia have been victimized first by the unbelievable and unrelenting brutality of the Khmer Rouge and then by the invasion and occupation carried out by the Vietnamese. Yet they have never abandoned their struggle for freedom and independence. Their determination in the face of extraordinary adversity is a tribute to the human spirit. Surely their cause is deserving of tangible American support.

Stephen J. Solarz, a Democrat from New York, is chairman of the House Subcommittee on Asian and Pacific Affairs.●

TRIBUTE TO HON. CHARLIE BENNETT

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FASCELL. Mr. Speaker, I know that I am joined by many of our colleagues in paying tribute today to the dean of the Florida congressional delegation, Congressman CHARLES BENNETT. For all of my years in Congress, CHARLIE BENNETT has been one of the most highly respected and admired Members of Congress. Since he was first elected to Congress in 1948, his courage and wisdom has been a source of admiration and strength for many of us. CHARLIE is the distinguished author of five books and a celebrated veteran of World War II. He has long been a source of sound and thoughtful judgment, particularly in matters having to do with the armed services and our national defense, and many are grateful for his knowledge and his expertise, as well as his friendship. It is with great honor that I call to the attention of our colleagues a recent article, published by the Wall Street Journal on CHARLIE BENNETT:

REP. BENNETT FINDS DEFEAT IN CONGRESS BRINGS NEW FREEDOM TO SPEAK ON ISSUE

(By David Rogers)

WASHINGTON.—Before Florida Rep. Charles Bennett sat down in the House last week, his fellow Democrats stood up.

An emotional ovation signaled the end of debate on the MX missile, but even more it marked a turning point in a personal journey for the 74-year-old Jacksonville conservative.

Less than three months before, Mr. Bennett had been brushed aside by younger Democrats in the race for House Armed Services Committee chairman, and now the applause was a bridge for both sides to reach out again to one another.

In his office the next day, Rep. Bennett's voice broke as he struggled to hold back tears. "I said, 'Thank you for taking me back,'" he recalled. "I didn't feel like 'Where were you?' I said, "Thank you for taking me back.'"

In this city where winning is so much a part of survival, Mr. Bennett's story is one of living with defeat, and a reminder of the casualties of change as a new generation of Democrats muscles its way to power in the party leadership.

Although humiliated and bitter after his loss, Mr. Bennett is nevertheless freer as a result. "Now I can be the worrisome nettle that at times I wanted to be," he says. Whether advising his president or his party, there is a new power and poignancy to his remarks.

"Although I am a bit older than you," he recently wrote President Reagan, "unlike you I have been recently rejected, by the Democratic caucus, for a position which seniority should normally have given me. This rejection . . . has freed me to speak my mind without any impediment of leadership responsibility of my party. So I do not speak as a Democratic leader but as a concerned citizen and a combat infantry veteran who wants to prevent war and best serve his country at the same time."

MR. SEA POWER

There is a touch of the archangel to the white-haired Mr. Bennett, as if he embodies a fierce religiosity and the swift sword of the Pentagon. He is "Mr. Sea Power" on the Armed Services Committee and the man who successfully sponsored legislation in the 1950s making "In God We Trust" the nation's motto.

Yet he also exhibits a renegade independence and a vulnerability that mark more his politics.

Long before he opposed the MX missile, Mr. Bennett was an early critic of the Vietnam War, and this adds to the irony that he was rejected by a generation of Democrats whose own politics sprang from the same protest movement.

First elected to the House in 1948, Mr. Bennett has spent nearly half his life in the chamber. The Armed Services Committee defined his legislative career, and in an office only a few yards from the committee room, he bided his time in hopes of someday becoming chairman. He is obsessed with his record number of floor votes, and listening for the bells signaling a roll call, he can seem a caricature of the congressman consumed by the process—not the substance—of government.

A frail, complex figure, he is a man of contradictions. He is capable of great personal courage, but is criticized for being too preoccupied with image. In debate, he is given to long, rambling harangues, yet in his writings and comments, he can be blunt with a sudden clarity.

"It is like sticking pins in a rattlesnake," he wrote President Reagan of the administration's covert military aid to anti-Sandinista guerrillas in Nicaragua. "If we can't do more than that, we should do less."

FOUGHT IN PHILLIPPINES

Mr. Bennett fought with Philippine guerrillas against the Japanese in northern Luzon as an Army officer in World War II. The independent, small-unit combat suited his personality, and the war marked him for life when he was crippled by polio contracted in the jungle. He wears a steel brace on his right leg, and with his two black canes,

he is a fixture in the House as he rushes to make yet another vote.

"He wears his clothes out from the inside," says Rep. Sam Gibbons (D., Fla.) with admiration, yet in his own remarks, Mr. Bennett betrays some misgivings about his obsession with legislative matters.

He blames himself now for not finding more time to help a drug-addicted son who died from an overdose of narcotics in an apparent suicide, "I do blame myself," he said. "That has been real hard to live with."

Like other Southerners, he struggled with civil rights in the 1960s. He opposed the 1964 Civil Rights Act, he says, but uncomfortable with his position, he supported voting-rights legislation a year later. "I came to see how wrong I was about black people," he says.

In June 1971, Mr. Bennett was the most senior member of the Armed Services Committee to support an anti-war amendment in the House, and among those who joined him was a young freshman on the committee, Rep. Les Aspin (D., Wis.). Seven terms later it would be Mr. Aspin who would win the chairmanship, and the contrast in the styles of the two men was already a harbinger of what was to come.

Mr. Aspin saw Vietnam from inside Robert McNamara's Pentagon. An Army economic analyst, he emerged unscathed by combat and with the brash confidence of a whiz kid looking beyond conventional wars to nuclear weapons and the nuances of arms control. A consummate deal maker, Mr. Aspin was a natural to beat the standoffish Mr. Bennett.

The same young liberals who contributed to Mr. Bennett's defeat in January cried foul last week when Mr. Aspin used his new position as Armed Services Committee chairman to preserve production funds for the nuclear missile. It was Mr. Bennett who co-sponsored the motion to kill the MX authorization, and there was a twinge of guilt for some of those giving him the standing ovation at the end of the MX debate.

"It wasn't for the speech, it was for something else," said Rep. Thomas Downey (D., N.Y.), remembering the mix of anger and admiration on the floor. "He has stayed by his position and didn't run and hide."●

SBCO'S RABBI LEFKOWITZ: A MASTER BUILDER OF THE BOROUGH PARK COMMUNITY

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. SOLARZ. Mr. Speaker, I rise today to pay tribute to an extraordinary young man, Rabbi Shmuel Lefkowitz, whom I have come to know and greatly respect over the last 8 years. His wisdom, integrity, and perseverance have helped him to build one of the most remarkable neighborhood development organizations in the United States, the Southern Brooklyn Community Organization. SBCO is largely responsible for the resurgence of a neighborhood and the preservation of a way of life for the people of Borough Park and Kensington in Brooklyn.

Since 1977 he has served as the executive director of the Southern Brooklyn Community Organization, an interethnic neighborhood preservation and development group which is also a division of the Agudath Israel of America. This small agency, staffed by local housing, economic development, and social work professionals has literally rewritten the books on how to go about preventing pockets of blight and building abandonment from destroying entire neighborhoods and ethnic communities.

I have been privileged to work with Rabbi Lefkowitz and his able board of directors at numerous planning and negotiating sessions over the last 8 years. Shmuel Lefkowitz is always prepared. With maps, charts, graphs, conferences, briefing papers, filmstrips, and walking tours, he has convinced elected representatives, Federal and local government officials, businessmen, bankers, homeowners, and religious leaders that making investments to improve and provide affordable housing for low- and moderate-income families is both prudent and profitable and a civic duty. As the audience demands he can speak eloquently or bluntly, briefly or for hours, about the wisdom of maintaining a healthy mix of private and public investment programs in our neighborhoods and of the importance of community organizations and merchant associations. But most of his and SBCO's energies have been aimed at the eradication of decay and abandonment and the revitalization of Borough Park and Kensington as a good place to live, work, and raise a family.

Shmuel Lefkowitz is an Orthodox rabbi, a social worker, a fundraiser, and the father of six children. He possesses an amazing array of abilities and extraordinary energies that make it possible for him to bring together people of various political, economic, ethnic, racial, and religious backgrounds and convince them to work together to improve their neighborhoods. After talking "tachlis" with them, explaining his vision of neighborhood preservation as a key to urban survival, he is able to disarm the most cynical New Yorker or hardened bureaucrat and inspire them to work with him and SBCO to preserve and revitalize the local community and to strengthen neighborhood institutions. His creativity, vision, and determination helped him to develop new initiatives and to reshape old programs to fit the needs of the people of Brooklyn.

In searching for a way to build affordable housing for moderate-income families, particularly those with many children, he set out to convince the Federal Government that a Federal program subsidizing mortgage costs for moderate-income families that had never been tried in New York could work, provided the program was modified by the Congress for areas with higher cost housing.

As the Representative from Borough Park, I worked with Shmuel first to convince the Congress to raise the mortgage ceiling, and then to convince HUD that there was no reason that section 235 housing couldn't be condominiums in apartment buildings, instead of suburban single-family homes on a sixth of an acre. Shmuel's perseverance and persuasive powers paid off, and now some 16 communities in New York and some 2,200 families are enjoying new housing built under this modified section 235 program.

Rabbi Lefkowitz knew that Brooklyn families wanted to own their own homes. Affordable home ownership gives people a permanent stake in their communities and makes it possible for families to stay near their synagogues, churches, schools, ethnic neighborhoods, and shopping areas. Homeowners are traditionally more interested in protecting their property values and working to make their neighborhoods safer and more attractive. So Shmuel helped organize the Borough Park Community Patrol to increase public confidence and to improve public safety. The first viable community anticrime organization in Borough Park, the community patrol now has hundreds of volunteer members and dozens of activities which have helped reduce crime and improve the neighborhood.

Over and over again he told groups of housing and community development experts, Federal officials, bankers, businessmen and community leaders, tenants and homeowners that it is far cheaper in human and financial terms to save neighborhoods than to attempt to recreate them after they have been destroyed. Neighborhood preservation through community action was Shmuel's motto and guiding principle, and the plan worked.

But now it has come time for Rabbi Lefkowitz to leave the Southern Brooklyn Community Organization and the busy offices which he planned, renovated, and established on 18th Avenue. But Rabbi Lefkowitz, the SBCO Board of Directors, Rabbi Sherer and the Agudath Israel can take great pride in the substantial accomplishments that have occurred under Shmuel's able stewardship at SBCO. Over $50 million in private investment has been leveraged into Borough Park and Kensington. One thousand units of new or renovated housing have been constructed to provide decent, safe, affordable shelter for large families, low- and moderate-income residents, and for our elderly and handicapped citizens.

More important than the new apartments and the revitalized shopping area on 13th Avenue, however, is the new positive spirit that Rabbi Lefkowitz has helped bring to the forefront in one of the Nation's largest

Jewish communities. Shmuel Lefkowitz proved that individuals can overcome the indifference of city hall and the White House and that diverse groups can put aside differences of philosophy or politics and work together to aid families, and improve the physical and social communities in which we raise our children.

Shmuel leaves at SBCO a tradition of quiet, effective advocacy, coupled with firsthand knowledge of the intricacies of development programs. SBCO worked to accommodate the needs of the various actors in neighborhood preservation: Federal agencies, private investors, local businessmen, community leaders, home buyers, and residents in order to produce the positive results that spell healthy, happy, prosperous neighborhoods.

I am proud to have this opportunity, here in the halls of the Congress, to pay public tribute to and to thank Rabbi Lefkowitz and the Agudath Israel for all that has been accomplished to make Brooklyn a better place to live. May Shmuel's new efforts to rebuild and revitalize neighborhoods in the private sector be equally successful, give him much satisfaction, and more time for his growing family.

I would not be surprised if Rabbi Lefkowitz were one day entrusted with major national responsibilities here in Washington for, to quote the poet Emerson: "He builded better than he knew; the conscious stone to beauty grew," and we are all the beneficiaries of his efforts.●

A BLUEPRINT FOR ACTION ON THE UNITED STATES-JAPAN TRADE GAP

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. McGRATH. Mr. Speaker, a constituent of mine, Mr. Robert McMillan of Garden City, NY, recently penned a thought provoking commentary outlining the basic steps we must take to reduce our trade gap with Japan. Mr. McMillan is a member of the trade policy advisory committee and is widely respected in the New York business community.

His article is a useful reference for our colleagues as debate over the equities of the United States-Japanese trade relationship continues. I hope that Members of this body as well as corporate leaders throughout our Nation take note of Mr. McMillan's work which follows:

WE MUST TAKE ACTION TO CLOSE TRADE GAP WITH THE JAPANESE

(By Robert R. McMillan)

Last year, the trade deficit of the United States stood at $123.3 billion—an all-time record high. The trade deficit for 1985 is expected to be at least $140 billion. Meanwhile, Japan showed a $44.4 billion trade surplus in 1984, up sharply from 1983.

You would think these deficits would spur significant action on the part of our government, but last week's trade negotiations notwithstanding, Washington has not risen to the challenge.

The most significant action on trade in the last several months remains the decision to repeal voluntary import restrictions on Japanese automobiles.

In the interest of free trade, the restrictions indeed should have been removed, but we must take action if we are to prevent further loss of manufacturing jobs in the United States. Here is a seven-point action program to help turn around our trade deficits over the next decade.

First, trade equity with Japan must be achieved. Our government must become more articulate and aggressive in insisting that Japan change some of its restrictions on the importation of services, agricultural goods and finished consumer products.

Second, U.S. companies should take greater advantage of a 1982 federal law removing obstacles to the formation of export trading companies by businesses and banks. Since the enactment of that law, only 50 such companies have been formed. There are over 6,000 export trading companies in Japan whose sales total $350 billion a year.

Third, we must move towards the creation of a North American Common Market so that goods and services may move freely among Canada, Mexico and the United States. Creation of such a market would mean even less dependence on Mideast crude oil for the United States and would open the markets of Mexico and Canada to more of our manufactured goods and investment dollars.

Fourth, changes should be made in the antitrust laws so that our businesses may properly combine and become more competitive with foreign firms. Mature and tired industries in the United States, such as steel, need to be able to put their resources together so that their corporate structures can be streamlined and made more productive.

Fifth, business must work with government and educators to make some basic changes in our educational system. Foreign languages must be taught to our children at an early age. Whether "everyone" overseas speaks English or not, our competitiveness is weakened when our sales forces are unable to communicate effectively in the language of those they are selling to.

Sixth, labor and management must continue to pursue excellence in product quality. Anyone who thinks Japan's products lack quality need only look at their penetration into the U.S. automobile and electronics markets.

Seventh, the United States should convene a world monetary conference to explore the means to stabilize world currency markets. Unless all nations work together to solve the continuous devaluations of currencies, the balance of trade will continue to ebb and flow with the strength of the U.S. dollar. The current high value of the dollar overprices our goods in world markets.

These steps will help to improve our balance of trade. Action is now required.●

COLOMBIAN OPPOSES U.S. AID TO NICARAGUAN REBELS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BARNES. Mr. Speaker, the administration has been telling us that Latin American statesmen support its Contra aid proposal. Now it turns out that the administration misled Colombian President Belisario Betancur when it described the proposal to him when he was in Washington. Betancur told the New York Times yesterday that Secretary of State Schultz never told him that President Reagan's plan provided for military aid to the Contras. That, Betancur said, makes it "no longer a peace plan, but a preparation for war." He voiced "outright rejection" of the idea, and said, "I haven't spoken with any Latin American leader who feels differently."

Betancur told the Times that it "would be a contradiction" for anyone to try to use his statements in Washington to imply approval of President Reagan's plan. He said he disapproves of Reagan's 60-day time limit on negotiations because it is "almost like an ultimatum." The Times further reports that the views of the other Contadora countries on Reagan's plan are similar to Betancur's.

I urge my colleagues to read the New York Times report, which follows:

[From the New York Times, Apr. 16, 1985]

COLOMBIAN OPPOSES U.S. AID TO NICARAGUAN REBELS

(By Joel Brinkley)

BOGOTA, COLOMBIA, April 15.—The President of Colombia said today that he and other Latin American leaders were opposed to renewed United States military aid for rebels fighting the Nicaraguan Government.

Earlier this month the President, Belisario Betancur, told reporters in Washington that his reaction to President Reagan's plan on Nicaragua had been "very positive." But today Mr. Betancur said his response had been based on the plan's call for a cease-fire and negotiations.

He said President Reagan and Secretary of State George P. Shultz had not mentioned to him that the proposal also provided for renewed aid to the rebels, and he said he had not realized this was part of the plan until his return to Bogota.

Mr. Betancur, speaking in an interview here, said Mr. Reagan's recent call for Congress to approve $14 million in aid to the rebels made that part of the President's plan "no longer a peace proposal, but a preparation for war."

In the last few days, several senior Reagan Administrtation officials have said that Mr. Betancur and other Latin American leaders supported Mr. Reagan's initiative, including a call for renewed aid to the rebels if a deadline for talks in Nicaragua is not met.

FOREIGN INTERVENTION OPPOSED

Mr. Betancur said today that he and other Latin American leaders "firmly believe that any foreign support to guerrilla groups,

whatever the origin, is clearly in opposition to the prevailing doctrine in Latin America regarding foreign intervention in the internal affairs of our continent."

His view on foreign financing of Latin American conflicts, he said, is "outright rejection" of the idea.

He said he had discussed the matter in the last few days with heads of state of many Central and South American countries, and added, "I haven't spoken with any Latin American leader who feels differently."

Mr. Betancur also said he believed that "we are now very close to reaching a full agreement" in the Contadora peace negotiations for Central America, which have been under way for more than two years.

The remaining obstacles, he said, involve agreements on limiting foreign military maneuvers, bases and advisers. But he said that "we have made some headway on that," adding that "there may be one or another matter out of the whole agreement that the United States would not agree with."

In the 60-minute interview at the Presidential Palace here, Mr. Betancur said that while parts of Mr. Reagan's Nicaragua initiative were "positive and constructive," other parts were in direct conflict with the goals of the Contadora discussions.

In what he called a "peace initiative" for Nicaragua, Mr. Reagan proposed a cease-fire and negotiations between the American-backed rebels and the Sandinista Government that would lead to new elections. Nicaragua immediately rejected the plan.

At the same time Mr. Reagan asked Congress to approve $14 million in renewed aid for the rebels, saying the money would be used for nonmilitary purposes for 60 days. If the Nicaraguan Government does not agree to talk with the rebels by June 1, Mr. Reagan said, the aid would then be available to the rebels for weapons.

Mr. Betancur was in Washington on April 4, when the plan was announced, and he said today that Mr. Reagan and Mr. Shultz had given him only a partial briefing on it. In a meeting that morning, Mr. Betancur said, they told him that they planned to propose a ceasefire, negotiations and nonmilitary aid to the rebels—ideas that Mr. Betancur said he accepted with enthusiasm.

"I DID NOT KNOW IT WAS TIED"

But he said that when he left the White House, he "did not know it was tied to the $14 million" in renewed aid to the rebels.

Mr. Shultz gave him a printed copy of the full plan as he left, Mr. Betancur said, but he did not have time to read it until much later.

That afternoon, Mr. Reagan appeared on national television and described his plan in detail. Mr. Betancur held a news conference in Washington at about the same time—he did not see Mr. Reagan's address, he said—and when he was asked what he thought of Mr. Reagan's plan, he said, "My reaction is very positive."

A few days later, Robert C. McFarlane, Mr. Reagan's national security adviser, told reporters that the leaders of the four Contadora countries—Colombia, Venezuela, Panama and Mexico—all had endorsed Mr. Reagan's plan, including the call for renewed military aid, although he said Mexico was "less effusive" than the others.

"QUALIFIED SUPPORT"

Today Mr. Betancur said, "I understand that Mr. McFarlane has interpreted my cautious remarks in which I stated that the proposal was, at least in part, constructive and positive, as a sort of blanket approval rather than qualified support."

If the Administration is trying to use his statements to gain renewed military aid for the rebels, Mr. Betancur added, "there would be a contradiction by whomever attempts to do so."

He said it would be "infinitely more constructive" if Mr. Reagan's proposal "made no mention of a 60-day time limit" for the end of nonmilitary aid, because that "is almost like an ultimatum."

Mr. Betancur said the first part of Mr. Reagan's plan, the call for a ceasefire, "is constructive and positive inasmuch as it delays the second part of the proposal, which is the onset of a military solution."

At a meeting in Panama last week, their first since last fall, officials from all four Contadora countries said their Governments had come to similar conclusions.

The Contadora group, named for the island off Panama where the first meeting was held, has been trying to fashion a peace plan for Central America since January 1983. The plan would encompass Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua.

TALKS ARE "SPECTACULAR SUCCESS"

Mr. Betancur, who is widely viewed as the Contadora leader most actively involved in the negotiations, called the meeting last week "a spectacular success." After several months of inaction, problems that had been blocking the talks are now resolved, he said, adding that the negotiations now seem to be surrounded by "a state of grace."

An agreement was reached Friday on the establishment of a commission to monitor an accord being negotiated on reducing arms in the region. "This was the greatest obstacle," Mr. Betancur said today. "We are now very close to reaching an agreement."●

THE PUCCIO REPORT ON WESTWAY—PART I

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. GUARINI. Mr. Speaker, today I am inserting the first part of a report by former Federal prosecutor, Thomas P. Puccio, on the proposed westway highway project in New York. The report was commissioned by Gov. Mario Cuomo in 1983 to compare westway's projected benefits with those which would accrue from the use of interstate highway trade-in funds to aid New York's mass transit system. In the first part of the report, Puccio provides a clear description of the project's magnitude, its evolution and present status, and the major issues involved. He analyzes New York's trade-in option and reveals that it would be more viable than westway and more beneficial to New York. In tomorrow's RECORD I will conclude the report.

THE PUCCIO REPORT ON WESTWAY—PART I

Last July, I agreed to report on the continued viability of the controversial Westway project, in light of a federal District Court Judge's finding that State officials had suppressed important evidence during the approval process. This task proved too burdensome to complete in the sixty-day period of time originally contemplated. Since taking the assignment, I have devoted considerable time to a review of documents (including briefs, court decisions, correspondence, and newspaper articles concerning Westway), and I have spoken at length with a number of individuals who are in favor of, and opposed to, the project.

Based on the above, I have reached two basic conclusions:

1. Whatever merit the Westway project originally had, it has now become a luxury that the City and State probably cannot afford. Moreover, legal entanglements which continue unresolved to date have put Westway almost out of reach. Accordingly, the valuable trade-in opportunity should be seriously explored before it is too late.

2. The federal District Court findings of deception by state officials makes an investigation by an appropriate state or federal agency a necessary step to restore public confidence in the integrity of the approval process.

BACKGROUND

Westway is a proposed highway/land development project that has been designed to take advantage of federal funding available under the interstate highway laws. To the extent that Westway expenditures fall within the "interstate highway" definition, and subject to the ultimate availability of funds. Westway's costs would be 90 percent covered by the Federal government, 10 percent by the State. At present, the State's cost estimate is in the order of $2 billion, though opponents believe that the eventual price would be $4 billion or more.

Westway is styled as a replacement roadway for the old West Side Highway south of 42nd Street. It would not, however, be built in the existing right-of-way (which is adequate to support a modest replacement roadway). Instead, approximately 200 acres of the Hudson River would be landfilled, and the road would be tunneled through this fill (or, for approximately one-third of its length, routed through an open cut in the fill or mounted on an elevated structure above the fill). The area of the fill ranges from the current bulkhead line outward as far as 800 feet to the pierhead line and is generally referred to as the "interpier area." According to the 1977 Environmental Impact Statement (EIS) for Westway, approximately 90 acres of the landfill would be used for parkland, 100 acres would be available for development, and the remaining area would support the highway and its interchanges.

The history of how Westway was developed as a concept and manipulated through the review process is lengthy and need not be repeated here. It is sufficient to note that funding approval was given by the Federal Highway Administration (FHWA) in January 1977; an air quality permit was issued for the project in 1980; and a Corps of Engineers' dredge-and-fill permit has since been set aside by the U.S. District Court (recently affirmed by the U.S. Court of Appeals), and the matter has been remanded to those agencies for reconsideration after the preparation of a new EIS. The preparation of that EIS is now underway.

THE PRINCIPAL ISSUES

At the center of the Westway debate are two principal issues first, the allocation of available Federal money to a combined highway real estate project or the alternative use of such funds for transit rehabilitation and other infra-structure improve-

ments; and second the impact of the highway and potential landfill development on existing communities, especially Greenwich Village. In addition, the District Court trial identified a third issue of substantial importance-i.e., the damage that the landfill might do to important fisheries resources of the Hudson River.

ALLOCATION OF FEDERAL FUNDS

The debate over the allocation of available Federal monies derives from Section 103(e)(4) of the Federal-Aid Highway Act, which authorizes the State and City (if they agree) to abandon Westway and use the funds instead for substitute transit and roadway projects. Most Westway opponents are strongly in favor of this "trade-in" alternative, because of the immense infrastructure capital needs that the State and City face. Westway proponents, in contrast, have asserted that the trade-in is illusory and that in any event, Westway represents a "once-in-a-lifetime opportunity" which should not be missed.

LAND USE

The "land use" issue has its own history. When Westway was first conceived, the Lower West Side was generally run down as it edged toward the Hudson. As a consequence, Westway was seen as the key to revitalizing this area. Since 1977, however, much of the Lower West Side has renewed itself through new construction and accelerated conversions. Thus, today the residential communities in the Village and Tribeca, as well as in Lower Manhattan, already extend to West Street, and Westway has become something of an anachronism in this regard. Instead, for many community residents, Westway has become a spectre, since the landfill development could serve to cut them off from the Hudson. In addition, if the development should end up being luxury housing the pressures on rentals (as well as co-op and condominium prices) in the existing upland neighborhoods could be severe.

IMPACT ON FISHERIES

Finally, the potential fisheries impacts have become a matter of concern to the groups who have been concerned with protecting the Hudson over the past 20 years. In this construction, the species of fish the most severely affected appears to be the striped bass, which has great commercial and sports value not only in the Hudson, but also on the north and south shores of Long Island, all the way to Montauk.[1] The striped bass has been at the center of power plant controversies on the Hudson for many years and was probably the key factor in defeating Con Edison's proposal to build a pumped storage plant at Storm King Mountain. For the groups involved in that and other Hudson River controversies (including sports and commercial fishing interests), the idea that Westway could (to quote the National Marine Fisheries Service) "threaten the survival of the Hudson River population of striped bass" is a matter of deep concern.

THE CURRENT STATUS OF WESTWAY AND THE LITIGATION

When the U.S. District Court set aside the Corps and FHWA approvals of Westway, Judge Griesa directed the preparation of a revised EIS on the fisheries impacts and reconsideration by both the Corps and FHWA, based on that revised EIS. Pending such reconsideration, the Court enjoined all major construction connected with Westway and most other substantial expenditures. As a result of that decision and injunction (which was affirmed by the U.S. Court of Appeals on February 25, 1983), major work on Westway has been brought to a halt.

In issuing its decision and injunction, the District Court found that the New York State Department of Transportation (NYSDOT), as well as FHWA, had acted in bad faith and conspired to conceal critical new information on potential fisheries impacts. As a consequence of these findings (which were also affirmed by the Court of Appeals), the District Court made specific in its injunction the further steps that the Corps was bound to follow on the remand. Central among these was the obligation that the Corps act independently of, and not defer to, NYSDOT in shaping its decision. In addition, the Corps was explicitly instructed to consult with, and give great weight to the views of, the expert Federal fisheries agencies in deciding what additional field studies, if any, were to be undertaken.

CORPS' RECENT BEHAVIOR

Following the Court decision, the Corps began to gear up to prepare a revised EIS, and in that connection initiated a systematic inquiry into the need for additional studies. This led in August 1982 to a recommendation by the Corps' own consultants that further field studies be undertaken. Subsequently, in October, an expert panel assembled by the Corps concluded that two winters of additional work were needed and that the studies must be carried out independent of NYSDOT and its consultants. These judgments were, in turn, endorsed by each of the Federal fisheries agencies. However, when the State objected to doing such studies, the Corps abandoned the position which its expert consultants had taken and simply accepted what the State offered (which was a single winter of local sampling). Furthermore, despite the specific terms of the injunction that the Corps conduct its own independent evaluation, and despite the explicit recommendations of the expert panel that any studies be carried out independent of NYSDOT consultants. The Corps is apparently using NYSDOT—and the same NYSDOT consultants whom the District Court found to have misrepresented the earlier fisheries results—to carry out the future field work. Beyond this, the studies now being undertaken were commissioned without consultation with the Federal fisheries agencies.

In view of the proceeding conduct (which is virturally a repetition of the 1980-81 activities that the District Court found unacceptable), the plaintiffs have moved to hold the Corps and NYSDOT in contempt. Judge Griesa, for his part, has made his concern quite clear and his scheduled court proceedings which are now ongoing. If the Corps and/or the State are held in contempt, the EIS process will have to start over and two winters of additional field work will eventually have to be undertaken.

TIMETABLE

This, of course, is not in accord with the State's timetable. To the contrary, shortly before the contempt motion was filed, the State was reported as expecting a revised draft EIS to be available by April. This has not happened; but even if a draft was forthcoming soon, in light of the conduct described above, it would very likely be found defective by Judge Griesa. Accordingly, it is unlikely that an adequate EIS will be issued in 1983. If this happens, and taking account of time required for further judicial review, it is unlikely that major Westway work could resume before 1985, even if the outcome of the review process were favorable to the project.

NO POSSIBLE ALTERNATIVES

In this last connection, one other point should be recognized: there may well be an insuperable substantive obstacle to Westway Specifically, under the Clean Water Act, the foiling of "special aquatic habitat" can only be permitted under extraordinary circumstances, where there are no possible alternatives. If, as the 1979-80 fisheries data appear to show, the interpier area is an important winter nursery for young striped bass and other fish, it will qualify as a "special aquatic habitat;" and since there are clearly alternatives to Westway (even if some people deem them less desirable), then under the applicable law, the Corps will not be able to issue a landfill permit. The likelihood of this outcome is all the greater because the Federal fisheries agencies continue to oppose the landfill permit; and, as recently emphasized by the Court of Appeals in affirming Judge Griesa, the Corps must give "great weight" to these views. The Corps will not meet that test if, as in the last time around, it simply ignores the negative recommendations of the agencies.

In summary; the legal proceedings surrounding Westway are likely to stretch out many months, if not many years; and while it would be foolish to contend that a permit could never be issued, the obstacles are substantial and any authorization to proceed is uncertain at best.

THE TRADE-IN ALTERNATIVE

The alternative to Westway deserving the most serious consideration is the trade-in of Westway, and the use of Westway funds for a substitute replacement road, combined with transit and other infrastructure improvements.

The trade-in requires as a first step that the Governor and the Mayor join together to request that Westway be withdrawn as an interstate route and that the funds required to complete it (as set out in the most recent interstate cost estimate) be made available instead for substitute transit and roadway projects. The request is made to the Secretary of the U.S. Department of Transportation. The date, every such request made to the Secretary (now totalling nearly 30) has been approved, and there is no reason to believe that the result would be different with Westway. To the contrary, every recent Secretary of Transportation has indicated that, if a Westway trade-in request were made, it would be approved.

Once the trade-in was effected, an "account" to the benefit of the City and State would be established in Washington, against which substitute transit and roadway projects would be authorized. The value of that account, based on current cost estimates, would be approximately $1.5 billion. (These funds require a 15% local match whether used for transit or roads.)

An initial allocation from the trade-in funds would be required to complete and improve the substitute roadways link between 42nd Street and the Battery: The State has already removed most of the old overhead structures, and an interim road has been developed which provides a reasonable, if sometimes congested, vehicle route

[1] The value of the striped bass fishery in New York and elsewhere along the North Atlantic coast has been estimated at more than $100 million annually.

down the West Side. Significant improvements, however, may be possible with trade-in funds. For example, according to one view, within the 260-foot right-of-way that exists today, the roadway could be relocated eastward to permit the construction of a border park; a pedestrian overpass could be provided to facilitate access to the waterfront; turning lanes could be added to smooth the flow of traffic; intersections could be reduced in number to alleviate congestion; and, in general, a first-rate surface arterial could be developed to carry both auto and truck traffic along the West Side corridor. While the resulting roadway would not have the capacity of Westway, the speed differential would be small, involving, at most, five to ten minutes of additional driving time in a rush hour setting.

FUNDS FOR OTHER BOROUGHS

To reconstruct such a replacement road, including associated rehabilitation of the waterfront, the allocation of $100 million of the trade-in funds would undoubtedly be more than sufficient. The remaining trade-in funds, totalling approximately $1.4 million (plus the State share of approximately $200 million), would then be available for transit rehabilitation and bridge, road and related infrastructure repairs and improvements. These funds could be used, moreover, not only in Manhattan, but also to the benefit of the outlaying boroughs and, the general metropolitan area. For example, subway improvements could be financed in the Bronx, Brooklyn and Queens, as well as in Manhattan; funds might be used to purchase new buses for Staten Island; interborough bridges could be rehabilitated; and roadways could be repaired in diverse sections of the metropolitan area. In short, while the bulk of the funds would presumably be spent in Manhattan, trade-in offers options that could provide much broader benefits.[2]

The trade-in funds would be a major and critical source of the money needed to buoy up failing capital infrastructure. Even with the MTA's expanded 10-year program, for example, there are substantial shortfalls of transit capital funds; and the problem is equally serious in connection with bridges and roads. Furthermore, the allocation of trade-in funds to transit rehabilitation would avoid the need for up to $1 billion of borrowed capital and the resultant interest charges. This could save 10 cents to 20 cents in terms of the fare.

SURER FUNDING FOR TRADE-IN

Recent changes in the Federal Highway laws have increased the attractiveness of trade-in, in certain respects. In particular trade-ins for substitute roadway projects (including bridges) will now be funded out of the Highway Trust Fund, rather than being dependent on annual appropriations from the General Fund. This should provide somewhat greater assurance of receiving such funds in a timely way (at least as great assurance as for Westway itself) and will also relieve to some degree the annual competition for transit trade-in funds. The latter have been tentatively set at between $365 million and $400 million annually for the next four years—a relatively low sum which could, however, be increased. In any event it has been estimated that if Westway were traded in, New York could obtain at least $100 million a year for transit, based on the current authorization level. That would be a substantial amount in its own right.

The preceding discussion assumes that the trade-in funds would be drawn down within the context of the current law. However, this need not be the case if a decision were made to trade-in, it is possible (if not probable) that a deal could be negotiated with the Federal government that would be more advantageous than the scenario described above. For example, a regularized flow of Federal funds (perhaps $200 million a year over 10 years) might be effectively guaranteed, allowing the State to issue its own bonds, backed entirely by the flow of Federal funds. This would allow major repair work to proceed immediately and in an expansive way—all the time when it is needed most. Such a program could also generate large numbers of current jobs, equal to or even greater than could Westway.

Based on experience in Boston, Chicago, and Washington itself, it is apparent that the State of New York can make a deal with the federal government to assure that trade-in works. Up to now, neither the State nor the City has been prepared to negotiate, and so long as they remain unwilling to do so, they will be inclined to assert that trade-in does not work. However, it does, as the elections by other cities and states have shown; and, in my view, there is little doubt that it will work in the case of Westway, if the City and State make that election and follow it through.●

[2] It is also worth noting that the trade-in would benefit the poor to a far greater extent than Westway, since the less affluent are heavily dependent on the subway and bus system.

OCEAN MINERAL RESOURCES DEVELOPMENT ACT

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BOSCO. Mr. Speaker, last year I introduced legislation aimed at slowing the Department of Interior's proposal to offer lease sales for undersea mining on the Gorda Ridge off northern California and Oregon until the Federal Government resolved the unanswered questions and concerns raised by both the mining industry and area residents. The draft environmental impact statement released by the Minerals Management Service in January 1984, which covered potential seafloor mining on 40 million acres from 20 to 40 miles offshore, drew intense criticism from environmental and fishing groups and State and local governments. Even the mining industry viewed the plan with considerable skepticism.

In response to the criticism of the draft EIS, the Interior Department agreed to scale back the size of the lease area to 4 million acres and established a joint Federal-State working group to conduct additional economic and environmental studies. It appeared to be a good-faith effort to respond to our concerns, and I did not pursue committee consideration of my legislation.

It now appears, however, that the joint Federal-State working group may report its findings within the next few months after only a limited number of meetings with limited financial and technical support. These findings, which will be far from comprehensive, may provide the basis for a revised draft EIS and could open the door to lease sales as early as 1986.

Although I do not want to prejudge the results of the working group's efforts, I firmly believe that we are still at least several years away from filling the large scientific data gaps that surround the issue of ocean mining on the Gorda Ridge. Ocean scientists who reviewed last year's draft EIS found it totally inadequate and said it would probably require another 4 to 7 years to get a better idea of what is out there and what the potential impacts of development might be. Moreover, most experts agree that the technology necessary for actual mining will not be available for at least 20 years. In short, leasing of mineral rights on the Gorda Ridge next year would clearly be premature. As a result, I am today reintroducing the Ocean Mineral Resources Development Act, which would provide for a moratorium on Gorda Ridge lease sales until more definitive scientific information is gathered and analyzed on both the mining potential of the area and the environmental impacts of development.

There are a number of issues that need to be further explored. First, to the best of my knowledge, there is still no definitive evidence that polymetallic sulfide minerals—including such strategic metals as copper, zinc, chromium, silver, platinum, nickel, and cobalt—exist on the Gorda Ridge. As Interior's draft EIS showed, very little is really known about the overall physical, chemical, and biological environment of the Gorda Ridge. In the absence of this information, the mining industry has been understandably hesitant to invest capital in the type of exploration technology necessary to undertake a successful mining venture—particularly now in light of the worldwide glut of polymetallic sulfides and the fact that the technology for actual mining may be 20 years away.

It is also clear that no adequate assessment of environmental impacts will be possible until more is known about the ore source and mining methods to be used in development. The possible destruction of the ocean-bottom ecosystem is an obvious concern, as are the potential onshore pollutant effects of polymetallic processing plants. In addition, the commercial fishing industry has raised serious concerns about the effects of heavy metal discharges on the ocean food chain in an area with extremely valuable salmon, steelhead, and alabacore fishery resources.

Serious questions also remain as to which Federal agency has jurisdiction

over the polymetallic minerals on the Gorda Ridge. While Interior claims jurisdiction under the Outer Continental Shelf Lands Act, the Department of Commerce has historically been assigned jurisdiction over the commercial mining of manganese nodules on the deep seabed under the Deep Seabed Hard Minerals Resources Act.

Finally, with little industry interest, a lack of basic information, and a worldwide glut of polymetallics, there is ample reason to doubt that the Government could receive anything near fair market value for leases on the Gorda Ridge. There was discussion last year that bids might be accepted for as little as 5 cents per acre.

The Ocean Minerals Resources Development Act is designed to address all of these issues.

First, this legislation would prohibit lease sales on the Gorda Ridge until such time as the President issues a feasibility report to the Congress and the prohibition is lifted by joint resolution, or until September 30, 1989, whichever occurs earlier.

Second, the Department of Commerce and the Department of Interior would be authorized to prepare a memorandum of understanding with respect to research and other scientific studies pertinent to the Gorda Ridge. This memorandum of understanding is to be submitted to Congress no later than 1 year after enactment.

Third, the President is to submit a Gorda Ridge feasibility report to Congress no later than September 30, 1988. Preparation of this report during the moratorium should lay a sufficient scientific foundation upon which future governmental and industry decisions can be based. Among other things, the report must contain a summary of the physical and biological environment; a determination of what, if any, additional technology is necessary to fill the scientific data gaps; a study on the feasibility of mining the area; and information on the most appropriate leasing procedures and lease values for exploratory and production activities on the Gorda Ridge.

Mr. Speaker, there is no practical economic, environmental, or national security rational for rushing ahead with hard mineral leasing in the Gorda Ridge area. The Ocean Mineral Resources Development Act offers an opportunity to take a more reasoned, careful, and pragmatic approach to the issue, and I hope my colleagues will give it careful consideration.●

SENATE JOINT RESOLUTION 15

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. YATRON. Mr. Speaker, I rise today in support of Senate Joint Resolution 15, designating May 7, 1985, as "Helsinki Human Rights Day." This legislation also asks the President to reaffirm U.S. commitment to implementing the provisions pertaining to human rights in the Helsinki Final Act and to engage the support of our allies in this process.

It is not enough for the United States to be a signatory to the Helsinki Final Act. We must also act as a defender of fundamental freedoms and an enforcer of the human rights promised in this treaty. The ideals aspired to in this document can only be attained if the language binding the 35 signatory countries is adhered to and not ignored. Actions taken by parties to the accords which make a mockery of this vital instrument should be challenged immediately by other members.

As chairman of the Subcommittee of Human Rights and International Organizations, I have learned that one of the most effective ways of combatting gross violations of human rights is exposing the violator and calling attention to those who have been violated. Ironically, some of the most grievous perpetrators of human rights abuse are signatories to the Helsinki accords. Repression runs rampant in many countries which have chosen to bind themselves, at least in theory, to the principles embodied in the Helsinki process. Basic individual liberties, including freedoms of religion and expression, are denied. Citizens of these nations live daily with the fear of government harassment and intimidation. Those who protest their treatment may be exiled, incarcerated, or murdered.

For millions of people, there is no means of escaping this way of life. They are not permitted to emigrate, even for the purpose of being reunited with their families. Their only hope may be through our intervening in their behalf by demanding that every government honor the dictates of the Helsinki accords.

Senate Joint Resolution 15 gives us the opportunity to uphold the dreams of the creators of the Helsinki Final Act, as well as the dreams of the oppressed and abused who are looking to us for leadership.●

SALUTE TO ARNOLD T. BALAND

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. OBERSTAR. Mr. Speaker, I ask the House to join me today in saluting one of my district's civic leaders, Arnold T. Baland, of Virginia, MN.

On April 25, Arnold will be formally honored and recognized for his 25 years of service to Project Democracy, for which he has been chief fundraiser, promoter, and inspirational leader since its inception in 1960. At age 81, Arnold has decided to retire from the arduous work and long hours of directing Project Democracy.

Project Democracy each year invites high school students from across Minnesota's Mesabi Iron Range to submit essays and oral presentations on a selected patriotic theme. Topics in the past have included: "1984—A Year of Decision for America"; "America, the Dying Dream?"; and this year, "The American Tradition, Alive in '85." Thousands of students have participated in the program over the past quarter century.

It is a contest which encourages young people to reflect on the tremendous opportunities which they have in this country, on their heritage, and on their future. It is a program which allows them to think about the past and dream about the future.

Project Democracy would not have existed without the leadership of Arnold Baland. I admire his consistency and his dedication. I, along with my fellow citizens of the Iron Range, salute Arnold Baland for his dedication to young Americans. We are fortunate to have had his unselfish support for this program. I wish him many happy and healthy years in his retirement.●

TRIBUTE TO JOHNELLA H. MARTIN

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BONER of Tennessee. Mr. Speaker, I rise today to commend an outstanding educator and human being.

Her name is Johnella H. Martin. Since 1955, she has been employed by the Metropolitan Nashville Board of Education where she has worked in both the junior high and elementary levels and served as a librarian and a classroom teacher.

For nearly two decades her name has been synonymus with hard work; human, civil and professional rights; and leadership. During this period we have recognized her as a tireless advocate for the rights of all persons, as an empathetic listener when sensitive problems surface, as a fighter in the battles to correct social and professional unjustices, and as a person in whom others place immediate trust.

She has worked with diverse groups during her nearly 30 years in the public schools. Whether dealing with a segregated class of all-black children early in her career or with an all-white group as one of Nashville's first minority teachers transferred to the sub-

51-059 O-86-35 (Pt. 6)

urbs, Johnella Martin conveys to children that she cares. She displays warmth and abiding concern for every child, the child with ideal qualities and the child with a multiplicity of problems.

One of Johnella's most memorable challenges was leading 4,000 teachers in 1975-76 as their local president. During her tenure, there was an ever-increasing likelihood of Nashville's first teachers' strike. Although the strike was avoided, many will never forget the courage she displayed, the fairness with which she presided, the determination of her leadership style, the confidence which she displayed in dealing with the public, and the emotional strain she shouldered for her colleagues.

Teachers, both black and white, rallied to her as their leader. Nearly a decade later her name still generates awe.

Her style is direct but her warm sensitivity is always crystal clear. She consistently has been a leader who remembered her roots. She has never compromised her identity as a minority by going along with majority leaders who were less committed to social justice than she is.

She served with distinction for 10 years as a member of the Tennessee State Board of Regents during stormy battles to desegregate our State universities.

Her goal in life has been to render service to others and to make this world a better place in which to live.

It gives me great pleasure to make her achievements known to the House of Representatives.●

THE 12TH ANNUAL DAYTON "A WORLD A'FAIR"

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. HALL of Ohio. Mr. Speaker, May 31, 1985, marks the beginning of the 12th Annual Dayton "A World A'Fair," sponsored by the Dayton International Festival, Inc. The purpose is to make area citizens aware of the diverse culture and heritage of the Miami Valley and to promote friendship and understanding among all cultures.

Every year, community organizations representing the area's ethnic groups and nationalities gather in a large fair. These groups set up educational displays, conduct demonstrations of folk art and dance, and serve samples of their native food.

The result is a successful, community-wide extravaganza which helps bridge the geographical gap between the citizens of the Miami Valley and the peoples of the world.

Moreover, the World A'Fair helps maintain the cultural identity of its participants, which can be strengthened and passed on from generation to generation. That is the priceless heritage of all Americans who have participated in the melting pot which makes up our great Nation.

Many of the groups which participate in the World A'Fair have been active in international relations and promoting increased U.S. attention to human rights. This, too, serves to draw together the nations of the world and promote good will among all men and women.

I wish success and enjoyment for all who contribute to making the Dayton World A'Fair the meaningful experience it has come to represent.●

GRANTING PUERTO RICO THE SAME TREATMENT UNDER SECTION 5517 OF TITLE 5 OF THE UNITED STATES CODE

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FUSTER. Mr. Speaker, on April 3, I introduced H.R. 1943 to include Puerto Rico within the definition of State for the purposes of the requirement imposed on the Secretary of the Treasury to withhold State income taxes from the income of Federal employees.

The proposed change would have a twofold effect. It would ease a significant burden presently faced by Federal employees located in Puerto Rico, and also benefit the Commonwealth by providing for faster receipt of tax revenues.

There are currently approximately 8,000 civilian employees in Puerto Rico who have Federal income tax withheld from their salaries. Their tax liability on these earnings accrues to the Commonwealth of Puerto Rico. Consequently, they file a Federal return to obtain a full refund of the withheld tax, which is then used to partially satisfy their Commonwealth tax liability. The tax due the Commonwealth is higher than the Federal tax currently withheld. Thus, many Federal employees need to make lump sum payments equaling 10 to 20 percent of their total tax liability.

The procedure presently in place has proved to be unsatisfactory in terms of revenue collections since there is usually a significant delay in the payment of Commonwealth taxes arising from the necessity to wait for the refund of withheld Federal taxes. Moreover, many Federal employees simply forget their Commonwealth tax liability once they have received their Federal tax refund.

I would like to emphasize that the proposed amendment would not result in the loss of revenue to the United States. It merely would authorize the Secretary of the Treasury to grant the Commonwealth of Puerto Rico the same treatment under section 5517 of title 5 of the United States Code, as any State having withholding statutes. Similarly, the administrative burden to the United States would be roughly equivalent to the burden currently assumed by private employers and should not be an onerous chore to the Federal Government in view of the benefit to its employees located in the Commonwealth of Puerto Rico.●

A TRIBUTE TO MS. E. MARIE FLENOURY

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. DIXON. Mr. Speaker, it is with great pleasure that I rise today to pay tribute to a dedicated and inspirational woman whose tireless efforts and compassion enabled hundreds of children in the Los Angeles community to experience the joy of learning to play musical instruments and to participate in choirs and marching bands. Ms. E. Marie Flenoury is a sensitive and warm person, who for the last 34 years has been a music teacher with the Los Angeles Unified School District.

Marie possesses innate musical talents which she selflessly and frequently shared with her students and friends. Upon graduating from the University of Southern California she had already been a violinist and soprano at several of Los Angeles' major churches and had arranged choral music for the Lillian Randolph Singers. While pursuing a theatrical career, Marie decided to take the elementary teaching exam and passed. In September of 1950 Marie accepted her first teaching assignment at Main Elementary School. Although at times difficult, something special happened during her 10 years at Main Elementary. Becoming involved with children changed Marie's life. Children became her life.

Having a strong desire to bring the joy of music to as many children as possible, Marie accepted the position of traveling music teacher and taught at 32d Street School, Castelar, Florence Avenue, Clifford Avenue, Elysian Heights, Commonwealth and Wilton Place elementary schools. Yet, it was at Manchester Avenue School, where she taught for the past 20 years, that her outstanding work with children earned her much praise and many commendations from the community.

It was not uncommon during her career for Marie to purchase opera and symphony tickets for children who otherwise could not attend, but

who longed for exposure to the fine arts. On more than one occasion Marie bought shoes for needy students, gave items of clothing and provided hot lunches for those who were participating in weekend activities. Marie, with the help of Addreona Trammell and the late Mary Coleman Jackson, formed a scholarship committee to assist children interested in music. Many of them, inspired by Marie's skillful teaching and encouragement, went on to music careers of their own.

Marie is not only gifted with a talent to play many orchestral instruments; she is also adept at writing choral arrangements and directing children's plays. In fact, in the 1930's when Duke Ellington was rehearsing for his musical, "Jump For Joy," and having problems with the choral arrangement of the theme song, a member of the cast suggested Marie redraft the arrangement. In a week's time Marie had reworked the theme song, and it was this version which opened the show. Later Duke asked Marie to come to New York to do the choral score to "Beggars Opera," but her heart belonged to the children, and there she stayed.

Among the many activities that Marie initiated while at Manchester Avenue, was a massive orchestra composed by young people who had studied with her, which ranged from her current students to older ones who were by then teaching. She also coordinated several special holiday parades and programs, and many of her students participated in the annual district orchestra and chorus.

Mr. Speaker, Marie Flenoury, after 34 years of bringing the delectation of music to the children to whom she had dedicated her life, decided that the time for retirement had finally arrived. Marie Flenoury is a special woman with special talents. And while I am certain that she is missed at Manchester Avenue School, I share with her many friends the happiness of knowing that she is vibrant and young in spirit and that she will enjoy greatly this opportunity to relax, become fluent in Spanish, obtain a degree in church music and appreciate those things for which she has worked so hard.

I join her many friends, colleagues and students in not only wishing Marie the very best, but also in extending to her our heartfelt thanks for sharing her wonderful gift of music with us through the years.●

TRIBUTE TO FRANK X. BATTERSBY

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. LENT. Mr. Speaker, I take great pleasure in paying tribute today to an outstanding citizen, Frank Battersby, who is retiring from a distinguished career with the PDR division of the Harris Corp.

On May 3, 1985, Frank's many friends, family, and colleagues will gather at a testimonial dinner to honor his significant achievements throughout his lengthy career.

Frank enjoyed a career with the U.S. Government having worked from 1952 to 1963 with the U.S. Army, New York Ordnance District, working as Branch Chief of the Tank and Automotive Branch. Frank's commitment and dedication in this area earned him both the Outstanding Performance Award and the Superior Performance Award.

In 1963 Frank transferred to the National Aeronautics and Space Administration as Business Manager and Contracting Officer for the Lunar Module Program of the Apollo project. Frank was instrumental in promoting the growth of a contract which grew from an initial award of $330,000,000 to an incredible $3¼ billion, a clear tribute to his talent and skill as business manager and contractor. For his outstanding work in this capacity Frank was once again presented the Superior Performance Award. He was also duly commended by both the Manned Spacecraft Center and the National Aeronautics and Space Administration Headquarters after the successful landing on the moon.

On the completion of the Apollo Program in 1970, Frank was employed by the Government Support Systems Division as Director of Purchasing. I know I speak for Frank's colleagues in the Harris Corp., as well as for all of us who have benefited from Frank's exceptional skills, in expressing our gratitude for his many years of dedicated service. Frank will certainly be sorely missed but we all extend our heartfelt appreciation and best wishes for continued success.●

NATIONAL CRIME VICTIMS WEEK

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. SCHUMER. Mr. Speaker, today Members of Congress are seeking to designate this week, April 14-20, 1985, National Crime Victims Week. The very existence of this legislation signals both the seriousness of the nation's crime problem and a significant shift in the way we are addressing this problem. In 1983, 27 percent of the Nation's households were touched by a crime of violence or theft. Almost 37 million individuals were victims of serious crime. Twenty-three thousand citizens die as the result of crime each year, and many times that number are injured. Increasingly, public attention is shifting its focus from the perpetrators to the victims of crime.

The 98th Congress enacted major legislation designed to crack down on crime, including stiffer sentencing requirements and closer parole monitoring. For the first time, this legislation also authorized programs to aid crime victims. In particular, the continuing resolution contains the Victims of Crime Act of 1984, which takes a major step toward reversing the preoccupation of our criminal justice system with the criminal at the expense of the victim. Last month, the Justice Department began implementing the act's central program, a trust fund, financed completely by fines imposed on criminals, from which matching grants will be made to State victim compensation and assistance programs.

The legislation of the last Congress is a notable start, but much more needs to be done. This week, I will introduce legislation to add an additional grant program to those contained in the Victims of Crime Act. My program, the Good Samaritan Assistance Act of 1985, will provide matching grants to States for programs that reward citizens who intervene in an attempt to prevent a crime or apprehend a criminal. We have all heard the tales of victims who suffered at the hands of criminals while onlookers did nothing. But the brave acts of those who have done something, many of whom who have been severely injured or even lost their lives trying to help their fellow citizens, have received little attention and little compensation. The Good Samaritan Act would encourage States to reward these deserving individuals and, at the same time, would educate the public that one can do something to help another who is being victimized.

Earlier this session, I introduced two other bills designed to help crime victims and to help communities band together to combat crime. H.R. 841 would allow crime victims to deduct medical expenses incurred as a result of crime without regard to the usual 5 percent floor on this deduction. Allowing victims to deduct crime-related medical expenses from their taxes is an important step toward a crime policy that also helps crime victims. Allowing nonitemizers to deduct their crime-related medical expenses assists

all victims of crime, regardless of income level. Moreover, the tax deduction provides a means for Congress to alleviate the hardship suffered by crime victims whether or not the crimes fall under Federal jurisdiction.

The second bill, H.R. 840 would allow all taxpayers, including nonitemizers, to deduct contributions to anticrime groups, including community crime watches and victim assistance programs. My legislation will help alleviate the financial burden faced by the less affluent in their efforts to responsibly protect their homes and their persons. In addition, it would encourage a spirit of self-help and community cooperation, which would make our neighborhoods both more secure and more pleasant.

This week, I urge the support of my colleagues for these and other efforts to put action behind our words of concern for victims of crime. This Nation's crime victims have begun to stand up for themselves, and it is our duty as their representatives to help them make this stand in a responsible and meaningful way.●

THE ADMIRAL METCALF CASE

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. ASPIN. Mr. Speaker, Joseph Metcalf gained considerable fame as the leader of U.S. troops in Grenada a year and a half ago. He later gained considerable notoriety when it was revealed that he returned from Grenada with 24 Soviet-made AK-47 rifles on his airplane. Metcalf received only a reprimand for taking home the illegal souvenirs, while several lower-ranking soldiers and marines faced courts-martial.

There are two issues involved here.

First, there is the Metcalf case itself. Was Metcalf shown favoritism because he was an admiral? Was his offense fully investigated? The Committee on Armed Services has been looking into just these questions. But the committee is withholding further action or comments on this set of issues while the Defense Department's inspector general performs his own investigation, which is expected to be concluded shortly.

The second issue is far broader than this particular case. Is there a systemic problem with the way allegations involving high-ranking officers are investigated? Do military investigators have the independence needed to pursue their work impartially, or are they subject to pressure—or even directions—from the very persons they are supposed to be investigating?

As we peel back the layers of the onion, we come to yet another broad issue. For even if the investigative process is truly tamperproof, the Metcalf case demonstrates that it fails to look tamperproof. Service personnel as well as the general public have complained of the smell of favoritism. What can be done to ensure not only that the process is honest, but also that it is perceived to be honest?

Without judging the Metcalf case itself, I believe the investigation of the House Armed Services Committee into this second set of issues has progressed to the point where we can make some recommendations.

I am proposing legislation specifically designed to prevent tampering with investigations of high-ranking officers and also calculated to send a signal to the military community and the public at large that we do not intend to permit high-ranking officers to sidestep allegations against them.

A major part of the problem we face is a result of the different ways that the Army, Navy, and Air Force have organized their investigative agencies. I am proposing to strengthen the relatively weak investigative arms of the Navy and Air Force so that a high-ranking officer will not be able to intervene to protect himself or a buddy.

To understand the solution, it is first necessary to describe the structure in each of the services today.

The Criminal Investigation Command—historically known by the acronym [CID]—is a major command within the Department of the Army. CID elements are normally tenant units at Army installations and provide investigative support to commanders within their geographic areas. CID elements determine what investigative actions are appropriate for all criminal allegations, whether reported to them or developed on their own. CID elements keep the command posted unless doing so would compromise an investigation.

The Office of Special Investigations [OSI] is the Air Force counterpart to CID. It, too, is a separate organization with detachments dispersed as tenant units at various installations. OSI detachments, however, undertake investigations as requested by local commanders. If an OSI detachment thinks a matter merits investigation, it usually must secure a request from the commander concerned before it can go ahead. Even though the head of an OSI regional office has some authority to start an investigation—if seeking a command request might handicap the effort—still, OSI must immediately secure command ratification of that decision. What's more, an OSI regional office must shut down an investigation at the request of the command. All the OSI regional office can do when this happens is notify OSI headquarters in Washington.

The Naval Investigative Service [NIS] is the Navy counterpart. Like OSI (and unlike CID), it has counterintelligence responsibilities in addition to its criminal investigative mission. Like OSI, NIS is structured chiefly to respond to command requirements. NIS may act on its own initiative only to investigate espionage, to give reciprocal support to other law enforcement or intelligence agencies, or, where urgent circumstances warrant, to gear up preliminary investigative action.

In the Metcalf case, the customs service uncovered the two dozen AK-47's when Admiral Metcalf's aircraft arrived in Norfolk, VA. Customs investigators deferred jurisdiction to NIS. About 1 week later, NIS approached Adm. Wesley McDonald, Commander in Chief of the Atlantic Fleet, and Metcalf's immediate superior, to ask if McDonald wanted any further investigation of the AK-47 issue. It is this approach by NIS—one mandated by the nature of its charter—that gives a bad odor to the Metcalf case, regardless of whether there was any actual wrongdoing by Admiral Metcalf.

McDonald summoned Metcalf, who proclaimed himself "totally responsible" and asked for an opportunity to speak to NIS to "clear things up." NIS agents interviewed Metcalf and then asked McDonald's office once again whether any further investigation were desired. McDonald's deputy, Vice Adm. Kenneth Carr, determined that "since responsibility had been fixed, no further investigation was necessary." As a result, NIS filed a report of what it had done to that point, and Metcalf ended up with a reprimand from Admiral McDonald.

The investigation was thus shortcircuited. While Metcalf had indeed accepted responsibility, NIS never had the opportunity to establish just what Metcalf was responsible for. Was he bringing the weapons into the country for "resale"? Was he bringing them in for personal souvenirs? Was he bringing them in to present to others? How much did he know about the rifles themselves, since the names of Metcalf's battle staff members were taped to many of them? It is to answer questions such as these that the Defense Department's inspector general is now trying to marshal the facts.

My immediate concern is that, regardless of the outcome of that IG investigation, the initial NIS investigation was shortcircuited by an admiral's direction to NIS. NIS was not free to make its own decision whether or not to pursue the case further.

As outlined earlier, the Army has the strongest internal protections against command interference in the investigative process. The Army CID is an autonomous command. It is not subject to the directions of local commanders or other officials below the level of the Army staff.

This is not to say that giving autonomy to the investigators solves everything. Generals and admirals, being the senior executives in their military organizations, get a lot of attention—both positive and negative. High rank shouldn't spare an officer from scrutiny; neither should it subject him to the third degree. Because the idea is to keep rank from skewing the investigative process, care must be taken to avoid either extreme.

Complementing the autonomy that it gives its investigators, the Army has a system for making sure that any scrutiny given the conduct of its generals is flagged for deliberate attention.

Any allegation of impropriety on the part of a general must be reported to the Army Inspector General [IG]. The IG then refers any criminal aspect of the case to CID. If CID brought the case to the attention of the IG in the first place, then CID retains any criminal investigative jurisdiction it exercises in the matter. The CID report to the IG in such a case would be chiefly informational, to let the system know that a general has come under a cloud.

Additionally, whenever a CID investigation develops any need to confront a general, a report is made to CID headquarters. This report serves two purposes. First, it gives investigators pause to deliberate on their approach to an unusual subject of investigation—the "ducks-in-a-row" purpose. Second, it gives CID headquarters the chance to avert any perception of a breach in protocol—the "my investigators are not the ones on trial here" purpose.

This simply goes to say that, although giving military investigators an independent charter probably doesn't suffice as the whole solution, it is absolutely necessary to any solution.

The legislation I am proposing would give the investigative services of the Air Force and the Navy the kind of independence the Army CID already has. That is a relatively simple corrective measure which, had it been taken earlier, would have precluded the shortcircuiting of the NIS investigation and averted the odor of tampering that permeates the Metcalf case.●

THE PRESIDENT'S PEACE PLAN HAS THE SUPPORT OF OUR CENTRAL AMERICAN ALLIES

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. STUMP. Mr. Speaker, on April 4, President Reagan set forth a bold new initiative for peaceful resolution of the Nicaraguan civil war. The Reagan plan will assist the Nicaraguans in achieving political and economic progress with full recognition of human rights and freedoms. The key leaders of the region have endorsed the President's plan and so should the U.S. Congress.

I. THE REAGAN PEACE PLAN FOR NICARAGUA

The President has asked both the Sandinista government and the Nicaraguan resistance to lay down their arms and to accept church-mediated talks on internationally supervised elections and on ending repression of the church, the press and individual rights. To facilitate this process, the President specifically asked the Nicaraguan resistance to extend the ceasefire offer it made in March to June 1, 1985. The President also has asked the Congress to release the $14 million it conditionally appropriated for aid to the Nicaraguan resistance under section 8066 of the Department of Defense Appropriations Act, 1985, incorporated in the fiscal year 1985 continuing resolution.

The President has pledged that, during the period that the ceasefire offer is on the table, the released funds will be used solely for humanitarian support to the Nicaraguan resistance groups, which specifically excludes arms and munitions.

The President's plan combines the key elements of a successful policy. The ceasefire stops the bloodshed in Nicaragua. Mediation by the church ensures that the mediators will have the trust and confidence of the people of Nicaragua. The agenda of the talks, that is, elections and an end to repression, begins the process of achieving legitimate democratic government in Nicaragua with respect for the rights of all. The release of the $14 million demonstrates the commitment of the United States to democracy in the Americas and also ensures that the resistance can subsist during the talks. Moreover, the release of the funds provides a clear and unmistakeable pragmatic incentive to the Sandinista government to participate in good faith in the process. The President stated:

If the Sandinistas accept this peace offer, I will keep my funding restrictions in effect, but peace negotiations must not become a cover for deception and delay. If there is no agreement after 60 days of negotiations, I will lift these restrictions unless both sides ask me not to.

II. THE VIEWS OF OUR ALLIES IN THE REGION

The Governments of Honduras, Costa Rica, and El Salvador have endorsed the President's plan. On April 12, President Suazo of Honduras informed a House Intelligence Committee delegation that his country supports the President's plan, especially since it goes hand in hand with the Contadora process. On April 13, Acting President Arauz and Foreign Minister Gutierrez of Costa Rica told the committee delegation that Costa Rica supports the President's initiative. Honduras and Costa Rica, which border on Nicaragua, have direct vital interests at stake in the democratization and demilitarization of Nicaragua. The consolidation of Sandinista control of all aspects of Nicaraguan life, the Sandinista military buildup, and Sandinista support for terroristic subversion, threaten the security of Honduras and Costa Rica.

In addition to Honduras and Costa Rica, El Salvador has expressed its support for the President's plan. President Duarte recently wrote the following letter to President Reagan:

DEAR MR. PRESIDENT: I want to thank you most sincerely and warmly for your letter delivered to me today which explains your new peace initiative in Nicaragua and Central America. Your initiative and approach have my complete support and I strongly urge all of the friends of Central America in your Congress to give it their full backing. It is the right step at the right time in our quest for peace and democracy in this region. We appreciate as well your continuing strong support for democracy in El Salvador.

As you know, the Salvadoran people have just been to the polls for the fourth time in three years. While we do not yet have the official results, the apparent significant victory of my government and my party is, in my opinion, first and foremost an endorsement of the efforts we have made, with the help of the people and government of the United States, to bring peace, reconciliation and democracy to our own country through an internal dialogue. We believe our approach of opening such a dialogue and offering a full opportunity to all of our Salvadoran brothers to participate in a free and constitutional democratic process in our country should also be offered to all of those who are struggling for democracy in Nicaragua. I speak for all Salvadorans in warmly applauding your efforts.

We remain concerned, as we have been for some time, by the continuing flow of supplies and munitions from Nicaragua to guerrilla forces here in El Salvador which are fighting against my government and our programs of reform, democracy, reconciliation, and peace. This continuing intervention in our internal affairs is of great concern to us and we deeply appreciate any efforts which your government can take to build a broad barrier to such activities—efforts which a small country like El Salvador cannot take in its own behalf.

Please accept my personal thanks for this courageous step and my best wishes to your family.

Sincerely,

JOSE NAPOLEON DUARTE,
President of the Republic of El Salvador, San Salvador.

Mr. Speaker, our friends and allies who are most directly affected support the Reagan plan for peace. The plan is a carefully balanced approach to a difficult situation and every element in the plan is critical to its success, including the release of $14 million for the Nicaraguan resistance. Congress must do its part to give peace a chance by supporting the President's plan and releasing the funds. The House of Representatives should approve House Joint Resolution 239 to release the funds.●

PERSONAL EXPLANATION

HON. JOHN E. GROTBERG

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. GROTBERG. Mr. Speaker, I was not present and voting when the House considered two suspensions Tuesday: House Concurrent Resolution 110 and Senate Joint Resolution 15. Had I been present, I would have voted "yea" on both of them.●

A RESOLUTION ON STUDENT AID

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. CLINGER. Mr. Speaker, with Congress poised to begin debate on the 1986 budget, I feel that now is the most appropriate time for the House of Representatives to reaffirm its commitment to higher education and to the student financial aid program. Although the administration-Senate budget plan for this program is not as draconian as the administration's initial one, it still cuts to the heart of this country's traditional commitment to equal access to higher education. I am, therefore, introducing a resolution which declares that no further cuts should be made in the student financial aid program which limits access to, or eligibility for, Federal student financial aid. The text of the resolution follows my statement.

The compromise budget would limit eligibility for guaranteed student loans to families with adjusted gross incomes of $60,000; the administration had originally proposed a $32,500 income limit. In addition, an $8,000 annual cap would be placed on the amount of college costs that would be allowed for purposes of determining Federal support.

These cuts, especially the $8,000 annual cap, will seriously undermine needy students' accessibility to their institution of choice. Pennsylvanians will be particularly hard hit. The Pennsylvania Higher Education Assistance Agency provides some startling data which persuaded me to oppose cuts in student aid. First of all, Pennsylvania ranks 44th among the 50 States in the proportion of its citizens who participate in postsecondary education. Two factors which contribute to this low participation rate are financially related. One, the average costs of a year of attending college in Pennsylvania are from 17 to 19 percent greater than the costs in the rest of the Nation, depending on the types of schools the students attend. Two, on the average, due to their lower incomes and larger family sizes, Pennsylvania's students and families can afford to pay only three-fourths of what all other States' students and families can afford to pay for college costs—$2,340 as compared to $3,050 per year. This year, the parents of over half of Pennsylvania's freshmen college students reasonably can afford to pay no more than $1,200 per year for college from their current income. The average cost of a year of attendance at Pennsylvania's 4-year public colleges is $6,070 while a year of attendance at the State's 4-year private colleges averages $10,200. In addition, since 1979, Pennsylvania students' and families' average ability to pay for college costs has risen by 30 percent while the national average has risen by 38 percent.

These facts clearly illustrate the desperate need in Pennsylvania for this program to continue in full force. I am sure that Pennsylvania is not unique in this situation and that my colleagues from other States share in the urgency of defeating these budget cuts. Yes; this program is expensive, but it represents an investment in human potential and in the future greatness of this country.

H.RES. 131

Expressing the sense of the Congress that legislation which would further restrict eligibility for, or access to, Federal student financial aid should not be enacted

Whereas rising tuition at public and private colleges and universities has increased the financial burden of students and their families;

Whereas any further restriction on eligibility for, or access to, Federal student financial aid would seriously interfere with the ability of low-income or middle-income students to attend their institution of choice, thereby undermining the American principle of equal access to higher education; and

Whereas the idea that a student's talent, and not finances, should be the sole factor in determining how far the student may pursue goals in education has been a reality in the United States since the passage of the Higher Education Act of 1965: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that legislation should not be enacted which would further restrict—

(1) eligibility for Federal student financial aid; or

(2) access to higher education.●

JOE B. SWANNER RETIRES

HON. J.J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. PICKLE. Mr. Speaker, if there ever was a prototype of the big cigar-smoking bureaucrat, it would be Joe B. Swanner. No question about it—Joe has all the attributes. He looks massive, important, challenging, and ready to dish out the Federal goodies on a ward-heeling basis. As a matter of fact, they could say of Joe, as some folks used to say about me when I was connected with the State Democratic Party. "I don't know Joe. B. Swanner, but I suspect him." I say this in jest, partly, but Joe really is all of these things, and I mean that to be a compliment to him.

Joe B. Swanner began his career in the Federal Government with the U.S. House of Representatives in 1950, on the floor of the House helping to prepare the Journal. From 1953 to 1959, he served as legislative assistant to Congressman O.C. Fisher. From 1960–63 he was chief file clerk for the U.S. House of Representatives. Between 1964 and 1966 he served as Director of the Office of Congressional Relations, Small Business Administration.

In 1966, he became the Special Assistant to the Administrator, Economic Development Administration. Later as Special Assistant to the Assistant Secretary, he was responsible for all EDA congressional relations and public information.

In 1968 he became Deputy Regional Director for the southwestern region of the Economic Development Administration in Austin, TX. He was appointed regional director in August 1973.

For many years, Joe represented our Government by helping our country build and develop. Joe and his agency, the EDA, have helped thousands of cities and communities build up their own resources and offered jobs to the unemployed.

I have the feeling that the value Joe and the EDA have given to most of these communities probably has been more lasting than most of the other Government programs. Joe had the tough job of deciding what community should get the help, but I always found him to be openminded and fair.

I am particularly grateful for Joe's and the EDA's assistance in the creation of the Buescher Science Center near Smithville, TX. That project alone lays the beginning of a new world health research program. We could not have built it without Joe's and the EDA's cooperation. Housing projects, water and sewer programs, the Paramount Theater, and countless other projects are monuments of Joe Swanner's achievements.

I am pleased to claim Joe B. Swanner my bureaucratic friend and thank him for his years of service to our Government.●

CONGRESSMAN GEORGE MILLER SALUTES MIKE GRIMES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. MILLER of California. Mr. Speaker, I am privileged to honor today Michael K. Grimes who, this week, will become the president of the Council for Exceptional Children. Mr. Grimes is currently the coordinator of special education for the Contra Costa County Office of Education, in my community in California. He has served the Contra Costa schools for 17 years, and has been a member of the Council for Exceptional Children for more than 20 years.

It is especially gratifying to me that Mr. Grimes has been recognized by this organization for dedication to handicapped children and their families, and for his continuing work with the professionals who serve them. Mike has given his time and energy to educating me about the needs of these children and has taught me to be an advocate for them. He has helped me understand how special education programs operate in the school systems throughout my county, and has communicated the concerns of school professionals seeking to strengthen their programs.

In addition to his distinguished career with the Contra Costa County schools, Mr. Grimes has been a principal leader and organizer of the Special Olympics in my county. I have been fortunate to participate with him at many Special Olympics events and to witness his delight in the opportunity brought to the children involved.

Mike's commitment to disabled children and their families, his longstanding involvement with the laws and programs assuring education for disabled children, and his continuing efforts to improve the lives of thousands of Contra Costa children make him a perfect choice to lead the Council for Exceptional Children. I look forward to working with him, and I congratulate him on his selection as president of the Council for Exceptional Children.●

A TRIBUTE TO RUTH AND ERICK LIEBENSTEIN

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. ACKERMAN. Mr. Speaker, I would like to call the attention of my colleagues to the remarkable lives of Ruth and Erick Liebenstein, Jewish refugees from Nazi Germany who demonstrated noteworthy courage on behalf of Israel, their community, Jewish freedom, and Jewish life.

In the latter part of July 1944, Corporal Liebenstein landed in Normandy and was assigned to a part of Gen. George Patton's 3d Army. The Germans were going to invade and the French expected the American liberators to help them. With virtually no arsenal, however, only moral support could be given in the event of an attack.

Corporal Liebenstein and his unit drove through French territory to locate German prisoners, realizing that they could be confronted at any moment. When indeed they faced a group of German soldiers who pointed at them with rifles in hand, they displayed exceptional courage, and finally obtained the group's surrender. The Americans proceeded to disable German rifles, detonate their hand grenades, and deliver the 32 Nazis to the appropriate division.

Mr. Speaker, for his heroism, Corporal Liebenstein was awarded the Silver Star. He is also the recipient of two Purple Heart Medals for having been twice wounded. Interestingly, during the Battle of the Bulge, a piece of shrapnel which would otherwise have killed him struck his mezuzah, and saved his life. This mezuzah—a symbol of his commitment of Judaism—was given to him by Ruth Strauss, who later became Mrs. Ruth Liebenstein.

Erick and Ruth are an extraordinary couple with a longstanding commitment to Jewish matters and the State of Israel. They have devoted their energies to mobilizing resources for Israel's economic strength, security, and growth. Mr. Liebenstein contributes to various Jewish philanthropic and communal endeavors, serving the Israel Bond Organization, the Board of the Young Israel of Forest Hills, the Yeshiva Dov Revel, and the Congregation Machane Chodosh. He also serves as a member of the Advisory Council on the Holocaust to the U.S. Congress. For all of their efforts, Mr. and Mrs. Liebenstein will be honored by the Congregation Machane Chodosh at the State of Israel Bond Testimonial Breakfast on April 21, 1985.

Mr. Speaker, I call on all my colleagues in the U.S. House of Representatives to join me in congratulating Ruth and Erick Liebenstein on this well-deserved tribute.●

REPEAL TAX BREAKS TO OIL COMPANIES

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FRANK. Mr. Speaker, today I am introducing legislation that would put an end to some of the most egregious special interest tax breaks to be found in the Internal Revenue Code—those benefiting oil producers and royalty owners.

There are a number of provisions in the current code, some of which passed as a part of the 1981 Economic Recovery Tax Act, which have little, if any, justification from either an economic or an energy policy perspective. And I am pleased to note that at least some in the administration have come to agree with this view. To quote from the Treasury Department's tax proposal, "Because investment in oil and gas is tax-favored, capital is diverted from other, more productive, economic activities." With deficit reduction at the top of our agenda in this session of Congress, it is incumbent upon us to look not only to budget expenditures, but to tax expenditures, as well. These breaks for the oil companies are among the biggest tax expenditures in the Tax Code.

This bill would change five provisions of the Internal Revenue Code, three of which were the result of amendments made by ERTA in 1981. It would repeal those sections of ERTA which exempted three barrels of oil per day for royalty owners, reduced the tax on newly discovered oil from 30 to 15 percent over 5 years, and exempted stripper oil for independent producers from the Windfall Profits Tax.

In addition to the repeal of the ERTA provisions, I am also proposing significant changes in two other provision of the code—the percentage depletion allowance and the expensing of intangible drilling costs. Under percentage depletion, independent producers and royalty owners are given an option accorded no other taxpayer in America. They may choose cost depletion, which is essentially like straight depreciation available to all taxpayers holding capital assets, or percentage depletion, which allows a deduction of 15 percent of gross oil related income (with certain restrictions). Since percentage depletion can be used for whatever number of years the oil will continue to produce, we are left with the outrageous result that total deductions can far exceed the taxpayers investment. If it could be demonstrated that percentage depletion led to greatly increased production, perhaps it could be justified. However, there is serious question whether percentage depletion has any stimulative effect at all on the production of oil. In any case, it is a drain on the Treasury that cannot be justified, particularly in light of the massive deficits we are currently facing.

Another preference accorded the oil industry is the allowance of expensing for intangible drilling costs [IDC's]. These include drilling, shooting and cleaning the well, draining, roadmak-

ing, surveying and geological work in preparation for drilling, construction of derricks, tank pipelines necessary for drilling, and preparation of the well for production. In any other context, costs such as these would be treated as capital expenditures and depreciated over the useful life of the asset. However, IDC's can be expensed in the first year, which results in a tremendous tax deferral opportunity for the oil industry.

Although the 1976 Tax Reform Act restricted the use of IDC expensing, and the Tax Equity and Fiscal Responsibility Act of 1982 reduced this preference by 15 percent, this break still exists. Even the Treasury Department's tax proposal recommends its elimination. The Treasury report estimates that, in 1986, 31,000 individuals with adjusted gross incomes of over $100,000 would receive over one-half of the total IDC tax benefits that go to individual taxpayers. These individuals would receive an average benefit of approximately $28,000. To quote the report's defense of eliminating this benefit, "By allowing investors in oil and gas ventures to base their decisions on intrinsic economics, rather than on the tax benefits generated from their investments, the productivity of all investments would increase . . ."

Mr. Speaker, there are clearly untold numbers of unproductive tax breaks throughout the Internal Revenue Code that are costing taxpayers billions of dollars. The provisions of my bill, I believe, address the most egregious. While many are arguing that we should ignore inequities and inefficiencies in the Tax Code until we have slashed the Federal domestic budget to the bone, I strongly disagree. I believe that fairness demands that we look at the entire range of Federal fiscal policy in formulating a solution to the problem of the deficit. The Tax Code deserves, indeed cries out for, at least as much scrutiny as the budget.●

GOLDIE ROTH: A WOMAN OF CONSCIENCE AND COMMITMENT

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. SOLARZ. Mr. Speaker, I rise today to pay tribute to Goldie Roth for dedicated work as a member of my staff. Her long and devoted service has been inspirational not only for the rest of my staff but for the entire Brighton Beach community in Brooklyn. I am proud to have had the privilege of working with her for the last 10 years and wish to express my deep gratitude for her unparalleled compassion, patience, and service.

Born in Poland, Goldie exemplifies the immigrant tradition upon which this country was built. Having lost both her parents before the age of 5, she came to America and was raised by her aunt. It was in Brooklyn that she met Ben Roth to whom she was married for nearly 50 years. Upon his death in 1976, she joined my staff. Since then, she has volunteered countless hours of her time in trying to help the members of her community in any way that she could. As a resident of Brighton Beach for over 50 years, she has developed deep ties to her community and has demonstrated unfailing loyalty and commitment to anyone who seeks her help. An active member of the Brighton neighborhood, Goldie has been a member of both the Boardwalk Men's Club and the Shorefront "Y."

In addition to generously volunteering her time at my office, Goldie is a patron of the Home for the Sages, a residence in Manhattan for displaced elderly men. Wherever there is a need, Goldie is prepared to give of herself regardless of the sacrifice that might be involved. Time and again, Goldie puts the welfare of others before herself.

Having traveled extensively throughout both the United States and Israel, Goldie has learned much about people and their needs and has brought this special knowledge to her work in Brighton. She is truly a rare individual whose fine work is an example for all of us to follow. As Henry David Thoreau once said:

> To be a philosopher is not merely to have subtle thoughts, nor even to found a school, but so to love wisdom as to live accordingly to its dictates, a life of simplicity, independence, magnanimity, and trust.

Goldie Roth is indeed a philosopher. It is an honor to know her.●

1985 CONGRESSIONAL CALL TO CONSCIENCE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. FORD of Michigan. Mr. Speaker, it is indeed a great privilege to join in the 1985 Congressional Call to Conscience. At this time I would like to remind my distinguished colleagues of the plight of the noted Ukrainian writer, Mykola Danylovych Rudenko, who has been serving a 12-year sentence in a corrective labor colony in the Mordovian complex in the Soviet Union since 1977. The strength and profound courage of Rudenko is never ending and serves as an inspiration for all of us in the free world as we continue our fight for human rights for all mankind.

Throughout his life, Rudenko has made many great accomplishments. As an active member of the Communist Party, he served in the Soviet Army during World War II where he received a serious spinal injury. After the war he was an editor in the official Ukrainian publishing house, Soviet Writer, and later was appointed managing editor of DNIPRO, the official journal of the Young Communist League of the Ukrainian S.S.R. During this period, Rudenko held the position of deputy secretary of the party organization of the Union of Soviet Writers of the Ukrainian S.S.R. From 1947 onward, numerous collections of his poetry were published officially in the U.S.S.R.

By the early 1970's, however, his work had begun to be criticized as it reflected his protests of Soviet life style. Rudenko received reprisals from the authorities. Ultimately, he was expelled from the party and forbidden to publish any more of his literary work.

In November 1976, the Ukrainian Public Group to Promote Observance of the Helsinki Accords was formed with Rudenko as chairman. During a series of police searches at the homes of Ukrainian group members 1 month later, group documents and Rudenko's manuscripts were confiscated. On February 5, 1977, during a closed trial, he was sentenced to 7 years in strict regimen labor camps followed by 5 years internal exile.

Mr. Speaker, I am greatly concerned about Rudenko's health, which has deteriorated considerably since his imprisonment. The length of Rudenko's sentence, his state of health which was already bad before his arrest, and the fact that he still faces 4 years internal exile, give rise to serious concern for his physical well-being.

It is no secret that the conditions in these labor camps are grueling and the prisoners receive inadequate nourishment and medical care. When Rudenko's wife, Raisa, visited him in 1980, he was so ill that he was unable to stand. She, too, was arrested and is currently serving a sentence because she attempted to smuggle some of her husband's writing out of prison.

Mr. Speaker, I am outraged at the cruel treatment Rudenko has received while serving his sentence in prison. He has been subjected to inhumane conditions which are not in accordance with the spirit of the Helsinki accords or in conformity with Soviet law. Such behavior demonstrates the Soviet Union's unwillingness to abide by the Helsinki accords which they signed in 1975.

As a member of a free nation, we must continue to speak against such violations by the Soviet Union. We must continue to seek the enforcement of the Helsinki accords and impress upon the Soviet Union our objection to the denial of basic human rights.

Mr. Speaker, I am very moved by the strength and conviction of Mykola Danylovych Rudenko. I am thankful for this opportunity to pay tribute to this brave man whose profound courage and overwhelming commitment for freedom and human rights is an inspiration to us all.●

TAX DEDUCTIONS FOR INTEREST PAID ON RESIDENTIAL MORTGAGES

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. MICA. Mr. Speaker, today I am introducing legislation with my fellow Congressman from Palm Beach County, the Honorable TOM LEWIS, to express our support for the current tax deduction for interest paid on residential mortgages.

As the Congress reviews tax reform proposals in the coming months, I believe we must keep in mind the positive effects that the deduction for residential mortgages has on our country.

Homeownership has risen steadily over the years. In 1983, 64.7 percent of all occupied housing units were owner occupied. In 1940, only 43.6 percent of families owned their homes. We are all aware that homeownership is a vital part of the American dream and that the tax deduction for residential mortgages has been a prime incentive and financial tool in helping families to realize that dream.

Our economy also benefits from the tremendous growth of the housing industry. In 1983 alone, the value of new construction on all housing units was $86 billion.

Mr. Speaker, I urge my colleagues to join with me in recognizing the tremendous contributions of the tax deductions for interest paid on residential mortgages.●

IN RECOGNITION OF THE HEROISM OF CHARLES M. PETERSON

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. LEHMAN of California. Mr. Speaker, it is a great honor to acknowledge an act of unselfish heroism performed by my constituent, Charles M. Peterson. On June 17, 1983, Mr. Peterson risked his own life to rescue a fellow park employee of Yosemite National Park.

Mr. Peterson and another park employee were assisting with a plugged culvert problem on Tioga Road in Yosemite National Park when Mr. Peterson's companion scuba diver became trapped in a rapid flow of water. Although both men had very little supply of air remaining, Mr. Peterson rescued his fellow employee and both escaped with less than 1 minute of air supply left.

For this act of personal courage, Charles M. Peterson has been awarded the Citation for Valor by the Secretary of the Interior. This award is given to Department of the Interior employees who have demonstrated unusual courage involving a high degree of personal risk in the face of danger. In recognition of Charles Peterson's outstanding heroism, he will be awarded an engraved gold medal.

Mr. Speaker, Charles Peterson's willingness to sacrifice his own safety for that of his colleague demonstrates the very highest level of human conduct. We can learn from Charles Peterson's example and strive to reach his exemplary standard of personal behavior, so that his valor can inspire our own. On behalf of the House of Representatives, we thank you, Charles Peterson, for being an example of the best in our public servants.●

SILVIO O. CONTE RECEIVES SERVICE AWARD

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. PURSELL. Mr. Speaker, last November, one of our colleagues received a very distinguished award. I would like for all of us to be aware of the recognition SILVIO CONTE has received for his strenuous efforts on behalf of Federal support of research for neurological and communicative disorders at the Annual Convention of the American Speech-Language-Hearing Association [ASHA].

An estimated 22 million Americans have communicative disorders, including 3 million school-age children with speech and language impairments and over 7 million elderly citizens with hearing losses.

For nearly 60 years, the American Speech-Language-Hearing Association [ASHA] has been the organization responsible for training, research, and service in the area of communicative disorders. Over 41,000 members of ASHA work in a wide range of settings including public schools, colleges and universities, hospital clinics, rehabilitation and home health agencies, Veterans' Administration and Department of Defense facilities, and in private practice.

ASHA has played an important role as an advocate for improving opportunities, access, and services for handicapped individuals. Members of the Appropriations Committee recognize the association and its staff for their expertise on programs like the Education of the Handicapped Act and the Rehabilitation Act.

Recently, ASHA presented its highest honor, the Distinguished Service Award, to our colleague, SILVIO O. CONTE. Representative CONTE was recognized for his dedicated support for health research and other programs benefiting persons with communicative disorders. I would like to share the remarks made in the presentation and acceptance of the award.

In presenting the award, president-elect Richard Flower, Ph.D., stated:

As you know, the Association is very proud of its Distinguished Service Award [DSA]. As awards to individuals outside of our field for their contribution to speech, language and hearing problems, they are few in number. Since 1960, only 34 awards have been made. Of these, only five have been made to Members of Congress. We are very proud that such Members of Congress are truly deserving of this honor. Previous awards have gone to Senator Charles H. Percy, Republican of Illinois, for his focus on the problems relating to services for individuals with impaired hearing and abuses in the hearing aid delivery system. Senator Lowell Weicker, Republican of Connecticut, received the award in 1981 for his great leadership on protecting Public Law 94-142, the Education of the Handicapped Act and for assuring continued adequate funding for handicapped programs. Senator Richard S. Schweicker, Republican of Pennsylvania, received the award in 1980 for his attention to the needs of the hearing impaired individuals and investigation of the adequacy of Federal support for these handicapped individuals.

In 1975, the DSA was awarded to first member of the House of Representatives John Brademas, a Democrat of Indiana, who was devoted to assuring that the Federal Government meet the rehabilitative needs of its people. In 1982, Congressman Claude Pepper, a Democrat of Florida, received the award for his attention to the problems of the speech and hearing impaired elderly and for his advocacy for services to the elderly population.

And so we come to the awards today. No one here is unaware of the struggle in Washington between those seeking to control the Federal deficit by cutting Federal spending and those seeking to increase Federal support for various interests. The last four years has seen bitter fights within the House of Representatives over Federal spending. Many of these fights have been focused on appropriations for education, health and human services. The subcommittee which deals with these budgets has enormous responsibilities.

During this period, ASHA has advocated for adequate appropriations for such programs as P.L. 94-142, for funds to train qualified personnel to serve the handicapped population, and for adequate funding to continue research affecting our knowledge of speech, language and hearing disorders. In pursuing the latter focus, ASHA helped create and has held leadership roles in a broad coalition called the National Committee for Research in Neurological and Communicative Disorders [NCR]. This Committee is composed of some 60 professional organizations including neurology, otolaryngology, and speech-language pa-

thology and audiology and many voluntary agencies such as the National Multiple Sclerosis Society, Alzheimer's Disease and Related Disorders Association and Muscular Dystrophy Association.

Throughout this most difficult period of time, NCR was able to find a member of the Appropriations Committee who wanted to devote the time and attention in order to understand the enormous potential that exists at this moment for research in almost all areas having to do with the brain and with disorders that affect 20 million Americans with speech, language and hearing handicaps. The man who picked up that challenge was the ranking Republican member of this subcommittee, a leader in his party, a fighter against pork-barrel politics and a humanitarian.

His efforts and his intelligence have shown themselves in the tangible, dramatic growth in funding for the National Institute for Neurological and Communicative Disorders and Stroke [NINCDS]—25% growth in the last two years—almost $100 million. His work will be remembered for many, many years in the future when we here assembled implement the fruits of that research.

Accepting the award, Representative Conte stated:

I am honored to be chosen by this organization for this coveted award. This only strengthens my resolve to carry on the battle for adequate funding for research to understand, treat, and hopefully cure, many of the communicative disorders affecting the 22 million Americans served by the members of this organization.

Over the last several years, amidst probably the most adverse climate for increasing funding for any domestic program in the last several decades, we have succeed in continuing Congress' strong support for biomedical research. When I first came to Congress in 1959, funding for the National Institutes of Health amounted to $324 million. In this fiscal year, 1985, funding will amount to more than $5.145 billion. And over that period of time, two of the biggest increases have come in the last two years, with a 12% increase in 1984 and a 14% increase in 1985. In 1983, funding NIH surpassed $4 million for the first time, and it only took two years for funding to surpass $5 billion.

I think those figures make it clear that those of us who support biomedical research in the Congress know of the fine work that is being done through NIH support, and are willing to fight, even in difficult times, to make sure that this work continues.

Research in the area of communicative disorders is, of course, conducted at many Institutes, such as the National Institute on Child Health and Human Development, the National Institute of Mental Health, National Science Foundation, and others. But the National Institute on Neurological and Communicative Disorders and Stroke [NINCDS] remains the Institute with the largest commitment to furthering research in speech, language and hearing. Over the past couple of years, as a result of a $15 million amendment, I sponsored on the FY 1984 appropriation bill, and efforts by a number of Members on the FY 1985 bill, funding for NINCDS has been growing significantly faster than the overall average for NIH. That is something I've worked hard for and am proud of. Let me also say I remain convinced of the merits of increasing the funding for basic research in communicative disorders and the neurological process, and let me briefly tell you why.

First, the research breakthroughs in this area are now upon us. Dr. Murray Goldstein, Director of NINCDS, stated to me that more has been learned about the brain in the last five years than in the previous 500. It is for that reason that I have been calling this "The Decade of the Brain." And it is born out by public recognition, such as the current Public Broadcasting Series entitled "The Brain." These are times of great excitement, and I believe we ought to do everything we can to take advantage of the tremendous opportunities now upon us.

Second, the aging of the population of the United States presents us with a future where communicative disorders will be ever more apparent and ever more important. It is estimated now that between 1980 and 2050, the number of persons with speech and hearing impairments will increase at faster rates than the U.S. population as a direct result of the aging factor. By the year 2000, it is estimated that 25% of the population over 65 will have impaired speech, and 46% will have impaired hearing. As much as some would like to avoid the implications of these figures, we know that we can do so only at our own peril.

And the third reason is a practical one—your people, in Washington, doing your educational and lobbying work, won't let us forget how important this area is. In this respect, NINCDS has been fortunate in having an effective lobbying effort—the National Committee for Research in Neurological and Communicative Disorders, more sensibly known as NCR. And I know that NCR has benefited from ASHA's leadership. This has included your Executive Director, Frederick T. Spahr, Ph.D., serving as NCR's Acting Treasurer and a member of their Executive Board, as well as your Director of Government Relations, Morgan Downey, ably presenting the opportunities in this field to Congress.

Putting aside the accomplishments of the past several years, which I try never to let you do, I know that many of you are concerned about the future of Federal funding: not just those of you who are researchers; but those of you who are not researchers but who provide clinical services under Medicare, Medicaid, or under the Education for All Handicapped Children Act, P.L. 94-142; and also those of you in university training programs which depend upon Federal funds to improve your programs. I don't know if anyone is in a position yet to predict what the next four years will bring in terms of federal funding, but I think it is not too hard to predict that we will have another "battle royale" on our hands.

Many of the programs that you have been concerned about have survived some severe proposals to cut back funding. Those proposals are going to be back, in full force, across the board. All of us are going to have to redouble our efforts, to educate all Members of Congress, not just those who have been supportive, and to educate the Administration, to assure that the handicapped in this society are not the ones that get left behind when the going gets tough.

If building an opportunity society is the goal of the next four years, then we must continue to build opportunities for those with communicative disorders to participate in the fullness of opportunity that America should afford all of its citizens. And that means supporting the work that ASHA members do. It is something I will strive for, and it must be something that you strive for, more so than ever.

With that, let me thank you once again for this award and say that I look forward to continuing to work with ASHA in the months ahead.

Thank you very much.

Mr. Speaker, I am sure we all are proud of the accomplishments of our colleague for which he has been honored.●

SS. PETER AND PAUL ORTHODOX CHURCH CELEBRATES 75TH ANNIVERSARY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. YATRON. Mr. Speaker, on September 7 and 8, 1985, the members of SS. Peter and Paul Orthodox Church, in Minersville, PA, will celebrate the 75th anniversary of the founding of their church. There will be a divine liturgy by His Grace, Bishop Herman, followed by a jubilee banquet and dance.

Since its founding in 1910, SS. Peter and Paul Orthodox Church, has stood as a focal point for steadfast spiritual commitment to helping meet and ministering to the needs and hopes of others. After 75 years of activity, the devotion and strength exhibited by Pastor Hatrak and the entire congregation stands as a model for all of us to emulate.

I am proud to take this moment to pay special tribute to the congregation of SS. Peter and Paul Orthodox Church for their selfless devotion to God, their church, and their community and for bestowing on the world immeasurable goodness.

I know my colleagues will join me in congratulating the congregation and in wishing them many more years together.●

SOCIAL SECURITY OFF LIMITS FOR DEFICIT REDUCTION

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. COURTER. Mr. Speaker, like many of my colleagues, I am concerned that attempts will be made to achieve budget savings on the backs of senior citizens in this Nation. Social Security COLA's are in danger of being substantially cut. I respectfully ask that my statement in opposition to these cuts be inserted in the RECORD, and I encourage other Members of the House to take action against any proposed Social Security benefit reductions.

Some Republicans in the House and Senate are considering a Social Security cost-of-living-adjustment [COLA] freeze in their efforts to draft a

budget. I believe the American people oppose Social Security benefit reductions, no matter how disguised.

The Social Security fund does not add to the budget deficit; it is a self financing program with its own trust account. Moreover, the fund is strong and healthy today, accumulating surpluses into the next century, thanks in great part to the expansion and price stability of 1983-84. I do not believe Congress should undermine this newfound public confidence in the system by returning to the evasion of letting inflation silently erode benefits.

Freezing Social Security COLA's would impose real hardship on thousands of America's elderly, many of whom depend on Social Security as their sole source of income. The Social Security Administration estimates that 419,000 Americans, mostly elderly and two-fifths of them single women living alone, would fall below the poverty line if COLA's were frozen even 1 year. Keeping scheduled COLA adjustments makes it unnecessary for Congress to adjust—and less tempting for Congress to overadjust—benefits from time to time.

Social Security was greatly debated in the 1984 campaign. President Reagan said "never" and categorically overruled any reduction in Social Security benefits. Moreover, in our Republican platform the party pledged it "must never turn its back on our elderly," and we promised "that we will adequately provide for them during their golden years so they can continue to enjoy our country's high standard of living, which their labors helped to provide."

I believe Republicans should adhere to their commitments. Social Security benefits, including COLA adjustments, should be declared off limits for deficit reduction.

I am opposed to any Social Security benefit cuts, including the postponement or elimination of COLA adjustments.●

FOUR OUTSTANDING CIVIC LEADERS

HON. GEORGE (BUDDY) DARDEN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. DARDEN. Mr. Speaker, in 1967, when I was a senior at the University of Georgia School of Law, a number of prominent businessmen from Cobb County, GA, contacted me about the enormous potential for career development there. Those individuals were W. Wyman Pilcher, Sr., president of United Federal Savings & Loan Association; William E. Bullard, president of Mayes Ward Funeral Home, Inc., and a director of United Federal Savings & Loan Association; Ernest W. Barrett, chairman of the Cobb County Commission; and G. W. (Romeo) Hudgins, a civic leader and regional director of the U.S. Savings Bond Division of the Department of the Treasury.

These four outstanding civic leaders persuaded me to move to Cobb County and arranged for me to become employed as an assistant district attorney under the late Ben F. Smith. During the initial years of my career up to the time of my election to Congress, these men were a continuous source of strength and support to my family and me. They represented the core of leadership in our community and deserve special recognition.

A recent article appeared in the Marietta Daily Journal about these four outstanding community leaders. It was written by Jasper Dorsey, a close friend of these distinguished gentlemen and retired executive with Southern Bell Telephone & Telegraph Co.

Mr. Dorsey, an outstanding civic leader in his own right, now writes a weekly column which is published in newspapers throughout the State. His column which appeared on Friday, April 5, 1985, is a fitting tribute to these men who personify integrity, leadership, and achievement.

Mr. Speaker, accordingly I am inserting this article in the RECORD.

[From the Marietta Daily Journal, Apr. 5, 1985]

COBB HAS BEEN BLESSED WITH DISTINGUISHED LEADERS

(By Jasper Dorsey)

Georgia lost a distinguished son a few weeks ago when Honorable Ernest Barrett, 62, died of cancer.

He had retired in December as chairman of the Cobb County Commission after 20 years and as chairman of the Atlanta Regional Commission since its inception.

Ernest was a rare man and a unique politician. He did not profit himself from political office. He went out of office less well-off than when he made his first political campaign.

All in spite of his presiding over one of the most rapidly growing areas in America, where he had advance knowledge of all the developments and interstate highway intersections, in all of greater Atlanta's counties. He refused to profit from this knowledge.

Had he done so, he could have become a multi-millionaire. It is to smile to think of what some politicians we know would do with those opportunities. Yet Ernest retired with almost no pension because he wouldn't ask for one. Legislators control commissioners' salaries and insist upon being asked, because it gives them leverage and trading strength. Barrett's old-fashioned virtue wouldn't let him beg them.

Bill Bullard, an old friend and counselor, chaired a November retirement party which raised enough money from business firms and friends to give his family a $100,000 annuity and a new car. Almost 1,000 people attended the dinner to thank Ernest for 20 years of unequaled growth with absolute integrity. And low taxes.

Barrett was the third of four unusual, distinguished and closely associated leaders in Cobb County to die in just a few years. A massive heart attack took the life of G.W. Romeo Hudgins first. Romeo was probably the most beloved and basically useful man in Cobb County because he gave himself and his friendship so extravagently to everyone.

W. Wyman Pilcher Sr. was taken by a heart attack in 1984. Retired as president and founder of United Federal, he had early dedicated his life to serving the needs of his community and his church. He had been named Cobb Citizen of the Year as had Romeo. Barrett was chairman and a founder of United Federal, Bullard was a founder, too, and still serves on the board of directors. He's just recovering from a cardiac arrest and four heart bypasses.

These four great citizens, about the same age, closer than brothers, were united in the common cause of service. Only Barrett ever sought public office, but they were uniquely effective in helping or hindering political candidates they thought deserving. Moreover, it was said they couldn't be bought . . . nor paid for. They sought no personal gain.

One of their early political efforts was to elect a seventh district congressman, John Davis, of Summerville, in 1960, over several local candidates, two of whom were very popular incumbent legislators.

They not only shaped elections, they shaped the community by giving the greatest gift of all. They gave themselves enthusiastically to every worthwhile cause. And they made a positive difference in all they touched.

Bullard, the first among equals, was the only one to grow up in Cobb. The others came there about the same time and immediately became friends in a service they tremendously enjoyed.

From the beginning, they were leaders in church, little leagues, high schools and in every good cause for God, country and community. To say they have been among the most useful, helpful, effective and outstanding leaders in Georgia is at best an understatement.●

FESTIVAL WILLIAMSBURG

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. BATEMAN. Mr. Speaker, it is with great pride that I rise today to share with my colleagues in the House news of an exciting and important cultural event taking place only a short drive from Washington in America's First Congressional District.

On the weekend of April 19-21, 1985, historic Williamsburg and the nearby Berkeley Plantation in Virginia will be the site of the first annual Festival Williamsburg. Over the course of this weekend, music lovers and visitors from all over the United States will be treated to a wide variety of performances ranging from early classical and Renaissance music to familiar Gershwin classics. The music will be performed by local artists as well as distinguished international musicians, including the National Orchestra of New York, the Brandenburg Collegium directed by Anthony Newman, Musica

Sacra, Israeli violinist Yuval Waldman, and pianist Rudolph Firkusny.

The weekend will begin with a private fundraiser featuring an all-Bach concert with Newman. This event has special significance in light of the attention being focused due to the recent 300th anniversary of the birth of the composer, Johann Sebastian Bach. This fundraiser is an integral part of Festival Williamsburg because the proceeds from this event will enable festival sponsors to hold ticket prices for all of the other festival programs to a minimum, thus making the festival accessible to a wider audience.

Saturday's activities will include a series of four concerts lasting all day and into the evening. These concerts will feature the National Orchestra of New York, conducted by Mitch Miller and Alvaro Cassuto; the New York Trumpet Ensemble; and the Brandenburg Collegium. The highlight of the concerts is expected to be "An American Concert for Everyone," featuring an all-Gershwin program including "Rhapsody in Blue" and "An American In Paris."

The concerts on Saturday, hosted by noted entertainer Steve Allen, will be held at the Berkeley Plantation on the James River, site of America's first Thanksgiving celebration.

The final series of concerts, on Sunday, will include performances in Williamsburg by the Williamsburg Consort, Yuval Waldman, and Musica Sacra.

Williamsburg, VA has long been recognized as a community rich in cultural heritage as well as steeped in historic significance for our Nation. I am confident that Festival Williamsburg will become a major national cultural event in the years ahead.

I invite all of my colleagues and their families and friends, their staffs, and any of their constituents from their home districts visiting Washington to travel to Williamsburg on the weekend of April 19 for this exciting event.●

PHIL BURTON WILDERNESS AREA IN THE POINT REYES NATIONAL SEASHORE

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. UDALL. Mr. Speaker, it is impossible to compare Phil Burton to anyone or anything because he was a one of a kind. This unique and fascinating man left his impression on all of us, and on countless American citizens. In all likelihood we shall not see one like him again. He left a personal and a professional legacy, however, that will outlive us all and our personal memories of him.

It is very fitting that we should honor that legacy by naming the wilderness area of the Point Reyes National Seashore after him. Phil Burton may have been the very essence of the urban man, the committeed indoorsman—in fact, it was said that the only time Phil Burton went outside was to smoke a cigarette—but he understood and appreciated what the life of the outdoors means to us and to our planet. So he spent much of his life fighting to preserve the natural wonders of our continent and no one could argue with his enormous success. Point Reyes National Seashore was one of Phil Burton's most beloved endeavors, It was a very complicated and arduous task to see it established, expanded and refined, and its wilderness designated, and his role in that task was indispensable.

The preservation of wilderness takes many people to accomplish. It takes scientists and biologists and geologists and academicians and park planners and foresters and writers and many, many everyday citizens. But it also takes people like Phil Burton to guide their dreams and ideas through the political system we have constructed to make these often difficult decisions.

Some people have expressed qualms about naming public things after people, especially after politicians, and I have often shared those misgivings. But it is true that the Forest Service has frequently named wilderness areas after people—one of the very first wilderness areas, in fact, is Montana's Bob Marshall Wilderness. And the Park Service itself, while prohibiting the naming of the parks themselves after people, does name unique features within the parks after people.

Well, Phil Burton was a unique feature of this institution. And if the naming of this wilderness area after him serves to honor his memory and to remind those future generations that the preservation of its beauty and integrity did not and could not have just happened—that it took people like Phil Burton with courage, tenacity, and vision to make it happen—then that is a very good thing.

So I am very pleased to support this legislation today.●

A TRIBUTE TO JOHN SILAN

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. YATRON. Mr. Speaker, I would like to bring to the attention of my colleagues in the U.S. Congress the outstanding achievements of Mr. John Silan, who is being honored on April 20 at a banquet hosted by the Cougar Tale Club for his contributions to sports and their appreciation of his accomplishments.

John Silan retired from coaching 7 years ago. In his coaching career, he spent 19 years at Kutztown High School as their basketball coach. His teams posted an outstanding record of 414–75 and won 15 Berks County Eastern Divison titles, 12 county championships, 8 District 3 crowns and 3 PIAA Class B State titles. When he left Kutztown High he coached 9 years at Delaware Valley College and 2 at Wilson High School, where he won another Berks County title in 1977.

The Cougar Tale Club is a group of over 90 men who played under Coach Silan when he was at Kutztown High School. They will honor their former coach on "John Silan Day."

Coach Silan is an outstanding example of dedication and excellence. He has left a lasting imprint on those he coached and on the sport of basketball. I urge my colleagues to join me in saluting this fine man, who has become a legend in his community. I wish him the very best in all his future endeavors. He has enriched the lives of all who have been privileged to know him and to work with him.●

SHIKELLAMY BRAVES WRESTLING TEAM WINS CLASS AAA TITLE

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. GEKAS. Mr. Speaker, some say it's harder staying at the top than getting there, but the Shikellamy Braves wrestling team proved conventional wisdom wrong when the team won the coveted Pennsylvania Interscholastic Athletic Association Class AAA wrestling title for an unprecedented second consecutive year. No one will ever forget the accomplishments that led this team from Sunbury, PA, down the road to the State wrestling championship. Behind all the recordbreaking statistics stands a skillful group of athletes and their coaches with an uncanny ability to ignite an excitement that has left not only the city of Sunbury in a frenzy but the surrounding communities as well.

The Shikellamy Area High School Braves wrestling team, led by Head Coach Phil Lockcuff and assistants Rob Johnson and John Supsic, became the first team to repeat as State champions and boasted a 49-match winning streak, losing only once in 88 matches. The highlight of the Braves' wrestling season came on March 16, 1985, when a record eight wrestlers went to the State tournament in Hershey, and six of them placed. Two of them won State championships while the team scored 97 points, more than any other team in Pennsylvania's high school wrestling history.

Head Coach Phil Lockcuff also received special recognition when he was named the Pennsylvania Wrestling Coaches Association's 1985 Class AAA State Coach of the Year after amassing a career record 180-16-3.

The coaches and players should be congratulated for their outstanding performances on and off the mat both as performers and outstanding citizens of their community. The sportsmanship which was displayed throughout their long and grueling season is a credit to themselves and the fans who enjoyed watching them wrestle.

Those players contributing to the team's winning effort this year include: Ron Furr, Greg Garman, John Herman, Jeff Reed, Chris Rose, Chris Derr, Bob Supsic, Pete Solomon, Kevin Kreider, Drew Wetzel, Rob Whary, John Supsic, Dan Bottiger, Tony Reed, Earl Malick, Todd Tilford, Ed Krankoskie, Paul Gemberling, Jason Bottiger, Mark Bogovich, Joe Burke, Bill Lytle, Keith Schell, Craig Welfer, Mike Bogovich, Rich Shipe, John Gemberling, Todd Lawrence, Joe Kremer, Jerry Zimmerman, Tim Dressler, Andy Shipe, Troy Underkoffler, Ben Amerman, Mike Sites, and Steve Evitts.

Congratulations and praise go to the coaches and players for giving the fans of Sunbury a season of unending thrills and showing us the joy of high school wrestling at its finest.●

CALIFORNIA DELEGATION ENDORSES H.R. 442

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. MINETA. Mr. Speaker, the California Democratic delegation to this House has unanimously endorsed H.R. 442, the Civil Liberties Act of 1985. This important legislation provides long overdue redress for the loss of basic constitutional rights which 120,000 loyal Americans of Japanese ancestry suffered during World War II.

Forty-three years ago, the California delegation played a regrettable role in developing the political and public demand for the internment. With our action endorsing redress and repudiating our predecessors actions, we have made a bold break with the past. Forty-three years from today, others will point with pride to the California Democratic delegation for our courageous stand in support of H.R. 442.

I wish to congratulate the delegation, and especially our dean, DON EDWARDS, for this action.

The Civil Liberties Act of 1985 is a historic bill. With the passage of this bill, the Congress will do something that only a great democracy can do: Admit a mistake, apologize for it, and recommit itself to the principles of due process and equal justice.

When my family and I were interned with other loyal Americans at Heart Mountain Relocation Camp in 1942, the Nation interned its Constitution, because when the rights of some citizens are lost, then the rights of all citizens are threatened.

The text of the delegation resolution and a chronology of the internment follow:

CALIFORNIA DEMOCRATIC CONGRESSIONAL DELEGATION RESOLUTION ON H.R. 442

Whereas, the internment of Americans of Japanese ancestry during World War II was unnecessary and unwarranted; and

Whereas, the internment was the result of racial prejudice, wartime hysteria and a failure of political leadership at the time; and

Whereas, on February 13, 1942, the California Congressional delegation in a letter to President Roosevelt requested the evacuation of Americans of Japanese ancestry from the West Coast; and

Whereas, on March 19, 1942, the Congress adopted Public Law 503 implementing the evacuation and the internment; and

Whereas, the internment deprived 120,000 loyal Americans of their liberty, their Constitutional rights, and their standing in their communities; and

Whereas, the Congressionally created Commission on Wartime Relocation and Internment of Civilians has proposed a package of recommendations to remedy the damages of the internment; and

Whereas, those recommendations are the basis of H.R. 442, the Civil Liberties Act of 1985; and

Whereas, as H.R. 442 attempts to insure that no other Americans ever face such a wholesale loss of basic liberties: Now therefore be it

Resolved, That this delegation regrets the actions of its predecessors in 1942 and repudiates the letter sent to President Roosevelt by the California, Oregon and Washington delegations; and be it further

Resolved, That this delegation endorses H.R. 422, the Civil Liberties Act of 1984 and urges prompt action upon that legislation.

CHRONOLOGY OF INTERNMENT OF AMERICANS OF JAPANESE ANCESTRY

Dec. 7, 1941—War begins with Japan.

Jan. 16, 1942—U.S. Rep. Leland M. Ford of California sends letters to the Secretary of War and the Attorney General proposing that "all Japanese, whether citizens or not, be placed in inland concentration camps."

Jan. 24, 1942—Attorney General Biddle responds saying, ". . . unless writ of habeas corpus is suspended, I do not know of any way in which Japanese born in this country and therefore American citizens, could be interned."

Jan. 26, 1942—The Office of Naval Intelligence issues two year study of West Coast Japanese Americans by Lt. Commdr. Kenneth Ringle. The Ringle Report concludes that the vast majority of Americans of Japanese Ancestry are loyal to the U.S. The Report recommends any detention be handled on an individual rather than racial basis.

Jan. 27, 1942—U.S. Reps. Alfred Elliot and Jack Anderson both of California meet with Edward Ennis of the Justice Dept. to argue the case for internment.

Jan. 30, 1942—Justice and War Departments meet with the California Congressional Delegation who present an internment plan; internment jurisdiction assigned to War Dept.

Feb. 13, 1942—President Roosevelt reviews letter on behalf of all California, Washington and Oregon members of Congress who recommend immediate evacuation of all persons of Japanese ancestry.

Feb. 19, 1942—President Roosevelt signs Executive Order 9066 that authorizes internment.

Mar. 9, 1942—Secretary of War Stimson asks Congress to act swiftly on bill to make violation of internment orders a federal offense punishable by a $5,000 fine or one year in jail.

—S. 2352 introduced in the Senate.

—H.R. 6758 introduced by Rep. John Tolan of California.

Mar. 19, 1942—Congressional penalty bill passes both houses with no opposition.

Mar. 21, 1942—President Roosevelt signs legislation into law as Public Law 503.●

STEEL IMPORT QUESTION

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. KOLTER. Mr. Speaker, it has to come to my attention that the Secretary of Commerce has been asked to reconsider his decision on a steel import question.

Goodyear Tire & Rubber Co. is planning construction of a 1,780-mile oil pipeline. About two-thirds of the steel to be used would be supplied by French and Belgian steelmakers. Only one-third would come from domestic steel producers. Normally, this action would be inconsistent with the steel accord reached between the United States and the European Economic Community in 1982. Goodyear had requested a waiver from the Commerce Department, arguing that 30-inch, thin-wall line pipe was in short supply. A clause in the European Steel Accord would allow these imports if Commerce did indeed establish that this particular type of pipe was in short supply domestically.

Fortunately, for domestic steelworkers, who have already suffered enough at the hands of steel imports, the Commerce Department found that domestic steelmakers could produce sufficient quantities of pipe for this particular project. It found no reason for granting a waiver and permitting 471,000 tons of foreign pipe to enter this country.

Mr. Speaker, I urge Secretary Baldrige to remain firm in his determination that domestic pipemakers can supply this project and I urge him not to reconsider his decision.●

PRESERVING THE MORTGAGE INTEREST DEDUCTION

HON. TOM LEWIS
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 16, 1985

● Mr. LEWIS of Florida. Mr. Speaker, today I am introducing legislation with my colleague from Florida, Mr. MICA, to express the sense of Congress that no limitation should be placed on the Federal income tax deduction for interest paid on a residential mortgage.

Home ownership is an important part of the American dream—the newly married couple purchasing their home in which they hope to raise a family, the middle-aged couple purchasing a vacation or second home to which they hoped to retire. These are examples of striving to realize the American dream, a dream whose realization contributes to family security, community responsibility and civic stability.

In recognition of the importance of home ownership, and in an effort to encourage it, the Internal Revenue Code has long provided major incentives to individuals to purchase a home through the mortgage interest deduction.

Several of the tax reform and simplification proposals pending before the Congress and being considered by the administration may significantly modify the home ownership deductions. As a result, individuals are postponing decisions to purchase a home because they are worried that their investment in owning a home might be eaten up by tax reform.

We need to reassure not only those people who currently own homes, but also those people who are hoping to buy one in the future, that Congress is committed to home ownership and will preserve the Federal income tax interest deduction for residential mortgage.

I urge my colleagues to join us in support of home ownership by cosponsoring this resolution.●

SENATE—*Wednesday, April 17, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father God, we ask for Your presence with us today in each office and home and with each person who is part of this large Senate family. We thank You for the recovery of Senator EAGLETON and pray for his rapid restoration to fullness of health and strength. We remember with loving concern Stan Kimmitt and his family in this time of great pain. Be with his son, Tom—touch him with healing love. Thank You, Father, that You are able to communicate with him even when we cannot. Grant Your peace to the family; guide the physicians, surgeons, and nurses in their ministries of healing. Gracious God, if there be others in our family who suffer, we commend them to Your gracious goodness and Your comforting care. In the name of the Great Physician. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, each leader has 10 minutes and may reserve whatever time is not used.

Following that, there will be a special order, not to exceed 15 minutes, for the Senator from Wisconsin [Mr. PROXMIRE], to be followed by routine morning business until 1 p.m., with statements therein limited to 5 minutes each.

Following morning business, it will be the intention of the majority leader to turn to any of the following Commerce Committee authorization bills if part of the 3-day rule can be waived. Apparently, last night, in reading the numbers, I erroneously indicated S. 814. It should have been S. 813, pipeline safety. S. 814, I understand, is a major tax reform bill. I do not think we want to slip it through. In any event, there are four rather minor bills from the Commerce Committee which perhaps could be taken care of today. I hope we can do this in the wrap-up, by unanimous consent, but there is always a possibility of rollcall votes. Also, the Senate could turn to any other legislative or executive items that have been cleared.

I indicate to my colleagues that many meetings are going on with reference to the budget and the budget resolution which will be taken up on Monday. I hope that, even though we are not yet engaged on the Senate floor, my colleagues will make themselves available for the meetings we have planned.

I doubt that there will be a session of the Senate on Friday, because, frankly, there is not much on the calendar—in fact, very little on the calendar.

Starting Monday, we will take up the budget resolution, and I would guess that from the 22d of April until we finish that budget resolution, we will be going rather full tilt in the Senate—long days and some evenings—the majority leader hopes to complete action on that package by the end of April, or at best by May 1.

So I advise my colleagues not to plan any trips away from the city starting on the 22d of April, until we finish action on the budget.

I also report that, in my view, we have a good budget package. Obviously, some areas are of concern to some of my colleagues. But I state in a very general way, because there has been a lot of debate on this subject, that, in my view, the American people want us to reduce Federal spending. The budget we will propose will do that by about $300 billion over the next 3 years. I believe that the American people have been ready for a long time for us to make some sharp reductions—in fact, eliminations—in some of the Federal programs that they have never fully understood and never really appreciated our funding with their tax dollars. So we will have a number of opportunities to vote on the budget when the budget resolution does come before the Senate.

I hope that my colleagues on both sides of the aisle will study the proposed budget carefully and will study the reasons for inclusion of certain items in the budget resolution, because it is the view of the majority leader that the American people expect us to act in a bipartisan way to reverse the trend of Federal spending, to avoid any tax increases, and to reduce the deficit.

So that will be the primary thrust of Senate action for the next 2 weeks.

Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. HUMPHREY). Under the previous order, the Democratic leader is recognized.

Mr. BYRD. I thank the Chair.

THE BUDGET RESOLUTION

Mr. BYRD. Mr. President, the distinguished majority leader has laid out the program and discussed, in a brief way, the budget resolution.

Yesterday, I indicated to the distinguished majority leader that we—when I say "we," I assume Members on both sides of the aisle—would like to have a copy of the legislative text so that we might have something before us which would enable us to think in terms of amendments, perhaps, to certain parts of the budget resolution. The distinguished majority leader supplied to me yesterday the backup material and the substance of many of the areas in the budget resolution, which I assume will be submitted at some point in time beginning next Monday, and the distinguished majority leader indicated that we would have the legislative text by Thursday morning.

If the distinguished majority leader has any additional information at this time, I will be glad to have it. We on this side of the aisle will certainly want to scrutinize the proposals. Perhaps we will have amendments.

There may be alternatives. The same thing could be true on the other side of the aisle. There are Senators on both sides who might be anticipating the offering of amendments to a specific item within the resolution or maybe some would want to offer alternatives.

Until we get the legislative text, we will not be able to prepare amendments.

May I ask the distinguished majority leader, has there been any change in this situation so that we might expect the text earlier, or will it indeed be available Thursday? At this point, can he tell me whether his resolution—and when I say "his resolution," the resolution that he and other Senators on the other side of the aisle have developed in negotiations with the White House—will be offered as a substitute

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

for the budget resolution that was reported from the Budget Committee and which appears on the calendar?

Mr. DOLE. Let me indicate that I have asked staff to check again and see if there might be a possibility of getting the text to the minority leader prior to tomorrow morning.

But in any event, we hope to have it available and it will be delivered at the earliest possible time.

It is a very complex, comprehensive, delicate job that they have been engaged in now for several days.

But the answer is it will be delivered as soon as it arrives, hopefully if not late today, Thursday for sure in the morning, for certain, I am just advised.

With reference to whether or not that will be offered as a substitute and at what time, I am just not prepared to say at this point.

But we welcome cosponsors.

Mr. BYRD. I thank the distinguished majority leader.

May I say to the distinguished majority leader, also, there were certain measures that he outlined in his statement for the RECORD concerning the program, and I wish to assure him that we on our side of the aisle are seeking to clear those measures, notwithstanding the fact that the 3-day rule has not run its course. I think we will be able to clear them. I took them up in the caucus yesterday, and there was no objection there. But we still need, I think, to run the request on the hotline, and I will get back to him as soon as I can in that regard.

SENATOR HART'S EUROPEAN TRIP REPORT

Mr. BYRD. Mr. President, the distinguished Senator from Colorado [Mr. HART] has been a serious student and participant in defense and foreign policy matters over the course of his Senate career. He is well known as an incisive and original thinker on matters ranging from arms control to military reform. He has written and spoken to a wide audience not only in the United States, as we all know, but also in Europe and elsewhere.

Senator HART traveled to the Soviet Union, France, Switzerland, and the United Kingdom in January of this year and has completed a comprehensive report to the Senate on his meetings with a variety of distinguished foreign officials, including French President Mitterand, British political leaders, and Soviet Foreign Minister Gromyko. Mr. HART has also delivered remarks to a number of prestigious audiences in Edinburgh, Paris, Geneva, and the U.S.A./Canada Institute in Moscow.

Mr. HART's report reflects a serious working experience and I believe is worthy of inclusion in the RECORD in its entirety. I congratulate the senior Senator from Colorado on his interesting report and commend it to my colleagues for their information.

Mr. President, I ask unanimous consent to have printed in the RECORD the report to which I have referred.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

OFFICIAL REPORT OF SENATOR HART'S JANUARY 1985 VISIT TO THE UNITED KINGDOM, FRANCE, SWITZERLAND, AND THE SOVIET UNION

INTRODUCTION

From January 11-22, 1985, Senator Hart and delegation[1] discussed arms control, international security and economic issues with the leadership of the Soviet Union and three West European countries—the United Kingdom, France, and Switzerland. The principal objective of the visit was to elicit the views from a broad spectrum of official and private leaders, meeting with representatives of both incumbent and opposition parties and a range of private experts in Western Europe; and with senior government officials and members of the USA/Canada Institute in the Soviet Union. Senator Hart also met with a dissident family in Moscow to assist in efforts to arrange emigration for medical treatment by a family member.

Senator Hart's visit included several major addresses to private groups, including speeches on NATO security at the University of Edinburgh and at the Institute Francaise de Relations Internationales in Paris; a speech on East-West relations and the future of arms control at the University of Geneva; and a presentation of U.S. economic issues at the USA/Canada Institute in Moscow.

Senator Hart was the guest of several groups during the course of his trip, including Democrats Abroad in the United Kingdom and France; the Union Bank and the University of Geneva in Switzerland; and the Parliamentary Group of the Supreme Soviet and the USA/Canada Institute in Moscow. Senator Hart is grateful to these groups for their invitations; and is especially grateful to the Senate Democratic Leadership for assisting with a portion of the delegation's expenses.

The following is a summary of the meetings and discussions which took place in the four countries.

I. United Kingdom

During the period of January 11-14, Senator Hart had meetings with leaders of all the major parties in the United Kingdom, including: David Steel, Leader of the Liberal Party; Dr. David Owen, former British Foreign Minister and currently Leader of the Social Democratic Party; Neil Kinnock, Leader of the British Labour Party; and Christopher Patten, Junior Minister for Northern Ireland in the Thatcher government, who hosted a small reception which included a number of Conservative members of Parliament.

The timing of Senator Hart's trip coincided with a period of serious political challenges for the Thatcher government, including a post-war record level of unemployment (13.6 percent), a flagging pound sterling, an industrial dispute over coal mines which then had no clear prospect of resolution, and a steady pattern of escalation of violence in Northern Ireland. Nevertheless, it was apparent from most discussions with British leaders that Prime Minister Thatcher and her Conservative Party government were as firmly entrenched in power as they had ever been, underscoring Mrs. Thatcher's image as the politically strongest and most durable of Western Europe leaders.

Conversely, the opposition parties, fragmented among the Labour, Social Democratic and Liberal Parties, were and are still vying with one another for leadership. The only apparent prospect for a serious opposition challenge to the Thatcher government is clearly dependent on the development of what is for now only a fragile alliance between the Liberal and Social Democratic leadership—still only a dim prospect given the active rivalry among the top individuals and serious differences over central issues such as defense policy. The two parties have a total of twenty-eight seats in the House of Commons.

Senator Hart's meetings with David Steel of the Liberal Party revealed some of the more fundamental differences between the approaches of his party and the rest of the opposition groups. A major focus of his disagreement with the Social Democrats hinges on the Liberal Party's opposition to the deployment of Pershing and cruise missiles in Britain and opposition to acquisition of the Trident submarine, a sentiment not shared by Social Democratic Leader, David Owen.

These differences pale into far less significance when compared to those between the Liberals and Social Democrats with the Labour Party, most notably again with respect to British defense policy. The Labour party platform includes radical proposals to restructure the entire foundation for national defense—a point of major disagreement underscored by both David Steel and Social Democratic Leader, David Owen.[2]

Senator Hart and David Steel discussed Mr. Steel's meeting in early January with Soviet Minister Mikhail Gorbachev, whose recent visit to the United Kingdom, coincided with his clear ascendance within the Soviet government hierarchy, had been the object of extensive press coverage. Steel suggested he had found Gorbachev to be far more ideologically rigid than had been portrayed in the press but stressed the importance of meetings among the "new generation" of leaders throughout the world, and particularly among those of the Soviet Union, the United States and Western Europe.

David Steel, who serves as rector of the University of Edinburgh, extended an invitation to Senator Hart to speak at a public forum at the University on January 11, for which Mr. Steel served as moderator. The subject of Senator Hart's speech—the future of U.S.-European defenses—focused on strategies for revitalizing and strengthening NATO's conventional deterrent (copy attached). The speech had an audience of over five hundred, comprised of students and faculty of the University and local citi-

[1] The delegation included two members of Senator Hart's Staff, Dr. Jannie Nolan, foreign policy aide and Doug Wilson, staff assistant. Senator Hart's wife Lee and his two children, Andrea and John, participated at private expense.

[2] For example, Labour Party policy would move to eliminate the preponderance of the U.S. nuclear force based in the United Kingdom, including U.S. nuclear missile carrying submarines based at Holy Loch, along with the F-111 nuclear capable aircraft; and scrap the central core of Britain's nuclear deterrent (Polaris, and under Thatcher's plans, Trident submarines), along with cruise missiles deployments.

zens. The majority of the members of the University's internationally recognized Center for Security Studies were in attendance, including Soviet defense expert John Erickson, whose commentary on Senator Hart's speech was printed in the University paper and is included in this report.

Senator Hart entertained questions from the audience for forty-five minutes and found the level of interest and expertise in defense issues, including among undergraduates, to be very high. Senator Hart had the opportunity for further discussion about NATO conventional defense strategy at an informal reception and lunch for University of Edinburgh faculty, hosted by the University's Chancellor, Dr. J.S. Burnet.

Senator Hart's concluding discussions with David Steel occurred at a dinner at the House of Commons jointly hosted by the Liberal International Party and Democrats Abroad. The dinner, attended by over a hundred British government officials and political experts as well as members of Democrats Abroad, represented the first time that an American and British political party had cooperated in arranging an event of this kind.

Senator Hart met with Christopher Patten, Conservative Member of Parliament, at an informal reception at Mr. Patten's home prior to the dinner at the House of Commons. Conservative members of Parliament who attended the reception included, among others, John Patten (no relation), Junior Minister for Health and Human Services; William Waldegrade, the Junior Environment Minister; Norman Lamont, the Minister of Trade; and Tristan Garel-Jones, a Tory Whip. The major issues discussed were current British efforts to effect a resolution to the problems in Northern Ireland and overall U.S.-U.K. economic relations.

With respect to Northern Ireland, it was apparent that there was considerable skepticism among British Conservatives as to prospects for early resolution of the Northern Ireland conflict. The fifteen year war between British, Irish and Ulster security forces with the outlawed Irish Republican Army has drifted into a deadly new phase in which the number of casualties were actually going down but the stakes steadily increasing: that is, the decline in the death toll had coincided with an increasingly stronger power base and capability to inflict violence by the IRA. Political violence targeted against the highest levels of government is expected to increase, as dramatized in October of 1984 by the destruction of the Brighton Hotel where an IRA bomb barely missed killing Margaret Thatcher and most of her Cabinet at a Conservative Party conference.

For over two years, the Irish government, headed by Garrett Fitzgerald, has been making a sustained effort to bring about a peaceful resolution to this protracted conflict. The government has organized the New Ireland Forum, comprised of the three major Irish parties as well as the Social democratic and Labour Party, the principal moderate Catholic party in Northern Ireland. After months of public hearings, the Forum produced a report in May of 1984 setting forth three possible roads to constructive change: outright unification; a confederation of Ireland and Ulster; or Joint Anglo-Irish authority for the province. The public rejection by Prime Minister Thatcher of all three options in November—undertaken in the aftermath of the Brighton bombings—has resulted in the current stalemate which for now eludes solution.

On January 13, Senator Hart met with Neil Kinnock, head of the Labour Party, at his home in London's West Ealing district. Just that morning returned from Nicaragua, Mr. Kinnock discussed his experiences in that country, which included attending the inauguration of the new Nicaraguan President and a meeting with Cuban leader, Fidel Castro.

Mr. Kinnock, elected Labour Party leader in October 1983, is more widely respected and considered far less doctrinaire than his predecessor, Michael Foot, notwithstanding the Labour Party's widespread reputation as irreversibly captive of the far left factions of the British political scene. Unilateralism and socialism, rightly or wrongly, are considered the two pillars of the Labour Party platform and account for the switch of many party moderates to the Social Democrats.

The discussion with Mr. Kinnock reinforced the accuracy of the perception that he is by no means doctrinaire. Mr. Kinnock expressed clear dislike for the Soviet government and had reservations about the nature and direction of the Sandinista government in Nicaragua. Nonetheless, Mr. Kinnock reiterated his belief that the revolutionary nationalists in Nicaragua—rather than the hard line Marxist-Leninists—now dominate in that country. He expressed the view that the Cuban government would like to give additional economic assistance to the Sandinistas but is prevented from doing so by domestic economic constraints.

Senator Hart and Mr. Kinnock discussed at some length Mr. Kinnock's visit to the Soviet Union late last year, which included a meeting with Prime Minister Constantin Chernenko. Kinnock reported that Chernenko seemed in reasonably good health at that time and that his discussion of arms control was notably lacking in diatribe against the Reagan Administration. Mr. Kinnock stated that Chernenko claimed to have "fully expected" a second term for the Reagan Administration and had expressed hope that the American President would prove less rhetorical and "more realistic" about arms control over the next four years.

Mr. Kinnock expressed the Labour Party's strong opposition to the deployment of cruise missiles in Britain, but made clear that a Labour government under his direction would not seek to radically alter British participation in the NATO Alliance.

Senator Hart's final meeting with a British official was with Dr. David Owen, a conversation which focussed principally on U.S. and British internal political affairs. Owen stressed his view that much work still needed to be done—especially at the local level—before an effective Liberal/Social Democratic alliance could be forged and considered as a credible alternative to the Conservatives. Mr. Owen expressed strong interest in the 1984 elections in the United States, particularly with respect to the impact of the new voting trends of the post-war 'baby-boom' generation—a phenomenon with which he found parallels in Western Europe.

II. France

A highlight of Senator Hart's visit to France during the period of January 14-16 was a meeting with French President Francois Mitterrand. Originally planned as a courtesy call, the meeting with President Mitterrand and Senator Hart was extended for over an hour and provided an opportunity for a full exchange of views on Western defense issues, arms control and domestic French economic and political trends. Senator Hart's January meeting with the President was his second, following a meeting initiated by the President in April 1984 when Mr. Mitterrand visited New York during the Democratic Presidential Campaign.

President Mitterrand expressed particular concern over the impact of the U.S. deficit on the strength of the French franc—hitting an all time low at the time of the visit—but made clear that he admired the strength and vitality of the American economy. President Mitterrand has a particular interest in the development of high-technology sectors in the manner of California's 'Silicon Valley'; and talked in some detail about his efforts to stimulate high technology growth in France.

Clearly the dominant issue occupying French public attention in early 1985 was the condition of the domestic economy. Over the last two years, President Mitterrand and his Socialist government have increasingly been forced by rising unemployment and declining national productivity to retreat from its traditional Socialist economic agenda and embark on more traditional austerity programs marked by fiscal conservatism. The apparent failure for now of socialist economic measures may have far-reaching effects in domestic political terms and for the future of the Left in France. The disappointing economic performance in the first two years of socialist rule are being viewed by many—on both sides of the French political spectrum—as a retreat from socialism and a move towards neo-liberal pragmatism.

Although much touted as the cause of major political liabilities for President Mitterrand (his approval rating in January was unprecedentedly low, twenty-five percent), Socialist leaders are hopeful that the current austerity programs will restore stability in the economy and allow a sufficient increase in government spending to permit a return—and re-legitimization—of the socialist agenda prior to the parliamentary elections in fifteen months. Although there was some doubt expressed as to these prospects, President Mitterrand, for one, showed remarkable resilience and optimism.

Still in question is whether President Mitterrand will remain in office throughout his term. Although Senator Hart and he did not discuss this directly, a number of French experts and commentators with whom Senator Hart met expressed doubts as to whether it would be possible for Mitterrand to retain the Presidency if there is a victory by the opposition in the parliamentary elections in 1986. The French government has never before been confronted by a situation in which there are opposing ideologies in the Parliament and the Presidency and should this happen, would be forced to navigate totally uncharted political territory.

President Mitterrand concluded his meeting with Senator Hart by extending an invitation to him and his family to return to France as his personal guests.

A key figure in the upcoming 1988 French Presidential elections with whom Senator Hart met is Raymond Barre, former Prime Minister under President Giscard D'Estaing. Mr. Barre, known as a moderate conservative, is currently leading the polls for potential opponents to President Mitterrand. Unlike his leading competitors, Mayor of Paris Jacques Chirac, and former President Valery Giscard D'Estaing—both of whom are affiliated with established political parties—Raymond Barre has maintained a power base which is independent of party affiliation. Although there was skepticism

expressed by a number of commentators as to Mr. Barre's ability to mount a serious opposition campaign in the absence of a party structure, Mr. Barre's independence has for now played successfully to the French electorate's current disaffection for traditional party politics.

Senator Hart and Mr. Barre had a wide-ranging discussion for over an hour, focussing principally on economic issues. Mr. Barre expressed his view that the power of the French state should be reduced and that the restoration of private ownership should extend beyond those industries nationalized by Mitterrand, to include the banking industry. Mr. Barre stressed a number of economic initiatives he believes vital to the restoration of the French economy, including tax cuts, higher structural incentives for business, civil service cuts and overall economic deregulation. Mr. Barre's analysis reinforced his image as a moderate conservative who has a solid base of expertise and is measured and cautious in his observations.

On the evening of January 14, Senator Hart addressed 150 members and invited guests of the leading French foreign affairs institute, the Institut Francais de Relations Internationales (IFRI), as a guest of its director, Thierry de Montbrial. As in Edinburgh, the focus of Senator Hart's formal speech was on NATO defense challenges and strategies to re-build a credible conventional deterrent. As reflected in the questions posed by the audience, there is strong national support in France for French military independence with an attendant commitment to upgrading the Force de Dissuassion.

One aspect of particular concern which grows out of this independence—and is a source of potentially serious disagreement between the governments of France and the United States—is the potential impact of the Strategic Defense Initiative on French security planning. Although not uniform, some comments from the audience suggested heightened concern about the deployment of defenses in the Soviet Union and the United States sufficient to nullify the strength of the French independent nuclear force and to suggest a retrenchment of the United States to a policy of "Fortress America".

Senator Hart expressed his support for continued research on defensive and space systems to counter any Soviet developments in this area, but stressed that the notion of a "defensive shield" of the type described by President Reagan "did not make sense technically, could not be afforded financially and was not desired diplomatically." Instead, Senator Hart urged the more pressing security requirement of reducing dependence on nuclear weapons through improvements in conventional forces and nuclear arms control. Senator Hart stressed his concern that "relying subconsciously more and more on nuclear weapons increases the danger of their accidental use" and of the risk of other nations, and even terrorists groups, acquiring such weapons. By contrast, creation of an effective conventional defense would lead to a more cohesive NATO alliance "because such forces would enable us to honestly assure our citizens that any conflict would have a reasonable chance of remaining at the conventional level."

Replying to a question about possible inclusion of the French and British nuclear forces in the upcoming talks with the Soviet Union, Senator Hart said he could never see a time when the U.S. would attempt to bargain unilaterally for its two allies but could envisage four-sided negotiations at some point in the future, albeit with considerable complications.

Senator Hart continued his discussion of NATO defense issues at an informal dinner hosted by ABC bureau chief for Paris, Pierre Salinger. In addition to Thierry de Montbrial, French education Minister Jean-Pierre Chevenement attended the dinner. The issues discussed ranged from U.S. global security commitments to the merits of space-based defenses. Of particular concern was the perception of an "isolationist" trend within the Democratic Party, suggested by the debates over Central America and the Persian Gulf during the Democratic Presidential Campaign.

Senator Hart explained his differences with both the Republican and mainstream Democratic Party over approaches to the use of force, underscoring his views that defense commitments had to coincide with improvements in defense capabilities; and that the application of military force for the resolution of instability had to be based on realism, judiciousness, and a clear definition of objectives prior to the commitment of American troops. He reiterated his concerns that a pragmatic evaluation of the structure of defenses for NATO was an urgent challenge which Western leaders could no longer afford to delay; and that the consideration of possible shifts in the relative allocation of burden for the defense of NATO between the United States and the European countries was not predicated on "isolationism" but on the recognition of the urgent need to rectify weaknesses in the NATO deterrent.

Senator Hart had the opportunity for substantive discussions with leading group of editors and commentators, including recently elected editor of Le Monde, Andre Fontaine. Senator Hart also paid a courtesy call to U.S. Ambassador Evan Galbraith prior to leaving Paris.

III. Switzerland

Senator Hart arrived in Zurich on January 15 to attend a working dinner in his honor with financial and industrial leaders, hosted by the Union Bank of Switzerland. The dinner took place at Wolfsberg Castle in Ermatingen, forty miles outside of Zurich, a site used as a conference and training center by the Union Bank. The last such dinner organized by the bank was for former Secretary of State Henry Kissinger. Swiss Secretary of State Eduard Brunner chaired the dinner and after-dinner discussions. A list of attendees is included with this report.

Of principal interest to the participants were U.S.-European economic relations. An overarching theme of the discussion was the interest among the Swiss in Senator Hart's proposals for economic and industrial revitalization in the United States. Another common theme was the concern about the volatility and instability in the foreign exchange markets resulting from the strength of the U.S. dollar.

The Swiss economy is heavily dependent on international economic conditions for its continued prosperity; and with the U.S. as its second largest trade partner, Swiss leadership is understandably concerned about the condition of the dollar. Exports are especially susceptible to volatile exchange rates, as the preponderance of these are in specialized manufacturing, including highly price-sensitive goods such as electronics, watches and highly specialized machinery. With few natural resources, Switzerland is also highly import dependent, including for energy, food and the majority of raw materials required for its manufacturing industry. Switzerland is also recovering from a relatively recent economic recession—the latest in 1981-1982—and is still battling inflation and unemployment, which, while low by international standards, are still at levels quite high by Swiss standards.

Concern was also expressed by Swiss industrialists over what they perceive to be an increasingly protectionist trend in the United States, especially with respect to on such items as machine tools, Several participants expressed hope that Swiss industries would have greater access to investment in the U.S. than exists currently.

There was much interest among participants in the prospects for success in the upcoming U.S.-Soviet arms control talks and in the recent Presidential election in the United States. The President of Switzerland had recently met with both U.S. Secretary of State Shultz and Soviet Foreign Minister Andrei Gromyko during their recent visit to Geneva and had shared his views with Dr. Bruner. Senator Hart shared his views on these issues over the course of a lengthy discussion after dinner.

Senator Hart returned to Switzerland on January 21, following his visit to the Soviet Union, to give a major address at the University of Geneva. The speech, co-sponsored by the Director of the University of Geneva's Graduate Institute for International Studies, Professor Kurt Gasteyger and by the head of the Faculty of Economics and Sciences Dean Peter Pschopp, was attended by several hundred students and faculty of the University and local citizens.

Senator Hart outlined a series of major proposals for achieving comprehensive progress in arms control and averting the greatest threat to global security, the growing possibility of the *use* of nuclear weapons. Senator Hart also discussed the major elements of his meetings in Moscow (discussed in detail below), focussing on one aspect in particular: his proposal that the superpowers consider one or several types of mutual testing and deployment moratoria to be undertaken as the upcoming arms negotiations progress.

Specifically, Senator Hart urged that the governments of the United States and the Soviet Union move to halt testing of anti-satellite weapons, testing and deployment of new types of strategic ballistic missiles, and on the testing of nuclear warheads, as a first step towards negotiating comprehensive reductions in nuclear weapons. Senator Hart stressed that these kinds of moratoria would help reverse the momentum of the arms race, saying . . . "technology drives the development of new weapons; and fear drives their deployment". Hart stressed that in order for such initiatives to be credible, they had to be mutual, "for the U.S. is strong enough to continue only if the Soviet Union responds to our lead."

Senator Hart referred to the major historical precedent for such measures—the declaration by President Kennedy in 1963 of a moratoria on the testing of nuclear weapons in the atmosphere. "The Soviet Union followed his lead—and a cycle of crisis, confrontation, and environmental damage was broken. Within months, our two nations had signed the Limited Test Ban Treaty", he said.

Senator Hart's speech was followed by active questioning from the audience. Questions focussed for the most part on concerns

about the U.S.-Soviet nuclear competition and hopes for progress in the upcoming talks. Following a short press conference, Senator Hart then participated in an informal dinner hosted by the University, attended by twenty five students and faculty members from the International Studies institute.

IV. Soviet Union

Senator Hart arrived in the Soviet Union on January 16, as guest of the Parliamentary Group of the Supreme Soviet and the USA/Canada Institute of the Soviet Academy of Sciences. Senator Hart and delegation were met at the aiport and accompanied throughout much of the trip by Institute Director and member of the Central Committee, Giorgi Arbatov. The delegation stayed at the official Embassy residence, Spaso House, as guests of Ambassador Arthur Hartman and Donna Hartman.

Senator Hart's visit to the Soviet Union was the result of invitations extended by Soviet Ambassador Anatoly Dobrynin since 1983. The timing of Senator Hart's trip, so close to the decision on January 8 to resume U.S.-Soviet talks, although coincidental, meant he was the first American Senator to meet with Foreign Minister Gromyko since this development. Given the possible sensitivity of meetings with Soviet officials at this time, Senator Hart sought briefings and guidance from senior administration officials prior to his departure, including Ambassador Paul Nitze, Standing Consultative Commission director General Ellis, Secretary of State Shultz and U.S. Arms Control and Disarmament Agency Director Kenneth Adelman.

Senator Hart was granted requests for meetings with several senior Soviet officials, including Council of Union Chairman Lev Tolkunov; Vice-Chief of Staff for Warsaw Pact Forces, Lt. General Chervov; Central Committee Deputy Chief, Vadim Zagladin, as well as Foreign Minister Andrei Gromyko. His request for a meeting with Soviet Leader Constantin Chernenko was not fulfilled.

Senator Hart's request for a meeting with Politburo member Mikhail Gorbachev, thought by most in the West to be Chernenko's heir apparent, was also not granted. The official explanation for this was that Foreign Minister Gromyko had been entrusted by the leadership to serve as the senior representative of the Soviet government.

The first official meeting Senator Hart's Soviet visit was with Council of Union Chairman Lev Tolkunov, in the Surpeme Soviet Presidium offices in the Kremlin on the morning of January 17. The two hour exchange, in which Sergei Losev, Director General of the Soviet Information Agency [3] Tass, also participated, focussed on arms control issues.

Senator Hart began the meeting by stressing what was a major theme of all of his official meetings in the Soviet Union: that there is overwhelming consensus in the West about the urgency of reaching equal, verifiable and comprehensive arms control agreements, in spite of some divergences in U.S. opinion over specific defense policies. It would not be possible, even for those who ardently support arms control to hope for early progress, however, as long as there were legitimate concerns over Soviet compliance with treaties.

Tolkunov began with an "appeal to all parliaments of the world to raise their voices against nuclear war" and went on to list past Soviet demarches for arms control, all of which, Tolkunov claimed, had been rebuffed by the U.S. side. He included Soviet proposals to renounce "first-use" of nuclear weapons as a basis for NATO doctrine, a NATO/Warsaw Pact agreement not to resort to force and SALT II. He also stressed the alleged U.S. violation of the principles guiding the agreement to resume negotiations stemming from continued U.S. efforts to develop defensive systems; and cited the deployment of INF missiles in Europe as a serious obstacle to the upcoming negotiations. Tolkunov did not respond to Senator Hart's rejoinder that the Soviet Union also was continuing its work on antisatellite and defensive systems.

Tolkunov criticized the current Administration for "undoing the history of past arms control agreements" and attempting to "restructure" Soviet forces away from reliance on land-based systems. This effort, he claimed, was based on a lack of understanding of the Soviet Union's geographic dependence on land-based forces, given the Soviet Union's difficulty in gaining access to oceans and the threat of blockage of Soviet fleets in the Baltic and Black Seas.

Senator Hart countered that the Soviet Union should now be feeling far greater confidence in her maritime capabilities, in light of the significant expansion of Soviet naval forces over the last twenty years. He added that the United States had never in actuality sought to dictate the composition of Soviet strategic forces, but was operating instead on the conviction that both sides would be far more secure with increased reliance on submarines rather than land-based forces--avoiding the first strike character of the latter. Hart stressed that the threat of Soviet maritime forces being bottled up was not the decisive factor in the capability of their forces. What is needed is not global access to oceans as much as the ability to deploy a credible, survivable sea based deterrent with submarines which operate undetected.

Tolkunov's ensuing analysis of the upcoming negotiations stressed the interdependence among the three working groups mandated to negotiate limits on strategic and intermediate range offensive nuclear forces and space/defensive weapons. Tolkunov stated categorically that failure to make progress in the space area would lead to an irrevocable "militarization of space" and urged consideration of restraints on the development of new technologies such as genetic and particle beam weapons. The pace of technology, he argued, was significantly outstripping the pace of political dialogue, with "potentially dangerous" consequences for global stability. Senator Hart agreed with the last observation, but stressed that any future proposal for a ban on space weapons should include "all defensive capabilities—not just in space but on earth—which could lead to instability for either side", excluding systems permitted by the ABM treaty.

Director General Losev's subsequent discourse opened with an expression of concern for treaties which have yet to be ratified by the United States, including SALT II, the Threshold Test Ban Treaty and the Treaty on Peaceful Nuclear Explosions. Mr. Losev said he welcomed the positive atmosphere between the two sides which had grown out of the recent decision to resume negotiations, but argued that the basis for conciliation would be much improved if these existing treaties could be ratified. The Administration's arguments against ratification of the testing treaties, based on allegations that they would hinder progress towards a verifiable, comprehensive test ban were merely a "pretext", he argued, which was being used to mask the Administration's efforts to continue to use testing to improve nuclear capabilities. He also stressed that it was the United States which had broken off the trilateral negotiations for a Comprehensive Test Ban and had refused Soviet efforts at resumption.

Director General Losev essentially repeated Tolkunov's assertions concerning the imperative to move forward with restraints on space weapons, characterizing the U.S. Strategic Defense Initiative as an "aggressive" strategic doctrine aimed at establishing U.S. military superiority in space and a first strike strategic posture.

He went on to discuss the potentially beneficial effects of the "improved atmosphere" in U.S.-Soviet relations for other areas of contention, such as the Middle East, emphasizing that the Soviet Union's proposal put forward in the summer of 1984 for a Middle East peace plan should be considered promptly. The Soviet proposal in no way infringed on Israel's security, he argued, and was "fully equitable" to all sides.

Senator Hart reiterated his concerns that neither side take any steps to infringe on the viability of the ABM treaty. The treaty had foreseen the requirement for both sides to engage in some types of research, to facilitate mutual security. It was particularly important, however, that the U.S. and Soviet negotiators move to agree not to construct new defensive systems such as radars and interceptors which were in clear violation; and to avoid interference in each others' national technical means of verification. Senator Hart again referred specifically to the concern within the Administration and the Congress over Soviet construction of radars at Krasnoyarsk and encryption of telemetry data from missile testing.

A key issue in any future negotiations would be compliance and verification, he stressed. To this end, continued Soviet activities which interfered in the monitoring of compliance, such as encryption, posed a serious impediment to future agreements. Senator Hart responded to Director General Losev's reference to the unratified treaties by asking for the Soviet delegation's views on implementations of possible moratoria on nuclear testing while the upcoming negotiations were underway.

Senator Hart also emphasized that no negotiations could proceed unaffected by overall political conditions. He stressed in particular the tensions between the two sides arising from Soviet behavior in Afghanistan, Central America and in the area of human rights and emigration policy. "Questions of emigration and family reunification are of keen interest to each and every member of Congress, regardless of Party", he said.

Senator Hart then shifted the discussion to the deployment of intermediate range missiles in Europe, stressing that the failure to avert these deployments through negotiations was a mutual responsibility. He noted that both sides had rejected the "walk in the woods" proposal, a proposal which had been widely supported in the United States.

[3] Others attending the meeting included Surpeme Soviet International staff members Vladimir Andreyev (Deputy Office Chief), Vitaliy Yeseyev (Sector Chief) and Yuriy Yurov, as well as Janne Nolan and Douglas Wilson from the Senator's Staff and Laura Kennedy from the U.S. Embassy.

Senator Hart asked Tolkunov for clarification of his apparent statement that no progress would occur in Geneva as long as INF deployments continued, a precondition that had not previously been mentioned as part of the agreement to resume talks. Tolkunov conferred hastily with Lusev and responded that he had meant only to suggest that INF deployments could "complicate" the talks; and that he would leave it to Foreign Minister Gromyko to explain these "intricacies" of arms control in which he himself was not expert.

Tolkunov's responses to Senator Hart's discussion focused on two main issues with which he took exception: Soviet submarine forces and Soviet human rights policies. Tolkunov repeated his argument that survivability of submarines was much reduced in limited ocean area and that, in addition, detectability of Soviet submarines was occurring in any case as a result of technological breakthroughs. Tolkunov disagreed strongly with Senator Hart's concern about human rights in the Soviet Union, referring to "twenty different UN proposals" which the USSR had offered, a number of which he claimed had been rejected by the United States. He urged recognition that the two sides had "different perspectives" on these issues.

Senator Hart's concluding remarks stressed the importance of increasing U.S.-Soviet exchanges to discuss such differences and to improve understanding; and reiterated his strong conviction that significant progress in negotiations will only be possible when key issues such as human rights and treaty compliance are taken more fully into consideration.

The formal meeting was followed by a lunch hosted by Mr. Tolkunov at the Palace of Congresses which was also attended by Ambassador Arthur Hartman, Tass Director General Losev, USA Department Chief in the Ministry of Foreign Affairs, Mr. Bessmerthykh and Mr. Arbatov, as well as several members of the Soviet Parliamentary Group. Discussion at lunch was ceremonial and social.

Following lunch, Senator Hart returned to the Kremlin for a two hour meeting with Foreign Minister Andrei Gromyko in Minister Gromyko's office.[4] Senator Hart opened the meeting by expressing his long standing interest in and commitment to arms control, inviting Mr. Gromyko to express his views as to when he believed the talks might resume and to describe his perspective on the interrelationships among the three working groups agreed to for the negotiations.

Gromyko replied that discussions were underway in Washington to decide the timing and location of the talks predicting (accurately, as it turned out) they would begin in one and a half to two months. He went on to stress that in spite of Soviet interest in avoiding undue delays, it was more critical for both the U.S. and Soviet Union to come to the negotiating table with concrete, detailed proposals which had a chance of success.

Mr. Gromyko then presented a lengthy discourse on past Soviet efforts at arms control. Listing past Soviet proposals for such initiatives as an INF moratorium, a nuclear freeze, a comprehensive test ban, and a NATO 'no first use' doctrine. He then discussed his concept of requirements for success in the upcoming talks, characterizing the three working groups as a triad which should only be seen as intrinsically interrelated. As illustration, he repeated the traditional Soviet view that INF weapons are, from a Soviet perspective, "strategic" weapons and that it was therefore essential that strategic and intermediate range nuclear forces be considered together. Similarly, space weapons could not possibly be considered in isolation, he aruged, since development of space weapons would invariably "neutralize" any progress undertaken in the offensive force area.

Mr. Gromyko's analysis of the SDI hinged on the depiction of the program as a U.S. plan for achieving a first strike capability. Placing two pencils point to point on the table, he asked Senator Hart to conceive of this as the space-based defensive shield being contemplated by the U.S. Such a shield, he aruged, would inevitably provide the U.S. with a defensive sanctuary, capable of attacking the USSR without fear of retaliation. This would leave the Soviet Union at the mercy of U.S. "conscience" and "morality" as the basis for its security, giving the U.S. the capability to engage in nuclear blackmail and coercion against the USSR. Mr. Gromyko stated flatly that the Soviet Union would "never permit this to happen" and that he had stated this equally categorically at Geneva. The SDI was under no circumstances seen by the Soviet Union as a move towards defenses but rather as an offensive program "imbued with an aggressive character."

Foreign Minister Gromyko criticized the American concept of the distinction between research and testing/deployment in the Strategic Defense Initiative, arguing that the expenditure of billions of dollars on a "research" program would generate pressures for a new round of the arms race in space which would prove inexorable. Were space to remain "demilitarized", by contrast, it would be possible to instead proceed with reductions in existing nuclear forces. Although the requirement to treat intermediate and strategic offensive arms together would be complicated, he continued, the larger number of "components" under discussion in the three working groups might provide a better opportunity for trade-offs, in turn heightening prospects for achieving agreement on "equivalence" based on a lower level of nuclear armaments. Were the U.S. to proceed with a space based defense system, however, there would be no prospects for disarmament.

According to Mr. Gromyko's depiction, successful research efforts in the defense area would invariably lead the U.S. to "break out of the narrow confines of the ABM Treaty," causing the negotiations "to explode in the air." He reiterated the view that the SDI was first and foremost an effort by the United States to achieve a position of "domination" over the Soviet Union, an effort which "cast an evil shadow" over U.S.-Soviet relations and was the "problem of problems" between the two sides.

Senator Hart stressed that the major impediment to comprehensive arms control stemmed from the inability of the two superpowers' leadership to assert effective political control over the pace of technological developments. Stressing that, at this juncture, both sides should do eveything possible to ensure success in the future negotiations, Senator Hart then asked Mr. Gromyko to comment on how he thought the Soviet leadership might respond to the idea of selctive moratoria in one or several areas (testing and development of new types of strategic ballistic missiles, testing of space weapons and/or testing of nuclear warheads) as a way to provide impetus for early progress.

Foreign Minister Gromyko reiterated previous Soviet offers for moratoria (CTB, a nuclear freeze, a ban on INF deployment and NATO no-first use.) When pressed, Gromyko responded that a moratorium on space weapons could not be based on testing alone but would have to include research as well, given that "research is ninety percent" of the process of weapons development. Moreover, the USSR could not accept a moratorium on strategic offensive forces as long as the U.S. pressed forward on SDI. Continued SDI research meant the Soviet Union had to "take all necessary steps" to ensure that its security would be preserved. Were the U.S. to agree to a halt on SDI testing, however, moratoria in other areas would be a "realistic and honest" way to proceed. Gromyko concluded by pressing the issue of INF deployments: a moratorium on INF deployments in Europe could and should be adopted to provide impetus to the negotiations and reduce international tensions.

Senator Hart urged Foreign Minister Gromyko to understand the seriousness of concern on the part of members of Congress—from both the Republican and Democratic parties—about Soviet compliance with arms control treaties. Resolution of these concerns was critical even to those who did not necessarily support all of the Administration's policies, he argued, and was in fact the prerequisite for any prospect of success in negotiations in the future. Senator Hart then again raised the issue of Soviet construction of a radar installation at Krasnoyarsk and continued Soviet encryption of telemetry in missile tests. These clear cases of violation were lending legitimacy to the overall appearance of Soviet non-compliance and as such, impeding efforts by those who support arms control to press forward for comprehensive efforts.

Mr. Gromyko's discussion of the compliance issue was essentially a categorical denial that the Soviet Union was engaged in violations. He argued that he and former Secretary of State Cyrus Vance had come to an agreement on "limited encryption" as part of the SALT II Treaty but that the current Administration had redefined the terms to demand a total encryption ban. The re-opening of "old questions" such as these would lead to commensurate Soviet efforts to re-open controversies of the past, he argued.

Not responding to the case of the Krasnoyarsk radar, Mr. Gromyko then directed his remarks to a criticism of the United States for attempting to depict the Soviet air defense system as already constituting a significant anti-ballistic missile defense. Gromyko stressed the view that the whole issue of compliance was being raised by the United States simply to divert attention from its own questionable activities—which the Soviet Union would continue to raise if the United States persisted in its allegations.

Senator Hart's concluding remarks emphasized the linkage between arms control and human rights which he had discussed with Mr. Tolkunov, pressing the critical importance of Soviet progress in the human rights area as a necessary positive contribu-

[4] Others attending the meeting included Soviet Minister of Foreign Affairs; USA Director, Bessmertnykh; and interpreter, Victor Sukhodrev, as well as Janne Nolan and Douglas Wilson from the Senator's staff.

tion to the climate for arms control negotiations.

Senator Hart also specifically raised the question of the Meiman family who are requesting emigration rights to seek medical treatment in the United States. (Senator Hart's meeting with the Meimans is discussed further below). Mr. Gromyko responded that while such matters were "internal" to the Soviet Union and handled in accordance with Soviet law, he would look into the case.

Senator Hart and delegation participated in a dinner at Spaso House on the evening of January 17th at which there were a number of prominent Soviet officials, including Academy of Sciences Vice President, Velikhov, Deputy Foreign Minister Komplektov and Mr. Tolkunov, among others.

On January 18, Senator Hart gave a presentation to the members of the USA-Canada Institute, hosted by the Institute's Director Georgi Arbatov. The meeting included about eighty Soviet analysts, including two Deputy Directors, of the Institute, Mr. Bogdanov and Mr. Kokoshin, and political analyst for Izvestiya, Valentin Falin. The principal focus of Senator Hart's formal remarks were on U.S. political and economic issues.

Following a review of current U.S. political trends, Senator Hart analyzed the slowness of the Democratic Party in adapting to structural, revolutionary change in the post-war economy. The Democratic Party had continued to adhere to the economic policies of Kennedy/Johnson era, leading to the party's inability to adapt to the transformation of economic and political realities which had resulted from such changes as the increase in importance of service over traditional industries; the OPEC oil embargos; the dramatic growth in international trade; and, the emergence of the non-aligned movement, which had served to radically alter the foundations for relations between North and South.

Senator Hart then presented his own policy proposals for the Democratic party based on new approaches to these economic and political challenges, including industrial policies designed to expand economic opportunities; increased energy independence for the West; protection of the environment; most effective conventional defenses; and balanced, effective and verifiable nuclear arms control agreements. Senator Hart emphasize that independent voters hold the balance of political power in the United States and that the Party which is best able to respond to this "third party" trend will be the one which dominates in the coming years.

The exchange between Senator Hart and the participants was extensive and eclectic. Mr. Arbatov lead the discussion by commenting on the evolution of U.S. military power, suggesting the United States had become a "big military and partially militaristic power" since World War II. He argued that the vulnerability to nuclear attack in the United States in the post-war era was a trauma of even greater significance than the Depression; and that the existing nuclear stalemate between the United States and the Soviet Union was "irreversible" and meant that neither side would ever again be in a position where differences could be settled by armed conflict.

Lieutenant General Milshteyn, a Deputy at the Institute, asked if the recent change in the Reagan Administration's approach to arms control was genuine or simply cosmetic. Senator Hart responded that he was not involved in formulating Administration policy and could not speak for the Administration. The decision to resume negotiations, however, did clearly indicate an ascendance of those in the Administration who favor negotiations; and that there was unmistakably strong support within the Congress for enforceable, balanced, verifiable agreements. The key problem, however, continued to be vertification.

Senator Hart outlined his proposals for possible moratoria as one possible avenue for the two sides to consider to accelerate the pace of progress in the talks, a subject on which the audience did not comment.

Other questions included a remark by Dr. Ivanyan, a section head in the Institute, who asked about what new voting blocs might be attracted to the Democratic party in the future. Senator Hart responded that the independent voters and the large segment of the population who had not previously been active voters were the major source of potential new support. Genrikh Trofimenko, Chief of the Foreign Policy department of the Institute, observed that Senator Hart's comments implied that the Republican party had been able to adapt to the "revolutions" to which the Senator referred, while the Democratic Party had not. He commented that Senator Hart sounded more like a "liberal Republican" than a Democrat during the Presidential campaign, while President Reagan seemed to have successfully undercut Democratic strength on foreign policy by sounding more like a Democrat than a Republican. He then asked Hart how he planned to provide a clear alternative to the Republican Party.

Senator Hart responded that the Republican Party had succeeded is using 'supply-side' economics to fill a vacuum left by the absence of Democratic leadership, but stressed that he himself had voted against the major elements of "reaganomics" and was not a neo-Republican. Rather, his policies were geared towards the expansion of economic opportunity through basic capitalism and entrepreneurship. Hart stressed that most Americans oppose centralization and government planning and that this was not an exclusive view of the Republican Party. It is widely felt that government programs should be a stimulus to, not a substitute for, private economic activity.

Dr. Melvil, another Institute section head, asked Senator Hart if President Reagan's re-election had been based on his effective use of "symbols". Senator Hart responded that the President's success had been based in large measure on his personal popularity and that it is always difficult to defeat an incumbent President when the economic climate is optimistic. He stressed that there are significant problems in the U.S. economic, however, stemming largely from the size of the national deficit.

Senator Hart's discussion with Institute members was followed by a private meeting with First Deputy Chief of the Central Committee's International Department, Vadim Zagladin. The Senator and Mr. Zagladin went into greater detail about the Senator's concepts for arms control moratoria, during which Mr. Zagladin asked many more questions than had been posed previously and took extensive notes.

Mr. Zagladin expressed the view that moratoria can be achieved two different levels: "technical" and "political", but that there were two essential approaches to achieving arms control which were fundamentally incompatible—"confrontation to force accommodation" or "negotiations undertaken in good faith". The USSR did not understand which approach the U.S. was planning to adopt, he said. Any Soviet consideration of proposals, therefore, including moratoria, required prior determination of which approach the Administration ultimately selected.

Senator Hart's subsequent official meeting was with Lieutenant General Nikolay Chervov, Vice Chief of Staff for Warsaw Pact Forces, in the offices of the Supreme Soviet. In a two hour discussion with General Chervov, Senator Hart had the opportunity to present his views in detail the overarching importance of verification to progress in arms control, urging that both the U.S. and Soviet union galvanize the full strength of their scientific and diplomatic talent to devise new ways to verify more comprehensive agreements.

General Chervov did not respond favorably to Senator Hart's views, arguing instead that verification was an ancillary issue "until there is agreement on what to control". He stressed that the basic principles for successful negotiations were equal security and equal interests, but that past agreements had been "cancelled by President Reagan". The Reagan Administration had abandoned the principle of equal security and was seeking unilateral military advantage, a view to which Hart took exception. General Chervov exhibited no flexibility throughout the extensive exchange on verification.

General Chervov then turned to his views on the SDI, which were somewhat more strident versions of those expressed by Foreign Minister Gromyko. He stressed that the Administration's efforts to militarize space had to be rejected and SDI research discontinued; and that no moratoria could even be considered until this took place. Referring to hand drawn charts, he presented a discourse on SDI objectives, consistent with his perception of the U.S. quest for military superiority.

Senator Hart raised the two issues of the Krasnoyarsk radar and Soviet telemetry encryption. General Chervov characterized Krasnoyarsk as entirely designed for space tracking. He then stressed that the U.S. Pave Paws radar system was of "equal concern" for the USSR.

The meeting with General Chervov was the final official meeting of Senator Hart's visit in Moscow. The Senator and delegation subsequently made a one day visit to Leningrad on January 19, as guests of the First Deputy Chairman of the Leningrad City Executive Committee, Boris Petrovich Taukin. The Senator laid a wreath at the Piskarevskoye Memorial cemetery, toured the Hermitage museum and laid flowers at the Victory Square monument to the World War II defenders of Leningrad. Other sites visited in Leningrad included the Pushkin-summer palace and St. Isaac's cathedral.

Senator Hart expressed strong sentiment about the importance of the memorial to the defenders of Leningrad during a lunch hosted by Mr. Taukin. Senator Hart referred to the wartime experience of the citizens of Leningrad as a tribute to the human spirit: "As long as human civilization survives, the word 'Leningrad' will be synonymous with human courage," he said. The Senator went on to stress that U.S.-Soviet relations are". . . a test of human creativity. We can confront each other with our military strength and die, or we can unite our creativity, guarantee peace for our children and eliminate the threat of nuclear war." Senator Hart concluded with a quote from

William Faulkner, "Mankind will not only survive, it will endure."

A very important highlight of Senator Hart's trip was a visit on the evening prior to the Senator's departure from Moscow to the home of Naum and Inna Meiman, whose daughter, Olga Plum is a resident of Colorado. Dr. Naum Meiman is a former member of the Soviet Helsinki Review Commission, most of whose members are now imprisoned or exiled. His wife Inna is a teacher of English who is currently recovering from her third operation for what has been diagnosed as terminal cancer.

During the ninety minute meeting (at which the U.S. Embassy-Moscow's human rights officer George Glass and staff assistant Doug Wilson were also in attendance), the Meimans spoke of the difficult problems they faced with Soviet authorities and the general difficulties of Soviet Jewish emigration. The Meimans have been repeatedly denied emigration visas to seek medical treatment and to be reunited with their daughter. A typical technique for stalling their request is for Soviet emigration officials to demand a certificate from the Ministry of Health stating that treatment abroad is required—only to have the Ministry of Health state that the Meimans are well aware that such certificates do not exist.

Senator Hart, who has been following this case actively for several years, expressed firm hope that his raising of the issue with senior Soviet officials, including Foreign Minister Gromyko, would help resolve the situation. Senator Hart has since sent letters on the Meiman's behalf to several Soviet leaders.

Several events were arranged specially for Senator Hart's wife, Lee, and children, Andrea and John, over the course of the visit. This included a visit to an English language school, at which Soviet children asked questions in English and presented gifts to the family, and to the Grand Kremlin Palace and the Tretyakov gallery. Of particular significance were the efforts by the delegation's Soviet hosts to fulfill Mrs. Hart's request to meet with representatives of the Soviet Women's Committee, several of whom Mrs. Hart had met on her previous visit to the Soviet Union in 1975.

Mrs. Hart was received by the Chairwoman of the Committee, Valentina Tereshkova, who is a member of the Supreme Soviet Presidium and the Central Committee. Mrs. Tereshkova left a national conference of the Soviet Women's Committee, over which she was presiding, to meet with Mrs. Hart. Mrs. Tereshkova described the work of the women's committee, talked about her previous visits to the United States and expressed hope that a committee delegation would visit the United States in November on the invitation of the American group, Peace Links, chaired by Mrs. Dale Bumpers.

Among the non-official events to which Senator Hart and delegation were invited was an evening at the Bolshoi for the premiere of two one act ballets choreographed by Petrov, the second of which featured music by a noted avant guarde Soviet composer, Shnittke. The Senator was introduced to the Theater's deputy director, to whom he extended an invitation to visit the United States as part of a revived era of cultural exchanges. The delegation also visited the Moscow circus and the Arkhangelskoye Estate, where lunch was arranged by the delegation's Soviet escorts, Oleg Krokhalev, Counsellor of the Ministry of Foreign Affairs USA Department and Yuriy Yurov, of the Supreme Soviet Presidium's International Office.

THE CLEAN COAL TECHNOLOGY PROGRAM: ALREADY VERY MEANINGFUL RESULTS

Mr. BYRD. Mr. President, Energy Secretary John Herrington recently testified before the Energy Committee on the DOE budget request for fiscal year 1986. In his opening statement, Mr. Herrington took note of the paradox that while "fossil fuels accounted for about 90 percent of the energy consumed in the United States in 1983 * * * coal, our most abundant fossil fuel resource, accounted for only 22 percent of total energy consumption." Unfortunately, the DOE fiscal year 1986 budget request for coal gives no indication that the policy implications of the paradox have been recognized by DOE, the Department of Energy. The DOE budget fails to address the near-term challenges which confront the use of coal. In fact, the DOE budget request for coal is about 42 percent less than the previous year and is about 61 percent less than the DOE budget request for fiscal year 1982.

My concern is that long-term research and development is overly emphasized by DOE and that the Department's current policy of supporting development of a technology only to "proof-of-concept" seriously jeopardizes opportunities to enhance coal use in the near term. I am concerned that the Department of Energy is forfeiting a leadership role in the development of coal technologies which will facilitate the use of coal in an environmentally acceptable manner. I am concerned that such forfeiture will needlessly delay the commercial application of existing technologies which are more cost effective and efficient than those processes currently in use.

Accordingly, in October 1983, I introduced S. 1925, the National Coal Science, Technology, and Engineering Development Act. The purpose of that legislation was to define the Federal role in coal technology development as a partnership with the private sector to accelerate the commercial use of clean coal technologies so that America's abundant coal resources can be utilized more cleanly, efficiently, and economically to produce energy for the Nation's factories and homes. About 1 year after I introduced S. 1925, Congress passed a modified version of my bill in the Interior appropriation bill for fiscal year 1985 and established a $750 million clean coal technology reserve as part of the continuing resolution for fiscal year 1985.

The Clean Coal Technology Program established by Congress is now being implemented by the Department of Energy. DOE was required to issue a solicitation for clean coal demonstration proposals which contained substantial cost sharing by the private sector. The Department is required to analyze and evaluate those responses and report to Congress by May 1, 1985. Based upon that report, Congress will decide whether to direct the Department of Energy to begin an effort to demonstrate clean coal technologies and whether to appropriate an initial amount from the clean coal technology reserve to start such an effort.

I am pleased to inform my colleagues that the response by the private sector has been most encouraging. I understand that the Department of Energy has received about 175 responses to its solicitation and more are expected. DOE Assistant Secretary William Vaughan was recently quoted by the media as stating that DOE "has been impressed by the response" to the program.

I also am pleased that just last week Assistant Secretary Vaughan made what I interpret to be very positive statements about the Clean Coal Technology Program. Addressing the Washington Coal Club, Mr. Vaughan, I am told, pointed out that DOE already has reaped what he considers to be very meaningful results from the clean coal technology solicitation. Mr. Vaughan further stated that the congressionally mandated program has "* * * helped DOE learn some new things * * * it's given us some new ideas * * *," and "* * * the exercise has pointed to some new directions in coal research."

Mr. President, it is gratifying that the Clean Coal Technology Program already has proven beneficial to the Nation, and I am certain the benefits will continue to accumulate as the program continues. The response by the private sector is a clear indication that there is substantial interest in the Clean Coal Technology Program and that there is a major opportunity for the Federal Government to play a leadership role in expediting the commercialization of clean coal technologies.

I also am pleased to report that the coal panel of the Department of Energy's own outside technical experts, the Energy Research Advisory Board [ERAB], in a draft report to be submitted on May 1, will urge the President to reconsider its policy of supporting the development of technology only to the proof-of-concept stage. The draft ERAB report states: "In most instances abandoning a development after Proof of Concept has been established * * * will result in just that, abandonment."

The report urges DOE to modify that policy, and suggests that the agency should actively support the demonstration of clean coal technologies. The ERAB report is worth quoting at length on this point:

The subject of clean use of coal is of major near-term and long-term national importance and deserves a change of this policy. DOE should assure commercialization by participating in the needed larger scale tests which are characteristic for utili-

ty operations before the technology can be adopted.

Finally, the ERAB report will suggest opportunities for DOE to exert leadership in the commercial application of clean coal technologies. Unfortunately, the report states, the budget request for technologies to use coal cleanly "appears too small by comparison with the needs which the increasing use of coal implies." The ERAB report notes that the budget does not allow DOE to "help with the transfer of the new technologies to the private sector and to assure their commercialization. This is the result of basic policy which should be reconsidered."

I am encouraged that the Department's own technical experts recognize the importance of clean coal technologies and the leadership role of the Federal Government in ensuring the commercial application of such technologies.

Mr. President, moving technology developed in Federal laboratories to industry does not happen by magic. It requires a cooperative and concerted effort on the part of both the Federal Government and the private sector. Successful technology transfer also requires significant private sector cost sharing to ensure that only clean coal projects with commercial promise are demonstrated at an appropriate scale. The private sector has indicated a willingness to do its part, as demonstrated by the response to the clean coal technology solicitation. The private sector participants have proposed about 160 projects with nearly 60 percent of the resources coming from the private sector. This response represents a willingness by the private sector to invest over $5 billion of private funds in clean coal technology demonstrations. The technology transfer and cost sharing elements are a central part of the Clean Coal Technology Program, a program which enjoys widespread bipartisan support in both the Senate and the House, and has been warmly embraced by the private sector. This is a sound investment which will pay significant dividends. I believe such an investment can be responsibly and successfully initiated within current fiscal constraints. The return on such an investment will be significant—clean coal to power the Nation's economy into the next century.

Mr. President, I ask unanimous consent that the full text of reports on Mr. Vaughan's remarks as published in Inside Energy and Coal Outlook be printed in the RECORD.

There being no objection, the reports were ordered to be printed in the RECORD, as follows:

VAUGHAN DOE'S INTEREST IN COAL USE AT MODULAR POWER PLANTS INCREASING

The role that coal can play in new, small—modular—power plants is apt to command increased attention at DOE, Assistant Secretary William Vaughan said last week. Vaughan also anticipates heightened departmental interest in coal's potential in the industrial, commercial and residential sectors.

"I think you'll see the utility emphasis in our coal program begin to shift a little in the next few years—away from an emphasis on backing out (replacing) oil [with coal] in existing power plants—and more toward the increasing need for modular, quickly fabricated power units that can meet tomorrow's incremental power demands," he told the Washington Coal Club.

Vaughan expressed confidence that coal can participate in "a big way" in the combustion-turbine market, especially if so-called "hot-gas cleanup" pans out. "And we have every reason to believe that it will," he said.

Tests at DOE's Morgantown Technology Center show prospects for a hot-gas system that can bring sulfur-dioxide emissions down to virtually zero, he said.

He also expressed hope that coal could double the 10 percent hold it has on the industrial, commercial and residential markets. Such a hike would represent an annual increase in coal production of 150-million tons, he said.

It's with that objective in mind that DOE has, in prior years, increased its emphasis on application of atmospheric-fluidized-bed-combustion and advanced-combustion technology to smaller-sized boilers, he said.

And he held out the possibility that new fuel forms based on coal—fuels that depart from the traditional categories of gasification and liquefaction—will help coal expand its share in those areas.

"The job, as we see it, becomes one of adapting the machine to accommodate fuel forms that, on balance, could be much cheaper than premium quality coal liquids or gases," he said. "If we can do that, we open the door to the use of coal in space heaters, or water heaters, or any number of commercial applications. You'll see some of that in future budgets."

Vaughan also pointed out what he considers to be "very meaningful results" from a DOE solicitation of information on clean-coal concepts, which was ordered by Congress last year. While the department continues to oppose any new funding of such ventures, it has been impressed by the response, Vaughan said.

Some 175 responses have flowed into the agency. DOE is to assess the responses in a report due to Congress May 1. Congress has set aside $750 million for possible distribution to such projects.

"If the clean-coal effort did nothing else, it has caused a number of individual companies—suppliers, manufacturers, architect-engineers and end-users—to come together and share ideas in a joint, cooperative fashion," Vaughan said. "That alone is going to help the industry."

"Second, besides giving us a benchmark on the state of the industry, the exercise has pointed to some new directions in coal research," he added. "It's told us some new things about limestone injection—about the pressure-hydration process that may help lower costs. It's given us some new ideas about the downstream processing of syn-gas from coal. It's pointed to some very interesting ideas in coal preparation."

Nevertheless, he maintained that the submissions contain "not enough quality information" to warrant government commitments yet. Such commitments should be based on standard procurement procedures, which would result in "refined" proposals, and not through special congressional appropriations, he said.

On another matter, Vaughan conceded Congress is unlikely to endorse adminstration proposals to eliminate funding for research involving magnetohydrodynamics (MHD) and for phosphoric-acid-fuel cells. Current funding is about $31 million for MHD and $29 million for phosphoric-acid-fuel cells.

CLEAN COAL PROGRAM SEEN HELPFUL

The 175 submissions to the Energy Dept. under the $750 million clean coal technology program have pointed DOE to some new directions in coal research, an agency official said last week.

"If the clean coal effort did nothing else, it has caused a number of individual companies—suppliers, manufacturers, architect-engineers and end-users—to come together and share ideas in a joint, cooperative fashion," William Vaughan, DOE's assistant secretary for fossil energy, said last week.

The congressionally approved program has helped DOE learn some new things about limestone injection and about the pressure hydration process that may help lower costs, he said. "It's given us some new ideas about the downstream processing of syngas from coal. It's pointed to some very interesting ideas in coal preparation."

DOE, recipient of 27 fluidized-bed combustion proposals, has been told "that the industry really believes atmospheric fluidized-bed combustion is a technology that's here to stay—in sizes of 200,000 pounds of steam up to 160 Mw.

"It's told us that coal gasification has a real place in the future of utility power generation in this country," Vaughan said. "It's told us that coal has the opportunity, through new technology, to return to the locomotive market and expand into the diesel-cogeneration sector of the power industry."

DOE will provide Congress with a report on 175 responses to the clean coal program on May 1, Vaughan said.

Mr. BYRD. Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes.

CONGRESS SHOULD REFUSE TO APPROPRIATE ONE MORE PENNY FOR THE MX

Mr. PROXMIRE. Mr. President, a couple of weeks ago this body voted not once, but twice on funding the MX missiles. A majority of Senators like our House brethren voted twice in favor of the funding. Those votes provided the appropriations needed to produce and deploy an additional 21 MX missiles, bringing to 42 the number of MX missiles deployed. Later this year, this body will once again face a vote on funding an additional 48 MX missiles. That would bring to 90 the number of MX missiles deployed by this country. The MX vote was close in the Senate and even

closer in the House. At the time of the vote a number of legislators were reported to have said they would support no more than the 42 now funded. They would oppose a vote to fund additional MX missiles this year. Because the Senate is still scheduled to vote up or down in the reasonably near future on additional MX missiles, I set forth my case herewith for opposing additional MX funding.

As the New York Times said in an editorial on March 13, a mistake is no asset, even when dressed up as a bargaining chip. Is the MX a mistake? Does a giraffe have a long neck? Are Sumo wrestlers heavy? The MX has to be the biggest, most conspicuous waste of money in a long time. After all, what do we need in a nuclear weapon? First, and above all, it should be stable. It should be the kind of weapon system that would not trigger a nuclear war.

What kind of weapon systems could trigger a nuclear war? Answer: A weapon system so vulnerable so certain to be taken out by a first strike by the adversary that it must be fired on warning or lose it. Of course, the warning may be false. This country has already experienced some close calls, some serious indications that adversary missiles were on their way. Fortunately for the fate of the world, the good Lord was with us. We discovered the warnings were false, in time. But the time is only a few minutes. The President must make a swift decision on firing or not firing the MX. We will have to make a terribly swift decision because the MX is so vulnerable in its stationary mode, and with its tempting target of 19 warheads, the President would have to decide whether to "use it or lose it."

I challenge any Senator who disagrees with this analysis to tell me how I have erred in describing the circumstances under which the MX would be used. Would the President wait until accurate, hard target Soviet warheads had struck MX bases in the hope that the hardening of the bases had done the job? That is the forlorn answer the secretary of Defense was given. Any familiarity with the old Minuteman silos in which the MX would rest tells us just how forlorn that hope of MX survival is.

Regardless of who is President of the United States when the MX missiles are deployed and the first warning of a nuclear attack has convinced a President that we are threatened with the real thing, the President would surely have to make the painful "use it or lose it" decision for the MX. The President could tell his submarine commanders and bomber pilots to break off their attack mission. But once the MX is launched, there goes good old Mother Earth.

Second, the MX is a first strike weapon. President Reagan, Secretary Weinberger and previous top officials of our Government have flatly forsworn the notion that we would engage in a first preemptive strike against the Soviet Union. I believe them. We might blunder into a nuclear war by using tactical nuclear weapons that could escalate swiftly to a full scale nuclear exchange later up the line. But a bolt from the U.S. blue against the Soviet Union before any Soviet attack on the United States? No. Never. Yes I believe President Reagan is sincere in his denial that he would never initiate such a strike. I believe no other future President would take such an action. So we will not strike first with the MX. That is not the problem. The problem is how the Russians will view an MX.

Put yourself in the position of Russian leaders. They know we have an immense and largely invulnerable nuclear striking capability in our quiet and invisible submarines and our swift moving bombers. They know we keep a far larger proportion of our submarine fleet and our bomber force at sea and in the air than they do. They also know that both our submarine fleet and our bomber force is far more heavily armed with nuclear warheads than their bombers and submarines. What does all this means? It means the Soviets know we have a massive nuclear deterrent, right now, today, without the MX, much of which they cannot possibly reach. And they know that we know they recognize the invulnerability of 75 percent of our nuclear deterrent.

They also know we have under development for the near future a new D-5, hard target kill missile which will have far greater accuracy and kill capacity than anything we have had before. That D-5 can be launched by our Trident submarines.

Now if you are a Russian military leader what do you ask yourself when you see the United States pushing the MX missiles on top of this overpowering new hard target kill capacity from invulnerable submarines? Don't you ask: "What can the Americans use the MX for that they cannot accomplish far more surely with a D-5 missile fired from the submarines we cannot reach?" The answer is that the MX can only really be justified as an addition to the American nuclear arsenal as a first strike—that is a preemptive strike at the Soviet Union or as a "fire on warning" destabilizer.

So the MX is indeed a mistake. It is indeed no asset, no matter how it is dressed up as a bargaining chip. It is clearly a destabilizing weapon system. The Russians will certainly view it as a first preemptive strike threat. They will do so because, as they consider the American nuclear arsenal that faces them, they see an impressive array of largely invulnerable submarine and bomber missiles, enough, and then some, to retaliate with an absolutely devastating strike against any Russian attack on the United States. But now we are adding a 10 warhead, land based, stationary missile that can only supplement the current American nuclear power as a first strike.

The Russians may be confident that this is one American missile they can surely take out with their own preemptive attack. In the light of all this, does the MX contribute to the security of our country? Does it make peace more likely between the armed-to-the-teeth nuclear superpowers? Of course not. If the Congress votes again for the MX, it is voting to move a long way down the road away from stability and toward the terrible prospect of an all out nuclear war.

GUATEMALAN INDIANS

Mr. PROXMIRE. Mr. President, over the past few years, Guatemala has been committing incredible atrocities against its Indian population. Thousands of people have been shot, hanged, or have simply disappeared. Entire villages have been destroyed for supposedly being "guerrilla villages."

In "Witness to Genocide," Thomas Anderson and Craig Nelson, two experts on Latin American politics, use testimony of refugees to detail Government atrocities. Most of the witnesses are Indians from the Guatemalan Province of Huehuetenango.

They tell of children's throats being slit and of women being hit with machetes. Animals were slaughtered, and villages were burned to the ground in a futile search for guerrilla strongholds. Rivers and streams, sources of drinking water were poisoned. Forests were destroyed with incendiary grenades dropped from helicopters.

Anderson and Nelson interviewed 23 refugees. Together they report hundreds of killings. One man told of how Guatemalan troops hanged his brother and hacked him to death with a machete. Hundreds of refugees have similar stories. Since so many killings occurred without witnesses, it is impossible to say how many Indians died at the hands of Government troops. The lowest casualty estimate for Huehuetanango Province alone is 3,000. Fires and bombings make many bodies untraceable.

Is it not ironic that Guatemala has ratified the Genocide Convention while this Nation has not? Why should murderers and thugs stand on higher moral ground than the greatest Nation in the world? We should be able to condemn Guatemala without any question about our own commitment to human rights. Let us lessen the Guatemalans' moral ammunition and ratify the Genocide Convention now.

S. 924—MANDATORY WORKFARE REQUIREMENT

Mr. PROXMIRE. Mr. President, today I am introducing legislation which will require that all heads of households in two-parent families work as a condition of their welfare grant from the Aid to Families with Dependent Children [AFDC] Program.

I have long believed that a mandatory work requirement—often referred to as "workfare"—should exist across the board in our welfare programs and I introduced similar legislation in 1981 and, again in 1983. I do just that today.

This legislation is different, Mr. President, because this legislation would be for families with two heads of households. In other words, a mother and father. These programs have not worked in the past because by and large they have been applied to single-parent families, and of course in those circumstances it means that the single parent has to leave a child—often a small child—in order to work. That is a moral decision that sometimes is a very bad one.

This would apply strictly and only to two-parent families. It has been tried, I am happy to say, in West Virginia with very substantial success far more than in any other State, and I think that experience is a good basis for the Senate and the Congress as a whole for considerating this legislation. I earnestly hope that we can enact it.

When I first introduced this legislation, States were prohibited from requiring workfare as a condition of receiving an AFDC grant except on an extremely limited test basis. The Omnibus Reconciliation Act of 1981 eliminated that prohibition by permitting—not requiring—States to adopt such a requirement.

Since that time approximately half of the States have adopted some form of workfare requirement but only three States have taken full advantage of this new authority.

Drawing on the experience of those three States, whose programs are now being evaluated, my legislation would limit the workfare requirement to those States which have elected to provide AFDC coverage for families where both parents are present. States would retain their rights, under current law, to establish a broader workfare requirement for their entire AFDC caseload, if they prefer.

But I believe that the preliminary evidence from the workfare evaluations now underway suggest that the approach taken by my legislation is the most pragmatic course to follow.

WORKFARE CAN INDEED WORK

Why do I support a workfare requirement?

First, because it can work and the State of West Virginia is proving it right now. In a preliminary evaluation of the community work experience demonstrations now underway in West Virginia, the Manpower Demonstration Research Corp. found that 4 months into the program, 40 percent of the State's 5,000 fathers receiving welfare were participating. And based upon that experience, the manpower report concludes that a 70- to 85-percent participation rate is a realistic possibility.

Because of the tremendous difficulties in placing single parents, the State's demonstration project only succeeded in providing work experience for 10 percent of the mothers receiving welfare assistance.

To understand just how successful the West Virginia experience has been, Mr. President, you only have to look at the experience in California when Ronald Reagan was Governor. In the most successful year of their program, they achieved only a 3-percent participation rate. The States have clearly developed a great deal more experience with work experience programs in the last decade and we should begin where they have been most successful—with two-parent AFDC-U families.

And what type of jobs are they provided?

The manpower report notes that a group of men are working on weatherization crews for a community action agency, another group is assigned to a city public works department, others are assisting in the preparation and serving of good to senior citizens and still others are working in somewhat higher skilled construction jobs. Clearly, these are not "make-work" jobs.

Second, it has been my experience that most Americans genuinely want to work. I do not believe that the work ethic is dead as some have alleged. But I also do not believe that our welfare programs should undermine the work ethic either.

Work experience programs allow individuals to maintain their dignity, insure that those with work experience will not lose their commitment to hard work and may help to provide those with little experience an opportunity to learn good work habits. Ideally, all jobs would provide useful training for subsequent employment and by targeting our initial efforts on the more manageable two-parent AFDC-U families we will be in a better position to ensure that; but even in cases where the job did not provide directly transferable skills, the manpower report makes it clear that there was a higher sense of personal well-being that came from earning a check.

Third, the manpower report shows a high degree of client satisfaction with the work requirement. Eighty percent of the participants thought that the work requirement was either "satisfactory" or "very satisfactory" and most believed that their jobs were not make-work but provided a valuable contribution to their employer or the community.

And their supervisors were just as happy. The manpower report notes that:

> More than half of the supervisors rated the participants as doing the same amount, and over 20 percent volunteered that participants did more work than a new employee.

Fourth, with budget deficits stretching out in the years ahead for as far as the eye can see, it is crucial that we maintain public confidence in the safety net that assists our least fortunate citizens. That safety net is vital and I support it.

Most Americans who work hard to provide for their own families do not begrudge assistance to their fellow citizens in their time of need. But what Americans cannot understand is why it is unfair to ask ablebodied individuals to work in exchange for the assistance which we provide their families. I believe it is a fair request and one which will help insure that our welfare programs regain and maintain the public confidence essential to their survival.

THE PROXMIRE PROPOSAL

My proposal would build upon the community work experience programs that Congress approved in the Omnibus Budget Reconciliation Act of 1981 and, in particular, upon the successful experience of West Virginia.

Recognizing the difficulty in implementing a full-fledged workfare requirement for both single-parent and two-parent families, my proposal would require that States implement a work requirement for two-parent families in those States which participate in the AFDC-U program.

The West Virginia experience clearly demonstrates that the heads of households in these cases are often easier to place. Here's why: Many fathers have prior attachment to the labor force. The number of AFDC-U recipients is far smaller and, therefore, more manageable for the States to develop the necessary staff commitment and expertise essential for successful placement. And, finally, it sidesteps the very difficult questions posed by the school calendar for single parents attempting to maintain a job.

It is important to keep in mind that these job placements would be required to meet the safeguards and protections now contained in section 409(a) of the Social Security Act:

Programs must meet appropriate health and safety standards.

Programs cannot be used to displace current workers.

Enrollment in a training program that will improve the recipient's chances of future employment is an acceptable alternative to the community work assignments.

Failure of the head of household to participate would not eliminate the family's grant but the head of household would be excluded from the calculation to determine the size of the family's grant. This creates a real financial incentive to participate without unfairly punishing the young children in the family who need the assistance.

In short, the law protects AFDC recipients from exploitation in terms of wages, hours, and conditions of employment and I believe these protections should be maintained.

Mr. President, as I have pointed out, our income support programs form an important safety net but must also provide recipients with a sense of dignity, reinforce the work ethic and more clearly integrate recipients into the life of their communities. And they must retain the confidence of the public.

The Proxmire proposal represents a solid step in this direction by building upon the experience we have gained from the West Virginia demonstration project.

Mr. President, I ask unanimous consent that the text of the bill be reprinted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 924

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 407(b)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of subparagraph (C);

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof "; and "; and

(3) by adding at the end thereof the following new subparagraph:

"(E) that the parent described in paragraph (1)(A) participate in a community work experience program in accordance with section 409.".

(b) Section 409(a)(1) of such Act is amended by inserting after the first sentence the following new sentence: "If a State provides aid to dependent children of unemployed parents in accordance with section 407, such State must establish a community work experience program in accordance with this section for, at a minimum, those unemployed parents described in section 407(b)(1)(A).".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by the first section of this Act shall be effective with respect to payments under part A of title IV of the Social Security Act for calendar quarters beginning more than 180 days after the date of the enactment of this Act.

(b) In the case of a State plan approved under part A of title IV of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by the first section of this Act, the State plan shall not be regarded as failing to comply with the requirements of such part solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 1 p.m. with statements therein limited to 5 minutes.

EXECUTIVE SESSION

Mr. THURMOND. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Beryl Sprinkel, to be a member of the Council of Economic Advisers.

Mr. BYRD. Mr. President, reserving the right to object, I will not object. I take pleasure in stating that this nomination has been cleared on this side of the aisle. Mr. PROXMIRE wishes to speak on it, and Mr. PROXMIRE is here if there is no objection to proceeding at this time.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to the consideration of executive business.

EXECUTIVE OFFICE OF THE PRESIDENT

NOMINATION OF BERYL WAYNE SPRINKEL TO BE A MEMBER OF THE COUNCIL OF ECONOMIC ADVISERS

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of Beryl Wayne Sprinkel, of Virginia, to be a member of the Council of Economic Advisers.

NEW REAGAN ECONOMIC ADVISER WRONG ON DEFICIT EFFECT ON ECONOMIC GROWTH

Mr. PROXMIRE. Mr. President, Mr. Sprinkel has been nominated to be Chairman of the Council of Economic Advisers. That nomination came before the Senate Banking Committee. I happen to be the ranking member of that Banking Committee. I would like to speak on this nomination for a few minutes because I think it is a very important decision by the President. The President was viewed at one time as being hostile to having any Council of Economic Advisers, and there was some question as to whether it would continue. The President has made the right decision I think in deciding to continue with it.

Mr. President, on April 2, at his confirmation hearing before the Senate Banking Committee, Beryl Sprinkel who has been nominated by President Reagan to be Chairman of the Council of Economic Advisers, declared that the record string of massive deficits that the country has endured in the past 3 years have nothing whatever to do with the remarkable economic recovery the country enjoyed in 1984—the best real growth of the economy since 1951. By saying that that deficit has nothing to do with the recovery, I think Mr. Sprinkel is wrong—ridiculously, and laughably wrong.

Mr. President, Beryl Sprinkel is probably the best we can expect from this administration as Chairman of the Council of Economic Advisers. The President has kept the office vacant for 9 long months. He has not replaced any of the retiring members of the three-man Council. This is the first time in the 38-year history of this institution that a President has allowed it to sink into a coma. Preserving this institution is critical for sound economic policy in the future. So this is no time to threaten the continuation of the Council by questioning any appointee the President might make. And in many respects Beryl Sprinkel is qualified. He is a respected economist. He has had a long and highy successful experience as the vice president and principal economist of the Harris Bank, a large and successful Chicago institution.

But Mr. Sprinkel has always had an obsession about monetary policy—I mean an obsession. Mr. Sprinkel, as I say, is a good man. I do not mean to demean him in any way. But he reminds me of a mechanical toy that you wind up, and no matter what questions you ask, you get the same answer. You can ask him what effect a tax increase or a tax cut would have on the economy. None. Monetary policy is all that counts. Ask him what effects an increase in spending has, or a decrease in spending has, and he will say only monetary policy has any effect. For him the economic world always has and I am sure always will revolve around the rate of the creation of money by our central bank—the Federal Reserve Board.

I do not mean, as I say, to demean Mr. Sprinkel, or a number of economists who share his view. He has some impressive company in that view, although it does represent a distinct minority of the economic profession. He is also, unlike some of his most illustrious predecessors, a faithful, down-the-line, all-out, unquestioning supporter of President Reagan and Reaganomics, no matter how far out or out of touch or unrealistic the President's economic policies may be.

And that brings me back to my shock and dismay to hear this new Chairman of the Council on Economic Advisers tell the Senate that the Federal deficits not only had nothing to do with the remarkable expansion of the economy in 1984, but that the economy enjoyed the best year for real economic growth for 33 years, and

get this: "In spite of the deficits." Why is that such a ridiculous statement? It is. And here is why: Mr. President, there is absolutely no way that very large Federal deficits can avoid stimulating economic activity and the larger the deficit, the larger the stimulation. Consider: What are the ingredients of a deficit? There are two. First, a cut in taxes, slashes revenues, leaves more money in the hands of taxpayers. Taxpayers—on the basis of years of experience with tax cuts normally spend 90 percent or more of their new increase in income. They save and invest the rest.

Whether they save or invest in the economy, that is, or spend, the economy is stimulated. The massive Reagan tax cuts of 1981 that took effect with increasing force in 1982, 1983, and 1984 began this process.

The second ingredient of deficits is increased Federal spending. And, of course, overall Federal spending did increase sharply over the past 4 years. The results were all-time record deficits of enormous size: $109 billion in 1982, $195 billion in 1983, and $175 billion in 1984. The latest estimate is $213 billion for this year. These deficits culminated in a vigorous recovery in 1983 and the best economic growth year since 1951 in 1984. Beryl Sprinkel calls that not simply a coincidence, but claims that the 1984 recovery occurred despite those immense deficits.

Now, Mr. President, consider our historical experience. When did this country enjoy the most colossal economic growth in its history? Answer: in 1943 and 1945. Those of course were the war years of World war II. There was no tax cut in those years. But we had far and away our biggest increases in spending and we had deficits that, while they were smaller than today's deficits in absolute terms, were three or four times larger in relation to the Nation's then gross national product. What happened to the economy under the impact of those stupendous deficits? Answer: the economy took off as it never had before and never has since. Unemployment that had consistently been around 14 percent to 17 percent for years throughout the 1930's, dropped to an astonishing 2 percent. Personal income zoomed right up through the stratosphere.

Mr. President, the stimulus of the economy by huge Federal deficits is more than a matter of historic experience, it is a matter of simple commonsense. If the Federal Government increases taxes the economy slows down. Why? Because the increased taxes take spending and investing capability out of the hands of millions of taxpayers. If the Federal Government cuts taxes as it did in 1981, the long-term effect is to increase economic activity. Why? Because the Government extracts spending power out of the hands of millions of taxpayers. Similarly, if the Government spends billions on public works or military weapons or any other kind of project that puts millions to work and puts money in their pockets, those workers will spend or invest that money and the economy will grow.

So, Mr. President, the new Chairman of the Council of Economic Advisers—the official legal chief economic adviser to the President—is demonstrably and clearly wrong on the critical issue of the effect of the Federal deficit on economic growth.

Now, let me make it clear that this Senator views the immense Federal deficits as the most serious economic danger to our country. With their present size, those deficits will impose a virtual perpetual burden on the American people as they swell the national debt and shove the burden of service on that debt through the stratosphere. They will raise interest rates far above the level home buyers, auto buyers and small businesses can afford. They will continue to keep the dollar bloated. As a result, our exporters will be less and less competitive. Our importers will lose much of our domestic market to cheap foreign imports.

We must bring the deficit under control. But we must do so with our eyes wide open. Cutting the deficit will slow economic growth. It may push the economy into deep recession for several years. For this reason it will take courage and persistence that will be very hard for this democracy to sustain. How do we sustain it? We need a chairman of the Council of Economic Advisers and a President who recognize the long, rocky road reducing the deficit will require and are willing to provide the leadership that such a prospect requires. Neither President Reagan nor Beryl Sprinkel measures up to this challenge.

Mr. President, I will not oppose Mr. Sprinkel because we need to preserve the Council of Economic Adviser. As I say, I disagree with him, but I certainly respect him. Therefore, I will not ask for a rollcall and will not oppose his nomination.

Mr. President, I yield the floor.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I believe the Senator from Wisconsin has finished speaking and the confirmation is ready to be acted on.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. THURMOND. Mr. President, I move to reconsider the vote.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. THURMOND. Mr. President, I ask unanimous consent that the Senate go back into legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ISRAEL IS IN PERIL

Mr. INOUYE. Mr. President, Israel is in peril.

Economic and financial forces threaten to do what hostile neighbors, with their combined military might have been unable to achieve in three wars and 37 years of unremitting armed antipathy toward the Jewish national homeland. Israel stands today militarily strong and confident in her ability to defeat her adversaries on the field of combat, but fearful and concerned that economic weakness and the almost insurmountable difficulty of confronting a complex array of financial problems may fundamentally alter the character of Government and society in Israel.

Mr. President, we must address the contradiction that Israel, in order to avoid destruction by more numerous and better equipped adversaries, has been forced to spend itself close to ruin. We must act—in our own interest—to ensure that debt does not become the weight which crushes freedom and democracy in Israel.

I do not suggest, Mr. President, that the continued existence of the state of Israel is in danger. Israel is a heavily indebted—but not an impoverished—country. Israel has a strong industrial and scientific base which has enabled Israeli manufactured and agricultural products to compete on the world market. It has the physical plant and the intellectual capital to regain control of its economy.

Only recently, however, under the national unity government, has Israel had the political will and decisiveness of leadership to deal with economic problems of such magnitude. We welcome that change, and we support the measures being taken by the new Government to right the upset economy. Because of these measures, because of the political courage exhibited by Prime Minister Peres and his Cabinet, it is proper to regard Israel today as a

country which is doing what is required to restore growth and stability to its economy. It is a highly developed economy which has sustained high levels of growth in the past and is now going through a difficult period of adjustment. The times are still hard, however, and the people of Israel continue to struggle.

Mr. President, in some respects, the people and Government of Israel are beseiged by an economic challenge as threatening to the fabric of Israeli society, to the preservation of democracy, as any war or conflict of the past. Today Israel owes to foreign governments and institutions nearly $24 billion, an amount which is nearly equal to its annual GNP and is 678 percent of Israel's annual export earnings. Israel's foreign debt service today is almost $4 billion per year; about $1 billion of that goes to service its debt to the U.S. Government, almost all of which was contracted for arms purchases. Debt service now consumes over 40 percent of the entire Israeli Government budget and has brought hard currency reserves to a perilously low level. In point of fact, if the danger of a rapid withdrawal of short-term deposits is taken into consideration, Israel has net negative reserves.

In fiscal year 1985, Israel will repay to the United States $158 million in principal and $1,018 million in interest. Over the next several years, these amounts will increase, reaching a peak of $1,146 million in principal and interest in 1991. If the repayment schedule on Israeli debt to the United States is not changed, by the year 2020, Israel will have paid $28,897 million in principal and interest to the United States.

It must be emphasized, Mr. President, that most of this debt is in the form of foreign military sales credits—debt Israel incurred for military hardware which is in the front line of defense of American interests in the Middle East. The burden of debt, and its impact on Israeli security and stability cannot—and should not—be held separate from the very interests the FMS credits were intended to serve. I need not remind my colleagues that those interests were—foremost—American interests.

Additional amounts of course, are owed to other governments, international financial institutions, and private institutions. In sum, as has often been noted, Israel's per capita debt is the highest in the world.

The rather daunting prospect of repaying this debt is compounded by the recognition that the external factors which caused Israel to go so far into debt have not changed. In the past 10 years, three severe blows have been delivered to the Israeli economy. First, the cost of petroleum sharply increased following the return of the Sinai and its oil to Egypt under the terms of the Treaty of Peace of 1979. The cost of energy imports have increased from $100 million in 1972 to $1.5 billion in 1984.

Second, defense spending has grown from $1.5 billion annually in 1972 to $5 billion today. To maintain its own deterrent and defense capability in the face of an enormous Arab buildup, financed both by petrodollars and by the Soviet Union, Israel was forced to increase its defense expenditures fourfold. This increase could not be met with current revenues; Israel was compelled to borrow to live.

Mr. President, I would note that the U.S. Government has not been unaware of this cost to Israel. At the beginning of the Reagan administration, in 1981, at an Appropriations Committee hearing, the Under Secretary of State for Security Assistance, Mr. James Buckley, was asked what impact the provision of advanced military equipment, such as enhanced F-15's or AWACS, to Arab countries would have on Israel. His response was, "We believe that that additional threat can be met through the purchase of additional F-15's or F-16's or other mixes that the Israeli military may believe to be necessary or desirable."

As I noted at the time, Mr. President, the implications of this policy were ominous. In effect, the policy of responding to Arab requests for increasingly more costly and more sophisticated arms was pursued in a way which ensured that Israel would fall further and further into debt. I put it to the Under Secretary of State at the time, and I put it to the Senate now, that such a policy knowingly engaged Israel in a war of economic attrition which it could not possibly win. The Arab countries, with their enormous oil wealth could afford the best; Israel, already indebted, could not afford to keep up.

I would ask all who question the origin of Israel's economic plight to look at the record—at our record, Mr. President. In our hearing, the Under Secretary of State freely admitted and openly recognized that: First, U.S. arms sales to Arab countries increased the threat to Israel, and second, that Israel would have to purchase additional arms—very expensive arms, F-15 and F-16 aircraft—to offset that threat. Left unsaid, of course, was that Israel would have to go further into debt to finance those purchases. In a war of economic attrition, it would be Israel who would take heavy casualties.

Mr. President, it is not by mere coincidence that Israel finds herself today spending nearly one-half of the Government budget on debt servicing and that she is confronted today by Arab forces which have increased their arms spending by 700 percent since 1972. It is not by mere coincidence that Israel has become indebted while the four largest importers of arms in the world are all Arab countries; Libya, Syria, Saudi Arabia, and Iraq.

This, Mr. President, is the most severe of the blows which have been dealt to the Israeli economy over the past 10 years. Gradually, incrementally, of necessity, Israel has mortgaged control over her economy to her creditors, the largest of whom is the United States. The accumulated debt, arising from the necessity of matching arms purchases of her adversaries, has diminished the national sovereignty Israel has fought so courageously to defend. The structure of the debt—large amounts of principal to be repaid, at high interest rates, for a protracted period—undermines the Government's ability to deal with the current crisis.

The Government of Israel is acting to correct the imbalances in the economy. The people of Israel are making further sacrifices to reduce their economic vulnerability.

A freeze has been put in effect on all public sector employment. The Israeli Minister of Finance has told the Senate that 15,000 public employees will lose their jobs because of budget cuts.

Inflation has been reduced through the imposition of a wage and price freeze. To achieve this end, Israelis have cut worker compensation by nearly 20 percent. Together with the impact of minidevaluations, real purchasing power has been cut by 40 percent over the past 6 months.

The Israeli Cabinet has approved a new series of taxes which it hopes will reduce pressures on foreign exchange reserves and enhance revenues. Knesset approval is believed to be imminent.

The Cabinet is also working on a new law that would enable the Bank of Israel to pursue a more independent and more restrictive monetary policy.

Government spending has been sharply reduced, with subsidies alone to be cut by $1.2 billion by the end of April. Newly enacted legislation holds Government officials responsible for staying within the budget.

Mr. President, it is beyond doubt that the Government of Israel will take the appropriate measures, difficult though they may be. Prime Minister Peres and key members of the Cabinet are united in their recognition that fundamental changes are necessary and in their resolve to see that these improvements are achieved.

Mr. President, our Government is addressing the economic difficulties of the State of Israel. It is widely anticipated that the administration will soon request supplemental assistance to help Israel meet its economic emergency. The administration, in cooperation with Israeli officials, is seeking to

contribute to the resolution of problems and structural imbalances affecting the economy. I applaud those efforts and intend to support supplemental funding for assistance to Israel.

It is my considered judgment, however, that measures which address only the economic emergency—and not its underlying causes—fall short of what is required. Such measures, while necessary to meet the crisis at hand, will not forestall its recurrence, nor will they give the necessary confidence to the Israeli people that their economic future is sound. Furthermore, by attending almost exclusively to the crisis of the present, these measures do not pay sufficient regard to the necessity of strengthening the longer term economic viability and political stability of Israel.

Therefore, Mr. President, I have informed my colleagues of my intention to introduce an amendment which would reduce the interest rate on existing U.S. military loans to Israel from the present weighted interest rate of 12 percent to a new rate of 5 percent. That, by the way, is the interest rate the United States now charges on military loans under the concessional FMS programs to countries in economic difficulty.

This amendment would achieve several important objectives:

It would reduce the onerous future debt burden faced by Israel. As I noted, interest on Israel's outstanding debt to the United States now has a weighted average of 12 percent. If this rate were changed to 5 percent, interest charges to Israel over the life of the existing loan portfolio would be reduced by $8,417,296,780.

The Government of Israel would be strengthened in its ability to handle both emergency and long-term economic concerns. Today, 47 percent of Israel Government spending is budgeted for debt service. A 5-percent interest rate on U.S. military loans would cut Government spending on debt service in half. In turn, this would reduce the need to borrow to finance debt and increase the availability of funds for defense and other essential services.

The people of Israel would be strengthened in their conviction that the United States supports them and recognizes the very real sacrifices they have made for peace in the Middle East. Moreover, Israelis would know that the United States has recognized the contribution Israel has made to our defense.

Mr. President, I would like it fully understood that my amendment does not cancel or forgive the repayment of debt by Israel. Under my proposal, Israel will repay every penny of principal that it has borrowed from the United States in military loans. Moreover, it should be understood that my amendment only reduces the interest rate charges for existing loans; the Secretary of the Treasury would still collect $6.4 billion in interest on outstanding FMS loans to Israel.

The amendment would require the appropriation of approximately $3.9 billion, which is the present value of interest payments which would be forgone. Because only the present value of money due and payable through the year 2000 and beyond is required for appropriation, this amount will reduce Israel's debt service charges by some $8.5 billion.

Mr. President, this is an extraordinary and an unprecedented step. It is, nonetheless, the appropriate measure. Aid to Israel is not included in the Department of Defense appropriations bill. Were that the case, aid to Israel and Israel's contribution to U.S. strategic interests could be compared directly to U.S. aid to NATO and to NATO's contribution to U.S. strategic interests. I am confident that such a comparison, which would highlight the $129 billion in annual U.S. expenditures in support of European security, would be highly favorable to U.S. assistance to Israel.

I do not suggest that we should put aid to Israel into the DOD appropriations bill; I do suggest that we make a realistic appraisal of the importance of Israel to U.S. interests in the Middle East and then act accordingly. From that perspective, we would soon recognize that what I propose is quite modest indeed.

Mr. President, let me conclude by addressing those who have raised concerns that my proposal to "buy-down" the interest rate on Israeli loans sets a precedent which other countries will seek to take advantage of. They are absolutely right; it does set a precedent. The precedent is that the United States will not place an unsupportable burden on a country which is a democracy that is based upon meaningful elections and free and open debate, which observes and defends human rights, and which shares the fundamental human values of our people.

Along the arc of instability which stretches from Pakistan through Iran and the Middle East and on through the Horn of Africa, there is one country—just one—which shares and practices daily the democratic principles which govern our own country. In the Middle East, a region which has been fertile ground for the seeds of terrorism and tyranny, Israel has been a constant defender of freedom and democracy. The people of Israel, at great cost in blood and treasure, have done their utmost to preserve their security and independence. U.S. interests in the stability of the Middle East dictate the necessity of helping to maintain Israel as an independent, democratic nation with a bright future of economic and human development.

Mr. President, that is the intention and the objective of my amendment. I would urge my colleagues to support this effort to help Israel help itself.

40TH ANNIVERSARY—END OF WORLD WAR II

Mr. DOLE. Mr. President, last Sunday was a very special day for me—the 40th anniversary of the date on which I was wounded near the Italian town of Castel D'Aiano, during the Allied campaign to liberate Italy in World War II.

That event changed my life, and similar events throughout the war theaters of Europe, Africa, and Asia changed the lives of countless thousands of other Americans and of their families back home.

For most of us, I think, the experiences of the war, on balance, were mostly good ones. We made friendships which have lasted throughout the four decades since the war ended. We learned lessons which have made us better able to cope with the challenges of the modern world. And, perhaps above all, we gained a new appreciation of what is really important in life—the value of hard work and dedication, of cooperation toward a common goal, of individual freedom, and indeed the value of life itself.

And we learned valuable lessons as a nation, too: That weakness is an invitation to aggression and war; that disunity will always be exploited by the implacable foes of freedom; that war is horrible but slavery even worse.

Those lessons were not learned in vain. Out of the ravages of World War II a new alliance was born, spanning the Atlantic and bringing together the free nations of Western Europe and North America. The NATO alliance has been the shield which, more than any other, has kept us secure against the threat of a hostile and powerful adversary.

From the aftermath of war, new democratic governments have emerged in West Germany, in Italy, and in France, which have become some of our best and closest allies.

And the spirit of hope and enterprise was rekindled for tens of millions of people, who have built from the wreckage of war strong and vibrant economies, which have brought new prosperity to countries which were the very battlegrounds of the war.

All this did not happen by chance. The renaissance of both individual and state was won by enormous dedication, generous cooperation and, above all, prodigious work. Depending and building on the accomplishments we have already achieved will continue to require the same kind of dedication, unity, and effort which we displayed in waging the war.

Last week, I led a delegation of six Senators on a visit to four Western nations which are among our best and closest friends—the United Kingdom, France, West Germany, and Italy. At our last stop, in Rome, I was honored and touched to receive two commemorative gifts, one from the Government of Italy and the other from the small town which has meant so much to me, Castel D'Aiano.

In receiving those gifts, among close colleagues and friends from Italy, I realized how far I had come, how far our Nation and our alliance have come. But I realized even more how much hard work there is for all of us to do, to preserve and strengthen what we have sacrificed so much to achieve. I urge all of us today to rededicate ourselves to that work, on which so much depends.

DESIGNER DRUGS

Mrs. HAWKINS. Mr. President, as if things were not bad enough with drug abuse in our Nation, a whole new series of narcotics has been developed. They are by and large less expensive than imported drugs, they can have a more powerful effect than heroin, or cocaine, they are manufactured in this country, and they are legal. They are called designer drugs.

In the Washington Post of March 14, is an article entitled "Phantom Chemist Makes Legal Designer Drugs." In this article, the new concept of homemade designer drugs is described in detail, mostly through the example of a phantom chemist in California. This individual is known to be operating in clandestine laboratories creating a drug with an effect stronger than heroin by rearranging existing molecular structures. This drug, by the way, has so far killed 85 people on the west coast.

Since current drug control laws define illegal narcotics by their exact molecular structure, the chemist described has thus far successfully evaded the law by making minor changes in the substance's molecules. By the time scientists decipher the structure of the chemist's latest product and enforcement agencies take steps to outlaw it, steps which too often take several months, the manufacturer of the drug simply redesigns the molecule.

One version of this manmade narcotic, called 3-methyl fentanyl, was cited in the article as being 1,000 times stronger than heroin: "* * * the amount absorbed through the skin from a smudge on the finger would be enough to knock you down."

While clandestine drug laboratories have existed in the United States for some time, their operations have largely been limited to the manufacture of drugs like LSD, PCP, amphetamines, and other known narcotics. This new version of home-manufactured drugs is one that has so far been confined to the west coast, but it is a phenomenon that drug control officials expect to catch on nationwide. And Federal drug law enforcement officials are seemingly powerless in stopping this newest kind of trafficking in death and destruction. As the Deputy Director of the DEA's Office of Diversion Control is quoted as saying:

If this thing breaks out of the West Coast, we hate to think what could happen. We don't have the legal apparatus to really go after this kind of thing. We're looking at ways to control these drugs as a class but the lawyers and the scientists say it's not clear we can.

There are now, actually, several classes of "designer drugs" made in other clandestine labs; for example, a drug that acts like heroin but causes Parkinson's disease.

Mr. President, before more people die, or contract Parkinson's disease, from "designer drugs," we should take steps to stop their production. With a whole new class of drugs developing in this country, an entire new front of the war on drugs is also being developed. As chairman of the U.S. Senate Subcommittee on Children, Family, Drugs and Alcoholism, and the Senate drug enforcement caucus, I plan to do whatever it takes to make these drugs illegal. The Drug Enforcement Administration should then apprehend the manufacturers of these substances. We should all work to educate the potential victims of "designer drugs," who, in their search for a temporary high, ingest these deadly substances that destroy them.

Mr. President, I ask unanimous consent that the article in the Washington Post of April 1, 1985, entitled "Designer Drugs," be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DESIGNER DRUGS

(By Boyce Rensberger)

A phantom chemist in California is foiling authorities by tinkering with molecules to create legal "designer drugs" that addicts say are as strong as heroin but that have killed at least 85 people.

"He's clearly a state-of-the-art chemist," says Gary Henderson, a pharmacologist at the University of California at Davis who coined the "designer drugs" term. "He'd have to be or he'd kill himself making this stuff. It's that potent."

Drug laws define illegal drugs by their exact molecular structure, so it is possible for the chemist to evade the law by making minor changes in the substance's molecules.

By the time scientists decipher the structure of the chemist's latest product and enforcement agencies take steps to outlaw it—which can consume several months—the chemist simply redesigns the molecule.

Although all of the deaths have occurred in the West, drug officials and chemists say it is only a matter of time before designer drugs spread nationwide.

The mystery chemist is known to have produced 10 variations of the drug fentanyl, widely used as an anesthetic in surgery but otherwise illegal.

Fentanyl has the same effect as heroin or morphine, and addicts can switch freely back and forth, but it is far stronger than heroin and therefore must be cut to a greater degree for street sales.

Only two of the variations of fentanyl have been outlawed. Pharmaceutical industry researchers have produced an additional 210 variations, none of which ever reached the market, and hundreds more theoretically are possible.

"Whoever this guy is, he's obviously got some chemical training and he's got a good laboratory," says Donald Cooper, a chemist who has analyzed the phantom chemist's products at the U.S. Drug Enforcement Administration's laboratory near Tysons Corner, Va.

"There are good indications he's cognizant of our legal efforts and he's trying to stay one step ahead of us."

Cooper and other chemists who have been tracking the phantom chemist since 1981, when his products first appeared, have developed a grudging admiration for him.

They cite a drug he made called 3-methyl fentanyl. It is about 1,000 times stronger than heroin. The amount absorbed through the skin from a smudge on one finger would be "enough to knock you down," says Henderson.

But, Henderson says, "the stuff he makes is clean, and the dose is cut just right. Every time I get a sample from the police, I think about this guy. I wonder what he's got in store for us. It's usually pretty interesting."

Henderson and Cooper are among many who believe it is inevitable that designer drugs will spread east. All the deaths so far have been in California, except for two in Oregon and one in Arizona.

Although recipes for making fentanyls are not yet in the cookbook form used by clandestine drug labs making LSD, PCP, amphetamines and other older drugs, Henderson and Cooper worry that a chemically sophisticated person could figure it out from chemical literature.

All but one of the fentanyls made by the phantom chemist are forms described in the chemical literature. One, called para-fluoro fentanyl, was his own invention. Investigators say they believe that only one chemist is likely to be at work because the same combination of other substances is used to cut the drug. This would be unlikely if several chemists were working independently.

"If this thing breaks out of the West Coast, we hate to think what could happen," says Ronald Buzzeo, deputy director of the DEA's office of diversion control. "We don't have the legal apparatus to really go after this kind of thing.

"We're looking at ways to control these drugs as a class but the lawyers and the scientists say it's not clear we can."

The problem is how to write a definition broad enough to include the whole fentanyl family without being so broad that courts consider the law too vague. "Besides," Henderson says, "no matter how many variations you put in the law, I'll bet I can think up another one."

Although several classes of designer drugs are made in other clandestine labs, fentanyls are the major concern now. Another group, for example, also acts like heroin but causes Parkinson's disease.

Because plain fentanyl is about 80 times more powerful than heroin, dealers usually

cut it far more than they do heroin. It is often sold as China White, the usual name for a superior grade of Asian heroin. The 3-methyl fentanyl form is sometimes sold as Persian White, the finest grade of heroin.

Plain fentanyl, like all organic compounds, is a molecule made of several kinds of atoms—carbon, hydrogen, oxygen and nitrogen—linked in a specific configuration of rings, strings and other patterns. The shape of the resulting molecule and the nature of the atoms at various positions determine how it will react in the body.

Designer alterations of fentanyl are possible, however, because some points on the molecule can bind to additional atoms or groups of atoms. In the case 3-methyl fentanyl, the molecule is a plain fentanyl with a methyl group (a carbon surrounded by three hydrogens) stuck on at a position that chemists, by convention, designate as No. 3.

For reasons not understood, this alteration makes the molecule react much more strongly with a nerve cell's opiate receptor sites, multiplying its strength. The alteration also turns the molecule into something other than fentanyl—something legal.

MARVELOUS MARVIN HAGLER

Mr. KERRY. Mr. President, today I am delighted to share with my colleagues the pride that Massachusetts feels as a result of the boxing victory the other night by one of our native sons, Marvelous Marvin Hagler, of Brockton.

Mr. Hagler successfully defeated his opponent Thomas Hearns before the largest boxing audience ever. This is the 11th time in the past 9 years that Marvelous Marvin has successfully defended his title.

Marvelous Marvin has been an inspiration to the citizens of Brockton and the Commonwealth. Mr. Hagler has followed in the heroic footsteps of another native of Brockton, the legendary Rocky Marciano. His public service work in the State has added to his reputation for concern and sensitivity through his work for various worthy causes throughout the Commonwealth.

Special congratulations are also in order for his two managers, Goody and Pat Petronelli who also hail from the great city of Brockton. Their support and guidance helped to make April 15 a great night for Massachusetts and allows all of us to continue to call Marvelous Marvin, Champ.

LEE VERSTANDIG AND MITCHELL DANIELS

Mr. COCHRAN. Mr. President, I rise at this time to commend the President upon his selection of two very talented individuals whom he has chosen to serve in this administration. Both of these distinguished gentlemen are former U.S. Senate staff members.

On March 25, President Reagan announced his intention to nominate Lee L. Verstandig as Under Secretary of the Department of Housing and Urban Development. At one time, Lee served as administrative assistant to our distinguished colleague from Rhode Island [Mr. CHAFEE] chairman of the Republican Senate Conference.

During Lee's most recent assignment as Assistant to the President for Intergovernmental Affairs, I have worked closely with him on matters of mutual concern to State and local elected officials of Mississippi, to the administration, and to my office. As the White House's liaison to local government since June 1, 1983, Lee has always made himself available to those officials from my State to hear their concerns and to solicit their input on the issues of the day so that those factors may be part of the administration's decisionmaking process.

I am confident that Lee will successfully meet the new challenges which await him in his new post at HUD. He served as Assistant Secretary for Governmental Affairs at the Department of Transportation under the stewardship of Drew Lewis from 1981 to 1983. For a 3-month period, in the spring of 1983, Lee served as the Acting Administrator of the Environmental Protection Agency until Bill Ruckelshaus was confirmed by this body.

Before entering Government service, Lee spent 17 years in the academic community, where he was associate dean of academic affairs at Brown University and a professor of history and political science at Roger Williams College. Perhaps his most valuable asset, however, is that Lee is a native of Memphis, a city which many Mississippians truly believe is a part of the Magnolia State.

Mr. President, I think that Lee Verstandig will be an excellent Under Secretary of HUD.

Also, on March 26, the President selected an equally talented and capable individual, Mitchell E. Daniels, Jr., to become his new Intergovernmental Affairs lieutenant.

Mitch Daniels, well known to Senators on both sides of the aisle, but particularly to majority Members, brought his vast expertise as a municipal offical and attorney to Capitol Hill from Indianapolis in 1977 as administrative assistant to Senator DICK LUGAR, who is now our distinguished chairman of the Foreign Relations Committee.

Born in Monongahela, PA, Mitch was educated at Princeton University, and, in 1967, was honored as a Presidential Scholar. Additionally, he holds law degrees from Indiana University School of Law and Georgetown University.

Mitch has progressed rapidly from one position of responsibility to another. His most recent position of achievement was that of executive director of the Republican Senatorial Campaign Committee, in which he served so brilliantly on behalf of the Senate majority. I personally appreciate his assistance to me last year.

Because of his service as principal assistant and adviser to Senator LUGAR during his tenure as chairman of the Banking Committee's Subcommittee on Housing and Urban Affairs, Mitch brings to his new position as keen sensitivity to the needs and concerns of State and local office holders. This depth of knowledge, coupled with the valuable insights he garnered during his service to the city of Indianapolis from his position on the mayor's staff, uniquely qualifies him for this new position at the White House.

Certainly Mitch's track record throughout an enormously successful public and private career gives all of us reason to applaud his selection for the White House Staff.

Mr. President, both these gentleman are exceptionally qualified for their respective new positions, and I wish them every success.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES—MESSAGE FROM THE PRESIDENT—PM 36

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with the provisions of the National Foundation on the Arts and Humanities Act of 1965, as amended, I am pleased to transmit herewith the 19th Annual Report of the National Endowment for the Humanities covering the year 1984.

RONALD REAGAN.

THE WHITE HOUSE, *April 17, 1985.*

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on April

16, 1985, he had approved and signed the following bill:

S. 781. An act to amend the Biomass Energy and Alcohol Fuels Act of 1980 to clarify the intention of section 221 of the act.

MESSAGES FROM THE HOUSE

At 12:06 p.m., a message from the House of Representatives delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 15. Joint resolution to designate May 7, 1985, as "Helsinki Human Rights Day";

The message further announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 236. Joint resolution commemorating the twenty-fourth anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny;

The message also announced that the House has passed the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 110. Concurrent resolution expressing the sense of the Congress that the authorities on Taiwan should continue to cooperate fully in the case of Henry Liu and that an extradition agreement should be concluded between the American Institute in Taiwan and the Coordination Council for North American Affairs.

ENROLLED JOINT RESOLUTION SIGNED

At 2:02 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 15. Joint resolution to designate May 7, 1985, as "Helsinki Human Rights Day."

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. THURMOND].

At 2:53 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 883. An act to extend the Export Administration Act of 1979.

The message also announced that, pursuant to the provisions of Public Law 96-388, as amended by Public Law 97-84, the Speaker appoints as members of the U.S. Holocaust Memorial Council the following Members on the part of the House: Mr. YATES, Mr. LEHMAN of Florida, Mr. SOLARZ, Mr. GARCIA, and Mr. GREEN.

MEASURE REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 110. Concurrent resolution expressing the sense of the Congress that the authorities on Taiwan should continue to cooperate fully in the case of Henry Liu and that an extradition agreement should be concluded between the American Institute in Taiwan and the Coordination Council for North American Affairs; to the Committee on Foreign Relations.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE:

S. 924. A bill to amend title IV of the Social Security Act to provide that States which provide aid to dependent children of unemployed parents must require the unemployed parent to participate in a community work experience program; to the Committee on Finance.

By Mr. HUMPHREY (for himself, Mr. BINGAMAN, Mr. COHEN, Mr. D'AMATO, Mr. DENTON, Mr. DURENBERGER, Mr. GRAMM, Mr. GRASSLEY, Mr. KENNEDY, Mr. MCCLURE, Mr. MURKOWSKI, Mr. PROXMIRE, Mr. PRYOR, Mr. RUDMAN, Mr. SYMMS, Mr. WALLOP, Mr. WILSON, and Mr. ZORINSKY):

S. 925. A bill to deny most-favored-nation trading status to Afghanistan; to the Committee on Finance.

By Mr. SYMMS (for himself and Mr. STAFFORD) (by request):

S. 926. A bill to approve the interstate cost estimate and permit the apportionment of funds authorized for fiscal year 1987; to the Committee on Environment and Public Works.

By Mr. SYMMS (by request):

S. 927. A bill to amend title 23, United States Code; to the Committee on Environment and Public Works.

By Mr. SPECTER (for himself, Mr. HEINZ, Mr. DODD, Mr. COHEN, and Mr. BRADLEY):

S. 928. A bill to amend title 23, United States Code, to modify the apportionment formula for resurfacing, restoring, rehabilitating, and reconstructing the interstate system; to the Committee on Environment and Public Works.

By Mr. HEINZ:

S. 929. A bill to amend the Railroad Retirement Act of 1974 to eliminate the COLA offset provisions, and restore amounts offset under those provisions after January 1984; to the Committee on Labor and Human Resources.

By Mr. NICKLES (for himself, Mr. BOREN, Mr. LUGAR, and Mr. GRASSLEY):

S. 930. A bill to amend the Commodity Credit Corporation charter to exempt all agricultural exports from cargo preference requirements; to the Committee on Commerce, Science, and Transportation.

By Mr. BOSCHWITZ:

S. 931. A bill for the relief of Margrit Fischer; to the Committee on the Judiciary.

S. 932. A bill for the relief of Kurt Jordi; to the Committee on the Judiciary.

By Mr. HART:

S. 933. A bill to establish State pension investment units, a secondary market for industrial mortgages, State venture capital and royalty finance corporations, and a national loan loss reserve fund; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HART (for himself, Mr. KERRY, and Mr. SIMON):

S. 934. A bill to establish a system of individual training accounts in the unemployment trust fund to provide for training and relocating unemployed individuals, to amend the Internal Revenue Code of 1954 to provide that certain contributions to such accounts shall be deductible from gross income, and for other purposes; to the Committee on Finance.

By Mr. HART (for himself, Mr. STENNIS, Mr. KERRY, Mr. GORE, and Mr. MELCHER):

S. 935. A bill to establish a national technology education grants program to provide matching Federal assistance to joint initiatives by private industry, educational institutions, and State government to strengthen science, engineering, and technical education, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. CRANSTON (for himself, Mr. PROXMIRE, and Mr. RIEGLE):

S. 936. A bill to amend the Securities Exchange Act of 1934 to provide improved protection for investors in the Government securities market, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CRANSTON (for himself, Mr. STENNIS, and Mr. EAGLETON):

S. 937. A bill to amend the War Powers Resolution to make rules governing certain uses of the Armed Forces of the United States in the absence of a declaration of war by the Congress; to the Committee on Foreign Relations.

By Mr. CHAFEE:

S. 938. A bill to amend title XX of the Social Security Act to provide for grants and contracts to provide services for pregnant teenagers and young parents; to the Committee on Finance.

By Mr. SPECTER:

S. 939. A bill for the relief of Joseph Willbroad Mayanja; to the Committee on the Judiciary.

By Mr. ROTH:

S. 940. A bill to amend title 10, United States Code, title 31, United States Code, and the Renegotiation Act of 1951 to control the cost of Department of Defense contracts; to the Committee on Armed Services.

S. 941. A bill to amend title 10, United States Code, to establish the position of Director of Weapon Systems Acquisitions in the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. DANFORTH (for himself, Mr. BENTSEN, Mr. LAUTENBERG, Mr. WILSON, and Mr. INOUYE):

S. 942. A bill to promote expansion of international trade in telecommunications equipment and services, and for other purposes; to the Committee on Finance.

By Mr. HEINZ (for himself, Mr. ANDREWS, Mr. BOREN, Mr. DOMENICI, Mr. FORD, Mr. HOLLINGS, Mr. MATHIAS, Mr. MITCHELL, Mr. NUNN, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, and Mr. ZORINSKY):

S.J. Res. 114. Joint resolution designating August 29 as "Railroad Retirement Day"; to the Committee on the Judiciary.

By Mr. LEAHY:

S.J. Res. 115. Joint resolution to designate 1985 as the "Oil Heat Centennial Year"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 924. A bill to amend title IV of the Social Security Act to provide that States which provide aid to dependent children of unemployed parents must require the unemployed parent to participate in a community work experience program; to the Committee on Finance.

(The remarks of Mr. PROXMIRE and the text of the legislation appear earlier in today's RECORD.)

By Mr. HUMPHREY (for himself, Mr. BINGAMAN, Mr. COHEN, Mr. D'AMATO, Mr. DENTON, Mr. DURENBERGER, Mr. GRAMM, Mr. GRASSLEY, Mr. KENNEDY, Mr. MCCLURE, Mr. MURKOWSKI, Mr. PROXMIRE, Mr. PRYOR, Mr. RUDMAN, Mr. SYMMS, Mr. WALLOP, Mr. WILSON, and Mr. ZORINSKY):

S. 925. A bill to deny most-favored-nation trade status to Afghanistan; to the Committee on Finance.

DENYING MOST-FAVORED-NATION TRADE STATUS TO AFGHANISTAN

Mr. HUMPHREY. Mr. President, today I and many of my colleagues introduce legislation that would repeal most-favored-nation status for the Soviet puppet government in Afghanistan.

Congress should move quickly. It is both a moral and geopolitical imperative to do so. Afghanistan represents a people struggling to be free. Afghanistan represents an important step along the road to the Mideast oil fields. We cannot allow Afghanistan to fall to Soviet imperialism.

As incredible as it seems, the United States has maintained most-favored-nation status with Afghanistan since the December 1979, Soviet invasion.

The Kabul regime has been the hand-maiden of the Soviets in a bold-faced attempt to destroy a nation.

Recent reports issued by the United Nations Human Rights Commission and Helsinki watch document in gruesome detail the blood-curdling terror of the Karmal regime.

The facts are appalling. The Karmal regime has helped the Soviets kill more than 1 million Afghans in the 6-year reign of terror. The Soviet policy of "migratory genocide" has created the largest refugee population in the world today. More than 4 million Aghans live in refugee camps in Pakistan. Another million fled to Iran. "Toy bombs," rape, mass executions, mutilation of children, women and elders are also part of the Soviet policy and that of its client in Kabul. Clearly, the terror parallels that of Nazi Germany.

Most-favored-nation status for the Karmal Government carries a symbolic message that places in embarrassing question the United States and its policies.

Even the State Department to its credit, wrote to me on April 2 that:

We understand that you intend to introduce legislation during the current session to discontinue most favored nation [MFN] trade treatment for Afghanistan.

The administration's authority to take such action on its own is limited to certain well defined circumstances, which unfortunately do not exist in regard to Afghanistan. We therefore welcome your legislative initiative and offer our full endorsement and support. We stand ready to assist you in any way during the drafting of the legislation and in facilitating its rapid movement through the Congress.

Mr. President, speaking only for myself, while I am grateful to have the support of the State Department as outlined in the letter which passages I quoted, I cannot help but ask: Where has the State Department been these last 5 years? Why has it been necessary for the Congress to take the initiative in withdrawing most-favored-nation status from Afghanistan? To be sure the Congress must act, it has to be done through legislation. But that is no excuse for the State Department, or for that matter the administration, having failed to act during these past 5 years when it has become all too clear that the Karmal government in Kabul is nothing more than a puppet government cooperating in genocide against its own people.

Where has the State Department been these 5 years? Why did this initiative not come from the State Department? That the criminal regime in Kabul has enjoyed most-favored-nation status for 5 years is one further indictment of the laxity on the part of our country with respect to mounting every possible pressure on Kabul and its masters in the Kremlin. We should be seeking every possible means of ousting the Soviets and restoring peace and freedom to the people of Afghanistan.

I use this occasion, Mr. President, once again to urge the White House to appoint an adviser on Afghanistan to investigate thoroughly the opportunities available to the West to aid the freedom fighters, to recommend policies, and to ensure they are carried out by the bureaucracy. The present structure of responsibility in this area is clearly inadequate and no better proof of it exists than the fact that this country has continued to extend most-favored-nation status to the puppet government of Afghanistan for some 5 years now.

Mr. President, I send a bill to the desk and ask unanimous consent it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the General Headnotes and Rules of Interpretation to the Tariff Schedules of the United States (19 U.S.C. 1202) are amended by inserting "Afghanistan" before "Albania" in headnote 3(f).

(b)(1) Notwithstanding any other provision of law, the products of Afghanistan shall not receive nondiscriminatory (most-favored-nation) trade treatment.

(2) No agreement may be entered into with Afghanistan under section 405 of the Trade Act of 1974 (19 U.S.C. 2435).

(c) Notwithstanding any other provision of law, Afghanistan may not participate, directly or indirectly, in any program under which the United States extends credit, credit guarantees, or investment guarantees.

By Mr. SYMMS (for himself and Mr. STAFFORD) (by request):

S. 926. A bill to approve the Interstate Cost Estimate and permit the apportionment of funds authorized for fiscal year 1987; to the Committee on Environment and Public Works.

By Mr. SYMMS (by request):

S. 927. A bill to amend title 23, United States Code; to the Committee on Environment and Public Works.

● Mr. SYMMS. Mr. President, I rise today to introduce two highway bills by request of the Secretary of Transportation. The first bill, which I sponsor along with Senator STAFFORD, the distinguished chairman of the Environment and Public Works Committee, would approve the 1985 interstate cost estimate [ICE] and, thereby, allow the timely release of interstate construction funds at the beginning of fiscal year 1986. Failure to approve a 1985 ICE by October 1 will disrupt the flow of interstate funds to the States and may result in the delay of highway projects and the loss of thousands of construction jobs around the Nation.

The second bill has been drafted to implement part of the administration's budget proposal for transit funding. This legislation provides that both highway and transit substitute projects would be funded out of the $725 million currently authorized for substitute highway projects from the highway trust fund for fiscal year 1986. Moreover, the bill would repeal the fiscal year 1986 funding authorization for parkways and park highways that is included in the Surface Transportation Assistance Act [STAA] of 1982.

Although I am pleased to introduce both bills at the request of Secretary Dole, I must note my reservations with regard to the transit substitute funding proposal included in the second bill. Mr. President, when Congress passed the STAA of 1982, we established a mass transit account within the highway trust fund and set aside 1 cent of the 9 cent per gallon Federal tax on gasoline to accrue to this account. Since that time, American highway users have contributed billions of dollars to support bus and rail transit systems around the country. The administration's proposal would require highway users to support an even

greater share of the cost of the Federal Mass Transportation Program.

In a recently released issue brief on Federal assistance to mass transit programs, the Highway Users Federation notes the following:

In contrast to the average 4 cent per person-trip of Federal expenditures for auto and truck travel on the nation's highways, the Federal Government's contribution to bus and rail transit averages 56 cents per person-trip, of which 13 cents is paid by highway users. Local and state subsidies add 43 cents, bringing the total subsidy to 99 cents per person-trip.

Mr. President, I believe my colleagues should be aware of these facts when we consider any proposal to increase expenditures from the highway trust fund for mass transit projects. For that reason, I ask unanimous consent that the issue brief to which I've referred be printed in the RECORD following my remarks. I also ask that copies of the two bills as well as the section-by-section summary and Secretary Dole's accompanying letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 926

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Transportation shall apportion for the fiscal year ending September 30, 1987, the sums authorized to be appropriated for such period by section 108(b) of the Federal Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways using the apportionment factors from the Interstate Cost Estimate submitted to the Congress in January of 1985.

THE FEDERAL ROLE IN MASS TRANSIT

TRANSIT SUBSIDY COSTS ARE SPIRALLING; THEREFORE, FEDERAL TRANSIT SUPPORT POLICIES SHOULD BE RE-EXAMINED WITH AN EYE TOWARD CONTAINMENT

Despite the increasing federal subsidy of urban mass transportation—which has risen from nothing in 1960 to $4.5 billion in 1984—commuting by mass transportation continues to decline in many places. Now, with increasing pressure to hold down federal expenditures, highway user taxes are seen as a source of additional transit funds.

Of the nation's 96.5 million workers, 84 percent commute by motor vehicle.

Six percent commute by bus and rail mass transportation, about equal to the percent that walks to work. Twenty percent of commuting trips are made within and between suburbs, where commuting is growing faster.

The U.S. Census reports that the average number of daily mass transit commuters has dropped 10.6 percent, from 6.8 million in 1970 to 6.1 million in 1980. This declining transit use contrasts with an increase in the number of persons commuting by motor vehicle which rose from 59.7 million in 1970 to 81.3 million in 1980, an increase of 36.2 percent.

The percentage of commuters using public mass transportation varies according to city size (from 2 to 3 percent in metropolitan areas under a million population to an average of 15 percent in metropolitan areas over 3 million). Buses carry two-thirds of public mass transportation riders; rail carries a third.

The federal government has helped support urban transportation since 1961, expanding from demonstration programs to assistance for equipment and construction, and then to operating assistance. Much early federal support assisted cities in purchasing private transit companies.

In 1982, federal aid amounted to $4.5 billion. Federal operating subsidies alone grew from $300 million in 1975 to $1.1 billion in 1979, remaining at that level through 1982. With passage of the Surface Transportation Assistance Act of 1982 (STAA-82), the federal government earmarked for the first time major portions of highway user taxes—$4.2 billion over the 1983-86 period—for the Federal Mass Transportation Program.

At funding levels authorized by STAA-82, federal support for a mass transit trip outweighs federal support for a highway trip 14 to 1.

In contrast to the average 4¢ per person-trip of federal expenditures for auto and truck travel on the nation's highways, the federal government's contribution to bus and rail transit averages 56¢ per person-trip, of which 13¢ is paid by highway users. Local and state subsidies add 43¢, bringing the total subsidy to 99¢ per person-trip.

The federal mass transportation program has modernized bus fleets nationwide and financed new rail systems in San Francisco, Washington, D.C., Atlanta, Baltimore, Buffalo, and Miami. There are proposals of federal funding of new rail starts in a dozen other cities. Although new rail systems usually offer improved service over the previous all-bus systems, rising construction and operating costs raise serious doubts about the affordability and cost effectiveness of rail transit. There is no evidence to suggest that rail transit investment reduces reliance on motor vehicles. Most rail transit passengers in cities other than New York City were previously bus riders.

The General Accounting Office (GAO) identified two main reasons for growing subsidy demands:

Rapidly rising labor and other operating costs are not offset by productivity improvements.

Transit systems have adopted unrealistically low fares that are unrelated to rising costs.

The GAO report also said the availability of federal operating subsidies has reduced local government initiatives to improve transit efficiency.

The federal government should establish cost-effectiveness criteria to foster rational decisions on which systems to support. And federal operating subsidies should be phased out in the interest of economy and efficiency.

THE SECRETARY OF TRANSPORTATION,
Washington, DC.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Enclosed is a draft bill which would approve the 1985 Interstate Cost Estimate (ICE) to allow timely apportionment of Interstate construction funds authorized for fiscal year 1987 and available for obligation on October 1, 1985. To prevent delays in the approval of the ICE, we have not included highway program changes or post 1986 authorizations in this bill. Also, we have not included the approval of an Interstate Substitute Cost Estimate (ISCE) since passage of a bill regarding the Interstate substitution program to implement a part of our budget proposal for fiscal year 1986 will make the approval of an ISCE unnecessary.

Quick approval of the draft bill will prevent delays in apportionments which have occurred in recent years. Such delays disrupt construction plans and prevent the timely completion of the Interstate System.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this proposed legislation to the Congress. Further, quick passage without amendment would be in accord with the program of the President.

Sincerely,

ELIZABETH HANFORD DOLE.

Enclosure.

ANALYSIS

The bill provides for the apportionment of fiscal year 1987 Interstate construction funds using the factors from the 1985 Interstate Cost Estimate (ICE). The apportionment is due on October 1, 1985, because Interstate construction funds are available for obligation one year in advance of the year of authorization.

S. 927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this bill may be cited as "The Fiscal Year 1986 Highway Amendments Act."

SECTION 2(a). The eleventh and twelfth sentences of section 103(e)(4) of title 23, United States Code, are amended to read as follows:

"For the fiscal years ending September 30, 1984 and September 30, 1985, sums obligated for projects under highway assistance programs shall be paid out of the Highway Trust Fund, and $70,000,000 shall be available for expenditure during each of the fiscal years ending September 30, 1984 and September 30, 1985. Twenty-five per centum of the funds available from the Highway Trust Fund for each of the fiscal years ending September 30, 1984 and September 30, 1985, for substitute highway projects under this paragraph shall be distributed at the discretion of the Secretary.".

(b) The sixteenth sentence of section 103(e)(4) of title 23, United States Code, is amended by striking "years ending September 30, 1985, and September 30, 1986." and inserting in lieu thereof "year ending September 30, 1985.".

(c) The eighteenth sentence of section 103(e)(4) of title 23, United States Code, is amended by striking "fiscal year beginning after September 30, 1983," and inserting in lieu thereof "of the fiscal years ending September 30, 1984 and September 30, 1985,".

(d) The twenty second sentence of section 103(e)(4) of title 23, United States Code, is amended by striking "years ending September 30, 1985, and September 30, 1986." and inserting in lieu thereof "year ending September 30, 1985.".

SECTION 3. Section 103(e)(4) of title 23, United States Code, is amended by inserting after the twenty second sentence the following:

"For the fiscal year ending September 30, 1986, sums obligated for substitute projects shall be paid out of the Highway Trust Fund, and $725,000,000 shall be available for expenditure during the fiscal year ending September 30, 1986. Twenty-five per centum of the funds available from the Highway

Trust Fund for the fiscal year ending September 30, 1986, for substitute projects under this paragraph, shall be distributed at the discretion of the Secretary. The remaining 75 per centum of such funds shall be apportioned on the basis of the Federal share of the cost to complete withdrawn Interstate routes or portions thereof as determined by the Secretary in accordance with this paragraph, less sums already made available for substitute projects under this paragraph.".

SECTION 4. Section 105(a)(5) of the Surface Transportation Assistance Act of 1982 (P.L. 97-424) is amended by striking ", September 30, 1985 and September 30, 1986." and inserting in lieu thereof "and September 30, 1985.".

THE SECRETARY OF TRANSPORTATION,
Washington, DC, April 1, 1985.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Enclosed is a draft bill entitled "The Fiscal Year 1986 Highway Amendments Act."

This bill is being submitted to implement the President's budget for fiscal year 1986. Currently, projects which are developed as substitutes for withdrawn Interstate highway segments under the provisions of 23 U.S.C. 103(e)(4) are funded from two sources. Substitute highway projects are funded from the Highway Trust Fund while substitute transit projects are funded from the general fund of the Treasury.

This bill provides that the $725 million currently authorized for substitute highway projects from the Highway Trust Fund for fiscal year 1986 would be available for both highway and transit substitute projects. A separate bill, which would amend various provisions of the Urban Mass Transportation Act and will be transmitted shortly, would repeal the authorization for fiscal year 1986 general fund appropriations for substitute transit projects.

Enactment of this legislation would achieve several desirable goals. First, by reducing the amount of funds available for substitute projects in fiscal year 1986, outlays would be reduced and help reduce the deficit. The Administration is not retreating from the commitment to fund substitute highway and transit projects. However, we believe they should be funded from the Highway Trust Fund since they are substitutes for withdrawn Interstate segments which would have been funded from the Trust Fund except that State and local officials decided these substitute projects could better serve local transportation needs. We estimate that enactment of this proposal would mean that all of the substitute projects would be funded no later than by fiscal year 1992, rather than by fiscal year 1991.

Second, funding all of the projects from the Highway Trust Fund would eliminate the need for state and local governments to obtain periodic Congressional approval of the division of funds between highway and transit substitute projects. Congress had not approved this division for the last 18 months and so formula funds have been delayed for these substitute projects. Enactment of this bill would make future approvals unnecessary because separate highway and transit apportionment factors would no longer be necessary.

The bill would also repeal the current $100 million parkways and park highway authorization for fiscal year 1986 that is contained in the Surface Transportation Assistance Act of 1982. This separate authorization is not recommended because the Department of the Interior has determined that existing road projects are not sufficiently high in priority to merit funding in FY 1986, given the need for fiscal restraint and the higher priority for construction of other facilities within the National Park System. Unforeseen park road needs, as may develop, can be financed through the use of unobligated balances in this program, through reprogamming, or by the construction program of the National Park Service.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this legislative proposal to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

ELIZABETH HANFORD DOLE.

SECTION-BY-SECTION ANALYSIS

This bill is being submitted to implement the President's budget for fiscal year 1986. currently, projects which are developed as substitutes for withdrawn Interstate highway segments under the provisions of 23 U.S.C. 103(e)(4) are funded from two sources. Substitute highway projects are funded from the Highway Trust Fund while substitute transit projects are funded from the general fund of the Treasury.

The bill provides that the $725 million currently authorized for substitute highway projects from the Highway Trust Fund for fiscal year 1986 would be available for both highway and transit substitute projects. The bill would also repeal the current authorization in FY 86 to use Highway Trust Funds on park highways.

Section 1. This section names the bill the "Fiscal Year 1986 Highway Amendment Act."

Section 2. This section amends 23 U.S.C. 103(e)(4) to delete references to fiscal year 1986 in the existing statutory language. This section maintains the status quo for years prior to fiscal year 1986.

Section 3. Section 3 amends 23 U.S.C. 103(e)(4) to provide that, in fiscal year 1986, $725 million will be available out of the Highway Trust Fund for Interstate substitution highway and transit projects. The current statutory split between formula and discretionary funds for highway substitute projects is retained. That is, 75 percent of the funds would be apportioned based on a formula and the remaining 25 percent would be allocated at the discretion of the Secretary. However, since highway and transit substitute projects would be funded from a common source, it would no longer be necessary for state and local governments to receive periodic Congressional approval of the division of funds between substitute highway and substitute transit projects. The division must be approved under current law by Congress because there are two separate sources of funds for these projects.

Section 4. Section 4 repeals the $100 million authorization from the Highway Trust Fund for fiscal year 1986 for the parkways and park highway program. This program was intended to supplement Park Service funds in the repair of Federally owned public roads that are critical to facilitating the use of parks. The Surface Transportation Assistance Act of 1982 authorized $375 million for fiscal years 1983-86 for this program. This program has provided $275 million during 1983 through 1985, more than 3.5 times the three-year spending on Park Service roads from 1980-1982. As a result of this increased spending, the Park Service expects that by the end of 1985 this program will have addressed the highest priority park road projects. Existing potential road projects are not sufficiently high in priority to merit funding in FY 1986 given need for fiscal restraint and the higher priority for other facilities within the National Park System. Park road needs, as may develop, can be financed through the use of unobligated balances in this program, through reprogramming, or by the construction program of the National Park Service.●

By Mr. SPECTER (for himself, Mr. HEINZ, Mr. DODD, Mr. COHEN, and Mr. BRADLEY):

S. 928. A bill to amend title 23, United States Code, to modify the apportionment formula for resurfacing, restoring, rehabilitating, and reconstructing the interstate system; to the Committee on Environment and Public Works.

INTERSTATE SYSTEM RESURFACING, RESTORATION, REHABILITATION, AND RECONSTRUCTION AMENDMENT OF 1985

Mr. SPECTER. Mr. President, today I am reintroducing legislation which would modify the formula for apportionment of Interstate Reconstruction, Rehabilitation, Restoration, and Resurfacing [4R] funds, which will total more than $5 billion during 1985 and 1986.

The current Interstate 4R formula is inadequate. It fails to effectively address the purposes that the Department of Transportation has identified for this program: facilitating interstate commerce, maintaining the system, and providing for military movement during a national defense emergency. Moreover, the present 4R formula, based on lane-miles and vehicle-miles traveled, does not accurately reflect those factors which contribute most heavily to the deterioration of the highway system. This bill modified previous legislation which I introduced in June 1983, and includes two new factors that act as surrogates for weather and truck traffic. Research has shown that adverse weather conditions and heavy truck traffic are the primary causes of structural damage to highway pavement.

BRIDGE NEEDS

The first new factor is bridge needs on the interstate system. Bridge needs address geography. More rugged terrain requires more bridges. Bridge needs also address meteorological conditions in a very straightforward and effective way. Deterioration occurs more rapidly when salt is applied to a bridge surface. Experts contend that salt is the primary cause of structural damage to highway bridge docks in the United States.

DIESEL FUEL

The second new factor is diesel fuel. Diesel fuel consumption serves as the

best surrogate available for measuring truck traffic. The American Association of State Highway and Transportation Officials reported in a recent study that one 80,000-pound truck causes as much damage to the highway system as 9,600 cars.

While the Federal Highway Administration has some reservations about using diesel fuel as a factor because of measurement problems, it is my view that these problems can be easily overcome. For example, by knowing the extent of vehicle miles traveled, one can accurately estimate fuel consumption. In the end, diesel fuel is quantifiable, consistent, relevant, available State by State, and would not cause a radical redistribution of funding if instituted.

Mr. President, my bill benefits 25 States and the District of Columbia and Puerto Rico. An additional eight States will not suffer any net reduction in funding for road repair as a result of this formula change. The amendment proposes a change for only 2 years—a modest attempt to rectify inequities perpetuated under the current apportionment during the first 2 years of the Surface Transportation Assistance Act. An apportionment formula change cannot be undertaken pellmell, but must be thoughtful and studied carefully. The Pennsylvania Department of Transportation has worked long and hard in developing these factors and the resulting formula. The numbers are before you and the proposal's logic is apparent.

In recognition of the needs of States with extensive interstate systems due to their sheer size, such as Montana and New Mexico, this amendment retains the lane miles factor. This bill also guarantees that every State, no matter how small, will receive at least 1 percent of the funding under this program. Often these States bear the brunt of considerable traffic even though the vehicle-miles and lane-miles factors do not adquately represent their repair needs.

It is my view that a reformulated interstate 4-R apportionment should be among those changes directed at strengthening our transportation network. I urge my colleagues to join me and support this legislation.

Mr. President, I ask unanimous consent that my distinguished colleagues, Mr. HEINZ, Mr. DODD, Mr. COHEN, and Mr. BRADLEY, be listed as original cosponsors of this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 928

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Interstate System Resurfacing, Restoration, Rehabilitation, and Reconstruction Amendment of 1985".

SEC. 2. Subparagraph (B) of section 104(b)(5) of title 23, United States Code, is amended to read as follows:

"(B)(i) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"(I) one-third in the ratio that diesel fuel used by motor vehicles on highways in each State bears to the total of diesel fuel used by motor vehicles on highways in all States;

"(II) one-third in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for under section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and

"(III) one-third in the ratio (not to exceed 10 percent) that the total cost to improve deficient bridges on the Interstate System in each State bears to the total cost to improve deficient bridges on the Interstate System in all States.

"(ii) Notwithstanding clause (i), no State shall receive less than 1 percent of the total apportionment made under this subparagraph for any fiscal year.

"(iii) For purposes of clause (i) the total cost to improve deficient bridges shall be determined by the square footage of bridges on the Interstate System (including bridges on toll Interstate highways) eligible for replacement and rehabilitation multiplied by the respective unit price on a State-by-State basis, as determined by the Secretary under section 144 of this title.".

SEC. 3. The amendment made by this Act shall apply with respect to fiscal years beginning on or after October 1, 1985.

By Mr. HEINZ:

S. 929. A bill to amend the Railroad Retirement Act of 1974 to eliminate the COLA offset provisions, and restore amounts offset under those provisions after January 1984; to the Committee on Labor and Human Resources.

RAILROAD RETIREMENT COLA RESTORATION

● Mr. HEINZ. Mr. President, today I am introducing legislation to return to railroad retirees the money that was unnecessarily taken away from them this past January. My bill would restore to retirees the 1.5-percent COLA subtracted this year from tier II benefits, retroactive to January 1985.

In 1983, when the railroad retirement system was on the brink of insolvency, rail labor and management negotiated, and Congress enacted a comprehensive financing package to restore solvency to the system. This rescue package called for contributions from three major parties—the railroad industry, employers, and employees; the Federal Government; and railroad retirees—in order to shore up the system's short- and long-term financial integrity.

For retirees, the bulk of their contribution came from the so-called COLA offset which required that the next 5 percent of their tier I—Social Security equivalent—COLA increases be deducted, dollar for dollar, from their tier II—industry pension equivalent—benefits. Due to this change, in January 1984 the 3.5-percent COLA given to Social Security beneficiaries was taken away, in full, from railroad retirees' tier II checks. In January 1985, the 3.5-percent Social Security increase was effectively reduced to 2 percent for railroad retirees, due to the second phase, 1.5 percent, of the COLA offset.

In my opinion, the reduction in railroad retirees' benefits this year was unwarranted, and we should restore the money the Government took away. When Congress passed the Railroad Retirement Solvency Act in 1983, it was working under very pessimistic assumptions about the future of both the railroad industry and the national economy. As it turns out, both have performed far better than expected in the past 2 years, and the railroad retirement trust fund is rapidly accumulating surpluses. From the standpoint of the financial solvency of the system, the money saved from the second phase of the COLA offset is overkill.

Mr. President, on January 24, 1985, the members of the Railroad Retirement Board sent a letter to President Reagan projecting the financial condition of the railroad retirement system through 1990, under two alternative sets of assumptions. Assumption A is considered a moderate estimate; assumption B a very pessimistic scenario. I would like to include in the RECORD a table from this letter that outlines the financial status of the trust fund under these assumptions.

[Employment in thousands; dollars in millions]

Calendar year	Employment		Fund balance	
	Assumption A	Assumption B	Assumption A	Assumption B
1985	385	375	$3,920	$3,843
1986	371	351	5,547	5,338
1987	364	342	6,422	6,024
1988	361	336	7,133	6,474
1989	347	314	7,610	6,688
1990	334	295	8,011	6,747

What this table shows is that even under extremely conservative assumptions about the future of the economy and the railroad industry, the railroad retirement system is building up billions of dollars in excess reserves. With this kind of surplus, I don't think it is fair to impose any more financial hardship on retirees who have already sacrificed a great deal.

Railroad retirees have been hit very hard in the past few years. In 1983, they were socked with a 6-month delay in their COLA due to the Social Security Amendments of 1983. In 1984, their tier I COLA was lost altogether due to the first phase of the COLA offset, and in 1985, retirees were forced to forego a major part of their

tier I COLA due to the second phase of the offset.

In my judgment, railroad retirees deserve a better shake. They have paid taxes throughout their working lives, and they deserve a fair benefit, protected against inflation. Given the excellent financial health of the railroad retirement system, we can clearly afford to give back to retirees part of the surplus they helped to create. Economic recovery has certainly benefited railroad employers and employees. I think we owe a full COLA to all railroad retirees.

Mr. President, I urge my colleagues to support this legislation, and recommend its quick enactment.●

By Mr. NICKLES (for himself, Mr. BOREN, Mr. LUGAR, and Mr. GRASSLEY):

S. 930. A bill to amend the Commodity Credit Corporation Charter to exempt all agricultural exports from cargo preference requirements; to the Committee on Commerce, Science, and Transportation.

REMOVING CARGO PREFERENCE FROM ALL AGRICULTURAL EXPORTS

Mr. NICKLES. Mr. President, today, I am introducing a bill which would free all agricultural exports from the clutch of cargo preference.

The immediate goal in this cargo preference fight is to overturn a February court ruling which has resulted in the suspension of $536 million worth of export credit sales. I have previously introduced legislation, S. 664, to accomplish this goal.

The bill I am introducing today along with my colleagues Senators BOREN, LUGAR, and GRASSLEY would fulfill the need to remove cargo preference requirements from all agricultural exports. This bill is a companion measure to H.R. 1760 which was recently introduced by Congressman BEREUTER.

Unfortunately, time that should be spent on building new export trade channels often has to be focused on keeping existing pathways clear from the debris of Government regulations. Cargo preference is one federally imposed requirement that threatens to choke off our ability to export our farm products freely.

Applying cargo preference to commercial agriculture export programs could require the USDA to fork over an additional $700 million for merchant marine subsidies. Such a move would break the bank of the Commodity Credit Corporation, hog-tieing our agriculture export programs.

At present, the merchant marine is receiving a multimillion-dollar per year subsidy hidden in the USDA budget.

I support a strong merchant marine. But I feel their financial support should come from the Maritime Administration or the Department of Defense up front. It should not be tucked away and written off as an expense to American agriculture.

At this point, I would like to ask unanimous consent to include in the RECORD an excerpt from a recent Wall Street Journal article which talked of the need for Congress to address the cargo preference issue, and the text of the legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 930

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 5 of the Commodity Credit Corporation Charter Act is amended to add at the end thereof the following:

"Export activities of the Corporation under this Act, and activities of the Corporation or the Department of Agriculture to promote the export of agricultural commodities under any other Act, shall not be subject to cargo preference requirements.

AXING FARM EXPORTS

Farm-state legislators have been in a state of near hysteria lately over the U.S. trade imbalance, the plight of farmer-debtors and the troubles of country banks. Yet it is within their power to relieve all three maladies, simply by changing federal laws.

As a warm-up exercise, here's a small test of seriousness: Congress could vote to repeal the Cargo Preference Act, which says the U.S. must ship half its food aid abroad in U.S. vessels, at substantial costs imposed by the maritime industry and unions. A federal court has just blocked the U.S. Department of Agriculture from ducking cargo preference on grain shipments that are outside the usual aid programs but carry federal credit subsidies. These latter sales involve competitive markets. Thus, the court effectively stalled a half-billion dollars in U.S. grain shipments. Congress has never had a better opportunity to rid the U.S. of the cargo-preference curse and thereby hand farmers a whopping victory.

That task, though useful, however should not stand in the way of still more important business, passage of President Reagan's Agricultural Adjustment Act of 1985. With the expiration this year of the hoary 1933 New Deal farm act—along with the incredibly unwise price-support amendments passed in 1981—Congress has a marvelous chance to put American farmers back on an equal footing with their competitors in international trade. The 1981 price supports were so high they priced American farmers out of important markets. Mr. Reagan's bill would begin lowering prices to the world market level.

The most immediate effect would be to cut the U.S. trade deficit. U.S. agricultural products account for nearly 50 percent of world exports, a huge business. But that's down from 58 percent five years ago and the prospect is for further slippage. The USDA estimates U.S. foreign sales this year at $34.5 billion, off nearly 10 percent from $38 billion in 1984. Last year's U.S. agricultural trade surplus was nearly $20 billion, so we're talking about real money.

We're not much enamored here of mercantilist pleas for trade surpluses. It is vital for the U.S. to protect its currency, and particularly so since the U.S. dollar is the world's primary trading currency, but that does not require trade surpluses. We are not so dismissive of the relationship, however, that we support federal laws that curtail U.S. exports. That is exactly what the 1981 agricultural amendments did, all in the name of helping farmers recover from previous policies, mainly the embargo on grain shipments to the Soviets and the necessary steps to strengthen the dollar.

U.S. grain prices have at times soared to levels some 20 percent above the world market. Taking advantage of the U.S. umbrella, new players have been moving into the world grain trade, picking off U.S. markets left and right. The U.S. comparative advantage in agriculture is diminishing as farmers in other producing countries reinvest their profits from international sales in modern equipment and better fertilizing methods—things that helped make U.S. farmers so successful.

The upshot is that U.S. farmers, instead of selling to their traditional customers abroad, are increasingly sending their production to a single customer, Uncle Sam. U.S. surpluses are building. In an article in the latest Foreign Affairs quarterly, Council on Foreign Relations fellow Barbara Insel notes that the U.S. is now storing and financing about 46 million tons of coarse grains and 38 million tons of wheat, about 35 percent of its total grain production. Partly as a result of the huge market distortion caused by the 1981 support program, the world is awash in surplus grain and the U.S. holds about 45 percent of the total surplus stock. U.S. taxpayers have been financing agricultural subsidies to the tune of about $19 billion a year in recent years, more than six times the cost in the late 1970s.

Many farm-state legislators, fearful of the noisy political uproar that has been raised by those farmers who are in financial trouble from their 1970s misjudgment—and also worried about the health of the banks that financed those farmers—would like to duck the Reagan remedies, perhaps by extending the present destructive law for another year. They try to distract voters by railing at the Japanese. They fret about the impact lower supports would have on farmers, forgetting the prices for what farmers buy must necessarily come down with the prices farmers receive, or else farm suppliers will put themselves out of business. The necessary market adjustment will be total for agribusiness, not piecemeal.

What the procrastinators ignore is the truth that a decision cannot be safely postponed. America's largest foreign-exchange business is heading south and American farmers face a future that will make them wards of Uncle Sam, which is something the taxpayers aren't likely to condone forever. Congress has the power to fix all this. It just has to do it.

Mr. BOREN. Mr. President, I am pleased to join my colleague, Senator NICKLES, in introducing today a bill which would remove cargo preference requirements from shipments of Public Law 480 sales and donations. Presently, the costs of cargo preference differentials are paid out of funds appropriated for sales or donations of U.S. agricultural commodities. This legislation would prohibit the payment of cargo preference costs from being paid out of the agriculture budget.

Each year, the added costs of Public Law 480 as a result of cargo preference requirements have increased year after year, thereby reducing the amount of money available for the shipment of agricultural products. In 1980, the USDA/Foreign Agricultural Service subsidy for cargo preference was $63 million. It is estimated that the added costs of cargo preference in this fiscal year for Public Law 480 alone will run over $118 million.

I agree that we need to maintain a viable merchant marine. However, it is simply unfair to ask American farmers to pay the cost of what is to benefit the entire Nation. If the merchant marine is in need of subsidization, then we can provide for its funding in the Department of Defense budget or the Maritime Administration budget. I would be quite willing to support legislation which would place the costs of cargo preference in either of these other areas of the budget.

I do not believe the preservation of a viable merchant marine sector is a responsibility of the Department of Agriculture. I also believe the American people have a right to know where their money is being spent. As it stands now, over $100 million of taxpayer funds appears to be supporting sales or donations of agricultural commodities when in reality it is going to the merchant marine industry. If it is important to the country to provide these subsidies, it is important enough to be considered on its own merits and therefore should be taken out of the Department of Agriculture budget.

The legislation we are introducing today will exempt the export activities of the Commodity Credit Corporation and the donations under the Food for Peace Program, Public Law 480, from cargo preference requirements. I urge my colleagues to support this legislation.

By Mr. HART:

S. 933. A bill to establish State pension investment units, a secondary market for industrial mortgages, State venture capital and royalty finance corporations, and a national loan loss reserve fund; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HART (for himself, Mr. KERRY, and Mr. SIMON):

S. 934. A bill to establish a system of individual training accounts in the unemployment trust fund to provide for training and relocating unemployed individuals, to amend the Internal Revenue Code of 1954 to provide that certain contributions to such accounts shall be deductible from gross income, and for other purposes; to the Committee on Finance.

By Mr. HART (for himself, Mr. STENNIS, Mr. KERRY, Mr. GORE, and Mr. MELCHER):

S. 935. A bill to establish a national technology education grants program to provide matching Federal assistance to joint initiatives by private industry, educational institutions, and State government to strengthen science, engineering, and technical education, and for other purposes; to the Committee on Labor and Human Resources.

LEGISLATION TO PROVIDE EDUCATION AND TRAINING TO MEET OUR CHANGING ECONOMY

Mr. HART. Mr. President, this Nation is in the midst of a fundamental restructuring of its technological and economic base. This development will affect the kind and quality of employment available to workers and future workers of our country. Today, I am introducing three legislative proposals that will enable us to make a smooth transition into an economy that will demand new skills and knowledge from our people.

Each bill contributes to a strategy to make our Nation prosper and compete effectively in this time of transition. The centerpiece of this strategy is a commitment to invest in the future: to anticipate and prepare for the challenges of a changing economy. To invest in the future we must provide workers with needed skills, encourage the most dynamic sector for our society, small business, and prepare our youth for a changing work place.

The three bills I am introducing today will help our Nation meet those challenges.

The National Individual Training Account Act enables dislocated workers to receive training necessary for reemployment.

The National Entrepreneurship Act increases the availability of capital to entrepreneurs who are striving to establish new, small businesses.

The High Technology Morrill Act provides young people with math, science, and technical skills required for success in our emerging economy.

The three bills share many common features. For example, the programs established by the legislation operate with a minimum of bureaucracy and redtape. The Federal Government is not cast in the role of protector; instead, the programs encourage individual and joint initiatives by private industry, State governments, educational institutions, workers and students. And, most important, they all invest in the future: they lay the groundwork for an economy that will boast a well-trained, well-educated work force, and thriving, innovative industries.

To invest in the future, we must help our workers make the transition to tomorrow's jobs. The development of new technologies and the decline of basic manufacturing industries are causing fundamental shifts—shifts that resulted in the dislocation of 5.1 million long-term workers between 1979 and 1984, and which will produce a shortage of 2.5 million skilled workers by 1990.

The National Individual Training Account Act represents a long-awaited Federal response to the problem of how we fund and promote the needed retraining of our Nation's workers. The legislation is a voucher-based system modeled on a very successful national retraining program, the GI bill, and a savings and equity based financing system analogous to the individual retirement account. It establishes a system of individual training accounts to help rectify the mismatch between job skills and market demands by enabling workers to gain the skills necessary to meet the changing demands of the job market.

The legislation authorizes employers and employees to make voluntary annual tax deductible contributions to an interest-bearing training account. Upon involuntary unemployment, the participating worker is entitled to withdraw funds, in the form of a tax-free voucher, to attend a certified training program of the worker's choice. Upon the worker's retirement, the unused balance of the account, plus accumulated interest, is refunded to the employer and employee.

We must also prepare for the future by encouraging the most dynamic sector of our economy—small business. Small businesses are, by their very nature, flexible and innovative. Original, marketable concepts are readily seized and developed by new, small firms that lack the slow-moving, bureaucratic features of many large, well-established firms. As a result, small enterprises produce 4 times as many innovations per research and development dollar as medium-sized firms, and 24 times as many as large businesses. Their role in job creation is essential: During the recession years of 1981 and 1982, small firms created 2.6 million new jobs, which more than offset the nearly 1.7 million jobs lost in the large industrial sector. Due to a rapidly growing work force in those years, this contribution could not reverse the climb in unemployment rates. But the small business sector demonstrated that, even during times of economic hardship, it will help lead the transition into a changed economy.

The National Entrepreneurship Act addresses the critical capital needs of small businesses, so that they continue to exercise their crucial role in job creation, innovation, and productivity. Specifically, the programs established by the legislation address three financial impediments faced by many young firms: the underavailability of seed money, the difficulty of obtaining equity investment, and the lack of long-term fixed-rate debt capital.

The legislation establishes four programs designed to increase the flow of capital to these firms through:

A matching grant system for the establishment of State pension fund investment clearing houses;

A national loan loss reserve fund;

A matching grant system for State development finance corporations; and

A secondary market for fixed-rate industrial mortgages for small and mid-sized firms.

By making risk and long-term capital available to new, young and small businesses, the provisions of this legislation will encourage and unleash America's entrepreneurial energies.

Finally, to invest in the future, we must prepare our young people for new technologies. The Bureau of Labor Statistics projects that the demand for scientists and engineers will increase by 40 percent by 1990. However, by all accounts, our young people's math and science capabilities are declining; today, only 13 percent of high school students are prepared for the college engineering curriculum, compared with 28 percent in 1972.

The High Technology Morrill Act would help remedy these shortcomings by improving technological education at all levels of our education system. Basic math and science must be emphasized at the elementary and secondary levels. Our colleges and universities must upgrade their science and engineering programs. And our educational system must provide training programs for workers who need more technical skills.

Our educational institutions cannot handle the job alone. Thus, the High Technology Morrill Act encourages partnerships nationwide between State governments, industries, and educational institutions. The act establishes a technology trust fund, financed by revenues from the sale and rental of energy and mineral resources on Federal lands, to respond to partnership initiatives by providing matching grants to educational institutions.

Under the act, specific projects would be initiated by local industry in cooperation with education and State economic agencies. The bill authorizes use of the funds by educational institutions to develop programs to enhance science and engineering teaching as a career, establish research and training centers, modernize laboratory equipment, start computer literacy programs, initiate retraining programs for workers with outmoded skills and support other approved programs that strengthen technological education.

Mr. President, these bills address crucial needs of an economy in transition. They will prepare our Nation for this transition, but are firmly grounded in today's realities and challenges. Together, they provide a strategy for investing in our people, our economy, and our future.

Mr. President, I ask unanimous consent that the full text of each bill and the corresponding floor statement be printed in the RECORD. I further ask unanimous consent that Senator STENNIS' floor statement on the High Technology Morrill Act be printed in the RECORD immediately following my statement on that bill.

There being no objection, the material will be printed in the RECORD.

S. 933—NATIONAL ENTREPRENEURSHIP ACT

Mr. HART. Mr. President, today I am introducing the National Entrepreneurship Act. This legislation is designed to make risk and long-term capital available to new, young and small businesses.

The legislation supports the creation and expansion of young and small firms by establishing a system of matching grants for State-sponsored pension investment units, providing matching grants for State-sponsored venture capital finance corporations, creating a secondary market for industrial mortgages similar to Fannie Mae, and initiating a national loan loss reserve fund.

The health and vitality of our economy depends on the strength of the small business sector. Yet many new, young and growing firms face impediments in capital markets which deprive them of the funds they need to grow and prosper.

These impediments must be eliminated so that small and young firms can continue to play their crucial role in our economy, particularly in the areas of job creation and innovation.

During the recession years of 1981 and 1982, small firms created 2.6 million new jobs, which more than offset the nearly 1.7 million jobs lost in the large industrial sector. Due to a rapidly growing work force in those years, this contribution could not reverse the climb in unemployment rates. But the small business sector demonstrated that, even during times of economic hardship, its contribution to job creation and renewed prosperity is vital.

The jobs created by these firms are particularly crucial due to the increased opportunities they provide for minorities and women—working people who typically suffer the highest level of unemployment. Women-owned businesses are increasing at three times the rate of male-owned businesses; and overall, minority entrepreneurs tend to hire a substantially greater percentage of minority workers.

Finally, we know that small enterprises produce four times as many innovations per research and development dollar as medium sized firms, and 24 times as many as large businesses.

Despite the importance of the small business sector, many of these firms are unable to meet their capital needs in traditional financial markets. The programs established by the National Entrepreneurship Act address the problems caused by three financial impediments faced by many young firms: the under-availability of seed money, pre-venture capital; the difficulty of obtaining equity investment, especially if the business is a startup or is not high tech; and the lack of long-term fixed rate debt capital. I have recommended essential reforms to help small businesses in the four titles of the legislation.

TITLE I: STATE PENSION INVESTMENT UNITS

Private and public pension funds are one of the few sources of long-term capital in America which are still growing. Within 15 years the private funds will be worth $3 trillion; State and local funds, well over a trillion.

Directing even a small amount of this capital into new firm startups and small business expansions would have a tremendous impact by generating additional jobs and increasing the international competitiveness of the American economy. Creative use of retirement fund assets would be especially helpful in fostering balanced regional development and financing affordable housing and family farm agriculture.

Restrictive statutes and overly cautious readings of pension law have slowed efforts to invest additional moneys in venture capital and small businesses. Moreover, large investors, such as retirement funds, face great difficulties in identifying promising entrepreneurial investment opportunities. Presently, a number of State and local funds, as well as private union funds, are searching for more innovative investment options; unfortunately, suitable alternatives are not readily available.

Creating a public-spirited development broker would help reduce these legal and administrative impediments. Title I of the National Entrepreneurship Act recognizes this by providing matching grants to States that establish pension fund investment clearing houses. Such units would collect and disseminate information on new investment options, design demonstration projects, recommend policies and legislative changes, develop alternative mechanisms for investment, and make it possible for pension fund managers and trustees to confer regularly and coordinate their strategies.

TITLE II. STATE VENTURE CAPITAL CORPORATIONS

The personal savings of entrepreneurs, and money from friends, family and associates, provide 80 percent of the total seed capital for new businesses. But this informal financing system works unevenly in middle-income communities and not at all in poor communities.

A number of States have established new financial intermediaries precisely to fill this gap in the capital markets. This latest wave of State development finance institutions varies widely in

structure and technique. Approaches range from direct State control to an independently managed corporation, and from every conceivable form a debt instrument to the riskiest, highest yielding investments.

Title II charts a new course for building upon these successes by making the Federal Government an investor and putting capital into such institutions on a matching basis. Important forms of financial innovation, like royalty financing, would be spurred, along with a cascade of new product applications and inventions.

TITLE III. SECONDARY MORTGAGE MARKETS

Increased interest rate volatility has reduced the willingness of banks to lend on a long-term, fixed-rate basis. The vast majority of bank loans are for less than 1 year and, where long-term loans are made, adjustable rate mortgages and loans are becoming the norm. This is a problem because small and newer firms do not have access to alternate sources of long-term loans for the expansion and modernization of their capital stock.

Simultaneously, investment dollars are being amassed in large institutional investors like pension funds. In many cases, these institutions need a predictable flow of funds over the intermediate and long term to meet the expenses of their future operations. Thus, institutional investors prefer to hold a substantial amount of long-term debt which provides a constant stream of income.

Additionally, institutional investors are not structured to handle numerous small loans. Since institutional investors do not possess a retail structure to negotiate one-on-one deals with potential entrepreneurs, new, young and small businesses are closed out of the competition for institutions' funds.

To increase the access of small- and medium-sized firms to long-term capital, title III of the National Entrepreneurship Act establishes a national program, akin to residential backed securities, to package and insure packages of multiple loans.

A secondary mortgage market would purchase long-term small business loans from commercial banks, thereby freeing banks from the interest rate risk of long-term lending. It would then package the loans into pools that would be large enough to interest institutional investors. In effect, this program would enable pensions funds and insurance companies to satisfy a large part of the long-term capital needs of small- and medium-sized business.

TITLE IV. LOAN LOSS RESERVE PROGRAM

Large firms have flexible financing options: They can obtain capital from large money center banks, the public debtor or equity market, or even the Eurodollar market. Small firms, however, lack such flexibility. Due to their difficulties in obtaining capital from the existing range of financial sources, most new, young. and small firms seek money from their local banks.

Banks, however, do not have an ideal financial structure for entrepreneurial lending. Since they are very highly leveraged, possessing little equity relative to debt, and governed by State and Federal regulations, banks tend to limit their loans to relatively conservative investments. Small firms are often locked out.

A national loan loss reserve program would address the unmet capital needs of rapidly growing small and young businesses whose growth exceeds their ability to generate internal resources to finance expansion. The program works by authorizing banks to make loans to firms under a certain size. The borrower and the lender agree on a loss reserve rate and each contributes one-third of the reserve. The Government then contributes an additional amount equal to the firm's contribution, yielding a loan loss reserve of 15 percent maximum on each loan.

Each bank develops its own loss reserve and can draw money from that fund only by experiencing losses. Losses are paid 100 percent if the reserve is adequate and since each bank has its own reserve, it is in the bank's vested interest to keep losses to the minimum. As the reserve grows, the bank can afford to be more aggressive in its lending practices. Such a program would open up a new market for banks, eliminate paperwork and delays, and encourage a large lending volume at a fraction of the costs of the SBA Guarantee Program.

The four programs I've outlined are targeted to specific problems in our capital markets, but their broader impact—the creation of thousands of new jobs, products and innovations—is crucial not only to the health of our economy, but also to the security of our Nation. To maintain our leadership role in an era of rapid technological innovation and increasing international competition, this Nation must promote a business atmosphere in which all creative Americans are encouraged to participate.

The text of the bill follows:

S. 933

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Entrepreneurship Act".

TITLE I—STATE PENSION INVESTMENT UNITS

FINDINGS AND PURPOSE

SEC. 101. (a) The Congress finds that—

(1) United States capital markets are among the most efficient in the world;

(2) the efficiency of United States capital markets could be increased by reducing barriers that inhibit investment in young entrepreneurial corporations with a potential to grow rapidly;

(3) many young entrepreneurial corporations with a potential to grow rapidly do not have adequate access to capital because—

(A) investors do not perceive that individual entrepreneurial corporations will provide stable, short-term earnings even though, as a group, small entrepreneurial corporations are at least as profitable as larger businesses;

(B) without established credit ratings, acquiring the necessary credit information is very expensive;

(C) investors are hesitant to finance new production techniques and innovative products, especially for unproven markets; and

(D) they are small and cannot provide sufficient collateral for loans;

(4) when sufficient capital is not available, young entrepreneurial corporations with a potential to grow rapidly cannot create new jobs and develop new products and manufacturing processes that will increase United States productivity and competitiveness in international markets;

(5) pension funds are uniquely qualified to help reduce capital market imperfections since public and private pension funds have more than $850,000,000,000 in assets and long time horizons which make them especially well suited to finance growth oriented investments that promise substantial long-term returns (such as venture capital activities), but not immediate cash flow;

(6) only a minority of pension funds invest in venture capital activities, private placements, or the common stock of smaller, publicly traded companies;

(7) encouraging pension funds to invest a greater portion of their assets in rapidly growing, small, and young businesses would improve the efficiency of capital markets, increase employment opportunities, and enhance the retirement income security of current and future retirees; and

(8) higher earnings achieved through more aggressive investment policies can also help reduce pension costs while preserving current benefits.

(b) It is the purpose of this title—

(1) to provide matching grants to States that establish pension investment units;

(2) to create within each State an institution to identify and eliminate legal barriers inhibiting pension funds from investing a greater portion of their assets in the securities of young entrepreneurial corporations with a potential to grow rapidly; and

(3) to encourage a greater use of pension fund assets as a source of long-term capital for the unique economic development needs of each State.

DEFINITIONS

SEC. 102. For purposes of this title—

(1) the term "Governor" means the chief executive of a State;

(2) the term "Secretary" means the Secretary of Labor;

(3) the term "State" means any of the several States, the District of Columbia, and the Commonwealth of Puerto Rico; and

(4) the term "unit" means a State pension investment unit established in accordance with this title.

DUTIES

SEC. 103. To help each State accelerate its rate of economic growth and job creation, a unit of a State shall—

(1) issue an annual report to the Governor which identifies and makes recommendations to eliminate tax and legal barriers that prevent pension funds from investing a greater portion of their assets in the securi-

ties of young entrepreneurial corporations with a potential to grow rapidly;

(2) analyze and evaluate the long-term growth potential of young entrepreneurial corporations whose securities are not currently evaluated by private investment research firms but which could provide pension funds with an adequate rate of return;

(3) help pension funds reduce the risk of investing in young entrepreneurial corporations with a potential to grow rapidly by establishing standards for and encouraging pension funds to purchase long-term securities backed by pools of industrial mortgages;

(4) develop new investment options and collect and disseminate information about such other investment options as venture capital and direct placement pools, new securities, mutual funds of small firm stocks, and other appropriate investment vehicles that will allow pension funds to invest their assets in ways that will prudently and responsibly promote the comparative advantage of each State in the areas of entrepreneurship, economic development, small business, affordable housing, family farm agriculture, energy conservation, and job creation;

(5) conduct meetings and briefings for the Advisory Council and Advisory Committee; and

(6) conduct such public hearings as are necessary to obtain broad public comment on the investment of pension plan assets.

PROGRAM AUTHORIZATION

SEC. 104. (a) The Secretary shall solicit from the States proposals for the establishment and operation of State pension investment units.

(b) The Secretary may make grants to States to pay the Federal share of the cost of establishing and operating units in accordance with this title.

ORGANIZATION

SEC. 105. (a) In order to be eligible to receive a grant under this title, a Governor of a State shall designate as a unit either a new or an existing office within the government of such State. Such unit shall be administered by a director.

(b)(1) A unit shall establish an Advisory Council composed of trustees and managers of pension plans established in the State.

(2) The Advisory Council shall make recommendations to the unit concerning its activities under this title.

(c)(1) A unit shall establish an Advisory Committee composed of representatives of participants in, and beneficiaries of, major public and private pension plans established in the State.

(2) The Advisory Committee shall make recommendations to the unit concerning its activities under this title.

PAYMENTS

SEC. 106. (a) The Secretary shall, in accordance with this title, pay to States the Federal share of the costs of establishing and operating a unit in accordance with this title.

(b) The maximum Federal share for each fiscal year under this section shall not exceed 50 percent.

(c) The total amount of Federal payments a State may receive under this section may not exceed $750,000 during the program's three years.

REGULATIONS

SEC. 107. The Secretary shall issue such regulations as are necessary to carry out this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 108. There are authorized to be appropriated for each of the fiscal years 1986, 1987, and 1988 such sums as may be necessary to carry out this title.

EFFECTIVE DATE

SEC. 109. This title shall become effective on October 1, 1985.

TERMINATION DATE

SEC. 110. The authority granted by this title shall terminate on September 30, 1988.

TITLE II—STATE VENTURE CAPITAL CORPORATION ASSISTANCE ACT

FINDINGS AND PURPOSE

SEC. 201. (a) The Congress finds and declares that—

(1) young entrepreneurial companies are a primary source of new jobs, products, and technological innovations;

(2) stimulating and encouraging young entrepreneurial corporations is in the national interest because the innovations and new products which they produce will increase the rate of United States productivity growth and improve the ability of the United States to compete successfully in world economic markets;

(3) one of the main obstacles faced by young entrepreneurial companies is insufficient access to the right kinds of capital, at the right time and in the right amounts;

(4) some of the best kinds of capital for innovations and new product development are equity and grants with a royalty payment provision whereby the investor receives a fixed percentage of the gross receipts from the sale of the new product;

(5) equity financing and grants with a royalty payment provision ameliorate the cash flow problems of young entrepreneurial corporations because they allow the firm to make payments to investors only when the innovation or new product has begun to generate sales revenues;

(6) during the last decade, States have begun to authorize State-sponsored venture capital corporations which provide equity and grants with a royalty payment provision to young entrepreneurial corporations; and

(7) if these activities are continued and expanded, we can reasonably expect that they will enhance each State's ability to take full advantage of its unique labor force skills, natural resources, capital stock, and economic development potential and that they will generate new jobs, enterprises, products, and models for other State and Federal economic development initiatives.

(b) It is the purpose of this title to foster innovations and new product development by—

(1) providing matching grants to States which establish or expand existing venture capital corporations;

(2) encouraging States to emulate the successful venture capital initiatives of other States; and

(3) stimulating States to develop new and more effective methods of venture capital finance.

DEFINITIONS

SEC. 202. For purposes of this title—

(1) the term "corporation" means a State venture capital corporation which meets the criteria of section 203 of this title;

(2) the term "financial assistance" means various forms of equity, convertible debt, or grants with a royalty payment provision provided by the corporation to a qualifying business;

(3) the term "innovation" means any new process or new technique without regard to whether a patent has or could be granted;

(4) the term "new funds" means funds not received by a corporation before the submission of an application to the Secretary under section 204;

(5) the term "qualifying business" means any individual, partnership, corporation, trust, or joint venture with less than $20,000,000 in sales or assets and whose principal activities do not consist of—

(A) dealing in commodities, securities, or real estate;

(B) retailing, banking, insurance, moneylending, debt factoring, hire-purchase financing, or other financial or personal services;

(C) leasing (including letting ships on charter or other assets on hire) or receiving royalties or license fees; or

(D) providing any professional service, including legal, accounting, or medical services;

(6) the term "product" means any product, device, technique, or process which is or may be exploitable commercially; such term shall not refer to pure research but shall be construed to apply to such products, devices, techniques, or processes which have advanced beyond the theoretical stage and are readily capable of being, or have been, reduced to practice;

(7) the term "Secretary" means the Secretary of Commerce; and

(8) the term "venture" means financial assistance from a corporation to a qualifying business in exchange for rights from or in an invention or product or proceeds therefrom.

ELIGIBILITY CRITERIA

SEC. 203. To be eligible for a matching grant under this title, a State venture capital corporation shall—

(1) be a State chartered, quasi-public corporation providing financial assistance in the form of equity or grants with a royalty payment provision to qualifying businesses;

(2) direct its financial assistance to qualifying businesses for the purpose of financing the development, production, or marketing of new products, manufacturing processes, or other technological innovations;

(3) have a staff of experts to evaluate the feasibility and economic impact of each proposed venture, including a description and estimate of the size of the potential market, the number of direct and indirect jobs that will be created, the potential for followup or spinoff product development, the long-term financial stability of the qualifying businesses, and the technical and managerial expertise of the officers of a qualifying business;

(4) determine that at least 50 per centum of the necessary funds for each venture for which the corporation provides financial assistance is available from private financial markets or the qualifying business's internally generated resources;

(5) monitor each venture to ensure adequate progress in the development and marketing of the new product, process, or innovation;

(6) have a reasonable prospect of receiving a market rate of return on its financial assistance through royalty payments, capital appreciation, dividends, or other financial returns; and

(7) determine that the qualifying businesses receiving financial assistance have no alternative sources for raising the total amount of funds necessary to finance the development or marketing of new products, manufacturing processes, or other technological innovations.

GRANT AWARD PROCESS

SEC. 204. (a) A State applying for a venture capital corporation grant must submit an application to the Secretary which establishes the eligibility of a corporation under section 203.

(b) Upon finding that the corporation meets the eligibility criteria listed in section 203, the Secretary shall approve a matching grant in an amount not to exceed the amount of the new funds committed by or on behalf of the State, but in no event exceeding a total of $5,000,000 for the duration of the program.

EVALUATION

SEC. 205. (a) The Secretary shall monitor and evaluate annually the effectiveness of each corporation assisted under this title, and shall make such evaluation available to the States and the Congress.

(b) The Secretary shall issue regulations for disqualifying from eligibility for further matching grants any corporation receiving an unsatisfactory evaluation.

AUTHORIZATION

SEC. 206. There are authorized to be appropriated to carry out this title amounts not to exceed $260,000,000 for the duration of the program.

TITLE III—SECONDARY MORTGAGE MARKETS

SHORT TITLE

SEC. 301. This title may be cited as the "Technology Development and Mortgage Assurance Corporation Act".

FINDINGS AND PURPOSE

SEC. 302. (a) The Congress finds and declares that—

(1) secondary mortgage markets have stimulated home ownership and employment by increasing the availability and affordability of long-term residential mortgages;

(2) many small businesses could grow more rapidly, create more jobs, and increase United States competitiveness in world markets if additional long-term capital were available to finance purchases of new plant and equipment;

(3) pension funds and insurance companies are a major source of long-term capital for the United States economy but they are not well equipped to originate and service the large number of relatively small loans needed by rapidly growing small businesses;

(4) commercial banks specialize in short-term business lending and have the facilities and specialized expertise to evaluate loan applications and to originate and service the large number of relatively small loans required by rapidly growing small businesses; and

(5) a secondary market for industrial mortgages would link the unique talents and lending activities of commercial lenders to those of pension funds and insurance companies, thereby increasing the efficiency of United States capital markets and the amount of long-term capital that is available to finance purchases of plant and equipment by small businesses.

(b) It is the purpose of this title to establish a quasi-public corporation chartered by the Federal Government to purchase and insure industrial mortgages and to sell pools of such industrial mortgages, similar to residential backed mortgage securities, to institutional and individual investors.

DEFINITIONS

SEC. 303. For purposes of this title—

(1) the term "qualifying business" means any individual, partnership, corporation, trust, or joint venture with less than $20,000,000 in sales or assets and whose principal activities do not consist of—

(A) dealing in commodities, securities, or real estate;

(B) retailing, banking, insurance, money lending, debt factoring, hire-purchase financing, or other financial services;

(C) leasing (including letting ships on charter or other assets on hire) or receiving royalties or license fees; or

(D) providing legal, accounting, or medical services;

(2) the term "financial institution" means any bank, business and industrial development company, savings and loan institution, commercial finance company, trust company, or credit union certified to originate, sell, and service mortgages pursuant to section 306; and

(3) the term "mortgage" means any loan which—

(A) is secured by a first lien on real property or an unsubordinated lien on any other type of property or equipment; and

(B) is used to finance the rehabilitation, renovation, modernization, refurbishing, or improvement of productive facilities and equipment used for business activities conducted in the United States.

CORPORATE STRUCTURE

SEC. 304. (a) There is established a body corporate to be known as the Technology Development and Mortgage Assurance Corporation (hereinafter in this title referred to as the "Corporation").

(b)(1) The Corporation shall have a board of directors composed of the Secretary of Commerce, the Secretary of the Treasury, the Secretary of Labor, and five members elected by the Corporation's stockholders.

(2) The Secretary of Commerce shall be the chairman of the board of directors.

(3) The principal office of the Corporation shall be in the District of Columbia or at such other place as the Corporation may from time to time prescribe.

(c)(1) The Corporation may appoint and fix the pay of such personnel as the Corporation considers appropriate.

(2) The staff of the Corporation may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the maximum annual rate of basic pay established and adjusted for the Senior Executive Service pursuant to section 5382 of such title.

CAPITALIZATION

SEC. 305. (a)(1) The Corporation shall issue, and the Secretary of the Treasury shall purchase, common stock of the Corporation in the amount of $200,000,000. Owners of the common stock shall be vested with all voting rights, each share being entitled to one vote with rights of cumulative voting at all elections of directors.

(2) The free transferability of the common stock at all times to any person, firm, corporation, or other entity shall not be restricted except that, as to the Corporation, it shall be transferable only on the books of the Corporation.

(b)(1) The Corporation may accumulate funds for its capital surplus account from private sources by requiring each mortgage seller to make payments of nonrefundable capital contributions, equal to not more than 2 per centum of the unpaid principal amounts of mortgages purchased or to be purchased by the Corporation from such seller.

(2) In addition, the Corporation may impose charges or fees, which may be regarded as elements of pricing, with the objective that all costs and expenses of its operations should be within its income derived from such operations and that such operations should be fully self-supporting.

(3) All earnings from the operations of the Corporation shall annually be transferred to its general surplus account.

(4) At any time, funds of the general surplus account may, at the discretion of the board of directors, be transferred to reserves.

(5) All dividends shall be charged against the general surplus account.

(c)(1) The Corporation shall issue, from time to time to each mortgage seller, its common stock evidencing any capital contributions made by such seller pursuant to subsection (b) of this section.

(2) In addition to the shares of common stock issued under paragraph (1), the Corporation may issue additional shares in return for appropriate payments into capital or capital and surplus.

MORTGAGE OPERATIONS

SEC. 306. (a)(1)(A) The Corporation is authorized to purchase, and to make commitments to purchase, industrial mortgages from any qualified financial institution.

(B) The Corporation may hold and deal with, and sell or otherwise dispose of, pursuant to commitments or otherwise, any such mortgage or interest therein, and the servicing of any such mortgage may be performed by the seller or by a financial institution certified as a seller.

(C) The Corporation shall receive applications for the certification of financial institutions for the purpose of this Act and shall establish criteria for determining the eligibility of a financial institution for certification.

(D) The criteria shall include (i) the financial institution is licensed to do business in the United States and is regulated by either a State agency or the Federal Government; and (ii) the financial institution, based on safety and soundness, capital adequacy, history, personnel, and financial stability, is competent to originate and service the types of loans required by the program.

(2) The operations of this section shall be confined to mortgages that meet the following conditions:

(A) the loans shall be limited to financing the purchase of plant facilities, land, and equipment for business activities conducted in the United States;

(B) the borrower is a qualifying business;

(C) the maximum term for the mortgage loans shall not exceed the useful economic life of the property being purchased and in no case shall exceed 10 years for equipment and twenty years for plant and land;

(D) the mortgage loans are secured by a security interest in machinery, equipment, or real property; and

(E) the mortgage shall be fully amortized over the life of the loan.

(3) The Corporation may establish requirements, and impose charges or fees, which may be regarded as elements of pricing, for different classes of sellers or servicers, and for such purposes the Corporation is authorized to classify sellers or servicers according to type, size, location, assets, or without limitation on the generali-

ty of the foregoing, on such other basis or bases of differentiation as the Corporation may consider necessary or appropriate to effectuate the purposes or provisions of the title.

(4) No industrial mortgage shall be purchased under this section unless—

(A) the outstanding principal balance at the time of purchase is less than 80 per centum of the value of the property securing the mortgage;

(B) the seller retains a participation of not less than 20 per centum in the mortgage;

(C) for such period and under such circumstances as the Corporation may require, the seller agrees to repurchase or replace the mortgage upon demand of the Corporation in the event that the mortgage is in default; and

(D) the mortgage was originated less than one year prior to the purchase date.

(b)(1) To provide a greater degree of liquidity to the industrial mortgage investment market and as an additional means of financing its operations under this section, the Corporation is authorized to set aside any mortgages held by it under this section, and, upon approval of the Secretary of the Treasury, to issue and sell securities based upon the mortgages so set aside.

(2) Securities issued under this subsection shall have such maturities and bear such rate or rates of interest as may be determined by the Corporation with the approval of the Secretary of the Treasury.

(3) The Corporation shall issue or purchase from private sources commitments to insure the timely payment of principal and interest to purchasers of the securities backed by mortgages previously set aside.

(4) Securities issued by the Corporation under this subsection shall be deemed to be exempt securities within the meaning of laws administered by the Securities and Exchange Commission.

(5) Mortgages set aside pursuant to this subsection shall at all times be adequate to enable the Corporation to make timely principal and interest payments on the securities issued and sold pursuant to this subsection.

(6) The Corporation shall insert appropriate language in all of its obligations issued under this subsection clearly indicating that such obligations, together with the interest thereon, are not guaranteed by the United States and do not constitute a debt or obligation of the United States or of any agency or instrumentality thereof other than the Corporation.

(7) The Corporation is authorized to purchase in the open market any of its obligations outstanding under this subsection at any time and at any price.

TITLE IV—LOAN LOSS RESERVE FUND

FINDINGS AND PURPOSE

SEC. 401. (a) The Congress finds and declares that—

(1) a critical factor in generating new permanent jobs in the private sector is the investment of capital in the right amount and the right form;

(2) when capital does not flow to its most productive uses—

(A) the economic health of an entire community suffers; and

(B) new employment is not created, technological improvements are not developed, and the macroeconomic benefits of new and profitable enterprise development are not realized;

(3) unlike large corporations which can draw on retained earnings to finance further growth, small businesses, young businesses, and entrepreneurial corporations rely on bank loans for growth and expansion;

(4) due to insufficient collateral, many small businesses, young businesses, and entrepreneurial corporations cannot obtain sufficient bank loans to grow rapidly, purchase new plants and equipment, and create additional permanent, private sector jobs; and

(5) the existence of an insurance fund, financed by equal payments from borrowers, lenders, and the Federal Government, can encourage banks and other lenders to increase their loans to small businesses, young businesses, and entrepreneurial corporations with insufficient collateral.

(b) The purpose of this title is to establish a national loan loss reserve fund (financed by equal payments from borrowers, lenders, and the Federal Government) to insure lenders against default on loans to small businesses, young businesses, and entrepreneurial corporations.

DEFINITIONS

SEC. 402. For purposes of this title—

(1) the term "lender participant" means a lender approved by the executive director to make loans pursuant to the provisions of this Act;

(2) the term "eligible loan" means a loan to a qualifying business under the conditions set forth in this Act;

(3) the term "qualifying business" means any individual, partnership, corporation, trust, or joint venture with less than $20,000,000 in sales or assets and whose principal activities do not consist of—

(A) dealing in commodities, securities, or real estate;

(B) retailing, banking, insurance, money lending, debt factoring, hire-purchase financing, or other financial services;

(C) leasing (including letting ships on charter or other assets on hire) or receiving royalties or license fees; or

(D) providing legal, accounting, or medical services;

(4) the term "amount of loss" means an amount equal to the unpaid balance of the principal amount, less any amounts realized by perfecting rights under a security agreement, together with such accrued interest as the executive director shall allow;

(5) the term "default" means a failure to make a regular payment of principal and interest for at least ninety days;

(6) the term "premium charge" means the percentage of the loan, as determined by the lender, which shall be deposited in the Entrepreneurship Loan Loss Reserve Fund on loans made pursuant to this title;

(7) the term "Board" means the board of directors of the Federal Deposit Insurance Corporation or the Federal Home Loan Bank Board;

(8) the term "Executive Director" means the Executive Director of the separate entrepreneurship loan loss reserve programs administered by the Chairman of the Federal Deposit Insurance Corporation and the Chairman of the Federal Home Loan Bank Board; and

(9) the term "Fund" means the separate Entrepreneurship Loan Loss Reserve Fund administered by the Chairman of the Federal Deposit Insurance Corporation and the Chairman of the Federal Home Loan Bank Board.

ENTREPRENEURSHIP LOAN RESERVE FUND

SEC. 403. (a)(1) The Chairman of the Federal Deposit Insurance Corporation and the Chairman of the Federal Home Loan Bank Board shall establish an Entrepreneurship Loan Loss Reserve Fund for the purpose of receiving Federal and private money to secure loans made pursuant to this title.

(2) Premium charges shall be accounted for on a lender-by-lender basis and shall consist of equal payments from the lender participant, borrower, and the Federal Government.

(3) The Fund shall be managed by an Executive Director designated by the chairman.

(4) Upon authorization by the Executive Director, amounts in the Fund shall be paid to lender participants to carry out the purposes of this title.

(b)(1) Notwithstanding any other provision of law, amounts in the Fund, in excess of amounts determined by the Executive Director to be needed for payment to lender participants pursuant to section 407, shall be offered to lender participants to be invested in certificates of deposit issued by them in proportion to their payments to the loan loss reserve program.

(2) If a lender participant declines to receive an amount offered for investment, such amount shall then be invested in United States Treasury securities.

(c)(1) All income from amounts invested shall be deposited in the Fund, and shall be used exclusively for the support of the loan loss reserve program.

(2) Such income shall be accounted for on a lender-by-lender basis in proportion to each lender participant's payment to the loan loss reserve program.

ELIGIBLE LOANS

SEC. 404. (a) The Executive Director shall certify those financial institutions which, by virtue of their experience, financial capability, and such other criteria as may be established under regulations issued pursuant to this title, are eligible to participate in the loan loss reserve program.

(b) Any financial institution may be disqualified from further participation in the loan loss reserve program on a finding, by the Board, in accordance with such regulations, that such institution has violated any of the provisions of this title, or any regulation issued pursuant thereto, or that such institution is insolvent.

(c) A loan made by a lender participant shall be recorded for the purpose of this section if the loan is approved under section 406 and if the borrower is a qualifying business.

(d) Not more than 25 per centum of the proceeds of any loan made pursuant to this Act shall be used for the repayment of one or more existing loans.

LOAN TERMS

SEC. 405. (a) Loans made pursuant to this title may bear interest at either a fixed or variable rate.

(b)(1) The total premium charge for each loan made pursuant to this title shall be paid in equal and matching amounts by the qualifying business, the lender participant, and the Federal Government.

(2) The lender shall determine the total premium charge for each loan made pursuant to this title. Such total premium charge shall be from 6 per centum to 15 per centum of the loan.

(3) When a loan is made by two or more lender participants, each lender participant's portion of the premium charge shall be proportionate to its participation in the loan.

APPLICATION PROCEDURE

SEC. 406. (a)(1) An application to record a loan made pursuant to this title shall be made by an eligible lender in such form as the Executive Director may require.

(2) The application shall set forth the amount of the loan, its maturity, interest rate, and amortization schedule.

(b) If, upon application by a lender participant, the Executive Director finds that the lender participant has made an eligible loan, the director shall record the loan.

(c) The lender participant shall submit, together with the application, the following premium charges determined by the lender—

(1) the percent premium charges payable by the lender participant; and

(2) the percent premium charge payable by the qualifying business.

(d)(1) All premium charges collected shall be deposited in the Fund.

(2) Upon recording a loan, the Executive Director shall pay, from funds appropriated for the purposes of this title, the premium charge payable by the Federal Government into the Fund.

(e)(1) All loans made pursuant to this title shall be recorded in a register to be maintained by the Board.

(2) The registration shall set forth the information contained in the application.

(f) All contributions made by a borrower and lender participant shall be allowed as an expense deduction in the year contributed for purposes of the Internal Revenue Code of 1954.

(g) Lender contributions shall not count toward the maximum amount of loan loss reserves that a bank can set aside from after tax earnings.

DEFAULTS

SEC. 407. (a) Upon default by a qualifying business on any eligible loan made pursuant to the provisions of this title—

(1) the Executive Director may require the lender participant to show how the proceeds of the loan were disbursed;

(2) the lender participant shall take such steps, and avail himself of such rights and remedies as may be available except when, in the determination of the Board, special circumstances exist which do not warrant taking such action; and

(3) the lender participant shall promptly notify the Executive Director, and the Executive Director shall, either at that time or after further collection efforts, pay to the lender participant the amount of loss.

(b)(1) In addition to the amount of loss, the lender participant may be reimbursed for all reasonable and necessary collection expenses incurred in the attempted collection of the loan.

(2) Such collection expense shall be a charge against that portion of the Fund attributable to the lender participant who made the loan.

(3) Before disbursing such funds, the Executive Director shall determine if such collection expenses are reasonable and necessary.

(c) Payments made to a lender participant pursuant to this section shall not exceed the amount retained in the Fund attributable to the lender participant who made the loan, except that the Executive Director may issue regulations providing for subsequent reimbursement when that portion of the loan loss reserve fund attributable to that lender participant is less than the amount of loss.

(d) Amounts recovered by a lender participant's collection efforts subsequent to reimbursement for a loss pursuant to this section shall first be paid into the Fund to the credit of the lender participant.

(e) Nothing in this section shall be construed to excuse a lender participant from exercising reasonable care and diligence in the making and collection of loans under the provisions of this section.

(f) If the board, after reasonable notice and opportunity for hearing, finds that an eligible lender has substantially failed to exercise such care and diligence as is required under this section, he shall disqualify that lender for further loans made pursuant to this Act until the Board is satisfied that its failure has ceased and finds that there is reasonable assurance that the lender will in the future exercise necessary care and diligence.

(g) The Executive Director shall establish procedures to assure that lenders are not reimbursed for any loan which does not comply with section 404(d).

CAPITALIZATION

SEC. 408. There are authorized to be appropriated $200,000,000 to the Fund.

S. 934—NATIONAL INDIVIDUAL TRAINING ACCOUNT ACT

Mr. HART. Mr President, today I am introducing a bill to deal with the growing problem of the massive displacement of workers caused by our rapidly changing economy.

The National Individual Training Account Act establishes a system of accounts, funded by voluntary contributions from employers and employees, for use by unemployed workers for training or relocation. It is an easily administered, self-financing system that will not add to the aleady severe financial pressures on the unemployment insurance system nor depend on annual appropriations from Congress. The system of training accounts established in the bill represents a long-awaited Federal response to the problem of how we fund and affect the needed retooling of our Nation's workplace.

America's employment needs have been profoundly affected by major shifts in our economic base. Improved automation techniques, the introduction of new technologies, the decline of employment in basic manufacturing industries and the growth in foreign competition have combined to increase worker dislocation and produce a shortage of skilled labor in our newer industries.

The Department of Labor projects a shortage of 2.5 million skilled workers by 1990. As the shortage of skilled labor becomes more acute, the numbers of dislocated workers are increasing rapidly. A November 1984 Department of Labor study shows that 5.1 million long-term workers were displaced from their jobs between 1979 and 1984 because of plant shutdowns or relocation, slack work, or the elimination of a position or shift. While 60 percent of these workers have found new work, almost half of those reemployed in full-time jobs are earning less than they did in their prior jobs. And 1.3 million of the 5.1 million dislocated workers—or about 25 percent—continue their search for work.

Today, institutions in the public and private sectors are not adequately prepared to assist displaced workers in finding new jobs and training for them. While the private sector has begun to recognize the importance of retraining programs for our work force, the programs offered, primarily by large corporations, cannot begin to meet the existing need for massive retraining efforts.

Federal programs offer little more. The unemployment insurance system provides income support to unemployed workers but furnishes no aid that leads to reemployment. Although title III of the Job Training Partnership Act was enacted to deal with the problem of the dislocated worker, the very limited funding allotted this program ensures that it reaches only a small proportion of workers who require job retraining.

In short, Federal programs fail to address the critical mismatch of job market demands and the current skills of our labor force.

The establishment of a system of individual training accounts will help rectify the mismatch between job skills and market demands by enabling workers to gain the skills necessary to meet the changing demands of the job market.

The National Individual Training Account Act is a voucher-based system modeled on a very successful national retraining program, the GI bill, and a savings and equity based financing system analogous to the individual retirement account.

The legislation authorizes employers and employees to make annual tax deductible contributions in the amount of 0.8 percent of the employee's salary or $250, whichever is less, to an interest-bearing training account. Upon involuntary umemployment, the participating worker is entitled to withdraw funds, in the form of a tax-free voucher, to attend a certified training program of the worker's choice. Upon the worker's retirement, the unused balance of the account, plus accumulated interest, is refunded to the employer and employee.

The provisions of the National Individual Training Account Act are geared to encourage personal choice, initiative, flexibility, and the wise use of funds with only limited Government involvement. Most importantly, the establishment of a system of training accounts will enable workers to thrive in an economy in transition. By ensuring that America's most valuable resource, the skill and knowledge of its people, is fully competitive, our Nation will continue to prosper in this time of great change.

The text of the bill follows:

S. 934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Individual Training Account Act of 1985".

TITLE I—INDIVIDUAL TRAINING ACCOUNTS

ESTABLISHMENT OF NATIONAL INDIVIDUAL TRAINING ACCOUNT PROGRAM

SEC. 101. (a) There is hereby established the national individual training account program (hereinafter in this title referred to as the "program") to be administered by the Secretary of Labor and the Secretary of the Treasury in cooperation with the several States. The purpose of the program is to provide incentives to employers and employees to invest in a system of individual training accounts that shall be used to defray the costs of employee training in the event an employee becomes or is about to become involuntarily unemployed. It is the intent of the Congress that—

(1) the program be maintained as a voluntary system open to any employee and any employer of such employee who elect to participate in the program, and

(2) amounts on deposit in individual training accounts be invested in a manner that will yield a high return.

(b) The Secretary of Labor shall prescribe such regulations as may be necessary to administer the program in accordance with this Act.

(c)(1) The Secretary of Labor, on behalf of the United States, may enter into an agreement with any State, or with any agency administering the unemployment compensation laws of any State, under which such State or agency shall—

(A) issue and redeem, as an agent of the United States, vouchers to pay training and relocation expenses in accordance with this Act;

(B) accept contributions, as the agent of the United States, from employees and employers for deposit into individual training accounts and distribute any amount in any such account at such times as any distribution from such account is authorized under section 103(b);

(C) provide individual counseling or job and training referral services to any participant in the program; and

(D) cooperate with the Secretary of Labor, the Secretary of the Treasury, and any other officer of any agency of the Federal Government or any other State in carrying out the purposes of this Act.

(2) The Secretary of Labor shall provide such information and shall detail, on a reimbursable basis, such personnel as may be requested by any State to assist such State to establish a State individual training account program which meets the requirements of section 3310 of the Internal Revenue Code of 1954 (as amended by section 202 of this Act).

DUTIES OF THE SECRETARY OF LABOR

SEC. 102. (a) The Secretary of Labor shall establish by regulations procedures for conducting the following activities:

(1) Acceptance and transfer of contributions for credit to any individual training account.

(2) Acceptance and review of any application for a voucher for training and relocation expenses filed by an individual who maintains a balance in an individual training account established for the benefit of such individual.

(3) Redemption of any voucher issued in accordance with section 103(d) for training or relocation expenses.

(4) Acceptance and review of any application for any distribution under section 103(b) from any account.

(5) Acceptance and review of any application relating to obtaining a certificate of eligibility for a training program.

(6) Review and transfer of any information collected or determination made by any State or person relating to any labor market, any training program, and any other factor which such Secretary may take into account for the purpose of any determination under this Act.

(b)(1) The Secretary of Labor and the Secretary of the Treasury shall establish procedures, by regulations issued jointly by them, for conducting the following activities:

(A) The transfer to the Secretary of the Treasury of any contribution for deposit in the Unemployment Trust Fund to the credit of any individual training account and any related account.

(B) The allocation and distribution among the several States of any amount credited to the individual training account administration account.

(C) The allocation and distribution of any amount in any individual training account among any contributors to such account pursuant to section 103(b).

(D) The determination and collection of any excess amounts paid or distributed from any account established in the Unemployment Trust Fund under section 910 of the Social Security Act.

(2) The Secretary of Labor and the Secretary of the Treasury shall establish procedures, by regulations issued jointly by them, for making a determination that any amount in any individual training account is incapable of being distributed to any person entitled to such distribution.

DISTRIBUTIONS FROM INDIVIDUAL TRAINING ACCOUNTS

SEC. 103. (a)(1) For purposes of this title, the term "eligible individual" means any individual who is involuntarily unemployed through no fault of his own.

(2) Any eligible individual may withdraw from an individual training account established for the benefit of such individual—

(A) such amount as is necessary to pay training expenses incurred by such eligible individual in a training program determined by the Secretary of Labor, under section 104, to be an eligible training program; or

(B) an amount not to exceed $1,000 to pay relocation expenses approved by the Secretary of Labor or the authorized agent of such Secretary under section 105, with respect to such eligible individual.

(3) If the employer of any employee certifies to the Secretary of Labor or the authorized agent of such Secretary that such employee will be discharged permanently within the six-month period beginning on the date such certification is submitted to the Secretary or such agent, such employee shall be treated as an eligible individual as of such date if such employee would, but for the fact that such discharge has not yet occurred, be an eligible individual on such date.

(b)(1) In the case of an employee who—

(A) voluntarily ceases to be employed by his employer, or

(B) involuntarily ceases to be employed by such employer through the fault of such employee,

an amount equal to the sum of any amounts contributed by such employer to an account established for the benefit of such employee shall be distributed to the employer from such account in the manner provided in paragraph (5).

(2) In the case of an employee who retires from his employment by his employer or who dies while employed, any balance in the individual training account established for the benefit of such employee shall be distributed from such account among the contributors to the account (or the successor in interest to any such contributor) in the manner provided in paragraph (5). The employee's share of any balance in such account, in the case of an employee who has died before such distribution is made, shall be distributed to and included in the estate of such employee.

(3) For purposes of this subsection, an employee who ceases to be employed because such employee has become disabled (within the meaning given to such term by section 72(m)(7) of the Internal Revenue Code of 1954) shall be treated as an individual who has retired.

(4) In the case of any distribution under this subsection of any amount from the balance in an individual training account, such amount shall be distributed among the contributors to such account (or the successors in interest to any such contributor) who are authorized to receive such distribution under any paragraph of this subsection. Any division of the amount in any such account being distributed among such contributors shall reflect—

(A) the amount of the net income of the account which is attributable to the contributions of each such contributor, and

(B) a proper allocation of any amounts previously distributed from such account for approved job training or relocation expenses among the contributions which were made before any such distribution (including the net income of the account which was attributable to such contributions and was earned before such distribution).

(5) For purposes of making any distribution under this subsection, the Secretary shall prescribe by regulations the manner in which any determination shall be made with respect to recognizing any person as the successor in interest to any employer in the case of any merger, acquisition, or liquidation affecting such employer.

(c) No distribution from an individual training account shall be made unless—

(1) application to the Secretary of Labor, through a State public employment office or other agency, is made by the person seeking such distribution, and

(2) such application is approved by the Secretary of Labor or an authorized agent of such Secretary in accordance with this title.

(d)(1) The Secretary of Labor shall establish a voucher system for making distributions from individual training accounts for training or relocation expenses.

(2) A voucher issued to an eligible individual under such system to pay training expenses or relocation expenses shall be redeemed by a public employment office (or such other agency which the Secretary of Labor has approved under section 3304(a)(1) of the Internal Revenue Code of 1954) for an amount not to exceed—

(A) the face value of the voucher, or

(B) the actual cost of such expenses,

whichever is less, upon the presentation of such voucher to such office (or such agency) by the person who provided or is providing

the service for which such expenses were incurred.

(3) No voucher issued to any eligible individual may be used to pay any expenses of any other individual.

(e)(1) In the case of any payment or distribution to any person from any individual training account (or the individual training account insurance account in the Unemployment Trust Fund) in excess of the amount to which such person is entitled under this Act, such excess amount shall be declared by the Secretary of the Treasury (in such manner as such Secretary shall prescribe by regulations) to be an amount due such Secretary by such person. The Secretary of the Treasury shall prescribe by regulations the manner in which any such excess amount shall be repaid by such person or otherwise collected from such person.

(2) Upon receipt of any repayment of any excess amount referred to in paragraph (1), the Secretary of the Treasury shall, subject to paragraph (3), credit the individual training account of the individual for whose benefit such payment was made for the amount of such repayment.

(3) To the extent any payment or distribution referred to in paragraph (1) gave rise to a debit by the Secretary of the Treasury of the individual training account insurance account in the Unemployment Trust Fund pursuant to section 910(a)(3) of the Social Security Act, the Secretary of the Treasury shall credit such insurance account for so much of the amount of any repayment under this subsection as does not exceed the amount of any such debit.

(f)(1) No voucher issued to an eligible individual before the end of the one-year period beginning on the date of the first contribution by such individual to the individual training account established for his benefit may bear a face value in excess of the balance in such account on the date of such issue.

(2) If the redemption of any voucher issued under this section to pay the training or relocation expenses of any individual gives rise to a debit by the Secretary of the Treasury of the individual training account insurance account in the Unemployment Trust Fund pursuant to section 910(a)(3) of the Social Security Act, no additional voucher for such purposes shall be issued to such individual for any amount in excess of any balance in the individual training account established for the benefit of such individual at any time—

(A) after the date of the redemption of the voucher which gave rise to such debit, and

(B) before the end of the one-year period beginning on the date of the first contribution by such individual to the individual training account established for his benefit after such individual obtained employment following such training or relocation.

(3) Notwithstanding subsection (a), no unemployed individual shall be treated as an eligible individual before the end of the one-year period beginning on the date of the enactment of this Act. Any unemployed individual who, but for the preceding sentence, would be an eligible individual shall be treated during such one-year period as an employee who has voluntarily ceased to be employed by the employer of such individual.

ELIGIBLE TRAINING PROGRAMS; CERTIFICATION BY THE SECRETARY

SEC. 104. (a) In the case of an application under section 103(c) by an eligible individual for a voucher under section 103(d) for a withdrawal from an individual training account to pay the expenses of training in any trade or occupation, no such application shall be approved by the Secretary of Labor or any authorized agent of such Secretary unless the training program providing such training has been certified by the Secretary of Labor to be an eligible training program under this section with respect to such trade or occupation.

(b) A training program shall be certified by the Secretary of Labor as an eligible training program for purposes of section 103(a)(2) of this title and section 197(f)(2) of the Internal Revenue Code of 1954 if the Secretary determines to his satisfaction that—

(1) the quality of such training program will be adequate and reasonable for the trade or occupation for which such training is being or will be provided;

(2) subject to subsection (d), the trade or occupation for which such training is being provided under such program is one which is likely to lead to employment opportunities for the participant in such program;

(3) the facilities and equipment to be used are suitable for such program and the instructors in such program are qualified to provide training in such trade or occupation; and

(4) the training program meets such other requirements as the Secretary may establish under the program.

(c) The Secretary of Labor shall by regulation prescribe procedures governing the manner in which a program may be certified under subsection (b) as an eligible training program for purposes of this title. Such procedures shall provide for the following factors to be taken into consideration by the Secretary before making such certification:

(1) The projections by the Bureau of Labor Standards pursuant to section 462(a) of the Job Training Partnership Act with respect to future demand for the occupation for which training is being provided under such training program.

(2) The training and education requirements for such occupation maintained by the Secretary of Labor pursuant to section 462(b) of such Act.

(3) Information collected and maintained by a State labor market information program referred to in section 125 of such Act concerning education and training supply support needs of the State within which such training program is situated.

(4) With respect to the quality of such training program, any determination relating to such program by the Secretary of Education, any State education agency, any State agency which regulates or accredits apprenticeship programs, any private industry organization, any agency or organization which receives Federal financial assistance under the Jobs Training Partnership Act, or any nationally recognized accrediting agency or association which the Secretary of Labor determines to be reliable authority as to the quality of training offered.

(5) Such other factors as the Secretary of Labor may determine to be relevant to such certification.

(d) No training program in low-wage industries where prior skill is typically not a prerequisite and labor turnover is high shall be approved by the Secretary as an eligible training program for purposes of subsection (a).

QUALIFIED RELOCATION EXPENSES; APPROVAL BY THE SECRETARY

SEC. 105. (a) In the case of an application under section 103(c) by an eligible individual for a voucher under section 103(d) for a withdrawal from an individual training account to pay relocation expenses incurred by such employee, no such application shall be approved by the Secretary of Labor or any authorized agent of such Secretary unless such Secretary or such agent determines that reimbursement from such account for such relocation is consistent with the purposes of this Act and the requirements of this section.

(b) Subject to the dollar limitation contained in section 103(a)(2)(B), the Secretary of Labor or any authorized agent of such Secretary may approve any application for a voucher to pay the costs incurred by an eligible individual for moving costs and such other reasonable costs incidental to the relocation of such employee which such Secretary or such agent may designate.

(c) The Secretary of Labor shall by regulation prescribe procedures governing the manner in which an eligible individual may be certified as eligible for relocation expenses under this section.

(d)(1) No application for payment of relocation expenses of any eligible individual shall be approved by the Secretary of Labor or any authorized agent of such Secretary for the relocation of such individual outside the State in which such individual was last employed before the end of the thirteen-week period beginning on the date such individual was last employed.

(2) No application described in paragraph (1) shall be approved after the end of the thirteen-week period referred to in such paragraph unless the public employment service of the State in which an eligible individual was last employed (or such other agency which the Secretary of Labor has approved under section 3304(a)(1) of the Internal Revenue Code of 1954) determines that no employment opportunity exists within such State in any trade or occupation of such individual.

(3) In the case of an eligible individual who was last employed in one State and during such last employment resided in another State—

(A) paragraph (1) shall be applied so as to allow the payment of relocation expenses for the relocation of such individual within either such State during the 13-week period referred to in such paragraph, and

(B) the determination under paragraph (2) shall be made with respect to employment opportunities within both such States before an application may be approved for the payment of relocation expenses for the relocation of such individual to any place outside of both such States.

INDIVIDUAL TRAINING ACCOUNTS ESTABLISHED AS SEPARATE BOOK ACCOUNTS IN UNEMPLOYMENT TRUST FUND

SEC. 106. (a) Title IX of the Social Security Act (relating to miscellaneous provisions relating to employment security) is amended by inserting at the end thereof the following new section:

"INDIVIDUAL TRAINING AND RELATED ACCOUNTS ESTABLISHED

"SEC. 910. (a)(1) There shall be established in the Unemployment Trust Fund an individual training account for the benefit of each individual who elects to participate in a State individual training account program approved by the Secretary of Labor in ac-

cordance with section 3310 of the Internal Revenue Code of 1954. No more than one such account shall be established for the benefit of any individual. Each such account shall be maintained as a separate book account in the manner provided in section 904(e).

"(2) Any amount received by the Secretary of the Treasury as a contribution to an individual training account shall be deposited in the Fund and, except as provided in subsections (b)(2) and (c)(2), credited to such account. To the extent the credit of any such amount to such account would cause the balance in such account to exceed $4,000, the amount of such contribution which would create such excess shall be promptly returned to the contributor of such amount.

"(3) Upon receipt of notification from the Secretary of Labor of any redemption by any State of any voucher for training or relocation expenses of an individual for whose benefit an individual training account has been established, the Secretary of the Treasury shall—

"(A) debit the individual training account of such individual for such amount, and

"(B) credit the State individual training account for such State for such amount.

If the amount of any such redemption exceeds the balance maintained in such account and does not exceed $4,000, the Secretary of the Treasury shall debit the individual training account insurance account for such excess amount.

"(4) Upon making a determination in accordance with procedures established pursuant to section 102(b)(2) of the National Individual Training Account Act of 1985 that any amount credited to any individual training account is incapable of being distributed to any person entitled to such distribution under section 103(b) of such Act, the Secretary of the Treasury shall—

"(A) transfer such amount from the Fund to the general fund of the Treasury, and

"(B) debit the account for such amount.

"(b)(1) There is hereby established in the Unemployment Trust Fund an individual training account administration account. Such account shall be maintained as a separate book account in the manner provided in section 904(e).

"(2) Of any amount received by the Secretary of the Treasury as a contribution to an individual training account, percent of such amount shall be credited to the individual training account administration account.

"(3) Upon receipt of notice from the Secretary of Labor of any amount determined (in accordance with regulations promulgated pursuant to section 102(b)(2) of the National Individual Training Account Act of 1985) to be due any State for assisting such State to administer the individual training account program in such State, the Secretary of the Treasury shall—

"(A) debit the individual training account administration account for such amount, and

"(B) credit the State individual training account for such State for such amount.

"(c)(1) There is hereby established in the Unemployment Trust Fund an individual training account insurance account. Such account shall be maintained as a separate book account in the manner provided in section 904(e).

"(2) Before the end of each fiscal year, the Secretary of the Treasury shall—

"(A) debit each individual training account for $25, and

"(B) credit the individual training account insurance account for such amount.

"(d)(1) There shall be established in the Unemployment Trust Fund a State individual training account for each State which participates in the national individual training account program. Each such account shall be maintained as a separate book account in the manner provided in section 904(e).

"(2) At least once during each quarter of each fiscal year (or upon the receipt of a request for payment from the Governor or other chief executive of any State), the Secretary of the Treasury shall—

"(A) out of any amount on deposit in the Fund, pay to each State for which a State account has been established under paragraph (1) (or, in the case of any such request, such State) an amount equal to the balance in the State account for such State, and

"(B) debit such State account for such amount.".

(b) Subsection (e) of section 904 of the Social Security Act is amended by striking out "and the railroad unemployment insurance administration fund" and inserting in lieu thereof "the railroad unemployment insurance administration fund, the individual training account administration account, the individual training insurance account, each individual training account, and each State individual training account".

TITLE II—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954 RELATING TO INDIVIDUAL TRAINING ACCOUNTS

SEC. 201. APPROVED STATE INDIVIDUAL TRAINING ACCOUNT PROGRAM REQUIRED FOR APPROVAL OF STATE UNEMPLOYMENT COMPENSATION LAWS.

(a) IN GENERAL.—Subsection (a) of section 3304 of the Internal Revenue Code of 1954 (relating to approval of State laws) is amended by redesignating paragraph (18) as paragraph (19) and inserting after paragraph (17) the following new paragraph:

"(18) a State individual training account program which has been approved by the Secretary of Labor under section 3310 is in effect in such State; and".

(b) CONFORMING AMENDMENT.—Paragraph (17) of such subsection (a) of such section 3304 is amended by striking out "and" at the end thereof.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to certifications of State laws for 1986 and subsequent years.

SEC. 202. STATE INDIVIDUAL TRAINING ACCOUNT PROGRAM REQUIREMENTS.

(a) IN GENERAL.—Chapter 23 of the Internal Revenue Code of 1954 (relating to the Federal Unemployment Tax Act) is amended by redesignating sections 3310 and 3311 as sections 3311 and 3312, respectively, and by inserting after section 3309 the following new section:

"SEC. 3310. STATE INDIVIDUAL TRAINING ACCOUNT PROGRAM REQUIREMENTS.

"The Secretary of Labor shall approve the individual training account program of any State which he finds meets the following requirements:

"(1) The public employment agency of such State is authorized and required under the law of such State to act as the agent of the Secretary of Labor with respect to the administration of the National Individual Training Account Act of 1985 to the extent required by such Act and any regulation promulgated by such Secretary pursuant to such Act.

"(2) All public employment offices (or such other agency which the Secretary of Labor has approved under section 3304(a)(1)) in such State shall accept money for deposit in an individual training account.

"(3) Participation in such program shall be voluntary and open to any employee covered under the unemployment compensation laws of such State and the employer of such employee.

"(4) An individual training account shall be established under such program only if the employee for whose benefit such account is established and the employer of such employee each agree to contribute to such account, in each calendar year during which such account is maintained, a minimum of—

"(A) $250, or

"(B) an amount equal to 0.8 percent of the wages paid by such employer to such employee during such calendar year,

whichever is less, subject to the limitation contained in section 910(a)(2) of the Social Security Act with respect to accounts which have a balance of $4,000 or more.

"(5) Any voucher for training or relocation expenses presented to any public employment office (or such other agency which the Secretary of Labor has approved under section 3304(a)(1)) in such State by the person who provided the service for which such expenses were incurred shall be paid by such State subject to reimbursement from the State individual training account for such State in the Unemployment Trust Fund in accordance with section 910(d)(2) of the Social Security Act.

"(6) No application by any individual for a voucher for training or relocation expenses shall be accepted unless such individual has received individual counseling from any public employment office (or such other agency which the Secretary of Labor has approved under section 3304(a)(1)) with respect to seeking employment.

"(7) Such State shall provide such cooperation to other States as may be necessary to administer the National Individual Training Account Act of 1985."

(b) TECHNICAL AND CONFORMING AMENDMENT.—Subsection (j) of section 3305 of such Code is amended by striking out "section 3310" and inserting in lieu thereof "section 3311".

(c) CLERICAL AMENDMENT.—The table of sections for such chapter 23 is amended by redesignating the items relating to sections 3310 and 3311 as sections 3311 and 3312, respectively, and by inserting after the item relating to section 3309 the following new item:

"Sec. 3310. State individual training account programs."

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

SEC. 203. DEDUCTION ALLOWED FOR CONTRIBUTION TO INDIVIDUAL TRAINING ACCOUNT.

(a) IN GENERAL.—Part VI of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to itemized deductions for individuals and corporations) is amended by adding at the end thereof the following new section:

"SEC. 197. CONTRIBUTIONS TO INDIVIDUAL TRAINING ACCOUNT.

"(a) DEDUCTION ALLOWED.—

"(1) EMPLOYEE.—In the case of an employee, there shall be allowed as a deduction an amount equal to the sum of the contributions paid or incurred by the taxpayer in the calendar year in which the taxable year

of the taxpayer begins to an individual training account established for the benefit of such employee in the Unemployment Trust Fund in accordance with section 910(a) of the Social Security Act.

"(2) EMPLOYER.—In the case of an employer, there shall be allowed as a deduction an amount equal to 125 percent of the sum of the contributions paid or incurred by the taxpayer in the calendar year in which the taxable year of the taxpayer begins to an individual training account established for the benefit of any employee of such employer in the Unemployment Trust Fund in accordance with section 910(a) of the Social Security Act.

"(b) LIMITATION ON CONTRIBUTION IN EXCESS OF MAXIMUM ACCOUNT BALANCE.—No deduction shall be allowed under subsection (a)(1) or subsection (a)(2) for any contribution to an individual training account to the extent such contribution would cause the balance in such account to exceed $4,000.

"(c) SPECIAL RULES.—

"(1) AMOUNTS INCLUDED IN CONTRIBUTION.—The amount of any contribution for which a deduction is allowable under subsection (a) includes—

"(A) the amount credited to the individual training account administration account in accordance with section 910(b)(2) of the Social Security Act, and

"(B) the amount credited to the individual training account insurance account in accordance with section 910(c)(2) of such Act, with respect to such contribution.

"(2) DISALLOWANCE OF ANY OTHER DEDUCTION FOR CONTRIBUTION TO INDIVIDUAL TRAINING ACCOUNT.—No deduction otherwise allowable under any other provision of this title shall be allowed with respect to contributions by an employer to an individual training account.

"(d) CARRYOVER OF UNUSED DEDUCTIONS FOR EMPLOYERS.—If the sum of any amounts allowable as a deduction under subsection (a)(2) to any employer for any taxable year exceeds the taxable income of such employer for such taxable year (hereinafter referred to in this subsection as the 'unused deduction year'), such excess shall be—

"(1) a training account deduction carryback to each of the 3 taxable years preceding such unused deduction year, and

"(2) a training account deduction carryforward to each of the 3 taxable years following such unused deduction year.

The entire amount of the unused deduction for an unused deduction year shall be carried to the earliest of the 6 taxable years to which (by reason of the preceding sentence) such unused deduction may be carried and then to each of the other 5 taxable years to the extent that such unused deduction exceeds taxable income for a preceding taxable year to which such unused deduction may be carried. If any portion of such unused deduction is a carryback to a taxable year beginning before the effective date of this section, this section shall be deemed to have been in effect for such taxable year for the purpose of allowing such carryback as a deduction under this section.

"(e) TAX TREATMENT OF DISTRIBUTIONS.—

"(1) IN GENERAL.—Any amount paid or distributed out of an individual training account shall be included in gross income of the payee or distributee for the taxable year in which the payment or distribution is received to the extent that such amount represents the return of contributions by such payee or distributee to such account for which a deduction was allowed under subsection (a), including interest accrued in such account and attributable to any such contribution.

"(2) DISTRIBUTION USED TO PAY TRAINING OR RELOCATION EXPENSES.—Paragraph (1) shall not apply to any payment or distribution out of an individual training account to the extent such payment or distribution is used to pay training or relocation expenses approved by the Secretary of Labor (or an authorized agent of such Secretary) with respect to the employee for whose benefit such account has been established.

"(3) EXCESS CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—Paragraph (1) shall not apply to the distribution of any contribution paid by any person in any calendar year to an individual training account to the extent that such contribution exceeds the amount of the limitation contained in subsection (b) with respect to any contribution to such account if—

"(A) such distribution is received on or before the day prescribed by law (including extensions of time) for filing such person's return of income for the taxable year which began in such calendar year,

"(B) no deduction is allowed under subsection (a) with respect to such excess contribution, and

"(C) such distribution is accompanied by the amount of net income attributable to such excess contribution.

Any net income described in subparagraph (C) shall be included in the gross income of the person for the taxable year which began in the calendar year in which such excess contribution was made.

"(4) DENIAL OF DOUBLE BENEFIT.—No deduction shall be allowed under section 217(a) for costs incurred by any employee described in paragraph (2) of this section to the extent that such costs were paid by such employee with the proceeds of any payment or distribution to which such paragraph (2) applies.

"(f) DEFINITIONS.—For purposes of this section—

"(1) TRAINING EXPENSES DEFINED.—The term 'training expenses' means—

"(A) tuition and fees required for the enrollment or attendance of an employee in an eligible training program, and

"(B) books, supplies, or equipment required for enrollment in such program and supplied through such program.

"(2) ELIGIBLE TRAINING PROGRAM DEFINED.—The term 'eligible training program' means a training program approved by the Secretary of Labor under section 104(b) of the National Individual Training Account Act of 1985.

"(3) RELOCATION EXPENSES DEFINED.—The term 'relocation expenses' means any expense described in section 217(b) which has been approved by the Secretary of Labor (or an authorized agent of such Secretary) under section 105(b) of the National Individual Training Account Act of 1985.

"(4) EMPLOYER DEFINED.—The term 'employer' has the meaning given to such term by section 3306(a).

"(5) EMPLOYEE DEFINED.—The term 'employee' has the meaning given to such term by section 3306(i)."

(b) CLERICAL AMENDMENT.—The table of sections for part VI of subchapter B of chapter 1 of such Code is amended by inserting after the item relating to section 196 the following new item:

"Sec. 197. Contribution to individual training account."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to contributions to individual training accounts made after December 31, 1984, in taxable years ending after such date.

SEC. 204. NO REDUCTION IN FEDERAL UNEMPLOYMENT TAX IN CASE OF LARGE EMPLOYER WHO REFUSES TO PARTICIPATE IN PROGRAM.

(a) IN GENERAL.—Chapter 23 of the Internal Revenue Code of 1954 (relating to the Federal Unemployment Tax Act) is amended by inserting after section 3303 the following new section:

"SEC. 3303A. NO REDUCTION IN TAX IN CASE OF LARGE EMPLOYER WHO REFUSES TO PARTICIPATE IN NATIONAL INDIVIDUAL TRAINING ACCOUNT PROGRAM.

"(a) IN GENERAL.—In the case of any large employer which refuses to enter into an agreement described in section 3310(4) at the request of any employee in any calendar year with respect to which such employer would otherwise be subject to the tax imposed under section 3301 at the rate described in paragraph (2) of such subsection, such employer shall be subject to such tax with respect to such calendar year at the rate described in paragraph (1) of such section.

"(b) LARGE EMPLOYER DEFINED.—For purposes of subsection (a), the term 'large employer' means any employer (within the meaning given such term by section 3306(a)) which during the calendar year employed an average of not less than 25 employees."

(b) CLERICAL AMENDMENT.—The table of sections for such chapter 23 is amended by inserting after the item relating to section 3303 the following new item:

"Sec. 3303A. No reduction in tax in case of large employer who refuses to participate in national individual training account program."

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to calendar years beginning after December 31, 1986.

(d) APPROPRIATION OF AMOUNTS ATTRIBUTABLE TO THE OPERATION OF SECTION 3303A(a) OF SUCH CODE.—For the expense of administering the Federal-State employment service, there is hereby appropriated to the Secretary of Labor for each fiscal year ending after January 1, 1986, an amount determined by the Secretary of the Treasury to be equivalent to percent of the amounts received in the general fund in the Treasury which are attributable to the operation of section 3303A(a) of the Federal Unemployment Tax Act (relating to denial of reduction in tax rate in case of large employer who refuses to participate in the national individual training account program).

S. 935—THE HIGH TECHNOLOGY MORRILL ACT

Mr. HART. Mr. President, I am pleased to join Senator STENNIS in introducing the High Technology Morrill Act. My hope is that this legislation will do for high technology what the original Morrill Act of 1862 did for American agriculture—make it the most productive and globally competitive industry in the world.

The purpose of the legislation is to promote joint initiatives by private industry, educational institutions, and state government to strengthen science, engineering, and technical education. It is my conviction that such partnerships offer a significant solution to the problems which have plagued American industries in recent years.

Historically, this Nation's economic strength has been built on the ability of our industries to be on the cutting edge of technology and innovation. Our position has been eroded, however, in the international marketplace by competitors who have made a more dedicated effort to upgrade their industrial capacity, respond to technological change, and improve the quality and quantity of their human resources. But the best minds of our younger people have not returned toward engineering and the sciences; our schools have proven more adept at producing lawyers and managers instead.

We are failing to provide basic science and math skills to our elementary and secondary school students. We are producing an insufficient number of technically trained individuals at a time when the demand for scientists and engineers is increasing rapidly. The Bureau of Labor Statistics projects that the demand for people in these areas will increase by 40 percent by 1990. This translates into about 180,000 new jobs in mathematical, physical, and life sciences; 480,000 in the computer professions; and 250,000 in engineering. Who will fill these jobs? How can we expect to meet the demand for skilled workers if we don't do something to improve their educational opportunities?

We must increase the quality of technological education at all levels. Basic math and science must be emphasized at the elementary and secondary levels. Our colleges and universities must upgrade their science and engineering programs. And our educational system must provide training programs for workers who need more technical skills.

Our educational institutions cannot handle the job alone. Thus, the High Technology Morrill Act encourages partnerships nationwide among State governments, industries, and educational institutions. The act establishes a technology trust fund, financed by revenues from the sale and rental of energy and mineral resources on Federal lands, to respond to partnership initiatives by providing matching grants to educational institutions. The role of the Federal Government is limited to providing national direction and shared funding of the program.

Under the act, specific projects would be initiated by local industry in cooperation with education and State economic development agencies. In my judgment, projects initiated jointly by a corporation and campus represent the wisest and most effective way to proceed. This ensures that programs respond to legitimate technological needs, it makes wise use of educational resources, and it satisfies economic development priorities.

The bill authorizes use of the funds by educational institutions to develop programs to enhance science and engineering teaching as a career, establish research and training centers, modernize laboratory equipment, start computer literacy programs, initiate retraining programs for workers with outmoded skills and support other approved programs that strengthen technological education.

Mr. President, this is truly a bill for America's future that is firmly grounded in today's realities and challenges. By developing now our human resources to meet the challenges of new technologies, we are safeguarding for the future our Nation's leading role in a changing world.

My hope is we in this body can put into place this year a legislative piece as creative and far sighted as Senator Morrill's piece over a century ago.

Mr. STENNIS. Mr. President, I am pleased to join with my fine friend and colleague from Colorado, Mr. HART, in again introducing the High Technology Morrill Act. As you know, this is an extremely important issue and it is one that I have been concerned about for some time.

The unmatched progress and growth of our great Nation over the past 200 years has come in a large measure from the leadership of our Nation in the practical application of science and technology. In every field of endeavor—agriculture, space, communications, commerce, medicine, chemistry, energy, and so on—U.S. engineers and scientists have led the way in getting the job done. Their record of scientific achievement has created the most bountiful nation and economy ever to exist, by and large, on the face of the Earth.

But with all of our progress, storm clouds are on the horizon. Some are the result of the pace of the new discoveries in science and technology. These changes are coming at such blinding speed that many of our workers are being dislocated by new machines and new methods of manufacturing.

Some of the storm clouds are the result of forces which are largely economic. The wage and price battles which characterized the 1960's and 1970's have weighed heavily on our major industries. Many of these mainstay industries, like autos and steel, have not since been able to successfully compete in international competition. And while higher prices took a heavy toll, there are other factors, some related to our engineering abilities. The most modern auto production plants in Japan seem to turn out autos that have the appearance of being of higher quality by virtue of better fit and finish. Some consumers say that the automobiles built by our foreign competitors are more reliable and perform more to their liking.

Mr. President, those are not idle words. Those words are not hurriedly chosen and spoken. I am a stubborn kind of fellow and I was slow to yield to the validity of these facts that I have just related. However, I decided we have to face the facts, whatever they are, and we have to try to do something about them.

Finally, and most important, there are signs that the United States is beginning to slip in areas of basic research. National testing programs and surveys tell us that recent high school and college graduates are becoming increasingly unaware of math and science. The downhill slide could have grave consequences for the Nation's economy and defense. Our economic prosperity and national security depends on the Nation's ability to reverse this downward trend in education, particularly in the fields of math and science.

The solution will not come easy. In discussions with educators in my State, I am told that there are serious deficiencies at all levels of math and science education. For example, over one-half of all new high school math and science teachers do not meet the full requirement for teaching and 10 percent of all college engineering faculty positions are either vacant or filled by temporary instructors.

Also, I am told that science, math, and engineering graduates right out of college can make more than their professors who have a higher degree. In my State of Mississippi, recent engineering graduates started at $27,000 while beginning high school and math teachers earned less than half that amount.

Because of the demands of our rapidly changing technical environment, we have placed a premium on engineering graduates. This, therefore, creates another problem in which the masters and doctorate programs have been brought to a standstill. Let me repeat that Mr. President. We all like to see a prosperous person get a good salary, so to speak. But this states—as a fact—that the salaries now paid by industry for engineers are so high that they have brought the masters and doctorate programs in education to a standstill. The net result is that industry is eating its own seed corn. Clearly, we must do something to make teaching of math, science, and other related areas more financially appealing.

This is not just a plea for money or another education bill trying to put out a limited program. This is a broad search, a broad appeal, for a new policy and new methods. I believe teaching is the second greatest profession; second only to the ministry itself.

I find to my surprise in this field that the school equipment and supply situation is also in a depressing state. University engineering and research equipment and facilities are outdated and obsolete in many instances. Sci-

ence equipment for all elementary and high schools is woefully inadequate or nonexistent when considered by the needs of the present demand. Something must be done and done soon to correct this problem.

Our college class of the year 2000 is now in elementary school. Think of that, Mr. President. These children, who are just now getting a start in the education process, will be the college class of the future, the year 2000. This generation may be the make-or-break generation to assure our future economic strength, our competitive edge in technology and production, and our ability to defend ourselves. This educational problem is urgent. Time has not run out on a solution but the clock is ticking fast.

Here I refer to the Soviet launching of sputnik in 1957. This Nation was reminded of the importance of maintaining its leadership in technology. Congress and the Nation got busy.

I remember one witness testified that unless we built a test facility with a thrust of 1 million pounds we would lose the race. Some segments of the press said it was ridiculous to talk about a million pounds of thrust. A short time later, due to the magnificent program we adopted, the thrust that we had then in one test facility was 6 or 7 or 8 million pounds.

We set our goals and passed the landmark National Defense Education Act which provided unprecedented levels of aid to school systems at all levels. We engaged in a bold crash program to land on the Moon.

These efforts were successful and they worked well together. As we all know, the real meaning of the Moon race was not just reaching the Moon but developing the expertise in the various fields and the technological ability to get there.

The challenge before us now is our economic future and our national defense. Someone said, "Oh, well, the Senator from Mississippi is always talking about national defense." I am proud to be able to talk about it some, but I say here now that this challenge is to our economic future. The warning signs are clearly there to heed. They are common knowledge to all of us—persistent unemployment, slowed productivity, and loss of market share.

Recently, I was at a launching of the Navy's newest guided-missile cruiser and they announced the crew of the old ship, *Ticonderoga*, was 800 men. That was some 80 to 100 years ago. This modern ship, which is said to be one of the greatest ever put together, has a crew of 400 men, a reduction of 50 percent.

Everywhere we are turning we are eliminating, through our scientific methods, the need for the individual to be employed. Something special must be done to meet the needs of our economy to furnish simple employment.

There will not be any magic solution to any of these problems now confronting our Nation, but they must be addressed and those problems must be solved. As it always has, it will require imagination, discipline, application, and plenty of plain commonsense and hard work.

I am confident that we have the resources to conquer these problems with a good foundation already in place to build upon. We have the world's highest student retention rate—three quarters of the U.S. children finish the 12th grade. We have the largest public school and university system in the world and the finest school buildings by any objective measure. This is a valuable storehouse of capital which can be used to build on and restore the United States to a preeminent position in science and technology. However, there is a rub in our present situation—the lack of those key students.

This effort must start in the schools. We need to correct the shift away from the quality of education which seems to be occurring. Our children have proven that they have an enormous capacity for learning. We need to address the teacher shortage and equipment problems of our educational institutions. Also, we need to address the need for upgrading the education and training of our current engineers, scientists, and technicians.

It is for this reason I have joined with Senator HART and others to introduce the High Technology Morrill Act. This legislation, in my opinion, would provide much of the needed stimulus to get our educational system headed back in the right direction. It will involve the government, educational institutions and industry in an attack on the educational problems of preparing for our Nation's future. We all—parents, Government, industry, and educators—have an enormous stake in this.

I ask my colleagues to join us in this important effort and urge that this bill be considered by the appropriate committee as soon as possible. I offer my assistance to work for its passage.

The text of the bill is as follows:

S. 935

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "High Technology Morrill Act."

FINDINGS

SEC. 2. The Congress finds that—

(1) the relationship between a healthy and vibrant national educational system and a healthy economy is inseparable in an era of technology dependent economic growth;

(2) competitor nations have given priority to the relationship between education and economic growth, especially as it pertains to new high technology industries such as electronics, computers, communications, aerospace, biotechnology, new materials, energy, and other technology-intensive fields;

(3) the future international industrial competitive position of the United States depends on maintaining United States scientific and technological leadership, increasing the rate of innovation, and increasing the productivity of our basic industries, all of which require a well-educated, motivated, and technologically proficient work force;

(4) while the rapid growth of high technology industries and the large increases in defense spending are exerting increasing pressure on the availability and quality of scientific, engineering, and technical personnel, our educational infrastructure is experiencing serious limitations in providing sufficient personnel with high quality training in critical areas, in keeping the proficiency of the current science and engineering work force up to date, and in maintaining high levels of technological literacy nationwide;

(5) although cooperation between industry and the academic community is now increasing, much more effort is necessary and can be achieved with a national policy that provides leadership and support for technology education;

(6) a national partnership among government, industry, and educational institutions, can most effectively carry out a nationwide program to improve the quality of math and science teaching at the elementary and secondary school level, upgrade the quality and capacity of community colleges, vocational schools, universities, and graduate schools to provide scientific, engineering, and technical education in areas of critical skill shortages, and expand the opportunities for lifelong education in all technological fields; and

(7) the Act of July 2, 1862 (commonly known as the First Morrill Act), which set aside publicly owned natural resources to fund investment in education for agriculture and the mechanic arts by establishing the land grant college system, provides a useful model for fusing the interests of government, industry, and education into a national policy for economic growth.

STATEMENT OF PURPOSE

SEC. 3. It is the purpose of this Act to establish a national technology education program designed to—

(1) assure an adequate supply of scientific, engineering, and technical personnel to ensure United States scientific and technological leadership, international competitiveness, and national security;

(2) strengthen programs in science, technology, and engineering of both public and private institutions of higher education;

(3) improve the quality of math and science training in elementary and secondary schools;

(4) improve the science and engineering knowledge and technical skills of the current work force, aid workers in keeping up with scientific and technological progress, and accelerate the absorption of workers into areas of critical skill shortages; and

(5) strengthen the partnership between industry, the academic community, and government to ensure that our educational system provides professional and technical skills relevant to national economic and security needs and that industrial resources are used to enhance the quality of education.

DEFINITIONS

SEC. 4. As used in this Act—

(1) the term "area vocational education school" has the same meaning given that

term by section 521(3) of the Carl D. Perkins Vocational Education Act;

(2) the term "educational institution" means any local educational agency, any State educational agency applying on behalf of schools directly operated by the State educational agency, any area vocational education school, any institution of higher education (including community colleges), and any postsecondary vocational educational institution;

(3) the term "elementary school" has the same meaning given that term by section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(4) the term "local educational agency" means any such agency as defined in section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(5) the term "postsecondary vocational educational institution" means any such institution as defined in section 521(3) of the Carl D. Perkins Vocational Education Act;

(6) the term "secondary school" has the same meaning given that term by section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(7) the term "Secretary" means the Secretary of Education;

(8) the term "State educational agency" means any such agency as defined in section 198(a)(17) of the Elementary and Secondary Education Act of 1965;

(9) the term "institution of higher education" means any such institution as defined in section 1201(a) of the Higher Education Act of 1965;

(10) the term "State" means each of the several States and the District of Columbia; and

(11) the term "Trust Fund" means the "Technology Education Trust Fund" established under section 5.

ESTABLISHMENT OF THE TECHNOLOGY EDUCATION TRUST FUND

SEC. 5. (a)(1) There is established in the Treasury of the United States a Trust Fund to be known as the "Technology Education Trust Fund" consisting of such amounts as are transferred to the Trust Fund under subsection (b). Subject to subsection (d) the Trust Fund shall remain available without fiscal year limitation and the amounts may be used only for payments in accordance with this Act.

(2) The Secretary of the Treasury shall be the trustee of the Trust Fund and shall report to the Congress not later than March 1 of each year on the operation status of the Trust Fund during the preceding fiscal year.

(b) The Secretary of the Treasury shall transfer from the general fund of the Treasury to the Trust Fund—

(1) for fiscal year 1987, 3 per centum,

(2) for fiscal year 1988, 3 per centum,

(3) for fiscal year 1989, 3 per centum,

(4) for fiscal year 1990, 3 per centum,

(5) for fiscal year 1991, 3 per centum,

of the rents, royalties, and other sums paid to the United States under—

(A) the Outer Continental Shelf Lands Act;

(B) the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas and sodium in the public domain", approved February 25, 1920 (commonly known as the Mineral Leasing Act of 1920); and

(C) any other Federal statute authorizing payments for mineral resource development designated by the Secretary of the Treasury for the purpose of this Act;

except that transfers under this subsection shall not exceed $250,000,000 in any one fiscal year. The amounts required to be transferred under this subsection shall be transferred at least quarterly on the basis of estimates made by the Secretary of the Treasury. Proper adjustment shall be made in any amount subsequently transferred to the extent prior estimates were in excess of, or less than, the amounts required to be transferred.

(c)(1) Amounts in the Trust Fund shall be available for making payments in accordance with this Act as provided in advance by appropriation Acts.

(2) Notwithstanding any other provision of law, unless enacted in specific limitation with the provisions of this subsection, any funds appropriated from the Trust Fund to carry out this Act shall remain available without fiscal year limitation.

(d)(1) No transfers required by subsection (b) of this section may be made by the Secretary of the Treasury to the Trust Fund after September 30, 1991.

(2) The Secretary of the Treasury shall pay into the general fund of the Treasury any amounts remaining in the Trust Fund after September 30, 1993, which were not expended and remain in the Trust Fund.

TECHNOLOGY EDUCATION GRANTS

SEC. 6. (a)(1) The Secretary is authorized, in accordance with the provisions of this Act, to make grants to educational institutions, private for-profit business concerns, and State agencies making application jointly to pay the Federal share of the cost of technology education programs.

(2) An application may be submitted to the Secretary jointly by private nonprofit organizations and a State agency or agencies if the nonprofit private organization represents an educational institution and a for-profit business concern, or a group of such institutions and concerns.

(b) No grant may be made under this section unless—

(1) the application is consistent with the economic development and educational policies of the State, as determined by the chief executive of the State, and is consistent with the priorities of the private sector and needs of educational institutions within the State; and

(2) the Secretary determines that there is a probability that the activities described in the application could not be carried out unless assistance sought under the application is furnished.

APPLICATION

SEC. 7. (a) Each educational institution, private for-profit business concern, and State agency applying jointly or nonprofit private organization and State agency, complying with the provisions of section 6, desiring to participate in the program authorized by this Act shall prepare and submit an application at such time, in such manner, and containing or accompanied by such information as the Secretary deems reasonably necessary. Each application shall—

(1) provide a description of the activities for which assistance is sought, including an estimate of the costs of the activities and the location in which the activities will be carried out;

(2) provide assurances (A) that the applicant will pay from non-Federal sources the non-Federal share of the cost of carrying out the application; and (B) that not less than 20 per centum of total costs of the application will be paid by the for-profit business concern joining in the application and the remaining per centum but not exceeding 30 per centum of the total costs of the application will be paid from State and local public sources;

(3) provide justification for any operational cost associated with carrying out the activities so described which have been supported under this Act for a period of more than one year;

(4) provide an analysis of the benefits which such activities may be expected to produce, particularly economic, employment, and educational benefits; and

(5) provide such fiscal control and fund accounting procedures as may be necessary—

(A) to insure a proper accounting of Federal funds paid to the applicant under this Act; and

(B) to insure the verification of the costs of the technology education program furnished by the applicant.

(b) Applications made under this section may not be approved by the Secretary unless he determines that—

(1) the application meets the requirements set forth in subsection (a) of this Act and is consistent with the other provisions of this Act;

(2) the activities for which assistance is sought under the application show promise of applying innovative approaches in the field of technology education which are not addressed by existing public or private educational programs;

(3) the activities described in the application will strengthen educational programs and courses of training necessary for occupations for which there is a clearly established need for personnel in the area which is to be served by the applicant; and

(4) the activities described in the application are likely to result in sustained efforts or lasting improvements in the courses of training offered by the educational institution participating in carrying out the application.

(c) In reviewing and approving applications made under this section the Secretary shall encourage—

(1) joint programs between institutions of higher education and elementary and secondary schools and area vocational education schools, and between postsecondary vocational educational institutions and elementary and secondary schools and area vocational education schools;

(2) joint programs between two or more institutions of higher education, including postsecondary vocational educational institutions;

(3) the participation of small business concerns; and

(4) the provision of activities designed to address technology education and economic development on a substate and interstate regional basis.

USES OF FUNDS

SEC. 8. Grants made under this Act may be used—

(1) to develop, modernize, and expand laboratory equipment and related facilities in educational institutions;

(2) to improve the quality of science and mathematics education and to increase computer literacy in elementary and secondary schools through teacher training, improving equipment, and curricula development;

(3) to expand technical training programs and initiate programs at institutions of higher education (including postsecondary vocational educational institutions) designed to retrain workers for jobs requiring more technical skills;

(4) to establish or maintain existing research/education centers designed to train or retrain new scientific, engineering, and technical employees while carrying out applied research or stimulating innovation, technology transfer, and the application of new technologies;

(5) to enhance mathematics, science, and engineering teaching as a career through faculty development activities which may include support for graduate students who enter the teaching profession, faculty exchange programs with industry, teaching retraining programs, or other programs to encourage retention of faculty;

(6) to improve the skills of the available scientific, engineering, and technical work force through lifelong learning and cooperative education activities;

(7) to improve educational productivity through the development of new educational methods and equipment such as computer based educational aids, and telecommunication instructional technologies;

(8) to improve the access of women, minorities, and handicapped to technical, engineering, and scientific fields, including teaching positions in such fields; and

(9) to stimulate cooperative programs between the humanities and the sciences.

PAYMENTS; DISTRIBUTION OF FUNDS

SEC. 9. (a)(1) From the amounts appropriated for each fiscal year pursuant to section 5, the Secretary shall pay, in accordance with the provisions of this Act, to each applicant which has an application approved under section 7, an amount equal to the Federal share of the cost of activities described in the application.

(2)(A) The Federal share of the cost of carrying out the application under this Act shall not exceed 50 per centum for any fiscal year.

(B) The non-Federal share shall be in cash or in kind. In determining the amount of the non-Federal share, the Secretary may attribute fair market value to services, equipment and facilities contributed from non-Federal sources.

(b)(1) The Secretary shall establish criteria for the equitable distribution of payments made in each fiscal year to applicants having applications approved under section 7.

(2) In carrying out the provisions of paragraph (1) of subsection (a), the Secretary shall take into account the size and location of the educational institution submitting the application as well as whether the educational institution is establishing or expanding the research capacity of the institution.

(3) The aggregate amount of payments made to applicants having applications approved under section 7 in a State in any fiscal year shall not exceed 10 per centum of the aggregate amount of all such payments in all States for such fiscal year.

(c)(1) Payments under this Act shall be made as soon as practicable after approval of the application.

(2) Payments under this Act may be made in installments, in advance or by way of reimbursement with necessary adjustments in account on overpayments and underpayments.

(d) In carrying out this Act, the Secretary may enter into contracts with any applicants having an application approved under section 7 containing provisions for multiyear obligations.

WITHHOLDING

SEC. 10. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any applicant, finds that there has been a failure to comply substantially with the provisions set forth in the application approved under section 7, the Secretary shall notify the applicant that further payments will not be made under this Act until he is satisfied that there is no longer any failure to comply. Until he is so satisfied, no further payments shall be made under this Act.

ADMINISTRATION

SEC. 11. (a) In order to carry out this Act, the Secretary is authorized to—

(1) establish, rescind and amend such rules and regulations as may be necessary;

(2) appoint and fix the compensation of such personnel as may be necessary;

(3) promote temporary and intermittent services to the same extent as authorized by section 31 of title 5, United States Code;

(4) establish advisory committees community, State governments, professional societies, and labor organizations; and

(5) accept and use with their consent with or without reimbursement, such services, equipment, and facilities of other Federal agencies as are necessary to carry out such functions efficiently.

(b) Each member of a committee appointed pursuant to paragraph (4) of subsection (a) of this section who is not an officer or employee of the Federal Government shall receive an amount not to exceed the daily rate prescribed for GS-18 under section 5332 of title 5, United States Code, as determined by the Secretary, for each day he is engaged in the actual performance of his duties (including traveltime) as a member of a committee. All members shall be reimbursed for travel, subsistence and necessary expenses incurred in the performance of their duties.

(c) Each Federal agency is authorized and directed to furnish such services, equipment, and facilities directly to the Secretary, upon a written request made by the Secretary.

(d)(1) In carrying out the provisions of this Act, the Secretary shall consult with the Secretary of Defense to coordinate technical training programs supported by the Department of Defense and activities assisted under this Act.

(2) Whenever the Secretary of Defense determines that funds available for technical training programs to the Department of Defense are available for and would contribute to carrying out the purposes of this Act, the Secretary of Defense is authorized to transfer such funds for use by the Secretary in carrying out the provisions of this Act.

(e) In carrying out the provisions of this Act, the Secretary shall consult with the Secretary of Commerce, the Secretary of Labor and the heads of such other Federal agencies as the Secretary deems appropriate.

(f) The Secretary shall prepare and submit to Congress an annual report on the activities assisted by this Act during the preceding fiscal year.

AUDIT

SEC. 12. The Comptroller General of the United States, and any of his duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of any applicant receiving assistance under this Act that are pertinent to the sums received and disbursed under this Act.

By Mr. CRANSTON (for himself, Mr. PROXMIRE, and Mr. RIEGLE):

S. 936. A bill to amend the Securities Exchange Act of 1924 to provide improved protection for investors in the Government securities market, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

PUBLIC SECURITIES ACT OF 1985

Mr. CRANSTON. Mr. President, today, I am introducing along with Senator PROXMIRE and Senator RIEGLE legislation entitled the "Public Securities Act of 1985" to provide improved protection for investors in the Government-related securities market.

With ever increasing frequency since the collapse of Drysdale securities in May 1982, at a loss of $270 million, we have seen the collapse of more and more of these firms. Two such firms have collapsed over the last 2 weeks: ESM Securities in Florida causing the Ohio thrift industry to shut down and the dollar to tumble in the world money market, creating an estimated loss to investors of $300 million. The failure of Bevill, Bresler and Schulman in New Jersey several weeks ago is expected to post losses around $200 million. Three of these firms failed in 1982, two in 1984, and so far this year two more have failed bringing the total losses up to the $1 billion range to public investors.

Because Treasury securities are free of default risk and highly liquid, they are in broad demand by the investing public. Treasury securities are held by private investors commercial banks, thrifts, other financial institutions and nonfinancial corporations. State and local governments, school districts and others often invest their excess funds in this market seeking safety along with the highest yield for their investment. A growing number of unsophisticated investors since the 1970's have entered this market, many of whom may be unaware that these dealers are unregulated and are being taken advantage of by a number of unscrupulous dealers. Given the increasing incidence of fraudulent activity in this market and the enormous size of losses that are being experienced, it seems appropriate for the Congress to propose some form of regulation to protect investor confidence in this market.

There is a growing concern that as investors become more cautious due to recent publicity concerning these failures of these firms, they will begin to demand possession of collateral on prior deals, possibly leading to a string of new failures. Additionally, there are signs that investors are rushing to do business only with a limited number of known, well capitalized securities firms. I express no criticism of their flight to quality; however their caution could have a negative effect on the breadth, depth, and liquidity of the Government securities market. Loss of investors confidence in this

market could impair the ability of the Treasury to finance the deficit and the operation of the Federal Government by the sale of Government securities.

Today the U.S. market's debt outstanding is $1.7 trillion, of which $1.3 trillion represents marketable securities issued by the U.S. Treasury. Ten years ago that total debt was $500 billion. In addition loss of investor confidence in this market could possibly cause disruptions in the ability of the Federal Reserve Board to carry out its monetary policy functions. The sale and purchase of Government securities through the banking system is the mechanism by which the Federal Reserve expands or shrinks the money supply.

Despite hopeful signs of voluntary prudence in the Government securities market brought on by revelation of these recent problems, and the emergence of capital adequacy standards for Government securities brokers and dealers being proposed by the Federal Reserve Bank of New York, this situation cries out for some form of comprehensive oversight and regulation. The potential here for enormous losses to investors and harm to the Government securities markets is unacceptable to the public at large and should not have to be tolerated by other market participants. Regulatory controls are needed to restore confidence and calm the capital market.

The collapse of ESM left more than a million depositors in Ohio without access to their savings, sent shudders around the world in the gold and dollar markets. While the Ohio thrift losses were limited to nonfederally insured thrifts, the Bevill New Jersey bankruptcy has spread losses to federally insured thrifts and banks across the Nation. We in Congress can no longer stand by in the wake of such carnage, particularly when they do not appear to be isolated incidents.

The bill we are introducing today will bring previously unregulated brokers and dealers in U.S. Treasury and Government agency securities under a self regulatory organization under auspices of the Securities and Exchange Commission. The bill reorganizes and expands the already functioning Municipal Securities Rulemaking Board into the Public Securities Rulemaking Board to oversee both municipal and Government securities brokers and dealers. The 17-member Board will promulgate regulations requiring the registration of all brokers and dealers in Treasury and Government securities and subject them to rules on fair practice, capital adequacy, disclosure, reporting, and enforcement procedures.

While there has been extensive study of these matters in the House over the last year or so including hearings, there have been no hearings in the Senate. With the introduction of this bill, we hope to show that there is concern about these issues and their effect upon the public.

I am aware that participants in the marketplace have been rightly discussing a board spectrum of possible approaches for establishing some kind of mandatory regulation of the Government securities markets under possibly several Government agencies; however, I feel that the appropriate place for these decisions to be made is in the Congress. I seek to bring all the participants in those discussions to the hearing table so that a coordinated effort can begin for exploring all the alternatives that may be desirable.

While evidencing our concern, we want to make every effort to find a way to have the least amount of Government regulation at the least cost, while assuring that we are reducing the potential for unsound and abusive practices, protecting the public interest, and assuring orderliness in the markets. This bill will place the responsibility for reform on private sector self-regulation, under the auspices of the SEC's oversight. In the past the effective self-regulation of other broker dealers by the exchanges, NASD, and the SEC has resulted in greater investor oversight and lower expense for the SEC and the securities industry.

Our bill is a companion to H.R. 2032 introduced by Congressmen DINGELL and WIRTH in the House on Monday, April 15, I would like to commend Chairman DINGELL for his leadership in bringing together regulators, the industry, and the Senate in developing this bill. He as well as I hope that this will be a bipartisan measure. Also, I look forward to full consideration of this proposal in the near future. I also commend Senators PROXMIRE and RIEGLE for joining me in this effort.

Mr. President, I ask unanimous consent that a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

THE PUBLIC SECURITIES ACT OF 1985: SECTION-BY-SECTION ANALYSIS

TITLE I—ESTABLISHMENT OF A SELF-REGULATORY ORGANIZATION WITH RESPECT TO MUNICIPAL AND GOVERNMENT SECURITIES

Section 101 creates a new Section 15B of the Securities Exchange Act of 1934 to provide for the registration and regulation of public securities dealers.

Section 15B(a)—Registration and Regulation of Municipal Securities Dealers

Paragraph (1)—Regulation.—This paragraph would prohibit any public securities dealer from making use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any public security unless registered with the Commission or exempted by rule or by order. A broker or dealer already registered with the Commission under section 15 would not be required to re-register.

Paragraph (2)—Registration Statement and Grant or Denial of Registration.—A person would register as a public securities dealer by filing a registration statement with the Commission containing such information and documents concerning the public securities dealer and any persons associated with the public securities dealers as the Commission may, by rule, prescribe. The registration of a public securities dealer would become effective in the same manner as presently provided for the registration of brokers and dealers in section 15(b).

The Commission is authorized to grant the registration if it finds that the requirements of this section are met and may deny such registration of it is unable to make that finding or if it finds that the registration, if granted, would be subject to suspension or revocation under subsection (c) of this section.

Paragraph (3)—Prohibited Conduct of Public Securities Dealers.—This paragraph would make unlawful any act or practice or course of business prohibited by the Act (other than section 5 or paragraph (1) of this subsection) by a registered public securities professional which would be prohibited if the mails or any means or instrumentality of interstate commerce were used in connection therewith irrespective of any use of such means.

Paragraph (4)—Commission Exemptive Authority.—The Commission would be granted broad powers to exempt, by rule or by order, upon its own motion or upon application, conditionally or unconditionally, any broker, dealer or public securities dealer in whole or in part from any provisions of this section or any rule or regulation promulgated under authority of this section. The intent of this grant of broad exemptive power is to give the Commission flexibility to implement the policies of the bill and to allow the Commission to develop practical and workable means of regulating the public securities industry and trading in public securities.

Section 15B(b)—The Public Securities Rulemaking Board

This subsection would establish and delegate rulemaking responsibility to the Public Securities Rulemaking Board, a self-regulatory organization for the public securities industry. Like the existing Municipal Securities Rulemaking Board, the Board would not be a membership organization, nor would it have any inspection or enforcement responsibilities.

Paragraph (1)—Establishment of the Board.—This paragraph would create the Board and provide for the equal division of its membership among representatives of, investors in, and issuers of, public securities who are not associated with any public securities professional, representatives of public securities professionals which are brokers or dealers, and representatives of public securities dealers which are banks or departments thereof ("public representatives," "broker-dealer representatives" and "bank representatives," respectively.) The Department of the Treasury and the Federal Reserve would have a role in appointment of members.

Paragraph (2)—Board Rulemaking Authority.—The sole function and responsibility of the Board would be to prescribe rules for the public securities industry and with respect to transactions in public securities (otherwise than on a national securities exchange), subject, of course, to Commission review and approval. Accordingly, para-

graph (2) would grant to the Board broad rulemaking authority over all public securities dealers and require it to promulgate rules to effect the purposes of this legislation and the Exchange Act. Similarly, the procedures established in section 15 of the bill for SEC review of proposed changes in the rules of the Board would be applicable and no rule of the Board or change in, addition to, or deletion from the rules of the Board may take effect except in accordance with section 19 of the Act. Furthermore, the Federal Reserve Board is given a role with respect to the impact and appropriateness of any proposed rules with special relation to and effect on government securities. The Board is required to include with the materials submitted to the Commission under section 19(b), the Board's response to any written comments or suggestions submitted by the Federal Reserve or the Department of the Treasury with respect to the impact of the proposed rule on the efficiency, liquidity, or integrity of the markets for government securities.

The scope of the Board's authority would be defined in terms of purposes rather than subject matters in prescribed areas.

Subparagraph (A) would require the promulgation of rules establishing professional standards with respect to training, competence, experience and other qualifications deemed necessary for public securities professionals and natural persons associated with public securities brokers and dealers, including financial responsibility of such persons. The Board would be permitted to classify public securities professionals in adopting such professional qualifications and standards, taking into account all relevant factors, in a manner analogous to the classification powers granted to registered securities associations under section 15A.

Subparagraph (B) would require the adoption of rules establishing fair procedures for the nomination and election of members of the Board. Such rules would be required to provide that nominees for membership on the Board as public representatives must be, in fact, representative of issuers of and investors in public securities and not associated with any public securities professional. In addition, the subparagraph would make clear that the size of the Board may be varied by rule so long as membership is equally divided among the three categories identified in paragraph (1) of this subsection, is an odd number, and the proportion of public representatives is not materially reduced.

Subparagraph (C) would require that the rules of the Board be designed to regulate the dealings of securities professionals so as to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation with self-regulatory organizations and certain other persons, to remove impediments to and perfect the mechanism of a free and open market in public securities, and, in general, to protect investors and the public interest. The subparagraph would require that such rules not be designed to permit unfair discrimination among customers, issuers, public securities brokers, or public securities dealers, to fix minimum profits or other fees to be charged by members, to regulate matters not related to the purposes of the Exchange Act or to the administration of the Board or to impose any burden on competition not necessary or appropriate in furtherance of its purposes. No such rule shall relate to issuing, bidding, or underwriting procedures fixed or approved by the Department of the Treasury.

Subparagraph (D) specifically states that the Board may promulgate regulations requiring the arbitration of claims, disputes and controversies relating to transactions in public securities, but provides that no person other than a public securities professional or a person associated with a public securities professional shall be compelled to submit to such arbitration except at his instance and in accordance with Section 29 of the Act.

Subparagraph (E) would require the Board to promulgate regulations governing the periodic examination of public securities professionals to determine compliance with the provisions of the Exchange Act and the rules and regulations promulgated thereunder by the Commission and by the Board. This provision would enable the Board to determine the minimum frequency of such examinations and the matters to be inspected. Inspections would be carried out in accordance with paragraph (7) of subsection (c).

Subparagraph (F) would require the Board to promulgate rules governing the form and content of quotations relating to public securities and the persons to whom such quotations may be supplied to provide fair and informative quotations, to prevent fictitious or misleading quotations, and to promote orderly procedures for collecting and publishing quotations. Such authority should enable the Board to ensure uniformity of quotations in public securities and uniform methods of disseminating quotations.

Subparagraph (G) would authorize the Board to prescribe recordkeeping and maintenance requirements for public securities professionals.

Subparagraph (H) would require the Board to define the term "separately identifiable department or division" with reference to banks by establishing specific criteria for determining the circumstances under which a bank division or department is sufficiently "separately identifiable" to permit its registration as a public securities dealer entity pursuant to section 30(a)(30). At the minimum, to avoid registration of the entire bank with the SEC as a "public securities dealer," the department or division of the bank must, by its operations, personnel and organization, permit independent examination, and the enforcement of applicable provisions of this Act, rules and regulations thereunder and the rules of the Board.

Subparagraphs (I) and (J) would delegate authority to the Board to provide for the administration of its affairs and operations, including selection of a Chairman from among the members of the Board, and setting the compensation for Board members as well as appointing and compensating the personnel necessary to conduct its self-regulatory functions.

Under subparagraph (K), the Board would have the responsibility of exercising its rulemaking authority to establish the terms and conditions under which any municipal securities dealer may sell, or prohibit the sale by any such dealer, of any part of a new municipal securities issue during the underwriting period to any municipal securities investment portfolio. Thus, the Board will continuously be in a position to exercise its powers to promulgate rules governing syndicate practices and conflicts of interest to prevent any preferential treatment or advantage which may accrue to participating syndicate members, bank or nonbanks, or any proprietary investment portfolios to the detriment of public investors.

Subparagraph (L) empowers the Board, in consultation with the Federal Reserve, to formulate rules to regulate the amount of initial and maintenance margin in connection with the purchase, sale, or carrying of government securities. Rules may also be developed concerning the type of deposit or collateral which shall be furnished; the carrying of undermargined account for limited periods and under specified conditions; the withdrawal of funds or securities; the substitution or additional purchase of securities; the transfer of accounts from one government securities broker or government securities dealer to another; special or different margin requirements for delayed deliveries, short sales, repurchase and reverse repurchase agreements, and arbitrage transactions; the bases and methods to be used in calculating collateral deposits, and margins and market prices; and similar administrative adjustments and details.

Section 15B(c)—Enforcement and Inspection by the Commission and the Bank Agencies

Paragraph (1)—It would be unlawful for any broker, dealer or public securities dealer to effect any transaction in or induce or attempt to induce the purchase or sale of any public security in contravention of any rule of the Board.

Paragraph (2)—Commission Administrative Power to Sanction Public Securities Dealers.—This paragraph would grant to the Commission broad disciplinary authority over public securities dealers, persons associated with them and other persons in connection with violation of the Act and rules and regulations thereunder by the Board or the Commission comparable to the authority contained in present section 15(b)(4) of the Exchange Act. Accordingly, the Commission may, by order, after appropriate notice and opportunity for hearing on the record, censure, suspend (for a period not exceeding 12 months) or revoke the registration of any public securities dealer if such action is necessary or appropriate in the public interest and such broker, dealer or public securities dealer has committed or omitted any act enumerated in section 15(b)(4)(A-E) of the Exchange Act. In addition, the SEC may impose appropriate limitations on the activities, functions and operations of public securities dealers which it determines are in the public interest.

Paragraph (3)—Suspension of Registration, Withdrawal or Cancellation of Registration.—The Commission may suspend any registration pending a final determination as to whether registration shall be revoked. In addition, this paragraph would authorize the SEC to prescribe procedures governing the withdrawal of registration by public securities dealers and to cancel any pending registration or terminate any registration for public securities dealers who have ceased acting in such capacity.

Paragraph (4)—Commission Power to Sanction Persons associated with Public Securities Dealers.—The Commission would have the authority, by order, to censure or impose appropriate limitations on the functions and activities, or bar or suspend (for a period not to exceed 12 months) any person from being associated with a public securities dealer if it finds, on the record following notice and opportunity for a hearing, that such person has committed or omitted any act or omission enumerated in clauses (A), (D), (E), has been convicted of any offense specified in clause (B), or is enjoined from any action, conduct or practice specified in clause (C), of Section 15(b)(4).

Paragraph (5)—Bank Agency Enforcement Powers.—This paragraph would vest primary responsibility and authority with the bank agencies to enforce compliance with the requirements of paragraphs (2) and (4) and the rules of the Board by public securities dealers which are banks and persons associated with such dealers. Bank regulatory agencies may enforce compliance by such public securities dealer or any associated person with the provisions of sections 15B and 17 of the Exchange Act, the rules of the Board, and the rules of the Commission thereunder pertinent to the regulation of public securities dealers and transactions in public securities in accordance with Section 8 of the Federal Deposit Insurance Act. Any violation of the rules of the Board or of the Commission by any bank, or a wholly owned subsidiary or department or division of a bank registered as a public securities dealer, would constitute a violation of the Federal Deposit Insurance Act. This paragraph will in no way affect any existing powers vested in the banking agencies under other laws to take disciplinary action against public securities dealers which are banks or departments or divisions thereof or against persons associated with such public securities dealers.

Paragraph (6)—Consultation and Cooperation Among Federal Agencies.—This paragraph would require the Commission and the bank agencies to consult with each other prior to initiating any action against a public securities dealer which is a bank or a person associated with any such dealer bank, or for violations of any Commission rule promulgated under 15(c) (1) or (2) of the Act or of any Board rule. The Commission would be required to give notice to the appropriate bank regulatory agency of the entry of an order of investigation and the commencement of any action against any public securities dealer which is a bank or a department or division thereof or against any person associated with such a public securities dealer. The notice must include the identity of such dealer or associated person and the nature of and basis for the proposed action. The banking agencies would be required to give notice to the Commission in similar circumstances.

The agencies are expected to consult with each other in good faith concerning the effect of the proposed action both on sound banking practices and the protection of investors and the possibility and desirability of coordinating enforcement actions.

The Committee believes the ends of both the banking and securities laws can be achieved in this manner while minimizing the likelihood that public securities dealers will be subjected to unnecessary regulatory duplication or enforcement proceedings. The requirements of notice and consultation are intended to assure a coordinated and efficient regulatory structure and to facilitate fair, effective and evenhanded regulation of the public securities industry.

Other than the requirements of prior consultation, nothing in the bill would interfere with the use of any authority the Commission or the bank agency may have under the Exchange Act or any other law to conduct inspections or enforce compliance. Specifically, although the bank agency would have the primary responsibility to enforce applicable requirements with respect to banks which are registered public securities dealers, the Commission would retain its full authority under section 21 of the Act and elsewhere with respect to all violations or suspected violations by all brokers, dealers, or public securities dealers. Under no circumstances would the requirements of notice and consultation confer any veto power on the banking agencies over Commission action.

Paragraph (7)—Allocation of Responsibility for Tests and Examinations.—Responsibility for the conduct of periodic examinations and for the administration of such entrance tests as the Board, may, by rule, establish would be assigned by this paragraph. Registered securities associations (e.g., the National Association of Securities Dealers, Inc. ("NASD")) and registered national securities exchanges would be delegated this duty with respect to public securities brokers and public securities dealers which are members, and the bank agencies in the case of public securities dealers which are banks or departments or divisions thereof. Reports and data resulting from an examination conducted by an association pursuant to section 15B(b)(2)(E) must be made and, on request, furnished to the Commission. The Board would be entitled to receive examination reports of public securities brokers and dealers prepared or furnished under this paragraph or section 17(c)(3), only upon request, and subject to any limitations which the Commission finds necessary or appropriate in the public interest.

Paragraph (8)—SEC Administrative Power to Sanction Members of the Board.—The Commission would be authorized to remove from office or censure, by order, any member, officer, or employee of the Board who is found, after notice and opportunity for a hearing on the record, to have willfully violated any provisions of the Exchange Act respecting public securities, any rule or regulation promulgated under the Act or any rule of the Board, or to have abused his authority.

Section 15B(d)—Pre-Filing Requirements for Public Issuers

The subsection would prohibit the Board or the Commission from promulgating any rules which would directly or indirectly impose any filing requirements on public issuers in connection with offerings of such securities. The bill does not affect in any way the existing exemption of any governments from the Securities Act of 1933, and this paragraph would ensure that de facto registration requirements are not imposed which would interfere with the government borrowings.

Section 111 contains a number of necessary conforming amendments to the Act. Paragraphs (a)-(f) amend the definition of exempted security in section 3(a)(12), self-regulatory organization in section 3(a)(26), municipal securities dealer in section 3(a)(30), person associated with a public securities dealer in section 3(a)(32), appropriate regulatory agency in section 3(a)(34) and statutory disqualification in section 3(a)(39). When used with respect to a public securities dealer, the "appropriate regulatory agency" means the Board of Governors of the Federal System with respect to a government securities dealer that is not a bank but that is monitored by and reports to the Federal Reserve Bank of New York.

Paragraph (g) amends section 3(a) of the Act to add certain necessary new definitions: public securities, public securities broker, public securities dealer, government securities, government securities broker, and government securities dealer.

Paragraph (h) clarifies the inapplicability of the Act to government entities unless specifically provided.

Section 112 amends paragraphs (1) and (6) of section 6(b) of the Act to clarify enforcement of the rules of the Public Securities Rulemaking Board by national securities exchanges.

Section 113 amends Section 7 of the Securities Exchange Act concerning the establishment of deposit requirements by the Federal Reserve Board with respect to government securities.

Section 114 contains a number of additional conforming amendments concerning references to the Municipal Securities Rulemaking Board, references to municipal securities and municipal securities brokers and dealers, consultation by the Commission with the Federal Reserve and Treasury Department in rulemaking with respect to capital requirements for government securities dealers rulemaking by registered securities associations, and transfer and access to documents.

TITLE II—TRANSITIONAL AND SAVINGS PROVISIONS

Sections 201-204 contain the necessary provisions for transfer and allocation of funds and personnel from the Municipal Securities Rulemaking Board to the Public Securities Rulemaking Board; termination of the Municipal Securities Rulemaking Board; savings provisions for the continued effect of rules, regulations, interpretations, contracts, policies, procedures and other actions; effect on pending administrative and judicial proceedings; nonabatement of proceedings; substitution of parties; and references in any other Federal provisions.

TITLE III—EFFECTIVE DATE

Section 301 makes the general effective date 180 days after enactment. Section 302 provides special effective dates for appointment and rulemaking authority.

By Mr. CRANSTON (for himself, Mr. STENNIS, and Mr. EAGLETON):

S. 937. A bill to amend the War Powers Resolution to make rules governing certain uses of the Armed Forces of the United States in the absense of a declaration of war by the Congress; to the Committee on Foreign Relations.

WAR POWERS ACT OF 1985

Mr. CRANSTON. Mr. President, today I am reintroducing with Senators EAGLETON and STENNIS legislation to amend the War Powers Resolution of 1973. This measure is the same as the one that I introduced in the last Congress. Our purpose is to restore the statute to the potency it had in its original Senate-passed version in 1973 because the law in its present form is ineffective.

I first introduced legislation to amend the War Powers Resolution in September 1983. At that time, the grim repercussions of the deployment of U.S. troops in Lebanon were still vividly etched in our minds. The serious deficiencies of the War Powers Resolution were also highlighted by this unhappy experience. As time has passed, the circumstances surrounding the Marines' deployment in Lebanon have faded. But the problems that afflicted the War Powers Resolution

have not; these deficiencies must be remedied.

We have had 12 years of experience with the War Powers Resolution, more than ample time to assess the effectiveness of this statute. Unfortunately our experience with the *Mayaguez*, the Iranian hostage rescue attempt, and most recently the Marine deployment in Lebanon, demonstrate that we have yet to restore the proper balance of war-making powers that was intended by the writers of the Constitution.

No event shows more conclusively the inadequacies of the War Powers Resolution than the ill-considered 1982 action by President Reagan to deploy troops in Lebanon.

U.S. involvement in Lebanese hostilities showed that the War Powers Resolution has serious limitations. It did not stop a President from sending troops into hostilities whenever and wherever he chooses. And as we saw, Congress was very reluctant to consider withdrawing American troops once they were deployed, even if their deployment was open ended, was poorly justified, and was inconsistent with the requirements of the War Powers Resolution. Thus does America gradually become embroiled in wars through deployment of troops into hostilities and through investments of money and advisers in war-torn countries.

We would not have faced this type of situation in Lebanon if the Senate version of the War Powers Resolution had been adopted when this matter was originally considered. That measure—primarily the work product of Senators Javits, EAGLETON, and STENNIS—passed the Senate on July 20, 1973, by a 72-to-18 vote. It would have precluded the President from introducing troops into hostilities or areas of imminent hostilities without the prior consent of Congress, except in certain specified circumstances—in order to rescue U.S. citizens or to respond to armed attack. It would have insured that the collective judgment of Congress and the President be provided in such key decisions of war and peace.

Had the original Senate bill prevailed in conference and become law, we would not have faced the crisis over U.S. military involvement in Lebanon. Given the mood of the American people, and the mood of the House and Senate, I believe Congress would never have authorized President Reagan to send the Marines into direct involvement in hostilities in Lebanon in the first place.

The Senate bill represents a far wiser, safer, more prudent course.

Therefore, with Senators EAGLETON and STENNIS, I am today introducing the proposed War Powers Act of 1985, a bill to amend the War Powers Resolution of 1973, restoring the War Powers Resolution to its original strength along the lines provided under the Senate passed measure which was the result of 3 years of development by the Foreign Relations Committee.

Under the leadership of my two distinguished colleagues and Senator Jacob Javits, the Senate took the lead in developing and creating war powers legislation. Throughout its consideration of the War Powers Act during 19871-73, more than two-thirds of this body consistently voted for this legislation. A majority of these supporters were also cosponsors.

The Senate made a clear-cut delineation of the war powers of the legislative and executive branches of Government. Our bill codified that constitutional balance and, to meet modern contingencies, granted limited emergency authority to the Commander in Chief. Extensive testimony by leading historians and constitutional scholars supported the constitutionality of the Senate bill.

Under the Senate-passed bill in 1973, the decision to initiate engagement in hostilities was a joint executive-legislative responsibility. Under the current War Powers Resolution, the responsibility for committing troops, and for justifying that commitment, is entrusted solely with the President.

Historically, the War Powers Resolution of 1973 was an important first step in congressional reassertion of its war powers. But it was only a first step.

The War Powers Resolution has proved inadequate and of limited effectiveness.

This law simply never comes to grips with the fundamental issue of codifying a constitutional balance between the executive and the legislature in warmaking.

The Founding Fathers vested the warmaking power exclusively in Congress, refusing to confer it upon the President.

The question of whether our Nation shall be at war or peace is far too awesome a decision for one person to make. Such unbridled power in the hands of one individual is dangerous to peace and to our free society.

In Abraham Lincoln's words, "no one man should hold the power of bringing this oppression upon us." In our nuclear age, preserving the checks and balances of our constitutional system is more crucial than ever before.

The framers of our constitutional system greatly mistrusted any executive having superpower. They therefore created a tight framework for congressional control over warmaking. Under article I, section 8, of our Constitution, both Houses of Congress are vested with the power to declare war and to raise and support armies, and are imbued with all power necessary and proper for carrying out these functions and the functions of the other branches.

The framers were, to paraphrase delegate George Mason, for clogging war and facilitating peace.

In the oft-quoted debate, the Constitution's drafters substituted "declare war" for "make war" in the listing of Congress powers to insure that the executive could protect American forces in wartime and could repel invasions. The change was in no way a grant of power for the President to take the Nation to war.

Under our Constitution, the President has a restrictive power to conduct wars as Commander-in-Chief. Within that sphere he is supreme, and Congress may not interfere with his command of authorized military involvements.

Alexander Hamilton, a strong proponent of executive power, fully agreed, however, that the authorization power—the decision to make war or peace—rests with Congress. In fact, during the Philadelphia debates Hamilton used the words "declare," "authorize," and "begun" interchangeably.

Hamilton emphasized this point in Federalist No. 69:

> The President is to be commander in chief of the army and navy of the United States. In this respect his authority would be nominally the same with that of the king of Great Britain, but in substance much inferior to it. It would amount to nothing more than the supreme command and direction of the military and naval forces, as first General and Admiral of the Confederacy, while that of the British king extends to the declaring of war and to the raising and regulating of fleets and armies—all which, by the Constitution under consideration, would appertain to the legislature.

When the Senate War Powers Act was being debated a decade ago, Senator Jacob Javits warned that the balance between the executive and the legislature in warmaking had been practically obliterated.

To quote Senator Javits:

> I doubt that there is anything now that an American President, if he simply wanted to cite precedent, might not feel he can do to plunge the U.S. into the broadest scale war without reference to Congress.

This is still too true today. The emergence of the United States as a superpower since World War II has seen a dramatic shift in actual Presidential power over war and peace—but not a shift in constitutional authority.

It is essential that Congress assert its constitutional role of primacy in the area of declaring and initiating war. We must establish our authority at the outset of U.S. involvement in hostilities.

This is what our bill—based on the original Senate-passed legislation—would accomplish.

Much of the interpretation and explanation of this act can be found in

the very thorough Senate Foreign Relations Committee report of June 14, 1973 (Report No. 220). Let me just outline the main provisions of this act.

The key provisions insure that the President must come to Congress first—I repeat, first, before committing troops into hostilities or areas of imminent hostilities. Section 3 spells out the emergency circumstances where the President may—without the prior consent of Congress—introduce troops into hostilities or situations where imminent introduction into hostilities is clearly indicated by the circumstances.

Thus, the first three clauses of section 3 codify the President's authority to repel sudden attacks and protect U.S. nationals—powers based on the intention of the constitutional convention and on precedent.

Clause (4) permits the use of the Armed Forces in hostilities or situations where hostilities are clearly imminent, "pursuant to specific statutory authorization." Under no other circumstances would the President have the authority to introduce our Armed Forces into hostilities or imminent hostile situations in the absence of a congressional declaration of war.

Section 5—which along with section 3 has been called the heart and core of the original Senate bill—would provide that the use of Armed Forces under any of the emergency conditions listed in section 3 shall not last more than 30 days unless Congress adopts legislation specifically authorizing such continued use. Thus, the President would be forewarned against any use that would be unlikely to command the support of majorities in both Houses of Congress.

In addition to these provisions of the original Senate act, section 5(b) of the proposed War Powers Act of 1983 incorporates a 1975 amendment proposed by Senator EAGLETON that would prohibit the expenditure of any funds for any use of the Armed Forces in violation of this act, unless specifically otherwise provided by a lawmaking specific reference to section 5(b) of this act.

The War Powers Act of 1985 would take effect upon enactment, but would not apply to any use of our Armed Forces being made on that date. However, the provisions of the War Powers Resolution of 1973 as, in effect, would continue applying to any use of the Armed Forces to which these provisions were applicable on the day before the date of enactment of this Act.

This proposed War Powers Act of 1985 in our era of undeclared wars, thus would provide for the conditions of modern warfare. It does so in such a way as to fulfill—not to alter, amend, or adjust—the intent of the Constitution and its framers regarding the war powers.

Our bill would restore the intended constitutional balance of power over warmaking.

In closing, I think it appropriate to heed the warning of Thomas Jefferson nearly two centuries ago:

Confidence is everywhere the parent of despotism—free government is founded in jealousy; . . . it is jealousy and not confidence which prescribes limited constitutions to bind down those we are obliged to trust with power . . . In questions of power, then, let no more be heard of confidence in man, but bind him down from mischief with the chains of the Constitution.

Mr. President, I ask unanimous consent that the text of our bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 937

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "War Powers Act of 1985".

SEC. 2. The War Powers Resolution (Public Law 93-148, 87 Stat. 555 et seq.) is amended to read as follows:

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'War Powers Act'.

"PURPOSE AND POLICY

"SEC. 2. It is the purpose of this Act to fulfill the intent of the Constitution of the United States and insure that the collective judgment of both the Congress and the President will apply to the introduction of the Armed Forces of the United States into hostilities and to the continuation of the use of such armed forces in such hostilities. Under Article I, section 8, of the Constitution, it is specifically provided that the Congress shall have the power to make all laws necessary and proper for carrying into execution not only its own powers but also 'all other powers vested by this Constitution in the Government of the United States or in any department or officer thereof'. At the same time, this Act is not intended to encroach upon the recognized powers of the President, as Commander in Chief, to conduct hostilities authorized by the Congress, to respond to attacks or the imminent threat of attacks upon the United States, including its territories and possessions, to respond to attacks or the imminent threat of attacks against the United States Armed Forces, and, under proper circumstances, to rescue endangered citizens of the United States located in foreign countries.

"EMERGENCY USE OF THE ARMED FORCES

"SEC. 3. In the absence of a declaration of war by the Congress, the United States Armed Forces may be introduced into hostilities or into a situation where the imminent introduction of such forces into hostilities is clearly indicated by the circumstances, only—

"(1) to repel an attack upon the United States or its territories or possessions; to take necessary and appropriate retaliatory actions in the event of such an attack; and to forestall the direct and imminent threat of such an attack;

"(2) to repel an attack against the United States Armed Forces located outside of the United States and its territories and possessions, and to forestall the direct and imminent threat of such an attack;

"(3) to protect citizens of the United States while evacuating them as rapidly as possible from any country in which such citizens, there with the express or tacit consent of the government of such country, are being subjected to a direct and imminent threat to their lives, either sponsored by such government or beyond the power of such government to control: Provided, That the President shall make every effort to terminate such a threat without using the United States Armed Forces: *And provided further,* That the President shall where possible, obtain the consent of the government of such country before using such armed forces; or

"(4) pursuant to specific statutory authorization.

"SEC. 4. The introduction of the United States Armed Forces into hostilities, or into a situation described in section 3 of this Act, under any of the circumstances described in section 3 shall be reported promptly in writing by the President to the Speaker of the House of Representatives and the President of the Senate, together with a full account of the circumstances necessitating such introduction, the constitutional and legislative authority for such introduction, the estimated scope and duration of the use of such armed forces in the hostilities or situation involved, and the consistency of such use with the provisions of section 3. Whenever the United States Armed Forces are engaged in hostilities outside of the United States and its territories and possessions, the President shall, so long as such forces continue to be engaged in such hostilities, report to the Congress periodically on the status of such engagement as well as the scope and expected duration of such engagement and such hostilities, but in no event shall such report be submitted to the Congress less often than every six months.

"THIRTY-DAY AUTHORIZATION PERIOD

"SEC. 5. (a) After the introduction of the United States Armed Forces into hostilities, or into a situation described in section 3 of this Act, under any of the circumstances described in section 3, the use of such armed forces in the hostilities or situation involved shall not be sustained beyond thirty days from the date of such introduction except as provided in a specific law enacted by the Congress and pursuant to the provisions thereof.

"(b) Notwithstanding any other provision of law unless such law specifically otherwise provides by specific reference to this subsection, no funds made available under any law may be obligated or expended for any use of the United States Armed Forces prohibited by subsection (a) of this section, by section 3, or by a law or joint resolution described in section 6 of this Act.

"TERMINATION WITHIN THIRTY-DAY PERIOD

"SEC. 6. The use of the United States Armed Forces in hostilities, or a situation described in section 3 of this Act, under any of the circumstances described in section 3 shall be terminated prior to the thirty-day period specified in section 5(a) of this Act of Congress by a law or joint resolution so directs.

"CONGRESSIONAL PRIORITY PROVISIONS

"Sec. 7. (a)(1) Any bill or resolution (pursuant to section 5(a) of this Act) authorizing the continuation of the use of the United States Armed Forces after their introduction, in any of the circumstances described in clause (1), (2), or (3) of section 3 of this Act, into hostilities or a situation described

in section 3 of this Act or (pursuant to section 6 of this Act) directing the termination of such use, shall, if sponsored or cosponsored by one-third of the Members of the House of Congress in which it is introduced, be considered reported out no later than one day following its introduction unless such House shall otherwise determine by yeas and nays. Any such bill or resolution referred to a committee after having passed one House of Congress shall be considered reported out in the other House within one day after it is so referred, unless such House shall otherwise determine by yeas and nays.

"(2) Any bill or resolution so authorizing the continuation of such use of such armed forces or so directing the termination of such use shall, if not sponsored or cosponsored by one-third of the Members of House in which it is introduced, be referred to the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate, as the case may be, and one such bill or resolution shall be reported out by such committee together with its recommendations within seven calendar days, unless such House shall otherwise determine by yeas and nays. Any such bill or resolution, if not so sponsored or cosponsored, which has been passed by one House and is to be referred to a committee of the other House shall be referred in such other House to the committee named in the preceding sentence and shall be reported out by such committee together with its recommendations within seven calendar days and shall thereupon become the pending business of such House and shall be voted upon within three calendar days, unless, such House shall otherwise determine by yeas and nays.

"(b) Any bill or resolution described in subsection (a) of this section shall, immediately upon being reported to the floor, discharged from Committee, placed on the calendar, or held at the desk become the pending business of the House in question (in the case of the Senate the time for debate shall be equally divided between the proponents and the opponents and shall be voted on within three calendar days thereafter, unless such House shall otherwise determine by yeas and nays.

"(c) In the case of any disagreement between the two Houses of Congress with respect to a bill or resolution described in subsection (a) that is passed by both Houses, conferees shall be promptly appointed and the committee of conference shall make and file a report with respect to such a bill or resolution within three calendar days after such bill or resolution is referred to the committee of conference. Notwithstanding any rule in either House concerning the printing of conference reports in the Record or concerning any delay in the consideration of such reports, such conference report shall be acted on by both Houses not later than three calendar days after being filed. In the event the conferees are unable to agree within 48 hours, they shall report back to their respective Houses in disagreement.

"INTERPRETATION OF ACT

"SEC. 8. (a) Statutory authorization to introduce United States Armed Forces into hostilities or into situations where imminent introduction of such forces into hostilities is clearly indicated by the circumstances (or, after such introduction, to sustain the use of such armed forces in the hostilities or situation involved) shall not be inferred—

"(1) from any provision of law (whether or not in effect before the date of the enactment of this Act), including any provision contained in any appropriation Act, unless such provision specifically authorizes such introduction (or use) of such armed forces and states that it is intended to constitute specific statutory authorization within the meaning of this Act: or

"(2) from any treaty heretofore or hereafter ratified unless such treaty is implemented by a law specifically authorizing such introduction (or use) of such armed forces and stating that it is intended to constitute specific statute authorization within the meaning of this Act.

"(b) Nothing in this Act shall be construed to require any further specific statutory authorization to permit members of the United States Armed Forces to participate jointly with members of the military forces of one or more foreign countries in the headquarters operations of high-level military commands which were established prior to the date of enactment of this Act and pursuant to the United Nations Charter or any treaty ratified by the United States prior to such date.

"(c) For purposes of this Act, any reference to the introduction of the United States Armed Forces shall be deemed to include a reference to the assignment of members of such armed forces to command, coordinate, participate in the movement of, or accompany regular or irregular military forces in or of any foreign country or of any foreign government when such military forces are engaged, or there exists an imminent threat that such forces will become engaged in, hostilities.

"(d) For the purposes of this Act, the terms 'introduced into hostilities' and 'introduction into hostilities' each include commitment, engagement, and involvement in hostilities, including bombardment.

"SEPARABILITY CLAUSE

"SEC. 9. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of the Act and the application of such provision to any other person or circumstance shall not be affected thereby.

"EFFECTIVE DATE

"SEC. 10. This Act shall take effect on the date of the enactment of the War Powers Act of 1983, but shall not apply to any use of the United States Armed Forces being made on such date.".

SEC. 3. Notwithstanding the amendment made by section 2 of this Act, the provisions of the War Powers Resolution shall continue in effect with respect to any use of the Armed Forces of the United States to which the provisions of such Resolution were applicable on the day before the date of the enactment of this Act.

SEC. 4. The title of the War Powers Resolution is amended to read as follows: "An Act to make rules governing certain uses of the Armed Forces of the United States in the absence of a declaration of war by the Congress.

● Mr. EAGLETON. Mr. President, I am pleased to join with my colleagues, Senator CRANSTON and Senator STENNIS, in introducing the War Powers Act of 1985, a bill which seeks legislatively to restore to the Congress its constitutional prerogative to declare war.

The War Powers Act of 1973 was a compromise between a House of Representatives that was not really all that interested in the subject and a Senate which wanted a War Powers Act at almost any price, and like most compromises, it was an imperfect resolution. One of the most difficult issues to resolve back in 1973 was that of defining the President's emergency powers in explicit legislative language. The Senate bill carefully enumerated and described the circumstances wherein the President could commit forces in an emergency without specific congressional approval. It mentioned three specific emergency situations: An attack on the United States; an attack on American forces legally deployed abroad; and the rescue of American nationals traveling abroad. The only other circumstance under which the President could introduce our Armed Forces was pursuant to specific statutory authorization by the Congress.

The House bill on the other hand simply required the President to consult and to report when U.S. forces were committed.

The compromise War Powers Act attempted to join these two widely divergent approaches by substituting for the clearly delineated and legally binding Senate provisions a toothless policy statement on Presidential authority to employ our troops in times of emergency.

The bill we are introduced today, the War Powers Act of 1985, seeks to reinstate the original Senate provisions with respect to the powers of the President to commit U.S. troops—provisions I would point out that have been adopted overwhelmingly by the Senate on two separate occasions. It spells out carefully those powers which adhere to the Executive by reason of his status as Commander in Chief and his obligation to act in emergencies to repel attacks upon the Nation, its forces, and its citizens abroad. For the rest, it makes clear that all remaining decisions involved in taking the Nation to war are reserved to the Congress, to which the Constitution gave specific and exclusive authority.

There was a time not too many years ago when the whole topic of war powers was arcane. Today, that is no longer true. Every member of the Senate is acutely concerned with how we get into war and even more acutely concerned with how we get out of war once the flag has been committed. Vietnam, Cambodia, and Laos were the tragedies which gave birth to the War Powers Act. Our tragic experience in Lebanon and deployment of our troops to Grenada focused more recent attention on what has been the perennial congressional/Presidential faceoff over the War Powers Act. Central America is our present dilemma. U.S. warships have been stationed off

the coast of Nicaragua. In the past year, three Americans were killed along the Honduran-Nicaragua border. In El Salvador, an American adviser was assassinated and four CIA-employed Americans died while engaged in an intelligence mission.

Almost exactly a year ago, the New York Times reported that "senior officials in the Reagan administration say that contingency plans are being drawn for the possible use of U.S. combat troops in Central America if the current strategy for defeating leftist forces in the region fails." Two days later, the Washington Post carried a story headlined, "CIA Views Minelaying Part of Covert 'Holding Action'," which stated, "The CIA views its involvement in the laying of mines in parts of Nicaragua as part of a holding action until its covert war against that country's leftist Sandinista government can be stepped up if President Reagan wins reelection, according to senior administration officials."

Both of these reports were disavowed by the White House, but subsequent statements have made clear that the only Central American "solution" acceptable to the President is the overthrow of the government in Managua. What we do not know is the extent to which U.S. military activity is a part of President Reagan's pledge "to do everything we can to win this great struggle."

Mr. President, I believe the Senate must once again take the lead to force the Congress to carry out its constitutional role. There is nothing we can do, nor seek to do, by statute to deny or limit the constitutional authority of the President. This legislation does not seek to hamper the President's ability to respond quickly in an emergency. The President would be able to take action necessary to respond to prevent an attack or an imminent threat of attack on the United States or its Armed Forces, or to evacuate American civilians endangered by hostilities abroad, but his authority to do so would end in thirty days without further explicit congressional approval.

If we do not take action on the legislation we are introducing today, we are tacitly endorsing the status quo, under which the responsibility for committing troops rests solely with the President.●

By Mr. CHAFEE:

S. 938. A bill to amend title XX of the Social Security Act to provide for grants and contracts to provide services for pregnant teenagers and young parents; to the Committee on Finance.

TEENAGE PREGNANCY

● Mr. CHAFEE. Mr. President, teenage pregnancy is one of the most distressing social issues facing the Nation today. The consequences of this problem for teenage mothers, their children and society are troubling.

While Congress debates the merits of birth control, abortion, and the virtures of chastity, the incidence of teenage pregnancy is steadily increasing. In 1981 alone, 1.1 million teenages became pregnant. These pregnancies resulted in 537,000 live births; almost half of which occurred out of wedlock. A teenage mother faces a future of lower educational attainment, diminishing employment prospects, repeated pregnancies and high probability of welfare dependence.

Statistics show that a women who becomes pregnant during her teens is substantially more likely to drop out of high school. If she does complete high school, she is far less likely to attend college than her peers. Teenage parents are also more likely to have more children at closer intervals than those who delay childbearing. As a result of their lower educational levels and larger families, teenage mothers have poor employment prospects and low earning power, both of which increase the probability of welfare dependence. One analysis shows that in 1975, 71 percent of the mothers who were under 30 and receiving welfare were teenagers when they first gave birth.

What a dismal future our young parents face. Given the disadvantaged circumstances of the teenage parent, I ask you to consider the quality of life they can provide for their children.

The child is even at greater risk than the parent. A baby born to a young mother is significantly more likely to be born at a low birthweight and therefore faces a substantially higher risk of death or birth defects. Babies of teen mothers are also much less likely to receive well-child care and more likely to face the frightening experience of hospitalization within the first 5 years of life. Nothing is as tragic as unnecessary birth defects or the death of a baby. Many such heartbreaking outcomes could be prevented with proper prenatal care. Our young deserve a better chance to be born healthy and to be kept free from debilitating diseases.

Although many speculate about the causes of teenage pregnancy, there is no conclusive evidence showing that any one factor contributes more than all others to the high incidence of teen childbearing. We could debate the causes ad infinitum, but while we do the incidence of teenage pregnancy will continue to rise at an alarming rate. We should move beyond the debate and accept the real challenge—to ensure that each mother who decides to carry her pregnancy to term and raise her child, should be afforded every opportunity to become self-sufficient and independent.

The legislation I am introducing today is a comprehensive and determined effort to address the problem of teenage pregnancy by significantly improving the outcomes of teen childbearing. My legislation is designed to provide comprehensive services to both the teen mother and her child, thereby reducing the number of risks and increasing self-sufficiency and independence. This bill will provide grants to public and nonprofit private entities to support comprehensive services—prenatal and postpartum care, well-child care, family planning and counseling services, education and vocational counseling, and other services such as day care and transportation. All of these are essential components of any effort to promote successful outcomes of teenage childbearing.

Even during a time of fiscal restraint it is sound economic policy to invest in teen programs. Programs that provide comprehensive services save us more money in the long run than society will spend to fulfill unmet social needs. Healthy children and self-sufficient, productive adults are essential to our Nation's well-being.

I hope my colleagues will carefully review my proposal and join me in my effort to assist young mothers in their struggle for independence. Mr. President, I ask that my legislation be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) title XX of the Social Security Act is amended by adding at the end thereof the following new section:

"SERVICES FOR PREGNANT TEENAGERS AND YOUNG PARENTS

"PROJECT GRANTS AND CONTRACTS

"SEC. 2008. (a)(1) In addition to the amounts paid to States under section 2002, the Secretary may make grants to, and enter into contracts with, public and nonprofit private entities to provide (directly or indirectly) to persons described in paragraph (2) any of the following services:

"(A) Comprehensive prenatal and postpartum care.

"(B) Well-child care for the infant involved.

"(C) Comprehensive planning services (including a broad range of acceptable and effective methods of contraception) to prevent unintended repeat pregnancies.

"(D) Education and vocational counseling services.

"(E) Family life and parenting education.

"(F) Counseling services (including counseling for family members) when appropriate.

"(G) Other services designed to improve the availability of comprehensive services to assist pregnant teenagers, young parents, and their families.

"(2) Persons for whom services may be provided under grants under paragraph (1) are—

"(A) pregnant teenagers under the age of 18 who have decided to carry their pregnancy to term, the fathers of the infants in-

volved in the pregnancy, individuals who have agreed to share responsibility for such infants, and the guardians of such infants; and

"(B) mothers of pre-school age children who were under the age of 18 at the time of birth of such children, the fathers of such children, individuals who have agreed to share responsibility for such children, and the guardians of such children.

"(3) In approving applications for grants and contracts under paragraph (1), the Secretary shall give priority to, and will encourage applications from, entities that serve an area where the incidence of teenage childbearing is high, where the proportion of low income and minority families is high, and where teenage pregnancy services are most needed.

"(4) Grants and contracts under this section shall be made subject to the amounts appropriated pursuant to subsection (e).

"REGULATIONS AND PAYMENTS

"(b)(1) Grants and contracts under subsection (a) shall be made and entered into in accordance with such regulations as the Secretary may promulgate and shall be payable in such installments and be subject to such conditions as the Secretary may determine to be appropriate to assure that such grants and contracts will be effectively used for the purposes for which they are made.

"(2) A grant may be made or contract entered into under subsection (a) only upon assurances satisfactory to the Secretary that the following will apply to the provision of services under such grant or contract:

"(A) Priority in the furnishing of such services will be given to persons from low income families and to persons who may experience other barriers to such services.

"(B) If fees are charged for such services, such fees will be charged pursuant to a fee schedule approved by the Secretary which bases fees on the income of the person for whom the service is provided and takes into account the difficulty teenagers face in obtaining resources to pay for services. No fee may be charged for services provided to any person from a low income family (as defined by the Secretary by regulation), except to the extent that payment will be made by a third party (including a government agency). In no case may an entity discriminate with regard to the provision of services to any individual because of that individual's inability to provide payment for services.

"(C) Maximum use will be made of funds for which the entity or its subcontractors are eligible under other Federal and State programs.

"(D) The role of families will be maximized in assisting teenagers during pregnancy and parenthood, but family participation will not be required.

"(E) The community to be served will be involved in the planning and implementation of the program.

"(F) Such reports will be made and such data will be furnished as the Secretary shall require, including, at a minimum, the number and characteristics of persons served, the services provided, and the results achieved.

"VOLUNTARY PARTICIPATION

"(c) Services provided with financial assistance under this section shall be provided only on a voluntary basis and only after the individuals seeking the services have been advised of the benefits and risks of all the courses of action available to the individuals and have had the opportunity to choose freely among them, including referral to another source of care when indicated. The acceptance by any individual of information or services supported under this section shall not be a prerequisite to eligibility for or receipt of any other service or assistance.

"REPORTS

"(d) The Secretary shall establish a systematic reporting system capable of yielding comprehensive data on which service figures and program evaluation shall be based. On or before each January 1 the Secretary shall submit to the Congress a report describing the activities supported under this section, including, at a minimum, the number and characteristics of persons served, the services provided, the results achieved, and the Secretary's plan and recommendations for the future.

"AUTHORIZATION OF APPROPRIATIONS

"(e) For the purpose of carrying out this section, there are authorized to be appropriated $30,000,000 for fiscal year 1986, $32,000,000 for fiscal year 1987, and $34,000,000 for fiscal year 1988.".

(b)(1) Section 2001 of such Act is amended by inserting before the period at the end thereof the following: ", other than section 2008".

(2) Sections 2004, 2005(a), 2005(a)(4), 2005(b), 2006(a), and 2006(b) of such Act are each amended by inserting "(other than section 2008)" after "this title" each place it appears.●

By Mr. SPECTER:

S. 939. A bill for the relief of Joseph Willbroad Mayanja; to the Committee on the Judiciary.

RELIEF OF JOSEPH WILLBROAD MAYANJA

Mr. SPECTER. Mr. President, I am introducing today a private immigration relief bill on behalf of Mr. Joseph Willbroad Mayanja, a native of Uganda.

Mr. Mayanja came to this country on May 16, 1982, under a student visa, to attend Central Pennsylvania Business School. He graduated from that school last summer, and is presently living in Summerdale, PA, and working at the Holy Spirit Hospital in Camp Hill, PA.

On April 12, 1983, Mr. Mayanja filed a request for asylum with the Immigration and Naturalization Service, thus invoking the requirement of immigration law that he demonstrate a "well-founded fear of persecution on account of race, religion, nationality, political opinion, or membership in a particular social group" upon return to Uganda. As reflected in his request, Mr. Mayanja is likely to be persecuted in Uganda both as a member of the Baganda Tribe and as a Catholic.

Mr. President, the persecution of the Baganda Tribe by the government of President Milton Obote has been well-documented. In testimony before the House Foreign Affairs Committee, Assistant Secretary of State for Human Rights Elliott Abrams stated that abuses of human rights in Uganda had become "among the most grave in the world," and that the abuses included large-scale massacres and forced starvation of dissident ethnic groups. Moreover, as reported in the New York Times on August 8, 1984, administration officials stated that:

> The worst abuses . . . have taken place in the Luwero Triangle, the homeland of the Baganda Tribe. In some cases, the officials said, Ugandan army units reportedly rounded up hundreds of Baganda and shot them on the spot. The officials said the tribe was suspected by the army of supporting the rebels. Most army members are from the Langi and Acholi tribes, which support Mr. Obote.

With regard to the risks faced by Mr. Mayanja in connection with his Catholicism, he submitted to the INS press accounts indicating that President Obote suspects the country's Catholic prelate, Emmanuel Cardinal Nsubuga, of operating a training camp for opposition guerrillas, and that government soldiers had staged raids on the Catholic cathedral in Kampala, arresting priests as well as worshippers, none of whom have been seen since.

On September 13, 1983, the INS denied Mr. Mayanja's request for asylum. He filed a rebuttal, and asylum was again denied on December 15, 1983.

Then in March 1984, Mr. Mayanja was notified that his father and aunt had been killed in Uganda by gunmen believed to be soldiers. On August 13, 1984, a renewed request for asylum was filed with the INS in Philadelphia.

On November 15, 1984, the renewed request was denied, on the basis of an opinion received from the State Department's Bureau of Human Rights. That Bureau—headed by Assistant Secretary Abrams, the same man who in congressional testimony a few months earlier had characterized the human rights situation in Uganda as "horrendous"—advised that Mr. Mayanja did not have the requisite "well-founded fear of persecution." In taking this position, Assistant Secretary Abrams appears to be attempting to maintain the careful balance that he articulated in testimony before the House Foreign Affairs Committee, when he indicated that the problem is not that the present Government of Uganda is too strong, but that it is too weak to control its own army, and that "we must be careful neither to condone unacceptable behavior nor to mislead potential adversaries of our own troubled friends." He also testified that: "Even a highly imperfect regime may well give a much better prospect of democratization than would the Communist regime that might follow it."

The INS has set a voluntary departure date of April 30, 1985, for Mr. Mayanja. On March 21, 1985, Congressman BILL GOODLING introduced a private relief bill on behalf of Mr. Mayanja in the House of Representa-

tives. The bill I am introducing today is a companion measure to that bill.

Mr. President, based on the State Department's own congressional testimony, it appears clear that Mr. Mayanja can indeed lay claim to a "well-founded fear of persecution." Unfortunately, it also appears clear that he individually is expected to bear the burden of the State Department's political dilemma—namely, their desire to condemn the human rights abuses in Uganda while at the same time not undermining President Obote to such an extent as to invite in a communist successor. In my view, this is not an appropriate burden for this one man to bear.

By Mr. ROTH:

S. 940. A bill to amend title 10, United States Code, title 31, United States Code, and the Renegotiation Act of 1951 to control the cost of Department of Defense contracts; to the Committee on Armed Services.

DEFENSE PROCUREMENT PROGRAM INTEGRITY ACT

● Mr. ROTH. Mr. President, I am today introducing the "Defense Procurement Program Integrity Act of 1985." This legislation is designed to prevent unearned profits on defense contracts; provide increased information to the public and the Government on profits and financing procedures in the defense industry; ensure more effective enforcement of existing laws requiring reasonable and supportable prices on major defense contracts; prevent claims for unallowable costs; establish time limits on the filing of claims; and ensure the continued effectiveness of defense contract cost accounting standards. I believe the legislation can help to restore integrity to the defense contracting process and remove the growing stain of abuse and waste of which we hear so much today.

Mr. President, the consensus for added defense spending has been seriously eroded over the past few years. A recent poll found 53 percent of the American public favored making "substantial cuts" in military spending—a marked shift from a similar poll conducted just a few months earlier when only 44 percent supported such cuts. The erosion in public support for the defense buildup has decreased even more substantially in comparison with the early days of 1981 when almost 70 percent of the public believed we needed to increase defense spending.

I believe the public's support for increased defense budgets has lessened in large part because the public does not believe their tax dollars are being spent wisely or efficiently. Certainly, recent revelations of unearned and inflated profits, claims filed by defense contractors on contracts for the costs of advertising, entertainment, and even the transportation of pet dogs, and continued evidence of overpricing in defense programs have been factors in the erosion of public enthusiasm for more defense spending.

I am a strong believer that we must strengthen our defenses, but I will not support defense spending at any price. I support it only at the right price, a fair price. Unfortunately, Mr. President, there is growing evidence that we are not getting fair prices in many cases and that some defense contractors are reaping unearned and exorbitant profits.

We have all read the recent accounts of abuse and waste in defense contracts involving some of our Nation's largest defense firms. I would stress that it is not just reports from the Inspectors General, the General Accounting Office, or the media that point to substantial problems in the management of defense acquisition programs. Prestigious groups such as the Georgetown Center for Strategic and International Studies (CSIS) have released reports which raise serious questions about the effectiveness of the Defense Department and call for major changes in the Department and in acquisition policies and procedures. A bipartisan group of six former Secretaries of Defense have endorsed, in its essentials, the CSIS study and they concluded, "in our view, the public's concern (with ineffective defense management) is well-founded; there are serious deficiencies in the organization and managerial procedures of the U.S. defense establishment."

Mr. President, many of the problems in the defense acquisition process have been blamed on the Department of Defense and it is true that the Department could do much to improve its operations. However, it is becoming increasingly evident that a number of defense contractors are performing poorly and inefficiently and are in some cases abusing the requirements of the defense acquisition process. Reports indicating gross inefficiency in operations, fraudulent dealings, unearned and excessive profits point to serious shortcomings in the management practices and attitudes of some defense contractors.

While not all defense contractors are at fault, it is no longer plausible to argue that the mismanagement and waste in defense programs is limited to a few "bad apples" or that it is bound to happen occasionally given the number of contracts and the amount of money being spent each year. The number of defense contractors, both large and small, that have been debarred and suspended from contracting with the Defense Department is on the increase. Evidence shows that a good number of large defense contractors have failed to practice cost-effective management and maintain a high level of integrity in the contracts they have been awarded.

Mr. President, this country has chosen to rely on its free enterprise system to provide it with needed defense equipment. There are two parties to every defense contract—the Government and the contractor. Both must hold up their end of the bargain or our defense program will suffer. We rely on contractors to carry out important defense projects efficiently, effectively, and with integrity. It is no exaggeration to say that their work is a matter of life and death to our servicemen. It is also a matter of incalculable importance to the safety and freedom of our citizens and, indeed to the entire free world. All of us, for these reasons, have a stake in the performance of defense contractors.

I believe we must restore the integrity of the defense acquisition process and in order to do so, a number of changes in the law must be made. The Defense Department must have effective tools to help it obtain fair and reasonable prices in the usually noncompetitive world of major weapons contracts. Defense contractors must be provided with a firm set of policies that makes clear to them their responsibilities while at the same time ensuring them a fair return on their investments. The current spate of unfavorable publicity concerning the performance of defense contractors must not lead us to eliminate the incentives they need to properly perform their work.

That is the purpose of my legislation. It will send a clear and straightforward signal to the defense industry that only fair and reasonable prices will be allowed on defense contracts and only profits which are earned in accordance with law and regulation will be permitted. Profits are necessary in the defense industry just as they are in any other industry. But profits must be fairly earned and reasonably related to the risks taken by contractors.

My bill has five titles. Title I seeks to restore the effectiveness of the Truth-in-Negotiations Act. The act was passed in 1962 in the wake of several General Accounting Office reports which disclosed that defense contractors were making excessive and unearned profits on negotiated, sole-source contracts. The lack of competition for these contracts meant that there was very little incentive to hold down costs. Because there was no competition, the Government had to rely on good faith negotiations with the contractor to ensure the lowest possible price.

All too often, the deck was stacked against the Government in these negotiations. Contractors actually had available more accurate, current and complete information concerning contract prices than they revealed to the Government. In many cases, this pric-

ing data indicated that the contractors would actually incur lower material, labor, and other costs than they were using to support their contract pricing proposals. As a result, negotiated prices were often too high and contractors profits were in many cases exorbitant.

The Truth-in-Negotiations Act was supposed to put the Government on an equal footing with the contractors when negotiating contracts. In a sense, it was designed to be a substitute for the lack of competition on these contracts. The Truth-in-Negotiations Act is one of the best means the Government has to prevent contractors from reaping unearned and excessive profits on contracts. Only when it has accurate and up-to-date information on contract proposals can the Government hope to obtain fair and reasonable prices.

This law requires contractors to submit current, accurate, and complete cost and pricing data on contract proposals valued at more than $500,000 and to certify that they have done so. It also authorizes the Government to audit the records of these contractors to find out whether they had, but failed to submit, better and more accurate cost and pricing data. Under the law, the procurement officials involved can reduce contract price or, when contract payments have already been made as is often the case, they can recover overpayments.

With a law like this on the books, overcharges on contracts should be under control. Unfortunately, during the last 10 years, decisions made by the Armed Services Board of Contract Appeals (ASBCA), the administrative board which hears contract disputes, have greatly weakened the law. For example, one recent decision by this board states that a contractor is not liable for failing to disclose all available information he has concerning contract prices if the Government should have known the data was not disclosed. This decision implies that a "take it or leave it" attitude on the part of contractors will be tolerated.

In another case, the board determined that pricing data did not have to be disclosed to contracting officers as long as some Government employee was given the data. Contractors could give pricing data on a contract proposal to a person not directly involved in the contract negotiations. As long as it can be proved that someone in Government was given the data, the contractors were relieved of their liability.

Other recent cases allow contractors to violate the Truth-in-Negotiations Act because a procurement was sole source or because a contractor was in a "superior" bargaining position. These and other decisions have reduced the deterrent effect of the act and made it much more difficult for Government negotiators to obtain fair and reasonable prices on contracts.

The act was originally passed because contractors all too often had data on cost and prices not available to the Government. Now, because of these decisions, contractors are excused from being open and truthful with the Government.

The Truth-in-Negotiations Act also contains no incentives to force contractors to settle defective pricing cases in a timely manner or to encourage them to avoid submitting faulty or overpriced contract proposals. Contractors who submit defective pricing data in support of a contract have often been paid many months or years before contracting officers get around to settling their cases. As a consequence, contractors who submit defective pricing data have long-term use of the taxpayers' money and under the law, they pay no interest for the use of that money or penalties for submitting defective pricing data. Contractors have every incentive not to settle cases for years. They pay no fines for delay and the longer a case drags on, the harder it will be for the Government to successfully settle.

Until recently, in part due to prodding from my committee and the Department of Defense Inspector General, the Defense Contract Audit Agency gave low priority to conducting defective pricing audits. Even today, less than 5 percent of DCAA's resources are devoted to such audits. Even worse, contracting officers often fail to fully support the findings of the DCAA auditors. Instead of insisting on recovering the full amount from contractors as recommended by DCAA, contracting officers often negotiate as little as 10 to 20 cents for each dollar of defective pricing uncovered by DCAA.

My committee held hearings on the effectiveness of the Truth-in-Negotiations Act in 1983 and uncovered numerous examples of waste of tax dollars through ineffective implementation of the act. For example, we uncovered one case in which a contractor agreed that he owed the Government $2 million in overcharges and yet it took almost 3 years to reach a final payment settlement. The contractor paid no fines or interest charges during the time in which the case was unresolved.

In another case, DCAA found $165,000 of overcharges on a contract. While the contracting officer agreed that defective pricing violations had occurred, he concluded that the amount involved was "not significant" and declined to collect from the contractor.

In a recent investigation by my committee, over 11 million dollars' worth of defective pricing was discovered on certain Navy shipbuilding contracts. Some of this money was first identified more than 4 years ago but nothing has been done about it.

During our hearings in 1983, information was submitted which indicated that over 1 billion dollars' worth of defective pricing remained uncollected by DOD. Some of this money had not been recovered even though it was first discovered almost 10 years ago. Contracting officers are lax in their efforts to recover defective pricing money from contractors. It appears that they do not want to face the unpleasant task of asking contractors to refund payments or reduce contract prices.

Mr. President, the important provisions of the Truth-in-Negotiations Act designed to protect the taxpayers against overcharges and excessive profits have been abused and weakened by the Armed Services Board of Contract Appeals, by law efforts on the part of contracting officers to recover funds, and by DCAA's unwillingness to devote resources to conducting defective pricing audits. It is time to strengthen and tighten the law to prevent overcharging. Title I of my bill does just that.

Essentially, Title I would improve the law in two primary ways. First, it would close certain loopholes in interpretation which have made it difficult for the Defense Department to collect overcharges resulting from defective pricing cases.

Second, it would put incentives in the law which would encourage contractors to settle defective pricing cases as soon as possible rather than to delay settlements for long periods of time. It would require that contractors be charged with interest from the day of contract award for any amounts determined to be defective pricing. This problem will help end unearned contractor profits and will reinstate the principle that defective pricing represents unearned enrichment to the contractor. A price adjustment under the act is not punishment but only fair restitution to the Government.

With all of this done, however, we still must have some institutional mechanism designed to collect exhorbitant profits which may become visible only after a contract has gotten underway or is concluded. For example, in one recent case involving two major defense contractors, excessive profits were earned by the two companies when they delivered products far in advance of the agreed-upon schedule. In recent shipbuilding contracts my committee reviewed, a contractor made profits approaching 22 percent of contract cost in part because it negotiated ship construction schedules which it knew were excessively long. When the ships were delivered earlier than called for under the contracts,

the contractors reaped unearned profits.

To cope with these and similar problems, I believe we must consider reactivating the Renegotiation Board and allow it to conduct reviews and make recoveries of excessive or unearned contractor profits. Title II of my bill does just that.

Nearly 15 million contracts are signed by the Defense Department each year and over $100 billion in procurement funds are obligated to pay for those contracts. More than $50,000 is spent each second by the Pentagon and some 8 million contractor employees and 50,000 Defense Department personnel are involved in managing military contracts. One recent contract proposal weighed almost 3 tons and contained complicated financial, engineering, and cost data. In short, the incredible complexity, the huge sums of money, the rapid pace of contract activity, and the large number of personnel involved in the contracting process make it extremely difficult to ensure that only fair and reasonable profits are earned by defense contractors.

An effective Renegotiation Board would provide a means of ensuring that defense contractors receive the profits they are entitled to and deserve while at the same time protecting the interests of the taxpayers in curbing unnecessary costs. Before 1979, renegotiation of defense contracts and subcontracts as a means of recovering excess profits received by contractors was authorized by the Renegotiation Act and the Renegotiation Board, a five-member independent agency, enforced the provisions of the act. Essentially, the Board reviewed and audited defense contracts and held hearings with defense contractors to determine whether excessive or unearned profits were received on contracts. During its 25 year existence, the Board found over $1.3 billion in excessive profits and its existence helped to deter contractors from making claims for profits that they did not deserve.

Today, while there are profit guidelines in existence in regulation, there are essentially no limits on profit levels. Profit limits contained in the Vinson-Trammell Act were eliminated in 1981 and the Congress eliminated funding for the Renegotiation Board in 1979. While the Truth-in-Negotiations Act and other requirements are intended to prevent DOD from negotiating and approving contracts with inequitable and excessive profits, in many cases such costs do not show up until contract progress payments begin to be made.

The Renegotiation Board will serve as a final check on profit levels. Because my legislation will also ensure that regular studies of contractor profit levels and financing practices are conducted at 3 year intervals, the Board will be able to pursue its work less obtrusively than before and more effectively. I would point out that the Board must be evenhanded in its work; large contractors must receive no special considerations just because of their size.

The third title of the bill concerns cost accounting standards. Uniform cost accounting standards were established for defense contracts in the decade of the 1970's in an effort to ensure that all contractors accounted for and allocated costs in a proper manner. Such uniformity made it easier for the Government and for contractors to ensure that fair and equitable contracts were negotiated.

Cost accounting standards continue to be a significant aid in establishing the integrity and credibility of cost figures and estimates used by DOD and by industry. The Cost Accounting Standards Board had the responsibility of establishing these standards and ensuring that they remained effective. It operated from March 1971 to September 1980 and during this time promulgated standards that covered most cost accounting matters.

During the past 3 years without a Cost Accounting Standards Board, no governmental group has functioned to amend standards when desirable or to provide interpretations, develop new standards and do the other duties previously performed by the Board. GAO has reviewed the implementation of costs accounting standards and its work has shown that Federal agencies and departments have generally implemented the standards as required. However, recent disputes between certain contractors and the Government concerning allowable costs suggests that reconstituting the Board may be a good idea.

Title III of my bill would reauthorize the Board as an independent organization in the executive branch of the Government. The Board would be headed by the Comptroller General and would have four other members all appointed by the President. The Comptroller General and the Defense Department both support the need for some type of Board.

Title IV of my legislation would require a survey to be made every 3 years of the profits and finances of defense contractors. The survey would help identify on a regular basis trends in the defense industry and provide the public and the Government with crucial information on the financial performance and capabilities of the defense industry.

While profit inflation is available on businesses from their annual reports, there is little information available on contract specific profit levels and the investments needed by the defense industry to meet commitments to the Government. It was 1976 when the last survey was made of contractor finances and profits. Both DOD's policies and the national economy have changed dramatically since then. Without this information, we cannot really determine whether profits on specific contracts are appropriate nor can we tell whether the interests of the taxpayer are being protected.

The Defense Department is conducting a new profits study but there is a need to make sure this data is provided on a regular basis to DOD and to Congress. Title IV of my bill would require defense contractors to report every 3 years on profit levels, investments, and losses. The Comptroller General supports this concept and stated recently in a speech before defense industry representatives:

> A review of DOD profit policy should be done periodically. * * * With such a program, we can enhance the credibility and integrity of the Government procurement processes and be a positive force in modernizing the industrial base.

The profit reporting requirements of title IV will provide needed data to craft more effective profit and contract financing policies. These improved policies will help Government contract negotiators achieve fair and reasonable contracts that avoid excessive or unearned profits.

Mr. President, the available evidence indicates that we need to reestablish the Renegotiation Board and that we must have better information on contractor profits. From all appearances, substantial profits are being made by contractors on defense work but we have little idea whether these profits are reasonable, whether they result in added investment to improve our defense industrial base nor whether our contract financing and payments policies make sense. We need to have this type of information in order to ensure fair profits to the contractors and reasonable prices on defense contracts.

Recent information available from the U.S. Census Bureau provides evidence that profits are healthy in the defense industry and they also raise questions which need to be answered. For example, according to the data, the top 10 defense contractors made the following profits in 1984:

PROFITS AT 10 LARGE MILITARY CONTRACTORS

Contractor	Profits as percent of equity	1984 profits (in millions)	Percent of sales to U.S. Government
Lockheed	42	$572	85
General Dynamics	30	382	86
Northrop	29	167	84
Martin Marietta	28	176	76
Boeing	26	787	42
Grumman	24	108	82
Rockwell International	21	496	63
Raytheon	18	340	49
Litton	16	277	41
McDonnell Douglas	16	325	69

Average return on equity for this group: 25 percent.
Average return for manufacturing, mining and trade corporations: 12.8 percent.

These are profits measured as a percent of equity, in other words, aftertax profits as a percentage of shareholder equity, and it is accepted as a fair representation of corporate profits on Wall Street. However, the data in the table is not broken out by percentage of sales to the U.S. Government and there is no data available purely on the profits made by these corporations as a result of their defense business. We have little information on the profits made by contractors on each of their contracts and we have almost no data on the investments made by contractors in their defense plants.

In short, all we have are indications that profits are healthy. We don't know how high they are, how reasonable they are in relation to contract costs nor how much investment had resulted from these profits. In order for us to be proper stewards of the taxpayers' dollars, we need to have this information and we need to have the tools to control excessive or unearned profits. That is the goal of titles III and IV of my bill.

Finally, the last title of the legislation would ensure that there is a statutory time limit on the filing of claims by contractors for work performed on contracts. Currently, contractors may file claims months and even years past the date upon which the event causing the filing of the claim occurred. Claims are often filed by contractors to cover the costs of changes made in the structure or design of a project at the request of the Government. However, there have been cases, most notably in shipbuilding, in which claims have been filed years after the date on which a change was ordered.

This excessively late filing of claims causes confusion and difficulty in establishing the validity of the claims. Often, it is almost impossible to track an old claim through years of paperwork and contract history. In the case of shipbuilding, late claims filings resulted in costly disputes which the Government has only recently settled.

As a result of the problems in Navy shipbuilding programs, a statutory limit of 18 months has been established as the deadline for the filing of claims. However, no similar statutory deadline exists for other weapons programs or for major construction programs. The legislation would set the deadline at 18 months in order to avoid confusion and ensure contract integrity.

The extension of the statutory 18-month period to all defense contracts has been supported by the Secretary of Defense. In a letter dated June 8, 1984, he stated "the Department of Defense supports, the 18-month statutory limit, in principle, but highly recommends that it be extended to all procurement and military construction." I believe this proposal will help ensure fair and equitable contract settlements and avoid costly litigation in the future.

Mr. President, I believe my legislation is comprehensive and will help to reestablish the integrity of the defense contracting process. I urge my colleagues to support it and ask that it be printed in the RECORD, along with a brief summary in explanation of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 940

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Defense Procurement Program Integrity Act of 1985."

TITLE I—UNALLOWABLE CONTRACT COSTS

COST AND PRICING DATA

SEC. 101. (a)(1) Subsection (f)(1) of section 2306 of title 10, United States Code, is amended by inserting "and are allowable in accordance with the requirements of law and applicable regulations and in accordance with such cost principles as the head of an agency makes applicable to the costs under such laws and regulations" after "current".

(2) Subsection (f)(2) of such section is amended by inserting "or were not allowable in accordance with the requirements of law and applicable regulations or in accordance with such cost principles as the head of the agency makes applicable to the costs under such laws and regulations" after "noncurrent".

(b) Section 2306 of such title is further amended by adding at the end thereof the following new subsections:

"(i) In any administrative or judicial proceeding to adjust the price of a contract under subsection (f)—

"(1) only cost and pricing data which were inaccurate, incomplete, or noncurrent when furnished with respect to the contract under subsection (f) and are higher than the accurate, complete, and current cost and pricing data which should have been furnished shall be considered for the purpose of determining an adjustment in the price of the contract;

"(2) it shall be conclusively presumed that the Government relied on all cost and pricing data furnished by the contractor or subcontractor under subsection (f); and

"(3) it shall not be a defense to an adjustment of the price of the contract that—

"(A) the price of the contract would not have been modified if accurate, complete, and current cost and pricing data had been furnished by the contractor or subcontractor because the contractor or subcontractor was the sole source of the property or services procured;

"(B) the price of the contract would not have been modified if accurate, complete, and current cost and pricing data had been furnished by the contractor or subcontractor because the contractor or subcontractor was in a superior bargaining position with respect to the property or services procured;

"(C) accurate, complete, and current cost and pricing data with respect to the contract were submitted to an officer or employee of the Government other than the contracting officer of the Government;

"(D) the contracting officer of the Government should have known that the cost and pricing data in issue were inaccurate, incomplete, or noncurrent even though the contractor or subcontractor furnishing the data took no affirmative action to bring the character of such data to the attention of the contracting officer;

"(E) the contract involved sales of military equipment to a foreign government;

"(F) the subcontractor furnished the cost or pricing data in issue on the contract or on a change or modification to the contract after the conclusion of an agreement between the Government and the prime contractor on such contract, change, or modification;

"(G) the contract was based on an agreement between the contractor and the Government about the total cost of the contract, and there was no agreement about the cost of each item procured under such contract; or

"(H) the prime contractor or subcontractor did not prepare and submit a certificate of cost and pricing data relating to the contract as required under subsection (f).

"(j)(1) In the case of an overpayment to a prime contractor or subcontractor by the United States Government by reason of the submission of inaccurate, incomplete, or noncurrent cost or pricing data under subsection (f), interest shall be charged on the amount of the overpayment. Interest shall be computed for the period beginning on the date of the overpayment and ending on the date the Government is reimbursed the amount of the overpayment or an adjustment under subsection (f) takes effect. Any adjustment in the price of the contract to the Government under subsection (f) shall include an adjustment for the amount of interest due the United States Government on the overpayment.

"(2) For the purposes of this subsection, the rate of interest charged for any period shall be the annual rate of interest established under section 6621 of the Internal Revenue Code of 1954 (26 U.S.C. 6621) for such period.".

TITLE II—RENEGOTIATION ACT

SHORT TITLE

SEC. 201. This title may be cited as the "Renegotiation Act Amendments of 1985".

CONTRACTS SUBJECT TO RENEGOTIATION

SEC. 202. Section 102 of the Renegotiation Act of 1951 (50 U.S.C. App. 1212) is amended by adding at the end thereof the following:

"(f) Certain Amounts Received After October 1, 1976.—Notwithstanding subsection (a), the provisions of this title shall not apply to contracts with Departments, or related subcontracts, to the extent of the amounts received or accrued by a contractor or subcontractor during the period beginning on October 1, 1976, and ending on October 1, 1985.".

TERMINATION DATE

SEC. 203. The last sentence of section 102(c)(1) of the Renegotiation Act of 1951 (50 U.S.C. App. 1212(c)(1)) is amended to read as follows: "For purposes of this title, the term 'termination date' means September 30, 1988.".

METHOD OF RENEGOTIATION

SEC. 204. Section 105(a) of the Renegotiation Act of 1951 (50 U.S.C. App. 1215(a)) is amended by inserting after the sixth sen-

tence thereof the following: "In renegotiating contracts and subcontracts under this title, the Board shall renegotiate the contracts and subcontracts by division and by major product line within a division of the contractor or subcontractor.".

MINIMUM AMOUNT SUBJECT TO RENEGOTIATION

SEC. 205. Section 105(f) of the Renegotiation Act of 1951 (50 U.S.C. App. 1215(f)) is amended—

(1) in paragraph (1), by inserting ", or $5,000,000 in the case of a fiscal year ending after the date of the enactment of the Renegotiation Act Amendments of 1985" after "June 30, 1956" each place it appears;

(2) in the second sentence of paragraph (3), by inserting "the $5,000,000 amount," after "the $1,000,000 amount,"; and

(3) in the last sentence of paragraph (3), by striking out "$1,000,000" each place it appears and inserting in lieu thereof "$5,000,000".

APPOINTMENTS TO RENEGOTIATION BOARDF

SEC. 206. Not later than October 1, 1985, the President shall appoint the members of the Renegotiation Board created by section 107(a) of the Renegotiation Act of 1951.

AUTHORIZATION

SEC. 207. There is authorized to be appropriated to the Renegotiation Board referred to in section 206 for fiscal year 1986, $10 million.

TRANSFER

SEC. 208. All property (including records) of the Renegotiation Board that was transferred to the Administrator of General Services pursuant to Public Law 95-431 (92 Stat. 1043) and is available shall be transferred to the Renegotiation Board.

EFFECTIVE DATE

SEC. 209. The amendments made by sections 202, 203, 204, and 205 of this title shall take effect on October 1, 1985.

TITLE III—COST-ACCOUNTING STANDARDS BOARD

SHORT TITLE

SEC. 301. This title may be cited as the "Cost-Accounting Standards Board Amendments of 1985".

COST-ACCOUNTING STANDARDS BOARD AMENDMENTS

SEC. 302. (a) Subsection (a) of section 719 of the Defense Production Act of 1950 (50 U.S.C. App. 2168(a)) is amended to read as follows:

"(a)(1) There is established a Cost-Accounting Standards Board which shall consist of—

"(A) the Comptroller General of the United States who shall serve as Chairman of the Board; and

"(B) four members to be appointed by the President of the United States, by and with the advice and consent of the Senate.

"(2) Of the members appointed to the Board—

"(A) two, of whom one shall be particularly knowledgeable about the cost accounting problems of small business, shall be from the accounting profession;

"(B) one shall be representative of industry; and

"(C) one shall be from a department or agency of the Federal Government.

"(3)(A) The term of office of each of the appointed members of the Board shall be four years, except that any member appointed to fill a vacancy in the Board shall serve for the remainder of the term for which his predecessor was appointed.

"(B) A vacancy on the Board shall be filled in the same manner in which the original appointment was made.

"(4) Each member of the Board appointed from private life shall receive compensation at the rate of one-two-hundred-sixtieth of the rate prescribed for level IV of the Federal Executive Salary Schedule for each day (including travel-time) in which he is engaged in the actual performance of duties vested in the Board.".

(b) The first sentence of subsection (g) of such section is amended to read as follows: "The Board may promulgate, from time to time, cost-accounting standards designed to achieve uniformity and consistency in the cost-accounting principles followed by defense contractors and subcontractors under Federal contracts.".

(c)(1) Subsection (h)(1) of such section is amended—

(A) in the first sentence, by inserting "interpret," after "amended,"; and

(B) by striking out the third sentence and inserting in lieu thereof the following: "The interest rate applicable to the price adjustment shall not exceed a rate determined by the Secretary of the Treasury, taking into consideration current long-term Federal Government borrowing rates. Such interest shall accrue from the time payments of the increased costs were made to the contractor or subcontractor to the time the price adjustment is effected.".

(2) Subsection (h)(3) of such section is amended to read as follows:

"(3)(A) Cost-accounting standards promulgated under subsection (g) and rules and regulatons prescribed under this subsection shall take effect not earlier than the expiration of the first period of ninety calendar days of continuous session of the Congress following the date on which a copy of the proposed standards, rules, or regulations is transmitted to the Congress.

"(B) For purposes of this paragraph, in the computation of the ninety-day period there shall be excluded the days on which either House is not in session because of adjournment of more than three days to a day certain or an adjournment of the Congress sine die.

"(C) The provisions of this paragraph do not apply to modifications of cost-accounting standards, rules, or regulations which have become effective in conformity with those provisions.".

(d) Subsection (k) of such section is amended to read as follows:

"(k) The Board shall report to the Congress not later than one year after the date of enactment of the Cost-Accounting Standards Board Amendments of 1985, and annually thereafter, with respect to its activities and operations, together with such recommendations as it deems appropriate.".

(e) Such section is further amended by redesignating subsection (l) as subsection (m) and by inserting after subsection (k) the following:

"(l) All cost-accounting standards, interpretations, modifications, rules, and regulations promulgated or issued by the Cost-Accounting Standards Board established by this section shall remain in effect unless and until amended, superseded, or eliminated by the Board pursuant to the authority of this section.".

TITLE IV—CONTRACTOR PROFIT STUDIES

SEC. 401. (a) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section 2406:

"§ 2406. Contractor profit studies

"(a) The Secretary of Defense, on a regular periodic basis, shall carry out studies of profits made by contractors under Department of Defense contracts to determine whether the level of such profits is reasonable. The Secretary shall carry out the studies at least once each 4 years.

"(b) A study under subsection (a) shall include (1) the profits made by contractors under Department of Defense contracts, (2) a comparison of the level of profitability of defense contractors under such contracts with the level of profitability of contractors under nondefense contracts and with the general level of profitability of businesses in the private section, and (3) whether variations between the levels of profitability are reasonable under the circumstances, (4) the impact of cost allowability on pricing and profits, (5) the relationship of contract pricing to capital investment, (6) the use of pricing to motivate cost efficiency and (7) the relationship of payment policy and contract pricing.

"(c) The Secretary of Defense shall transmit the findings resulting from a study under subsection (a) to the Congress, the Comptroller General of the United States, and the Renegotiation Board established by section 107(a) of the Renegotiation Act of 1951.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following:

TITLE V—LIMITATION ON CONTRACTOR CLAIMS

SEC. 501. (a)(1) Chapter 137 of title 10, United States Code, is amended by adding at the end thereof the following new section 2324:

"§ 2324. Limitation on contract claims

"(a) A claim submitted by a contractor requesting or demanding payment in connection with a contract entered into by the Department of Defense, including a claim for an equitable adjustment, may not be paid unless the claim is submitted as provided in subsection (b).

"(b) A claim referred to in subsection (a) shall be submitted to the appropriate contracting officer of the Department of Defense within 18 months after the date of the event (or the last date of the event, as the case may be) on which the claim is based, shall include the certification required by section 6(c)(1) of the Contract Disputes Act of 1978, and shall include such documentation as the Secretary concerned may prescribe in regulations.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following:

"2324. Limitation on contract claims.".

(b) The amendments made by subsection (a) shall take effect with respect to contracts entered into on or after the date of enactment of this Act.

THE "DEFENSE PROCUREMENT PROGRAM INTEGRITY ACT OF 1985"—A BRIEF SUMMARY

The bill has five titles aimed at making both the Defense Department and defense contractors more responsible business partners.

TITLE 1: DEFECTIVE PRICING

Closes loopholes in the defective pricing provision of the Truth-in-Negotiations Act by disallowing certain defenses used by contractors when they have been caught with less inaccurate, incomplete, and has current

cost and pricing data. Defenses previously allowed by the Armed Services Board of Contract Appeals that would now be disallowed are:

1. That the contractor, being the sole source of the property or service, would not have modified the contract price.
2. That the contractor was in a superior bargaining position and would not have modified the contract price.
3. That the supply of cost and pricing data to any officer or employee of the government is sufficient (even though the officer or employee is someone other than the contracting officer).
4. That the contracting officer should have know that cost and pricing data was deficient.
5. The contract involved foreign military sales.
6. The subcontractor submitted the data after agreement between the prime contractor and the government.
7. The contract is based on total cost, not the cost of individual items.
8. A certificate of cost and pricing data was not prepared.

Provides for interest penalties on defective pricing cases to encourage contractors to settle defective pricing cases as soon as possible rather than to delay settlements for long periods of time.

TITLE 2: RENEGOTIATION

Reinstitutes the old five-member Renegotiation Board which was charged with ensuring that defense contractors receive the profits they are entitled to while at the same time protecting the interests of the taxpayers. Estimated operating budget of $9.9 million in 1986. Changes in the Board include:

1. To allow renegotiation by division and by product line within the organization of a contractor or subcontractor, thereby closing a loophole in the original Act which allowed firms to average profitable with unprofitable product lines in order to escape renegotiation proceedings.
2. Increasing the minimum floor at which a company is subject to review by the Board from $1 million to $5 million of renegotiable sales. This is to encourage the Board to focus on larger defense firms rather than small businesses.

TITLE 3: COST ACCOUNTING STANDARDS

This section would reestablish the Cost Accounting Standards Board (CAS Board). The old Board went out of existence in 1980 after promulgating uniform standards governing the manner in which costs are accounted for and allocated on defense contracts.

The Board would be established in the Executive Branch. The Comptroller General would serve as chairman, four other members are appointed for four-year terms by the President with the advice and consent of the Senate. Members shall be compensated at a daily rate when engaged in actual performance of duties.

The Board would promulgate cost-accounting standards designed to achieve uniformity and consistency in the cost-accounting principle followed by defense contractors. Estimated cost is $1 million annually.

TITLE 4: CONTRACTOR PROFITS

This section would require a survey to be made every three years of the profits and finances of defense contractors.

The survey would help identify, on a regular basis, trends in the defense industry and provide the public and the government with crucial information on the financial performance and capabilities of the defense industry.

This would formalize a current study now being undertaken by the Defense Department on profits and ensure that this kind of data is provided to Congress and the public on a regular basis.

TITLE 5: STATUTE OF LIMITATIONS ON CLAIMS

Currently, all contractors except those in the shipbuilding industry may file claims months and even years past the date upon which a change in the contract was made. This can result in contractors using the claims process as a means of recouping losses incurred on contracts.

Legislation passed by Congress last year set an 18-month statute of limitations on claims submitted by shipbuilding contractors against the Navy. The bill would extend that provision DOD-wide.●

By Mr. ROTH:

S. 941. A bill to amend title 10, United States Code, to establish the position of Director of Weapon Systems Acquisitions in the Department of Defense, and for other purposes; to the Committee on Armed Services.

WEAPON SYSTEMS ACQUISITIONS IMPROVEMENT AND REFORM ACT

● Mr. ROTH. Mr. President, I am pleased to introduce today the Major Weapon Systems Acquisitions Improvement and Reform Act of 1985. This bill would consolidate within the Department of Defense all major procurement activities. This office would take over the management of major weapons acquisition programs from the military services. It would be headed by a civilian Director nominated by the President and confirmed by the Senate who would be charged with developing and procuring the weaponry needed by our military services. The Director would also be responsible for developing appropriate career training, apprenticeship, incentive, and evaluation programs to assure the establishment of a stable and motivated acquisition work force. Based on the evidence I have seen, I believe this idea offers the potential for more effectively managed and less costly weapons programs.

Mr. President, I would be the first to acknowledge that it is no piece of cake to develop, produce, and manage complex weapon systems and to hold down the cost growth which routinely affects them. If it were, the dozens and dozens of acquisition improvement efforts which have been initiated by virtually every administration would certainly by now have given us a more efficient and well-managed acquisition process.

It hasn't happened. In fact, if anything the problems in the acquisition process are as serious today as they have ever been and the public has the perception that we really don't know how to build dependable, reasonably priced weapon systems.

Part of this perception of an acquisition system out of control stems from the very fact that the Defense budget, and in particular the procurement portion of that budget, has grown dramatically over the last 3 years. The Defense Department procurement request for this year is three times greater, in constant dollars, than it was less than a decade ago. About 15 million separate contract actions will be made in this year alone to buy weapons and related spare parts. Nearly 1 job in 10 in the United States today is dependent to some degree on the defense contracting business. Somewhere around half of the general tax revenues now collected go to defense programs.

The public is also aware of these substantial increases in the Defense budget. But they are just as aware of the cost growth, weapon system failures, and overpriced spare parts which have resulted from the existing acquisition system. As my colleagues know from their visits with constituents back home, the fact, is that the public's view of defense matters is greatly influenced by their perceptions of the way in which weapon programs and spare parts purchases are managed. My concern, and I know that of other Senators as well, is that the public is becoming convinced the Defense Department is not effectively managing the defense acquisition process.

If we don't act soon, we run the risk of losing the consensus in support of the defense rebuilding effort which we need and which was so evident in 1981. Coupled with the budget deficit pressures which have now begun to affect the size of the defense program, the public's growing disillusionment with the management of the acquisition process is a serious matter and one that I, as a strong proponent of revitalized defense, am anxious to reverse. The job of buying weapons and equipment not only has to be done well, the public has to be convinced it is being done well.

Mr. President, the acquisition process has been examined repeatedly over the years and we are all familiar with most of the many problems cited at one time or another as major factors in cost growth and mismanagement: poor or overly optimistic cost estimates, gold-plating, poor testing, lack of competition in contracts, and schedule stretchouts. Whether these are in fact the real causes of cost growth, or just symptoms of the problem, there is little doubt in my mind that the acquisition process is ripe for improvement. More than 3 years of hearings on acquisition management in my Governmental Affairs Committee have convinced me of that fact. A recent report by the General Accounting Office dramatically illustrates the very serious cost growth and management problems affecting acquisition programs.

GAO reviewed the Defense Department's budget, planning, and cost esti-

mating procedures for its major weapons programs to provide an assessment of the realism of the Department's 5-year projection of funding requirements. The GAO looked at the actual versus planned costs for 97 major weapons between the years 1973 and 1983 and found that Congress must consistently provide substantially greater appropriations than anticipated for weaponry, an average of 32 percent more. It also found that even with the additional money, the quantities of weapons which DOD is actually able to buy is consistently less than originally planned. In fact, since 1970 this pattern of receiving more money and purchasing fewer quantities of weapons has gotten worse and in the 13-year time period between then and now, DOD has never once been able to purchase the planned quantities.

The GAO figures indicate that our acquisition system is in a serious state of disrepair, soaking up even the sizable increases in funding which have occurred over the last 3 years and producing far less than we had hoped. We are buying less but continuing to spend more. I am convinced the American people are willing to dig deep to build a strong defense but I am equally convinced they won't accept a defense which is wasteful and more costly than necessary.

I would point out that numerous recent studies conducted by prestigious organizations such as the Center for Strategic and International Studies [CSIS] and the Heritage Foundation indicate that the public's perception of a wasteful and inefficient weapons acquisition process are on target. For example, the CSIS study concludes:

> Despite the good will, competence, and effort of the individuals who have in the past and are now leading the Department of Defense, we continue to face a broad range of problems in the management of our national security activities.

Six former Secretaries of Defense agreed with the conclusions reached in the study and they stated:

> In our view, the public's concern is well-founded: There are serious deficiencies in the organization and managerial procedures of the U.S. defense establishment.

In outlining the serious problems we face in improving the management of acquisition programs, it becomes apparent to me that the solutions of the past are no longer adequate. I believe we should consider more comprehensive, and far-reaching changes which may threaten the status quo, but could help set the stage for real and lasting improvements.

That is why I am proposing the creation of a civilian Officer of Major Weapon Acquisitions.

How would such a proposal help improve the management of the defense acquisition process? It would ensure that someone—the Director of Major Weapon Systems Acquisition—is identified and held accountable for the performance and cost of a weapon program. This person would have the clear responsibility. This person would have to answer for the cost increases and technical problems. This person would enjoy the rewards and recognition of a job well done.

That is not the case now nor has it been so for a long time. Fourteen years ago, Gilbert Fitzhugh, the Chairman of the President's Blue Ribbon Defense Review Commission said of DOD procurement:

> There is nobody that you can point your finger to if anything goes wrong and there is nobody you can pin a medal on if it goes right, because everything is everybody's business and . . . what is everybody's business is nobody's business.

The bill not only establishes clear accountability for weapon system acquisition, it also makes it the Director's responsibility to upgrade and stabilize the procurement work force. The procurement work force today is not trained adequately. People making procurement decisions often do not have the experience necessary to deal effectively with complex weapon systems and are frequently shifted in and out, from job to job. For military officers, managing an acquisition program is not often a career goal and few officers want to stay for a long period of time as a program manager or other procurement official. The result is a work force that does not have sufficient familiarity with the systems and programs it manages and cannot be made to account for the results of their management actions. "It didn't happen on my watch" is a phrase all too often heard.

Evidence gathered by the General Accounting Office and Pentagon audit agencies illustrates the many problems affecting the existing acquisition process. For example, the C-5 aircraft has had nine different program managers over the life of the program. The Army Audit Agency found on the Hellfire Missile, Pershing II, Multiple Launch Rocket System, and the Viper Rocket System that since 1978, these four systems had an average of one new program manager every 2 years. The Army report concluded that since "It normally takes a project manager at least a year to have a good understanding of a project, changes should be minimized."

Aside from the high turnover of military officers, there are indications that procurement personnel are not being adequately trained to perform their jobs. Evidence of the magnitude of this problem is contained in a February 1984 report from the Defense Department inspector general who reported significant deficiencies in the training of the 26,000 member DOD procurement work force. The IG found that the mandatory procurement training requirements in the Department were not being implemented effectively. He noted that 67 percent of the senior and intermediate level contracting peronnel surveyed had not completed the DOD training requirements. To overcome these training shortfalls, the IG estimated that 29,000 man-days of effort would be required. The IG concluded that "the DOD procurement work force may not be sufficiently trained to effectively meet the procurement mission."

Interservice rivalries and military service domination of acquisition also makes it difficult if not impossible to implement uniform departmentwide policies for procurement or to pursue potentially money-saving acquisition strategies such as joint service purchasing of weapons. To illustrate, a 1983 GAO report found that there has never been a successful joint procurement program between the services, one that could help assure substantial commonality among systems deployed by the services and achieve significant cost savings. They noted that the services have different organizational arrangements, standards, data requirements, manuals, provisioning procedures, military specifications, and occupational skills in their acquisition systems. Even nomenclature and application of departmentwide requirements are different between the services.

For example, an effort was made in the mid-1960's to consolidate the oversight of defense contract management in one agency, the Defense Contract Administration Service [DCAS]. Supposedly, plant cognizance or the actual management of contracts was to have been given over to the new agency from the services and it would establish uniform oversight offices in contractors' plants. However, the DOD directive provides a loophole which allows each of the services to continue to maintain their own oversight offices in contractors' plants, continuing the duplication, confusion, and waste which existed before the establishment of DCAS. DCAS has never been allowed to become the centralized contract administration agency it was supposed to have become because of opposition from the services.

As a result, the Government does not present a single face to the contractors. Information for six prime contractors which I have developed shows that many contractors are forced to deal with more than one DOD administrative agency in performing their contract work. In some cases, the Navy, Air Force, and DCAS all have people on location in the same contractor plant.

This morass of different procurement organizations and policies, the high turnover of procurement personnel, the poor training and experience

that characterizes the Government's work force and the lack of accountability for the success or failures of weapons programs are problems my bill seeks to address.

A centralized civilian weapons acquisition management agency in DOD would help ensure the continuity of key personnel, reduce duplication and result in operational economies. Procurement is a business function, not a military one. Putting it in the hands of professional procurement personnel would free up valuable military personnel to be concentrated on true military functions, such as military strategy formulation and contingency planning.

Under the civilian acquisition agency concept, the military would continue to perform the military functions of identifying threats, developing requirements for weaponry to fight those threats and commanding combat units. Only the management of the actual acquisition of weapons would be changed. The proposed centralized acquisition agency would be staffed by civilian professionals, trained and prepared to devote their careers to acquisition management. They would direct the acquisition of a weapon system and would be assigned to manage the program for many years, remaining fully accountable for its success or failure.

Mr. President, I would point out that in creating such an agency, we should be fully prepared to compensate its procurement professionals adequately and be willing to reward good work and punish poor performance. In time, we would develop a cadre of seasoned procurement professionals who would know the acquisition process from the inside out and be ready to devote their careers to their chosen profession—acquisition management.

I am firmly convinced that the creation of the kind of civilian acquisition agency I have described would result in more accountable, more professional and more cost conscious acquisition managers. However, I believe that this idea must be thoroughly considered and its implementation carefully planned in order to ensure that the concept is successfully adopted as a part of our defense acquisition process. I consider my bill to be a first step in the process of developing this idea. It can serve as a vehicle for comment and refinement and I hope all Members will take the time to offer me their thoughts on the proposal. There is no doubt that this kind of reform will encounter resistance from some. However, the idea has the support of the President's own Grace Commission. There is also much to be gained from the experience of our Western allies. The Congressional Research Service did a study at my request on the acquisition of weapon systems in several European nations. The report was completed recently and found that "Since the 1960's, there would appear to be a significant trend in the Western industrialized countries toward centralization of the military procurement function." The report states that the chief motive of "centralization seems to have been the avoidance of duplication and the promotion of economy in an era when the cost of major weapon systems has escalated substantially." Overall, the report shows that most of our Western allies have moved to a centralized acquisition management agency and it ends with the observation that a "significant indication of the degree of satisfaction with centralization is that none of these countries intends to reverse this trend."

Based on the decades of problems which have plagued our Nation's defense acquisition process and the success many European countries have had with a centralized weapons acquisition management agency, I believe the idea of a centralized acquisition management agency has merit, and I urge Members to study the proposal.

Mr. President, I recently wrote an editorial on this idea which was published in the Washington Post. I ask unanimous consent that the editorial, along with the bill, be printed in the RECORD. I also ask unanimous consent that an analysis of the bill appear in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 941

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Weapons System Acquisitions Improvement and Reform Act of 1985".

PURPOSES

SEC. 2. The purposes of this Act are—

(1) to reduce conflicts, overlapping activities, and duplication among the Armed Forces of the United States in the development and procurement of weapon systems;

(2) to improve the professionalism, expertise, training, and experience of the civilian acquisition work force in the Department of Defense;

(3) to allow the Armed Forces to concentrate on the military functions which are their primary responsibility;

(4) to assure that acquisition managers and support personnel in the Department of Defense are held accountable for the success or failure of their weapon systems acquisition programs; and

(5) to increase the efficiency and effectiveness of the acquisition process and reduce cost growth, acquisition schedule delays, and quality deficiencies which have affected and continue to affect major weapon systems acquisition programs.

ESTABLISHMENT

SEC. 3. (a) Chapter 4 of title 10, United States Code, is amended by inserting after section 136a the following new section:

"§ 136b. Director of Weapon System Acquisitions: APPOINTMENT; POWERS AND DUTIES

"(a) In this section, 'weapon system acquisition program' means a program to develop and procure a weapon system, including all initial components, spare or replacement parts, hardware, software, and associated equipment, which function together to give the weapon system the capability to carry out the mission for which it is developed and procured.

"(b)(1) There is a Director of Weapon Systems Acquisitions in the Department of Defense, appointed by the President, by and with the advice and consent of the Senate.

"(2) The Director shall report to and be under the direction, control, and authority of the Secretary of Defense and shall not be subject to or report to any other officer or employee of the Department.

"(c)(1) The President shall appoint the Director from among civilians without regard to political affiliation and solely on the basis of fitness to perform the duties of the Director.

"(2) The President may remove the Director of Weapon Systems Acquisitions from office. Upon removing a Director of Weapon Systems Acquisitions from office, the President shall transmit to the Senate and the House of Representatives a written explanation of the reasons for the removal.

"(d) It is the duty and responsibility of the Director—

"(1) to carry out, in a cost-effective and timely manner, all acquisitions of weapon systems for the Department of Defense, including the acquisition of initial components and spare parts, hardware, software, and associated equipment;

"(2) to assure that each weapon system acquired is a reliable, maintainable, and operationally effective weapon system and is designed to successfully carry out the missions identified for the weapon system by each armed force for which the weapon system is acquired;

"(3) to establish and carry out appropriate career training, apprenticeship, incentives, and evaluation programs to assure the establishment and maintenance of a stable, motivated, and experienced work force in the office of the Director of Weapon Systems Acquisitions;

"(4) to require the assignment of personnel to a weapon system acquisition program for a sufficient period of time to assure the direct accountability of personnel for program performance and to assure the effective management of such program or of a specific phase of such program; and

"(5) to respond to requests from the Congress relating to programs within the responsibility of the Director.

"(e) The Secretary of Defense shall delegate to the Director the Secretary's authority to develop and procure weapon systems.

"(f) Chapters 137 and 141 of this title shall apply to the Director in the same manner as such chapters apply to the Secretary of Defense.

"(g) Neither the Secretary of a military department, nor a designee of such Secretary, may carry out a weapon system acquisition program.

"(h) The Secretary of Defense shall assure that the office of the Director of Weapon Systems Acquisitions is appropriately staffed with civilian personnel.

"(i) The Secretary of Defense shall furnish the Director of Weapon Systems Acquisitions the appropriate and adequate office space (including field office space), equip-

ment, special facilities, and services necessary to carry out the Director's duties and responsibilities.

"(j) The Secretary of Defense shall transmit to the Congress recommendations for such legislation as the Secretary considers necessary to eliminate any limitations which prevent the establishment of any personnel program referred to in subsection (d)(3).".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 136a the following new item:

"136b. Director of Weapon Systems Acquisitions: appointment; powers and duties.".

GRADE OF POSITION

SEC. 4. Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following:

"Director of Weapon Systems Acquisitions, Department of Defense.".

TRANSFERS

SEC. 5. (a) The Secretary of Defense shall transfer to the Director of Weapon Systems Acquisitions of the Department of Defense all functions and activities that the Secretary determines are significantly related to or otherwise important to the successful performance of the duties and responsibilities of the Director set out in section 136b(d) of title 10, United States Code (as added by section 3 of this Act), and are within the responsibility of—

(1) the Defense Contract Administration Service of the Defense Logistics Agency;

(2) the Army Material Development and Readiness Command (including the Army Missile Command and the Army Tank and Automotive Command);

(3) the Naval Material Command (including the Naval Air Systems Command, the Naval Electronics System Command, the Naval Supply Systems Command, the Naval Sea Systems Command, and the Naval Facilities and Engineering Command);

(4) the Air Force Systems Command;

(5) the Air Force Logistics Command; or

(6) any other subordinate unit of the Department of Defense.

(b) The Secretary of Defense shall, subject to section 1531 of title 31, United States Code, transfer to the office of the Director of Weapon Systems Acquisitions the personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available, in connection with the functions or activities transferred pursuant to subsection (a).

SAVINGS PROVISIONS

SEC. 6. (a) In this section—

(1) "Director" means the Director of Weapon Systems Acquisitions of the Department of Defense;

(2) "military department" means a department listed in section 101(7) of title 10, United States Code;

(3) "Secretary" means the Secretary of Defense; and

(4) "Secretary concerned" has the meaning given such term in section 101(8) of such title.

(b) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective in the exercise of functions, transferred under section 5, or by any court of competent jurisdiction; and

(2) which are in effect on the effective date of this Act,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Defense, by any court of competent jurisdiction, or by operation of law.

(c) The provisions of this Act shall not affect any proceedings pending at the time this Act takes effect before the Department of Defense or a military department, the functions of which are transferred to the Director under section 5.

(d) Except as provided in subsection (f)—

(1) the provisions of this Act shall not affect actions commenced prior to the date this Act takes effect; and

(2) in all such actions proceedings may continue, appeals may be taken, and judgments may be rendered, in the same manner and effect as if this Act had not been enacted.

(e) No action or other proceeding commenced by or against any officer in his official capacity as an officer for the Department of Defense or a military department from whom functions are transferred by this Act shall abate by reason of the enactment of this Act. No cause of action by or against Department of Defense or a military department, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act. Causes of action and actions with respect to a function, activity, or office transferred under section 5, or other proceedings may be asserted by or against the United States, the Secretary, or the Director as may be appropriate and, in an action pending when this Act takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(f) If, before the effective date of this Act, a military department, or any officer thereof in his official capacity, is a party to an action, and under section 5 any function or activity of the military department is transferred to the Director, such action shall be continued with the Secretary or the Director substituted or added as a party, as appropriate.

(g) Orders and actions of the Director in the exercise of the functions transferred under section 5 shall be subject to judicial review to the same extent and in the same manner as if such orders had been issued and such actions had been taken by the Secretary or the head of the military department exercising such functions immediately preceding their transfer. Any statutory requirements relating to notice, hearings, actions upon the record, or administrative review that apply to any functions transferred under section 5 shall apply to the exercise of such functions by the Secretary or the Director.

EFFECTIVE DATE AND APPLICATION

SEC. 7. (a) This Act and the amendments made by this Act shall take effect on the first day of the first month beginning 18 months after the date of enactment of this Act.

(b)(1) Notwithstanding section 136b(d) of title 10, United States Code (as added by section 3 of this Act), during the period beginning on the effective date of this Act and ending on the first day of the sixth fiscal year that begins after such date, the Director of Weapon Systems Acquisitions of the Department of Defense shall perform the duties and responsibilities set out in such section 136b(d) only with respect to weapon system acquisition programs that are major defense acquisition programs (as defined in section 139a(a)(1) of title 10, United States Code).

(2) The Secretary of Defense shall take paragraph (1) into consideration in scheduling the effective dates of transfers to be made under section 5.

[From the Washington Post, May 20, 1984]

WE NEED PROFESSIONAL ARMORERS: WEAPONS ARE TOO IMPORTANT TO LET THE MILITARY PROCURE THEM

(By William V. Roth, Jr.)

The excuse I most often hear for the horror stories that have come out of the Pentagon in recent years—weapons that don't work, 1,000-percent cost overruns, 15-cent tools with $9,000 price tags—is that timeworn military dodge, "It didn't happen on my watch."

Trying to fix responsibility for military waste and mismanagement is like trying to nail Jell-o to the wall. And it's not a new problem: Gilbert Fitzhugh, the chairman of a major defense review commission in the early 1970s, complained:

"There is nobody [in the Defense Department] that you can point your finger to if anything goes wrong, and there is nobody you can pin a medal on if it goes right, because everything is everybody's business and . . . what is everybody's business is nobody's business."

Nowhere is this situation more prevalent, or more troublesome, than in the procurement of major weapon systems. Every time we hold a hearing on a new procurement snafu, we are told that many, if not all, of the bad decisions along the line were made by people who are no longer associated with the project, or even in the service. When you put a project manager under the gun, the temptation to pass the buck back to his predecessors seems overwhelming.

It's becoming clear that most of the blame for these procurement fiascos lies not with the individual project managers and contracting officials—generally hard-working, well-meaning people who do the best they can—but with a system that puts procurement management decisions for major new weapons programs into the hands of a succession of military officers who have neither the training nor the experience to handle the job. Any system that assigns as many as nine or 10 officers to manage the different stages of a multiyear procurement is asking for trouble, and trouble is just what we're getting.

Examples are everywhere. The C-5 cargo plane has had nine different program managers during its problem-plagued lifetime. The project managers for the Army's Hellfire and Pershing II missiles, the Multiple Launch Rocket System and the Viper rocket have had an average tenure of only two years.

Since management experts tell us that it takes a manager at least a year to master the ins and outs of a complex project, it's hard to escape the conclusion that these weapon programs are being managed at least half the time by people who don't really know what they're doing.

Moreover—according to a recent report by the Pentagon's inspector general—there are serious short-comings in the training of the Defense Department's 26,000 procurement specialists. Fully 67 percent of the senior and intermediate-level contracting personnel surveyed had not completed "mandatory" training requirements, the report said.

Interservice rivalry is another cause of our military procurement headaches. Each service jealously guards the right to buy its own weapons, in it own way, to carry out its own mission. As a result, every attempt to save money by developing weapons that can be used by more than one service—like the notorious F-111 fighter-bomber—has been doomed to failure.

Over the years, both Congress and the Pentagon have made sporadic and limited efforts to solve some of these problems, with a notable lack of success. Now, with defense spending at an all-time high, it's time to make fundamental changes.

One controversial idea which deserves a fresh look is a proposal to take procurement of major weapons entirely out of the hands of the military services and turn it over to a centralized Defense Procurement Agency. The agency would be staffed by a highly-trained, well-paid cadre of civilian procurement and systems management professionals similar to the diplomats in the U.S. Foreign Service and the medical specialists in the Public Health Service.

Unlike career military officers who rotate in and out of procurement and program management assignments, and who often regard such tours of duty as unwelcome detours on the road to higher rank, members of the Defense Procurement Service would sign up for careers as procurement specialists. They would advance in grade as they gained experience and expertise, and receive promotions and bonuses based largely on their ability to procure major new weapons at the lowest possible cost.

As a condition of employment, Procurement Service professionals would agree not to accept employment from a major defense contractor for an extended period of time—say, five years—after leaving the government.

This proposal would address many difficult procurement problems in a single reform. Continuity and accountability would be insured. If one team of managers would stick with a project from concept stage to completion and the weapon didn't work, or the cost escalated beyond recognition, we'd know who to blame.

Turning procurement over to a civilian procurement corps would also free military officers to do the work they're trained to do: formulating military strategy, planning for contingencies and developing requirements for weapons to meet the nation's defense needs.

Despite its merits, this proposal has never had a hearing because of strong opposition from the military services. But the idea is hardly unprecedented. Of the world's major military powers, only the United States and the Soviet Union continued to procure major weapons through systems controlled by the military services. Although the evidence is inconclusive, there is reason to believe that civilian acquisition agencies in countries like Great Britain, Canada and West Germany have worked well, and could serve as models.

With our defense budget soaring, we simply must look for basic changes in weapons procurement. A civilian-run Defense Procurement Service may be just the reform we need to bring the cost of weapons under control.

WHAT THE BILL DOES

1. It consolidates the procurement personnel of the following into one office:

	Procurement personnel	
	Civilian	Military
The Defense Contract Administration Service of the Defense Logistics Agency	(1)	(1)
The Army Material Development and Readiness Command (including the Army Missile Command and the Army Tank and Automotive Command)	6,402	216
The Naval Material Command (including the Naval Air Systems Command, the Naval Electronics Systems Command, Naval Supply Systems Command, the Naval Sea Systems Command and Naval Facilities Engineering Command)	8,659	949
The Air Force Systems Command	4,135	455
The Air Force Logistics Command	3,145	155
Any other subordinate unit of the Department of Defense determined by the Secretary to be necessary for the successful management of weapon acquisition programs	(2)	(2)
Total	22,341	1,775

[1] Total figures for this agency not yet available.
[2] Agencies included in this category would depend on the discretion of the Secretary of the Department of Defense.

2. Appoints a civilian director at a level IV subject to confirmation by the Senate.

3. The director is charged with the responsibility—

To carry out, in a cost-effective and timely manner, all acquisitions of weapon systems for the Department of Defense, including the acquisition of initial components and spare parts, hardware, software, and associated equipment;

To assure that each weapon system acquired is a reliable, maintainable, and operationally effective weapon system and is designed to successfully carry out the missions identified for the weapon system by each armed force for which the weapon system is acquired;

To establish and carry out appropriate career training, apprenticeship, incentives, and evaluation programs to assure the establishment and maintenance of a stable, motivated, and experienced work force in the office of the Director of Weapon System Acquisitions;

To require the assignment of personnel to a weapon system acquisition program for a sufficient period of time to assure the direct accountability of personnel for program performance and to assure the effective management of such program or of a specific phase of such program; and

To respond to requests from the Congress relating to programs within the responsibility of the Director.●

By Mr. DANFORTH (for himself, Mr. BENTSEN, Mr. LAUTENBERG, Mr. WILSON, and Mr. INOUYE):

S. 942. A bill to promote expansion of international trade in telecommunications equipment and services, and for other purposes; to the Committee on Finance.

TELECOMMUNICATIONS TRADE ACT

Mr. DANFORTH. Mr. President, from an international trade perspective, deregulation of the U.S. market for telecommunications and AT&T divestiture represent a disaster in the making. The legislation I am introducing today, along with Senator BENTSEN and others, is designed to turn this potential for disaster into a major initiative to open foreign markets to U.S. exports of telecommunications products and services.

Based on S. 2618, which was introduced in the last Congress, the Telecommunications Trade Act is the product of hearings and extensive discussions with business and labor concerned about the absence of free and fair trade in the telecommunications sector. On August 5, 1983, a decision was made that is likely to have the greatest impact on U.S. trade of any other in recent decades. The decision was not made by the President or by the Congress—in fact, its impact on American trade was hardly considered by those involved in this and other events leading up to the final outcome. The decision—the final step before the breakup of the Bell System—came about after years of thought, litigation and legislation focused on domestic considerations of competition and deregulation. Yet, this domestic policy decision will have an enormous impact on the U.S position in world markets.

In trade terms, AT&T divestiture is nothing less than the unilateral giveaway of the U.S. market to foreign suppliers. Moreover, since most foreign markets are effectively closed to U.S. telecommunications exports, divestiture also represents a giveaway of the only leverage that might ever be used by our trade negotiators to gain access to those markets.

Therefore, it is imperative that we capitalize on the restructuring of the U.S. market to promote negotiations that will achieve an open world trading system in telecommunications.

Moreover, to the extent that foreign countries have already committed to opening their telecommunications markets, it is imperative that the United States establish a systematic, results-oriented means of enforcing compliance with these commitments.

The Telecommunications Trade Act provides a framework for negotiations to open foreign markets to U.S. exports and for aggressive enforcement of trade agreements related to telecommunications. It does so in a manner fully consistent with U.S. trade obligations under the GATT, it offers U.S. trade negotiators the mandate, authority, and leverage to gain and maintain access for U.S. exports of telecommunications equipment and services comparable to that provided by the restructuring of the U.S. telecommunications market.

BACKGROUND

Observed in a vacuum, the fragmentation of the American telecommunications system may be a good idea, where increased competition among domestic providers of equipment and services may ultimately benefit the system's users.

But in this interdependent world, we cannot afford to make decisions in a vacuum. We cannot afford to let trade be the stepchild of domestic policy decisions—particularly if we consider the

tremendous impact trade has on the U.S. economy, our employment, and our competitiveness.

If we are to have a forward-looking trade policy, a job-creating trade policy, we must pay special attention to those sectors with the greatest promise for growth and employment—be it direct or indirect.

Taken in this context, the decision to restructure the U.S. telecommunications market without addressing the gaping imbalance in trade opportunities it is bound to create is unconscionable.

In trade terms, divestiture represents the unilateral dismantling of a major nontariff barrier to imports through elimination of AT&T's vertical integration relationship between the manufacturer of equipment and the provision of service. That a number of American equipment manufacturers will be able to take advantage of the breaking of this link is clearly a healthy event. That this will also lay bare the U.S. market to many billions of dollars in new sales by foreign manufacturers—without any corresponding improvement in market access for U.S. exports—is unthinkable in view of U.S. export potential in this sector.

The Constitution provides for Congress to regulate commerce with foreign nations. It is imperative that Congress act now to prevent this trade disaster before it is too late.

The international situation with respect to telecommunications trade is unique. The United States is virtually the only country in the world with a private telecommunications system. Practically all other industrialized countries have monopolistic telecommunications entities that are controlled by—if not owned and operated by—their governments.

The world over PTT's—post, telegraph, and telephone entities—are protected, nurtured, and supported by their governments. Equipment procurement is confined to the extent possible to domestic manufacturers, who in turn use Government financial support to develop new equipment and to promote their export drives. And export they must—because in this day of highly sophisticated, R&D-intensive telecommunications equipment, economies of scale dictate that few home markets are big enough to provide adequate returns on investment.

The comparative advantage that American producers currently enjoy in the telecommunications sector would lead us to expect the United States to run a substantial trade surplus in the telecommunications area. In stark contrast to the logic of the marketplace, however, is the large and growing trade deficit of the United States in this sector—reaching close to $1.1 billion in 1984. There can be no question that U.S. telecommunications exports are only a small fraction of what they would be under open market conditions.

Notwithstanding any other factors affecting U.S. trade in telecommunications, one finds throughout the world that virtually all major telecommunications markets are closed:

The European Common Market may be an EC-wide market for many products but that is certainly not the case with telecommunications. In Europe, almost every country has its own system and each government inures the protection of its home market and producers. These telecommunications monopolies remain unwilling to procure substantial amounts of foreign equipment and will purchase a domestic product even when better and less expensive American equipment is available.

In Japan, Nippon Telegraph & Telephone serves an enormous market. Although commitments have been made to open NTT procurement to increased purchases of foreign products, the results have been marginal at best—particularly in the key areas of network switching and transmission equipment. Moreover, recent moves to privatize NTT have exposed governmental and industry efforts to protect key markets for telecommunications services and sales, raising legitimate questions about the value of any Japanese commitments to follow through on such market-open agreements. Meanwhile, major Japanese manufacturers continue to make inroads into the U.S. telecommunications market at an alarming pace—a pace that will increase exponentially with the restructuring of the U.S. market.

Other countries maintain or are in the process of creating major barriers to imports of telecommunications equipment, as well. Canada uses high tariffs and discriminatory purchasing policies by provincial governments. Advanced developing nations, such as Brazil and Mexico, are imposing an increasing number of import and investment restrictions as time progresses.

Therefore, in trade terms, the breakup of AT&T is more than just the unilateral elimination of a major barrier to imports. It also means that on January 1, 1984, we may have discarded the only trade concession that could ever be effective negotiating leverage for the United States to gain reciprocal market access for our telecommunications exports. It is hard to imagine any other U.S. leverage providing as much incentive for foreign telecommunications manufacturers and their governments to really open up domestic markets.

Today the United States is still the world's most highly competitive producer of telecommunications equipment. But the wholesale giveaway of the U.S. market and our apparent reluctance to aggressively enforce existing telecommunications trade agreements, have already set the stage for a major, irreversible shift in high technology trade patterns.

The exponential growth in U.S. imports will not happen overnight, but the trends are there. Unless we are willing to risk waiting for the clamor for import quotas on telecommunications equipment that is sure to come, something must be done now—before the damage cannot be reversed.

Recent trends in telecommunications trade only begin to tell the story: Although the consent decree which set the terms for divestiture was only signed in 1982, the shift in purchasing patterns has already contributed to America's first negative balance of trade in telecommunications. The 1983 deficit of over $400 million more than doubled in 1984, attributable once again to flat exports and an increase of imports by over one-third.

One need look no further than the landmark FCC Carterfone decision of 1968—involving the interconnection of certain terminal equipment with the national network—to see the dramatic impact a domestic decision to deregulate can have on production and imports of telecommunications equipment.

Since the Carterfone decision, the United States has accelerated the move toward telecommunications deregulation—thereby accelerating the growing imbalance in world telecommunications trade. Some court and regulatory decisions have had a greater impact on trade than others. Yet, at no time has the United States sought from its trading partners reciprocal concessions for these unintended market liberalizing measures. Moreover, where we have telecommunications trade agreements in place, we seem to have studiously avoided the use of remedies under U.S. law to enforce compliance.

Recent decisions—in particular, the final breakup of the Bell System—will produce a trade effect that can no longer be ignored. The potential trade giveaway from AT&T divestiture is staggering: One Japanese telecommunications newsletter recently estimated that the breakup of AT&T would open a new $5 billion market in the United States—almost 50 percent more than all NTT purchases in a single year. Another study has predicted that by 1990, imports of customer-premises equipment alone will triple, with Japan and Canada capturing 42 percent and 23 percent shares, respectively.

It is hardly surprising, then, to find that Japanese, Canadian, and European companies alike have already launched massive sales offensives in this country.

The magnitude of the shift in telecommunications trade in the future

should not be surprising in the light of deregulation:

Foreign telecommunications firms will be increasingly dependent on exports to meet the growing cost of their investments. The U.S. market, representing some 40 percent of the entire world market for telecommunications, will stand alone in size and openness.

U.S. manufacturers will have to rely on the domestic market for the bulk of their sales with little prospect of foreign barriers being lifted and major export opportunities.

At home, U.S. manufacturers will be faced with competition from foreign firms that can afford to move into this market for long periods without turning a profit—given protection in their home markets, patient capital and the potential return on their investment in the most lucrative market for telecommunications in the world.

Finally, in the foreseeable future, U.S. telecommunications manufacturers will consist of one major producer that is unused to real competition and many other American firms that could be highly successful competitors if given a few years to take advantage of divestiture without being swamped by imports.

The Bell operating companies have already begun to assert their independence and are in the market for the cheapest quality source of equipment they can find. It is no accident that the first major wave of telecommunications imports coincided with a dramatic drop in purchases by some of the BOC's from Western Electric. With the Bell logo in hand and access to AT&T patents, foreign suppliers willing to slash profits to expand market share offer attractive bargains.

Unfortunately, these same operating companies will be the most severely hurt if—as I expect—the end of the decade finds us scrambling to close the U.S. market to imports in the face of lost sales and lost jobs.

And make no mistake, the trade shift is by no means inevitable: The world market for telecommunications shows signs of growth undreamed of a few years ago—expanding from $45 billion today to $60 billion by 1987 and $90 billion in 1990. The shift is not inevitable—if only American producers are able to garner a share of the world market commensurate with their competitiveness.

What is absolutely certain is this: The United States cannot afford to wait before we react to the trade implications of the restructuring of the U.S. telecommunications market or until we execise our legal rights to retaliate against violations of existing telecommunications trade agreements. A few years from now it will be too late. Efforts to close the U.S. market then will hurt consumers and put at risk American exports.

We need to resolve this potential trade disaster before its full impact is felt—to use the openness of the U.S. market as leverage to gain access for U.S. telecommunications exports.

The legislation I am introducing today can accomplish this—in a manner fully consistent with U.S. obligations under the General Agreement on Tariffs and Trade [GATT]. The present situation presents us with a unique set of circumstances, including low levels of current trade relative to the future and a major reduction in U.S. import barriers as yet uncompensated by our trading partners.

These unique circumstances offer us a unique opportunity—namely, the opportunity to create on open world trading system in telecommunications that will benefit world producers and consumers alike.

CONCLUSION

In conclusion, U.S. trade policy to date has invariably been reactive or, in the case of AT&T divestiture, a by-product of purely domestic decision-making. Therefore, it is not surprising that we constantly find ourselves trying to resolve last year's trade problems.

The United States must have a forward-looking trade policy. Problems must be anticipated and resolved before they reach unmanageable proportions. New trade agreements will never be credible unless existing agreements are enforced.

In the case of telecommunications, we have a unique opportunity to resolve a trade problem before it does major harm to our economy. If we do not resolve the problem now, it will have been a problem of our own making.

The negotiation of reciprocal access market arrangements is the cornerstone of the GATT. In the case of telecommunications trade, unfettered access to our market is the only concession likely to be attractive enough to open foreign markets for U.S. exporters. To give away this access without compensation would be an opportunity lost and foolish to the extreme.

International trade is too important to the U.S. economy to allow it to remain a stepchild of our domestic policy decisions. The restructuring of the U.S. telecommunications market has major trade implications. We ignore them at our peril.

ATTACHMENTS

Mr. President, I ask unanimous consent that a detailed outline of the Telecommunications Trade Act and the text of the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 942

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Telecommunications Trade Act of 1985".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) rapid growth in the world market for telecommunications products and services will continue for several decades;

(2) the United States can improve prospects for—

(A) the growth of—

(i) United States exports of telecomunications products and services, and

(ii) export-related employment and consumer services in the United States, and

(B) the continuance of the technological leadership of the United States,

by undertaking a program to achieve an open world market for trade in telecommunications products, services, and investment;

(3) many foreign markets for telecommunications products, services, and investment are characterized by extensive government intervention (including restrictive import practices and discriminatory procurement practices) which adversely affect United States exports of telecommunications products and services and United States investment in telecommunications;

(4) unfair and discriminatory trade practices in foreign countries threaten the loss of jobs in the United States telecommunications industry;

(5) the open nature of the United States telecommunications market, accruing from the liberalization and restructuring of such market, has resulted, and will continue to result, in a dramatic increase in imports of telecommunications products and a growing imbalance in competitive opportunities for trade in telecommunications; and

(6) unless this imbalance is corrected through the achievement of substantially equivalent competitive opportunities for United States telecommunications products and services in foreign markets, the United States should avoid granting continued open access to the telecommunications products and services of such foreign countries in the United States market.

(b) PURPOSES.—The purposes of the Act are—

(1) to foster the economic and technological growth of the United States telecommunications industry and all United States persons who benefit from a high quality telecommunications network;

(2) to ensure that countries which have made commitments to open telecommunications trade fully abide by those commitments; and

(3) to achieve a more open world trading system for telecommunications products and services through negotiation and achievement of substantially equivalent competitive opportunities for United States telecommunications exporters and their subsidiaries in those markets in which barriers exist to free international trade.

TITLE I—ACTIONS TO ACHIEVE COMPETITIVE OPPORTUNITIES

SEC. 101. INVESTIGATION OF FOREIGN TRADE BARRIERS.

(a) ANALYSIS OF BARRIERS.—By no later than the date that is 6 months after the date of enactment of this Act, the United States Trade Representative, in consultation with the Secretary of Commerce and the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1872), shall—

(1) for purposes of section 102, identify and analyze all acts, policies, and practices in the markets of foreign countries that deny to telecommunications products and services of United States firms and their subsidiaries any competitive opportunities that are substantially equivalent to the competitive opportunities available to such products and services of foreign companies and their United States subsidiaries in the markets of the United States, and

(2) for purposes of section 103, shall determine which of such acts, policies, or practices—

(A) is inconsistent with the provisions of, or otherwise denies benefits to the United States under, any trade agreement,

(B) is unjustifiable and burdens or restricts United States commerce, or

(C) otherwise has the effect of—

(i) nullifying or impairing any benefit from concessions or commitments to the United States under any agreement, or

(ii) impeding attainment of any objective of any agreement to which the United States is a party.

(b) FACTORS TO BE TAKEN INTO ACCOUNT.—

(1) In conducting the analysis under subsection (a)(1), the United States Trade Representative shall take into account the following factors:

(A) the economic benefits (actual or potential) accruing to firms in each foreign country and to their United States subsidiaries from the open access to the United States telecommunications market that has resulted from the liberalization and restructuring of such market; and

(B) actual patterns of trade, including sales of telecommunications products and services in foreign countries by United States firms and their subsidiaries in relation to the international competitive position and export potential of such products and services.

(2) In making determinations under subsection (a)(2), the United States Trade Representative shall consider as dispositive any evidence of actual patterns of trade (including sales of telecommunications products and services in a foreign country by United States firms and their subsidiaries) that do not reflect patterns of trade which would reasonably be anticipated to flow from the concessions or commitments of such country based on the international competitive position and export potential of such products and services.

(c) DISCONTINUANCE OF INVESTIGATION.—

(1) The United States Trade Representative may exclude any country from the investigation conducted under subsection (a) if the United States Trade Representative determines that the potential market in such country for United States telecommunications products and services is not substantial.

(2) Before making a final determination under paragraph (1) to exclude any foreign country from the investigation conducted under subsection (a), the United States Trade Representative shall—

(A) consult with the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives regarding such proposed exclusion,

(B) publish notice of such proposed exclusion in the Federal Register and the reasons for such proposed exclusion, and

(C) provide an opportunity for written public comment on such proposed exclusion.

(d) REPORT TO CONGRESS.—By no later than the date that is 6 months after the date of enactment of this Act, the United States Trade Representative shall submit a report on the analysis and determinations made under subsection (a) to the Committee on Finance and the Committee on Commerce, Science and Transportation of the Senate and to the Committee on Ways and Means and the Committee on Energy and Commerce of the House of Representatives.

SEC. 102. ACTION BY THE PRESIDENT IN RESPONSE TO INVESTIGATION.

(a) INITIAL ACTION.—

(1) Upon conclusion of the investigation conducted under section 101, the President shall enter into negotiations with those foreign countries whose acts, policies, or practices are identified under section 101(a)(1) for the purpose of entering into trade agreements under section 201 which provide to the telecommunications products and services of United States firms and their subsidiaries competitive opportunities in the markets of such countries that are substantially equivalent to the competitive opportunities available in the United States market to such products and services of foreign firms and their United States subsidiaries.

(2)(A) The general objectives of negotiations conducted under paragraph (1) shall be—

(i) to obtain multilateral or bilateral agreements (or the modification of existing agreements) that provide to the telecommunications products and services of United States firms and their subsidiaries competitive opportunities in foreign markets that are substantially equivalent to the competitive opportunities available in the United States market to such products and services of foreign firms and their United States subsidiaries;

(ii) to correct the imbalance in competitive opportunities accruing from uncompensated reductions in barriers to the access of foreign firms and their subsidiaries to the United States telecommunications market; and

(iii) to facilitate the increase in United States exports of telecommunications products and services to a level commensurate with the competitive position of the United States telecommunications industry.

(B) In the negotiations conducted under paragraph (1), the President shall pursue specific objectives in order to reduce or eliminate foreign barriers to United States exports of telecommunications products and services, including (but not limited to)—

(i) national treatment for such products and services of United States firms and their subsidiaries;

(ii) most-favored-nation treatment for such products and services;

(iii) nondiscriminatory government procurement policies with respect to such products and services;

(iv) equipment standards and procedures for certification of equipment that do not exceed the minimum standards and procedures necessary to protect the telecommunications network;

(v) reduction or elimination of customs duties on telecommunications products;

(vi) elimination of subsidies, dumping, violations of intellectual property rights, and other unfair trade practices that distort international trade in telecommunications;

(vii) elimination of investment barriers that restrict the establishment of foreign-owned business entities which market telecommunications products and services; and

(viii) monitoring and dispute settlement mechanisms to facilitate compliance with telecommunications trade agreements.

(C) In pursuing the objectives described in subparagraphs (A) and (B) and in establishing the strategy of the United States in negotiations conducted under paragraph (1), the President shall take into account the factors described in section 101(b)(1).

(b) ACTIONS TO BE TAKEN IF NO AGREEMENT OBTAINED.—

(1) If the President is unable to enter into an agreement under section 201 with any foreign country described in subsection (a)(1) which achieves the objectives described in subsection (a)(2)(A), the President shall, by no later than the date that is 2 years after the date of enactment of this Act, take whatever actions authorized under paragraph (3) against such country that are necessary to fully achieve such objectives.

(2) In taking action under paragraph (1), the President shall first take those actions which most directly affect trade in telecommunications products and services with the country concerned.

(3) The President is authorized to take any of the following actions under paragraph (1):

(A) terminate, withdraw, or suspend any portion of any trade agreement entered into under—

(i) the Trade Act of 1974,

(ii) section 201 of the Trade Expansion Act of 1962, or

(iii) section 350 of the Tariff Act of 1930,

with respect to any duty or import restriction imposed by the United States on any telecommunications product;

(B) take any action described in subsection (b)(2) or (c) of section 301 of the Trade Act of 1974 with respect to any telecommunications product that is subject to registration or approval by the Federal Communications Commission under part 2, 15, or 68 of title 47 of the Code of Federal Regulations;

(C) prohibit the Federal Government from purchasing the telecommunications products of any specified foreign country;

(D) increase domestic preferences under title III of the Act of March 3, 1933 (41 U.S.C. 10a, et seq.) for purchases by the Federal Government of telecommunications products from any specified foreign country;

(E) suspend any waiver of domestic preferences under title III of the Act of March 3, 1933 (41 U.S.C. 10a, et seq.) which may have been extended to any specified foreign country pursuant to the Trade Agreements Act of 1979 with respect to telecommunications products or any other products;

(F) order the appropriate Federal officials to deny Federal funds or Federal credits for purchases of the telecommunications products of any specified foreign country;

(G) suspend, in whole or in part, benefits accorded articles from specified foreign countries under title V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.); and

(H) take any other action pursuant to subsection (b) or (c) of section 301 of the Trade Act of 1974 with respect to—

(i) any product other than a telecommunications product of such country, or

(ii) any service of such country.

(4)(A) Notwithstanding section 125 of the Trade Act of 1974 and any other provision of law, if any portion of a trade agreement described in paragraph (3)(A) with a foreign country is terminated, withdrawn, or suspended under paragraph (1) with respect to any duty or nontariff import restriction imposed by the United States on products of such foreign country, the rate of such duty provided for in rate column number 2 of the Tariff Schedules of the United States shall apply to such products after the date on

which such termination, withdrawal, or suspension takes effect.

(B) Notwithstanding subparagraph (A) of this paragraph, section 125 of the Trace Act of 1974, and any other provision of law, if any portion of a trade agreement described in paragraph (3)(A) is terminated, withdrawn, or suspended by the President under paragraph (1) with respect to any duty imposed on the products of any foreign country before the date that is 2 years after the date of enactment of this Act, the President may delay (to such extent as the President may provide by proclamation) the application of subparagraph (A) with respect to such duty or import restriction until the date that is 2 years after the date of enactment of this Act.

(5) No action taken under paragraph (1) shall affect any binding obligations under any written contract entered into before April 17, 1985, to which any national of the United States is a party.

SEC. 103. ACTION BY UNITED STATES TRADE REPRESENTATIVE IN RESPONSE TO INVESTIGATION.

(a) INITIAL ACTION.—If an affirmative determination is made under section 101(a)(2) with respect to any act, policy, or practice of a foreign country, the United States Trade Representative shall, by no later than the date that is 30 days after the date on which the report is submitted under section 101(d), take whatever actions authorized under subsection (c) against such foreign country that are necessary—

(1) to fully offset such acts, policies, and practices, and

(2) to restore the balance of concessions between the United States and such foreign country.

(b) REVIEWS BY THE UNITED STATES TRADE REPRESENTATIVE.—

(1) By no later than the date that is 1 year after the date on which the report is submitted under action 101(d), and annually thereafter, the United States Trade Representative shall conduct a review to assess the extent to which the objectives described in section 102(a)(2) are being met by each foreign country whose acts, policies, or practices were identified under section 101(a)(1), taking into account the factors described in section 101(b).

(2) If the United States Trade Representative determines, on the basis of a review conducted under paragraph (1), that a foreign country—

(A) is not in compliance with any agreement entered into under section 201, or

(B) has adopted an act, policy, or practice described in section 101(a)(2),

the United States Trade Representative shall take whatever actions authorized under subsection (c) that are necessary to restore the balance of competitive opportunities.

(c) AUTHORIZED ACTIONS.—

(1) The United States Trade Representative is authorized to take the following actions under subsection (a) or (b):

(A) terminate, withdraw, or suspend any portion of any trade agreement entered into under—

(i) the Trade Act of 1974,

(ii) section 201 of the Trade Expansion Act of 1962, or

(iii) section 350 of the Tariff Act of 1930,

with respect to any duty or import restriction imposed by the United States on any telecommunications product;

(B) take any action described in subsection (b)(2) or (c) of section 301 of the Trade Act of 1974 with respect to any telecommunications product that is subject to registration or approval by the Federal Communications Commission under part 2, 15, or 68 of title 47 of the Code of Federal Regulations; or

(C) take any other action pursuant to subsection (b) or (c) of section 301 of the Trade Act of 1974 with respect to any products other than telecommunications products or any services of such country.

(2) Actions described in paragraph (1)(C) may be taken against a foreign country under subsection (a) or (b) only if—

(A) the United States Trade Representative has taken all feasible actions described in subparagraphs (A) and (B) of paragraph (1) against such country, and

(B) the objectives of subsection (a) or (b) (as the case may be) have not be achieved.

(3) Notwithstanding section 125 of the Trade Act of 1974 and any other provision of law, if any portion of a trade agreement described in paragraph (1)(A) with a foreign country is terminated, withdrawn, or suspended under subsection (a) or (b) with respect to any duty or nontariff import restriction imposed by the United States on any products of such foreign country, the rate of such duty provided for in rate column number 2 of the Tariff Schedules of the United States shall apply to such products after the date on which such termination, withdrawal, or suspension takes effect.

(d) ACTION NOT TO AFFECT CERTAIN CONTRACTUAL OBLIGATIONS.—No action taken under this section shall affect any binding obligations under any written contract entered into before April 17, 1985, to which any national of the United States is a party.

SEC. 104. CONSULTATIONS.

(a) ADVICE FROM DEPARTMENTS AND AGENCIES.—For purposes of determining appropriate action under section 102(b) or 103, the President and the United States Trade Representative shall consult with the Secretary of Commerce, the Federal Communications Commission, and the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1872).

(b) ADVICE FROM THE PRIVATE SECTOR.—For purposes of identifying the objectives of negotiations conducted under section 102(a), conducting the investigation pursuant to section 101, and determining appropriate action under sections 102(b) and 103, the United States Trade Representative shall provide the opportunity for presentation of views by any interested party, including appropriate committees established under section 135 of the Trade Act of 1974.

(c) CONSULTATIONS WITH CONGRESS AND OFFICIAL ADVISORS.—For purposes of conducting negotiations under section 102(a), the President shall keep appropriate committees of the Congress, as well as appropriate committees established pursuant to section 135 of the Trade Act of 1974, currently informed with respect to—

(1) the negotiating priorities and objectives for each country involved;

(2) the assessment of negotiating prospects, both bilateral and multilateral; and

(3) any United States concessions which might be included in negotiations to achieve the objectives described in section 102(a)(2).

TITLE II—TRADE AGREEMENT AUTHORITY

SEC. 201. GENERAL TRADE AGREEMENT AUTHORITY.

(a) IN GENERAL.—During the 3-year period beginning on the date of enactment of this Act, the President may enter into trade agreements which meet the objectives described in section 102(a)(2)(A) with foreign countries which provide for—

(1) the harmonization, reduction, or elimination of—

(A) duties, or

(B) restrictions, barriers, or other distortions to international trade, or

(2) the prohibition of, or limitations on the imposition of—

(A) duties, or

(B) restrictions, barriers, or other distortations to international trade.

(b) AGREEMENT TREATED IN SAME MANNER AS AGREEMENT UNDER SECTION 102.—For purposes of section 151 and subsections (c), (d), (e), (f), and (g) of section 102 of the Trade Act of 1974, any trade agreement entered into under subsection (a) shall be treated as a trade agreement entered into under section 102 of the Trade Act of 1974.

(c) APPLICATION OF AGREEMENT BENEFITS.—Notwithstanding any other provision of law, any agreement entered into under this section may provide that the benefits and obligations of such agreement—

(1) apply solely to the parties to the agreement, or

(2) not apply uniformly to all parties to such agreement.

The President shall take into account any actions which may be necessary to reconcile such treatment with United States international obligations.

SEC. 202. COMPENSATION AUTHORITY.

(a) IN GENERAL.—If—

(1) the President has taken action under section 102(b) with respect to any foreign country, and

(2) the United States Trade Representative is not required to take action against such country under section 103(a),

the President may enter into trade agreements with such foreign country for the purpose of granting new concessions as compensation for such actions taken by the President in order to maintain the general level of reciprocal and mutually advantageous concessions.

(b) AGREEMENT TREATED IN SAME MANNER AS AGREEMENT UNDER SECTION 102.—For purposes of section 151 and subsections (c), (d), (e), (f), and (g) of section 102 of the Trade Act of 1974, any trade agreement entered into under subsection (a) shall be treated as a trade agreement entered into under section 102 of the Trade Act of 1974.

(c) FACTORS TO BE TAKEN INTO ACCOUNT.—In determining whether to enter into an agreement under subsection (a) and in determining the terms of such an agreement, the President shall take into account the factors described in section 101(b)(1).

TITLE III—MISCELLANEOUS PROVISIONS

SEC. 301. ACTION TO ENSURE COMPLIANCE WITH FCC REGULATIONS.

(a) IN GENERAL.—

(1) Any product of a foreign country that is subject to registration or approval by the Federal Communications Commission may be entered only if—

(A) such product conforms with all applicable rules and regulations of the Federal Communications Commission, and

(B) the information which is required on Federal Communications Commission Form 740 on the date of enactment of this Act is provided to the appropriate customs officer at the time of such entry in such form and manner as the Secretary of the Treasury may prescribe.

(2) For purposes of this subsection, the term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(b) COOPERATION.—The Federal Communications Commission, the Secretary of Commerce, and the United States Trade Representative shall provide such assistance in the enforcement of subsection (a) as the Secretary of the Treasury may request.

(c) COMPILATION OF INFORMATION COLLECTED.—At least twice every year, the Secretary of the Treasury shall compile the information collected under subsection (a)(2) into a summary and shall submit such summary to the Congress. Such information shall also be made available to the public.

SEC. 302. ACTIONS UNDER SECTION 301(c) OF THE TRADE ACT OF 1974.

(a) IN GENERAL.—Paragraph (6) of section 301(e) of the Trade Act of 1974 is amended by inserting ", or a foreign supplier of goods related to a service," after "foreign supplier of services".

SEC. 303. REPORT BY THE SECRETARY OF COMMERCE.

By no later than the date that is 6 months after the date of enactment of this Act, and at least once every 2 years thereafter, the Secretary of Commerce shall submit to the Congress a report on the impact of United States domestic policies and practices on the growth and international competitiveness of the United States telecommunications industry. Such report shall include—

(1) a statement of the actions taken or recommended to overcome any domestic policies and practices found to inhibit the growth and international competitiveness of the United States telecommunications industry; and

(2) a statement which assesses the probable trade consequences of failure to take the actions identified in paragraph (1).

SEC. 304. TELECOMMUNICATION PRODUCT.

For purposes of this Act, the term "telecommunication product" means any articles classified under the following item numbers of the Tariff Schedules of the United States (19 U.S.C. 1202):

684.57	684.67	685.24	685.39
684.58	684.80	685.25	685.48
684.59	685.10	685.28	688.17
684.65	685.12	685.30	688.41
684.66	685.16	685.32	707.90

TELECOMMUNICATIONS TRADE ACT: RATIONALE AND SUMMARY

I. RATIONALE

Premises: (1) In trade terms, the court-ordered divestiture of AT&T represents the unilateral elimination of a major non-tariff barrier to imports of telecommunications equipment.

Deregulation of the U.S. telecommunications market will benefit domestic equipment manufacturers only to the extent that they are able to compete successfully with foreign producers, many of which receive protection and support from their governments.

U.S. imports of telecommunications equipment already have risen dramatically. Imports can be expected to increase exponentially in the coming decade.

(2) Most foreign markets for telecommunications equipment are closed. In 1980, Japan agreed to open its telecommunications market to U.S. manufacturers. This agreement has not yielded significant results. The so-called privatization of Nippon Telephone and Telegraph (NTT) offers little prospect for improved market access. Most European post, telephone and telegraph systems (PTTs) are closed to U.S. suppliers. Canada maintains high tariffs and provincial governments follow discriminatory purchasing policies. Advanced developing nations increasingly are closing their markets for telecommunications.

Major foreign producers have launched massive sales offensives in an effort to win a position in the U.S. market, which is attractive because of its size, the economies of scale it offers, and its accessibility.

(3) Systematic use of access to the U.S. market as negotiating leverage and strict enforcement of existing trade agreements is the only effective means we have of improving access for American telecommunications exporters. Yet, we are giving away access to the U.S. market and are unwilling to retaliate against foreign unfair trade practices.

If the U.S. market remains open and foreign markets remain closed, foreign producers will have no incentive to pressure their governments to open their national markets.

The U.S must establish a systematic and results-oriented means of gaining access for competitive American exports of telecommunications equipment and services.

(4) The situation is extremely time-sensitive. If we wait until imports soar and U.S. companies complain, the cost of quotas or tariff increases will rise, both in terms of compensation due under GATT and in terms of disputing supply sources of American telecommunications purchasers.

American Objectives: (1) More open world trade in telecommunications equipment and services through negotiated reductions in foreign tariff and non-tariff barriers. The U.S. should secure a more open trading environment in exchange for access to the U.S. market and through strict enforcement of existing trade agreements related to telecommunications.

(2) Ideally, an agreement such as that covering trade in civil aircraft could be negotiated (i.e. a multilateral free trade arrangement) for the benefit of signatories only.

(3) Short of a multilateral agreement, bilateral agreements with major trading partners could be negotiated or governments could subject their PTT purchases to GATT rules for non-discriminatory procurement.

(4) In nations where a lack of sales of competitive U.S. products is evidence of noncompliance with existing agreements, the U.S. should enforce its rights through retaliation.

The Telecommunications Trade Act is a GATT-legal means of using access to the U.S. market as leverage to expand U.S. exports by gaining access to foreign markets.

II. SUMMARY OF THE TELECOMMUNICATIONS TRADE ACT

Findings

The world market for telecommunications will be the source of rapid growth in the coming decades.

The U.S. can increase U.S. telecommunications exports, export-related employment, technological leadership and consumer service by achieving an open world trading system for telecommunications products, services and investment.

Foreign telecommunications markets are characterized by extensive government intervention, including restrictive import practices and discriminatory government procurement.

These unfair and discriminatory practices in foreign countries threaten the loss of jobs in the United States telecommunications industry.

Deregulation of the U.S. market for telecommunications will result in a dramatic increase in imports of telecommunications equipment and a growing imbalance of trade opportunities with respect to other countries.

Unless this imbalance is corrected through the achievement of substantially equivalent competitive opportunities abroad for U.S. telecommunications exports, the United States should avoid granting continued open access for foreign telecommunications products in this market.

Purposes

To foster the economic and technological growth of the United States telecommunications industry and those economic interests that benefit from a high quality telecommunications network.

To ensure that countries that have committed to open telecommunications trade fully abide by those commitments.

To achieve a more open world trading system in telecommunications through negotiation and achievement of substantially equivalent competitive opportunities for United States telecommunications exporters and their subsidiaries in markets where barriers exist to free international trade.

Investigations and determinations

A six-month investigation by the Trade Representative would form the basis for any decision to undertake negotiations or retaliatory action. The investigation would analyze foreign barriers to U.S. exports of telecommunications products and services and provide for the determination of whether competitive opportunities are substantially equivalent to those in the U.S. market. In addition, the Trade Representative would also be required to determine which of the barriers are in violation of, inconsistent with or otherwise nullify or impair existing commitments or agreements related to telecommunications trade.

For purposes of the investigation, the Trade Representative would be expected to take into account the benefits to companies in each country of open access to the U.S. market due to deregulation, as well as actual patterns of trade (including sales of U.S. telecommunications products and services), in relation to the competitive position and export potential of the U.S. industry.

Presidential objectives

General Negotiating Objectives include:

Negotiation of agreements to achieve competitive opportunities in foreign markets for the telecommunications products and value-added telecommunications services of U.S. companies and their subsidiaries substantially equivalent to those in the U.S. market for such products and services of foreign companies and their subsidiaries.

Correction of the imbalance in competitive opportunities accruing from the uncompensated reductions in barriers to foreign access to the U.S. telecommunications market with deregulation and AT&T divestiture.

Facilitation of increased United States telecommunications exports to a level commensurate with the competitive position of the U.S. industry.

Specific negotiating objectives include non-discriminatory government procurement practices, standards and procedures for certification that do not exceed the minimum necessary to protect the network, the elimination or reduction of tariffs, dumping,

export subsidies and other unfair or restrictive foreign trade practices.

Assessment of competitive opportunities abroad would be measured in terms of both nominal access opportunities and documented or anticipated results.

Presidential authority

For a period of three years after enactment, the President is granted authority to enter into multilateral or bilateral trade agreements providing for open trade in telecommunications. For this purpose, he may reduce, eliminate or otherwise modify U.S. tariff and non-tariff barriers. Any such trade agreement must be approved by Congress and will be treated as a trade agreement under fast-track legislative procedures set out in Sections 102/151 of the Trade Act of 1974.

At the end of two years, the President is directed to correct any remaining imbalance in competitive opportunities in telecommunications trade by restricting the importation of products or services from countries with whom no trade agreements have been reached. For this purpose, the President is to employ any of a series of remedies available under current law and this Act, to an extent sufficient to achieve the desired balance of opportunities. The President is to focus his action in the telecommunications sector whenever possible. Remedies available to the President include duty increases, restrictions on registration or approval of equipment, restrictive government procurement practices and other measures.

The President is granted authority to compensate (through offsetting trade concessions, if necessary) major foreign suppliers of products against which restrictions are imposed. For this purpose he is to minimize the cost of compensation under any GATT Article XXVIII negotiation by invoking "reasonable expectations" arguments related to the trade impact of deregulation in the U.S. telecommunications market.

Action by the Trade Representative

With respect to countries which have committed to opening their markets for telecommunications but which fail to fully live up to those commitments, the U.S. Trade Representative would be required to act immediately to restore the balance of competitive opportunities. For this purpose, the Trade Representative would be required to raise duties and restrict the registration or approval of telecommunications products imported from those countries.

An annual review of foreign compliance with agreements related to telecommunications would be established to provide a mechanism for enforcement of such agreements.

Mr. BENTSEN. Mr. President, I am happy to join with Senator DANFORTH as the principal cosponsor of the Telecommunications Trade Act of 1985.

If there is one industry that exemplifies the lack of trade policy direction in our Government, it is telecommunications. Consider how telecommunications was deregulated last week by the Government of Japan. It was a deliberate, legislative process that was imbued with trade policy. Contrast the decisions in the United States deregulating various aspects of the telecommunications industry, going back for several years. These decisions have never seriously taken account of trade policy.

The result is another one in a string of unilateral trade concessions by the United States.

Moreover, telecommunications is a good example of what happens when the United States has available to it many tactics but no strategy. We could have refused to allow imports into our new private market until our producers got access to the closed markets of Europe and Japan. The tools were there, but the policy was not.

As a result, none of the tools in U.S. law was used in connection with deregulating the American industry to assure that U.S. producers of telecommunications equipment would have as much of a chance to sell their products abroad as foreigners would have to sell to the Bell operating companies that were spun off in the AT&T antitrust case.

Now Mr. President, this bill in effect creates a trade strategy in one industry. Last year, we created what amounts to a requirement on the administration to develop such trade strategies, known as national trade estimates. The first national trade estimate is due in October of this year, but in the meantime, action with regard to telecommunications trade is necessary. This bill employs a group of tactics to accomplish the objective of open world trade in telecommunications products. These tactics include unbinding U.S. duties; negotiations, increasing U.S. rates of duty; and bilateral negotiations.

Mr. President, these and many other tactics are available to the United States. We must learn to use such tactics in aid of strategies designed to open up world trade, thereby creating growth and improving living standards worldwide. It is right and appropriate that the United States do this, both because our living standards will improve in open world competition and because in order to maintain our leadership of the world trading system, we must demonstrate our willingness to take strong affirmative action to keep markets open.

Mr. President, this is free trade legislation in every sense of the phrase. We're not trying to punish anyone. We recognize, in fact, that we have ourselves to blame for our current situation with telecommunications. But we also recognize there is something we can do about it.

I trust this legislation will now be subjected to searching and thorough hearings and consideration in the Finance Committee. Some revisions may, of course, be necessary. I welcome comments in detail on the negotiating objectives in the bill, the standard of relief, the scope of products covered, and other aspects of the bill.

What we are doing here will, I think, set a pattern for a strategic, affirmative U.S. trade policy that we have not seen in past administrations or in the current administration.

We can no longer tolerate a trade mythology, Mr. President; we need a trade strategy.

Mr. LAUTENBERG. Mr. President, I am pleased to join my colleagues from Missouri [Mr. DANFORTH] and Texas [Mr. BENTSEN] in introducing this important telecommunications trade legislation.

This legislation has one aim: To open foreign markets to telecommunications trade.

The United States has proceeded down a path of deregulation and competition in telecommunications that has opened its market to unprecedented market entry. The United States freely permits the sale of telecommunications equipment and its interconnection with the public network, so long as it poses no physical harm to the system. With the breakup of AT&T, the more than $10 billion a year in purchases by the old Bell operating companies has been opened up to any and all bidders.

Mr. President, while the doors to the U.S. telecommunications market have been flung open, the doors to foreign markets remain closed. Foreign, government-owned telecommunications monopolies favor local suppliers. Foreign regulators bar the interconnection of American equipment, or impose unreasonable standards or testing regulations.

Even when a nation agrees on paper that it will open its market, as the Japanese did in its agreement with the United States on purchases by Nippon Telephone & Telegraph [NTT], bureaucratic inertia and local biases prevail. NTT has not bought one sophisticated switch. It has bought no transmission equipment. It bought less than $140 million of American equipment out of $2 billion in purchases in 1983.

The result is that imports of telecommunications equipment have almost tripled from 1982 to 1984. At the same time, our balance of trade in telephone and telegraph equipment went from a trade surplus of more than $200 million to a trade deficit of over $1 billion.

The problem is not competition at home. The problem is closed markets abroad.

The solution should not be protection. The U.S. telecommunications industry is on the cutting edge of technology. It does not need protection. It needs access to foreign markets.

This legislation is intended to pry open these foreign markets with the most effective tool we have: access to our own market. The legislation would give nations that export to the U.S. the opportunity to provide access to their markets equivalent to the access the United States has already unilat-

erally provided to them. If negotiations to secure such reciprocal access fail, then steps to stop access to the U.S. market—through the imposition of tariffs and the denial of equipment certification—would be mandated. The same steps would be used to force open markets where agreements exist on paper, but do not provide access in practice.

Mr. President, a great deal of concern has been expressed recently about the ability of American firms to sell in the Japanese market after the privatization of NTT. I have expressed my concern to the Secretary of Commerce, the USTR, and the Chairman of the FCC about the barriers imposed by the new regulatory scheme in Japan. Some progress has been made in negotiations with the Japanese, but the true test will be in the marketplace.

It should be emphasized, however, that this bill is not directed solely at the Japanese market. While Japan is the second largest telecommunications market, the United States faces barriers to market entry in Europe and elsewhere. This legislation is needed to secure free worldwide trade in telecommunications equipment.

Mr. President, the telecommunications industry is a major one in my State. Over 40,000 people are employed in the manufacture of communications equipment, and thousands more are employed in research and development to bring new products to market.

My State is also the American home to foreign-owned electronics firms. They provide welcome economic activity in my State. But it is in their interest as well that we maintain free and open trade in telecommunications product.

Mr. President, the United States has already acted. It has opened its market. It is now time for others to act. I urge my colleagues to support this important legislation.

By Mr. HEINZ (for himself, Mr. ANDREWS, Mr. BOREN, Mr. DOMENICI, Mr. FORD, Mr. HOLLINGS, Mr. MATHIAS, Mr. MITCHELL, Mr. NUNN, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, and Mr. ZORINSKY):

S.J. Res. 114. Joint resolution designating August 29 as "Railroad Retirement Day"; to the Committee on the Judiciary.

RAILROAD RETIREMENT DAY

● Mr. HEINZ. Mr. President, 50 years ago, on August 29, 1935, the Railroad Retirement Act was signed into law by President Roosevelt, establishing the foundations of the current railroad retirement system. To celebrate the success of the Railroad Retirement Program on its 50th anniversary, I am proud today to introduce a Senate joint resolution to designate August 29, 1985, to be "Railroad Retirement Day."

Throughout the history of the United States, the railroads have played a special, and a very crucial role as a catalyst to economic growth and job creation. By creating an efficient transportation network, the railroads were critical in precipitating the great expansion of industry and commerce in the past century and a half. Beginning with the Interstate Commerce Act of 1887, Congress has long recognized that the vital role served by the railroads requires special public attention and oversight.

During the Great Depression, when general unemployment was very high, rail pensions were collapsing, and many older railroad workers who might wish to retire could not because they had no other source of income upon which to rely, Congress created the railroad retirement system. Taking into account the particular needs and contributions of the railroad industry, the retirement plan established a unique and innovative scheme for guaranteeing the income security of railroad workers.

Over the past 50 years, the Railroad Retirement Program has provided basic social insurance and pension benefits for more than 4 million retired rail workers and their families. Currently, the Railroad Retirement Board provides cash benefits to more than 1 million Americans. Further, 400,000 present railroad workers, and all future employees, are assured pension income in their old age.

In 1983, there was a great deal of publicity regarding the pending insolvency of the railroad retirement system, and confidence in its future reached an all-time low. Due to comprehensive legislation to restore solvency to the program, railroad workers and employees can rest assured that the system is in excellent financial health. In fact, the Railroad Retirement Board informs me that the trust funds are rapidly accumulating substantial surpluses, and that even under the most pessimistic of assumptions, the program's financing is sound far into the future. I think this fact further justifies "Railroad Retirement Day," and should be made widely known.

Mr. President, the Railroad Retirement Program is in my judgment one of the most successful social programs in the history of this country. During the Great Depression, it helped to relieve unemployment and provide basic income to workers who wanted to retire. Throughout the past half century, it has expanded, and has truly protected railroad workers and their families from poverty and destitution in old age. I am confident that this excellent system will continue long into the future, and will serve to underscore the tremendous contributions of the railroad industry and its workers to the American economy.

I would hope that all my colleagues would join me in sponsoring this resolution, Mr. President, and urge its swift adoption.●

By Mr. LEAHY:

S.J. Res. 115. Joint resolution to designate 1985 as the "Oil Heat Centennial Year"; to the Committee on the Judiciary.

OIL HEAT CENTENNIAL YEAR

Mr. LEAHY. Mr. President, no nation in history has enjoyed the comforts and conveniences that we in the United States enjoy today. And too often we take it for granted.

It was just 100 years ago that American ingenuity developed oil heat as a practical reality in our homes and businesses.

In August, 1985 the Patent Office granted the first patent for a furnace that could burn liquid and gaseous fuels—the first technically sound oil burner.

Oil heat developed Vermont and other States in the north country. There is hardly an area of the Nation where this great resource wasn't a critical development factor.

Along with the technology let's not forget the dedicated men and women whose sense of service to their customers has become legendary.

In Vermont, tales of trucks braving blizzard conditions to deliver oil to homes with near-empty tanks are legend.

In short, Mr. President, we are honoring more than a business. We are honoring a way of life.

I am pleased to introduce today a resolution designating 1985 as the "Oil Heat Centennial Year."

A similar resolution has been introduced in the House. I hope we can speed adoption on behalf of all Americans who owe a long overdue thanks to this vital industry.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 115

Whereas, on August 11, 1885, the U.S. Patent Office granted a patent to David H. Burrell of Little Falls, New York, for a furnace that could burn liquid and gaseous fuels, which patent is generally regarded by technical experts and industrial historians as the first technically sound oil burner; and

Whereas, at the Columbian Exposition in Chicago in 1893 oil burners, for the first time, were utilized in major public exhibit buildings, and these oil burners were hailed and recognized as a technological combustion breakthrough by most, but were condemned as "instruments of Satan that brought the fires of hell to Earth" by some; and

Whereas, by World War I, the oil burner had become the premier Naval source of

propulsion, its technology was sought and adopted by Russia, Germany, Great Britain, France and the United States to power large warships, especially super-dreadnoughts and battle cruisers; and oil burning techniques and oil field locations became a major source of naval espionage; and

Whereas, oil burner technology was adapted to the heating needs of homes, businesses and industry in the decades that followed World War I, increasing from about 12,000 installations in 1920 to 2 million in 1940 to about 10 million in 1960 to more than 15 million in the 1970's, helping to generate improved housing for all Americans and the industrial boom that powered post World War II America; and

Whereas, the oil burner continues to be a major, modern heating technology used by millions of consumers in the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Florida, Ohio, Indiana, Michigan, Wisconsin, Minnesota, North Dakota, South Dakota, Montana, Idaho, Utah, Nevada, Oregon, Washington, and the District of Columbia; and

Whereas, the Oil Heat industry is, and always has been, developed and characterized by a large and diverse group of competitive small businesses, many of which are family owned through a second, third and fourth generation that began in their business endeavors by supplying ice, lumber, coal and then oil, to their communities; and

Whereas, many of these small businesses are in the forefront of new energy efficient technologies of the 1980's, leading the way toward higher efficiency oil heat, new conservation techniques, solar heating and other technologies; and

Whereas, the 100th anniversary of the development of the oil burner is an appropriate time to recognize the overall contributions of oil heating to the technological revolution of the 20th century and the individual contributions of the many thousands of small businessmen and women who made this century of heating comfort progress possible. Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that, the year 1985 is designated as the "Oil Heat Centennial Year" thereby recognizing the contributions of the oil heat industry over the past century. The President is requested to issue a proclamation calling upon the people of the United States to observe this commemorative year, with appropriate federal agencies to participate in the observance of such year and cooperate with persons and institutions conducting related observances, ceremonies, and activities.

ADDITIONAL COSPONSORS

S. 231

At the request of Mr. DOLE, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of S. 231, a bill to establish a National Commission on Neurofibromatosis.

S. 408

At the request of Mr. WEICKER, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 408 a bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

S. 491

At the request of Mr. QUAYLE, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 491 a bill to improve debt-collection activities and default recoveries and to reduce collection costs and program abuse under student loan programs administered by the Department of Education, and for other purposes.

S. 614

At the request of Mr. BUMPERS, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 614, a bill to amend section 3505 of title 44, United States Code, to further reduce the Federal paperwork burden on small businesses.

S. 713

At the request of Mr. WILSON, the name of the Senator from Oklahoma [Mr. BOREN], the Senator from Virginia [Mr. WARNER], and the Senator from Alabama [Mr. DENTON] were added as cosponsors of S. 713, a bill to prohibit the interstate sale and transportation of drug paraphernalia.

S. 729

At the request of Mr. DURENBERGER, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of S. 729, a bill to amend the Internal Revenue Code of 1954 to make permanent the rules relating to imputed interest and assumption of loans, and for other purposes.

S. 736

At the request of Mr. BUMPERS, the name of the Senator from Missouri [Mr. EAGLETON] was added as a cosponsor of S. 736, a bill to amend the Bank Holding Company Act of 1956 to provide for the safe and sound operation of depository institutions.

S. 769

At the request of Mr. PRESSLER, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 769, a bill to amend title 38, United States Code, to allow the use of upright grave markers in national Veterans' Administration cemeteries.

S. 879

At the request of Mr. PROXMIRE, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 879, a bill to authorize funds for research, development, test, and evaluation in connection with strategic defense initiative programs and advanced strategic missile systems for fiscal year 1986, and for other purposes.

SENATE JOINT RESOLUTION 20

At the request of Mr. SYMMS, the name of the Senator from Nevada [Mr. HECHT] was added as a cosponsor of Senate Joint Resolution 20, a joint resolution proposing an amendment to the Constitution of the United States with respect to the English language.

SENATE JOINT RESOLUTION 32

At the request of Mr. PRESSLER, the names of the Senator from New York [Mr. D'AMATO], and the Senator from Delaware [Mr. ROTH] were added as cosponsors of Senate Joint Resolution 32, a joint resolution to authorize and request the President to designate September 15, 1985, as "Ethnic American Day."

SENATE JOINT RESOLUTION 34

At the request of Mr. QUAYLE, the names of the Senator from Louisiana [Mr. LONG], the Senator from New Mexico [Mr. DOMENICI], the Senator from Alabama [Mr. HEFLIN], the Senator from Florida [Mrs. HAWKINS], and the Senator from Alabama [Mr. DENTON] were added as cosponsors of Senate Joint Resolution 34, a joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "National Children's Week."

SENATE JOINT RESOLUTION 53

At the request of Mr. DENTON, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of Senate Joint Resolution 53, a joint resolution to authorize and request the President to designate the month of June 1985 as "Youth Suicide Prevention Month."

SENATE JOINT RESOLUTION 64

At the request of Mr. RIEGLE, the names of the Senator from South Carolina [Mr. HOLLINGS], the Senator from Michigan [Mr. LEVIN], the Senator from New York [Mr. MOYNIHAN], the Senator from Nevada [Mr. LAXALT], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of Senate Joint Resolution 64, a joint resolution to designate the week beginning May 5, 1985, as "National Correctional Officers Week."

SENATE JOINT RESOLUTION 83

At the request of Mr. DOLE, the names of the Senator from North Carolina [Mr. EAST], and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of Senate Joint Resolution 83, a joint resolution designating the week beginning on May 5, 1985, as "National Asthma and Allergy Awareness Week."

SENATE JOINT RESOLUTION 87

At the request of Mr. MURKOWSKI, the names of the Senator from Florida [Mr. CHILES], the Senator from Nevada [Mr. HECHT], and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of Senate Joint Resolution 87, a joint resolution to provide for the designation of July 19, 1985, as "National P.O.W./M.I.A. Recognition Day."

SENATE JOINT RESOLUTION 92

At the request of Mr. DENTON, the names of the Senator from North

Carolina [Mr. EAST], the Senator from New Mexico [Mr. DOMENICI], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 92, a joint resolution to designate October 1985 as "National Foster Grandparents Month."

SENATE JOINT RESOLUTION 107

At the request of Mrs. HAWKINS, the names of the Senator from South Dakota [Mr. ABDNOR], the Senator from North Dakota [Mr. ANDREWS], the Senator from Texas [Mr. BENTSEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from New York [Mr. D'AMATO], the Senator from Kansas [Mr. DOLE], the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Alabama [Mr. HEFLIN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from North Carolina [Mr. HELMS], the Senator from South Carolina [Mr. HOLLINGS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Hawaii [Mr. INOUYE], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Michigan [Mr. LEVIN], the Senator from Louisiana [Mr. LONG], the Senator from Idaho [Mr. MCCLURE], the Senator from Maryland [Mr. SARBANES], the Senator from Oklahoma [Mr. BOREN], the Senator from Delaware [Mr. ROTH], the Senator from Georgia [Mr. NUNN], the Senator from California [Mr. CRANSTON], and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of Senate Joint Resolution 107, a joint resolution to designate the month of May 1985 as "Older Americans Month."

SENATE CONCURRENT RESOLUTION 36

At the request of Mr. PROXMIRE, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of Senate Concurrent Resolution 36, a concurrent resolution expressing the sense of the Congress regarding the establishment of a joint commission between the United States and the Soviet Union to study the concept of "nuclear winter" and its impact for the national security of both nations.

SENATE RESOLUTION 81

At the request of Mr. ARMSTRONG, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from California [Mr. WILSON], the Senator from Idaho [Mr. MCCLURE], the Senator from Wisconsin [Mr. KASTEN], the Senator from South Carolina [Mr. THURMOND], the Senator from North Dakota [Mr. ANDREWS], the Senator from Delaware [Mr. ROTH], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Resolution 81, a resolution to establish regulations to implement television and radio coverage of proceedings of the Senate.

SENATE RESOLUTION 130

At the request of Mr. WALLOP, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of Senate Resolution 130, a resolution relative to the Sport Fish Restoration Trust Fund.

AMENDMENTS SUBMITTED

FEDERAL FIRE PREVENTION AND CONTROL ACT AUTHORIZATION

BYRD (FOR GORE) AMENDMENT NO. 31

Mr. BYRD (for Mr. GORE) proposed an amendment to the bill (S. 818) to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974; as follows:

On page 2, line 4, strike "$21,036,000" and insert in lieu thereof "$22,036,000".

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that the Committee on Agriculture, Nutrition, and Forestry has scheduled a hearing on the nominations of Peter C. Myers, of Missouri, to be an Assistant Secretary of Agriculture, vice John B. Crowell, Jr., resigned and Robert L. Thompson, of Indiana, to be an Assistant Secretary of Agriculture, vice William Gene Lesher, resigned.

The hearing will begin at 11 a.m. on Monday, April 22, 1985, in 328-A Russell Senate Office Building.

For further information, please contact the Committee staff at 224-2035.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INVESTIGATIONS

Mr. DOLE. Mr. President, I ask unanimous consent that the permanent Subcommittee on Investigations, of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Wednesday, April 17, 1985, to conduct a hearing on the U.S. Government's personnel security system.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 17, in order to receive testimony concerning the nomination of Joseph H. Rodriquez, of New Jersey, to be U.S. district judge for the district of New Jersey.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, April 17, to hold an oversight hearing on the President's proposed budget for fiscal year 1986, for the Department of Energy's environment and safety programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITIES

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Securities, of the Committee on Banking, Housing, and Urban Affairs, be authorized to meet during the session of the Senate on Wednesday, April 17, 1985, to conduct a hearing on the authorizations for the Securities and Exchange Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITY AND TERRORISM

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Security and Terrorism of the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, April 17, for a closed hearing on FBI oversight and budget authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CONFIRMATION OF JOHN F. KRINGS

● Mr. CHILES. Mr. President, yesterday I voted against the confirmation of John F. Krings to be the first Director of the Office of Operational Test and Evaluation, because I don't believe he is the most qualified person to fill this new position. I want it completely understood that I have nothing personal against Mr. Krings. I understand he is a very bright and likable person. He certainly has an outstanding record with the McDonnell Douglas Corp. as their chief test pilot, and he has also served with distinction as the chairman of the Flight Test Operating Committee of the Aerospace Industries Association.

My concerns are that Mr. Krings has not demonstrated to my complete satisfaction that he possesses the necessary operational test background and experience to head this new office. Senator PRYOR has so ably pointed out that there are better qualified candidates for this position, who have experience in conducting and analyzing realistic operational testing, and who we can be assured will be completely objective in their appraisal of test results. I agree with the Senator from

Arkansas that the new Director of Operational Test and Evaluation will be our servicemen's last line of defense against what is sometimes a less than stringent acquisition process, and the first leader of this critical office will set the standards for realistic testing and unbiased reporting for years to come.

As concerned as I am about the length of time it has taken this administration to name a nominee to head this new independent office, I could not in good conscience support the nomination of Jack Krings for this important post.●

A COMPREHENSIVE APPROACH TO PREVENTING CHILD ABUSE

● Mr. CHAFEE. Mr. President, as a cosponsor of the Senate resolution designating April as "National Child Abuse Month," I would like to take this opportunity to draw the Senate's attention to a significant child abuse prevention program now underway in Rhode Island.

Three facts about the tragedy of child abuse are particularly disturbing. First, the incidence of child abuse goes up each year—increasing in 1984 over the previous year by 19 percent. Second, experts agree that the available statistics underrepresent the actual extent of the problem. Third, there is every indication that the victims of child abuse in all too many cases grow up to become abusive parents.

But in this seemingly bleak picture, there are some bright spots. The Rhode Island Chapter of the National Committee for the Prevention of Child Abuse—thanks to a grant from the National Center on Child Abuse and Neglect—has launched a comprehensive program designed to get at the very root of the problem, and prevent child abuse before it takes place. This project will bring full-scale child abuse awareness and prevention programs to six of Rhode Island's school systems. Combining its own resources with those made available by the Rhode Island Chapter of the NCPCA, each school system involved in the program has designed a program that best suits local needs.

Under the program, children from kindergarten right up through grade 12 are now learning how to protect themselves against abuse and what to do if it happens to them. Teachers and other school personnel are being trained to spot possible cases of child abuse and to follow through appropriately; one aspect of this training will be the effective use of the new child abuse neglect tracking system [CANTS] developed by the Rhode Island Department of Children and their Families in order to streamline the identification, reporting, and investigation of child abuse.

Concerned community members, along with parents and teachers, have been recruited and organized as volunteers to raise funds, organize events, and serve as lay counselors, often contributing particular professional skills—in public relations or in the graphic arts, for example—to the effort. And, most importantly, parents are integrally involved in every aspect of the campaign, participating in parent education programs or joining one of the corps of volunteers that have been formed in each of the six school systems.

This program demonstrates how, by taking full advantage of the access that local schools afford, we can mobilize entire communities—parents, teachers, children, and concerned volunteers—against the problem of child abuse. It offers real hope that the tragic cycle of abuse can be broken.

Thanks to similar contributions by thousands of committed individuals across the country, we have in large measure succeeded in breaking the silence that has surrounded child abuse for centuries, and have brought the problem to the forefront of the national consciousness. This is a significant and quite encouraging achievement, and the effort continues, in ever more innovative ways.

In setting aside the month of April as National Child Abuse Prevention Month, we have declared our commitment to building on these successes and stopping child abuse before it occurs. Through concerted efforts like the one now in progress in Rhode Island, we are well on the way toward developing a truly effective national program to keep our children—our most precious resource—protected from harm and in good health.●

TEACHER WARRANTY: A NEW APPROACH FOR EDUCATION

● Mr. PRYOR. Mr. President, on Sunday, April 7, 1985, a column appeared in the Arkansas Democrat by distinguished guest writer Dr. George A. Antonelli, dean, division of education, at the University of Arkansas at Pine Bluff [UAPB]. UAPB is taking a bold step in the area of teacher education by instituting the concept of teacher warranty—an individualized program of assistance for any teacher education major from the class of 1985 who is employed within the Arkansas school system. This program is extended to those students who are experiencing professional difficulties in performing their assigned teaching duties. A teacher training team will implement a plan to improve an individual student's performance and competence in cooperation with a variety of support personnel.

The teacher warranty concept is gaining momentum on college and university campuses across the country. I am proud that an institution of higher learning in my State is in the forefront of this progressive movement. Dean Antonelli is to be commended for his leadership in this area.

Mr. President, I ask that Dr. Antonelli's article on this subject be printed in the CONGRESSIONAL RECORD.

The article follows:

TEACHER WARRANTY OFFERS INSURANCE THAT INSTITUTIONS ARE LOOKING FOR

(By Dr. George Antonelli)

For many years public school teachers and administrators have contended that colleges of education have provided irrelevant courses with incompetent faculty in an irascible manner. Conversely, colleges of education have considered the staff development activities of public schools as illegitimate experiences conducted by illiterate trainers in an irresponsible manner.

More recently, a cover of *TIME* declared, "Help! Teachers Can't Teach", and The Chronicle of Higher Education published an article entitled, "Universities Should Get Out of the Business of Teaching Teachers". One need not reference A Nation at Risk: The Imperative for Education Reform, the report of the National Commission on Excellence in Education, to conclude that teachers and teacher educators are in grave trouble.

Japanese teacher educators have provided career warranties which parallel the business communities' efforts to build confidence in services for many years. The first American institution of higher education to emulate the concept was Doane College in Nebraska. In 1981, Doane College initiated an institutional reform program which increased entrance and retention requirements for teacher education majors, provided a support system for first-year teaching graduates, and warranted their teaching skills for the first year.

"The warranty assures graduates and employers that if there are any rough spots during a Doane education major's first year on the job, the college is there to take responsibility for its product," says Richard E. Dudley, chairman of the education department at Doane.

James Cooper, dean of education at the University of Virginia, announced a one-year warranty on the class of 1985. While Cooper admits he expects to be like "the Maytag repairman", he seems to be emulating Lee Iacocca's style. Cooper is trying to build confidence in his students as well as increase their chances for employment.

Meanwhile, Dean Robert D. Barr of Oregon State University was announcing a warranty assurance in an article, "New Ideas for Teacher Education", which appeared in the October issue of Phi Delta Kappan. An editorial in The Oregonian seems to be more to the mark: "The innovation should put the public schools and the teacher training college in better communication with each other . . . It should afford students assurance that they are getting in the college classroom what they are paying for."

In an attempt to reverse the decreasing number of black teachers in Arkansas classrooms, Chancellor Lloyd V. Hackley of the University of Arkansas at Pine Bluff (UAPB), initiated institutional reforms back in 1981.

The UAPB program provides for an individualized three-year warranty for any UAPB student from the class of 1985 who is

certified, as well as employed, in the schools of Arkansas. To this extent, any UAPB student experiencing professional difficulties in assimilating or demonstrating teaching duties and responsibilities during the three years will be provided the service of a clinical professor in the Division of Education or a content specialist in the Division of Liberal Arts and Sciences in cooperation with the site personnel assigned by the school district. This teacher training team will design and delineate a plan to improve the performance and competence of each recalled UAPB teacher education graduate.

What do other educators think about the warranty concept? Dr. richard Kunkel, Executive Director of the National Council for Accreditation of Teacher Education, thinks it "helps tie higher education into a continued responsibility for the professional development of the teacher." Dr. S. John Davis, superintendent of public instruction in Virginia, says: "I would hope all of our institutions would be willing to stand behind the teachers they train."

All these programs have differences as to length of warranty, delivery of guaranteed services, geographical constituencies, and number of warranted clientele, but there are a number of important similarities. Indeed, they all have:

Established pro-active programs which respond to existing problems with teachers and teacher education.

Increased the entrance/exist requirements for teacher education students.

Enhanced the employment opportunities for their students.

Demonstrated confidence in the ability, efforts, and commitment of their students.

Involved teacher preparation faculties with public school colleagues.

Invited public school teachers and administrators to become equal shareholders in their teacher education programs.

Provided a collaborative model which can be utilized to increase communication between schools and colleges.

Accepted accountability by performance as a criterion for curriculum development.

Institutionalized a business perspective for program development; and

Reconceptualized the process of teacher education.

I hope these warranty programs will help revitalize the image and substance of teacher education.●

U.S. DEFENSE AND ARMS CONTROL POLICIES

● Mr. PRESSLER. Mr. President, the administration's strategic defense initiative, popularly known as "star wars," has sparked a new and wide-ranging debate over U.S. defense and arms control policies. Experts have expressed differing and confusing viewpoints about the goals, costs, and international implications of the proposed SDI program. A three-part series by James McCartney of Knight-Ridder newspapers provides the general reader with an informative report on the SDI. I ask that this series, entitled "Star Wars: The Future of Arms Control," be inserted in the RECORD as it appeared on March 10, 11, and 12, 1985, in the San Jose Mercury News.

The series follows:

[From San Jose (CA) Mercury News, Mar. 10, 1985]

WILL "STAR WARS" WORK IF CALLED UPON?

(By James McCartney)

WASHINGTON.—It is the year 2000 and the Soviet Politburo, after months of heightening tension with the United States over a crisis in the Middle East, decides to strike.

The order is given to attack the United States with 1,400 giant, land-based strategic missiles and 936 submarine-based missiles, launching the world's first all-out nuclear war.

The missiles are targeted on every U.S. city with a population of more than 20,000 and every missile site and major airport. The objective is the annihilation of the United States.

At zero hour, all of the 1,400 land-based missiles and the first flight of 64 submarine-based missiles are launched. Seconds later, first-stage booster rockets ignite, sending out flares of infrared radiation that are detected instantly by sensors on American reconnaissance satellites thousands of miles above.

Space war, by computer, is under way.

The winner, if any, will be apparent within three to four minutes, possibly within 60 seconds.

It is the moment of truth for American technology. The question is whether the "Star Wars" defense program initiated in 1983 by President Reagan will work. The labors of thousands of scientists over those 17 years will be tested, as a question of life or death for modern civilization.

This imaginary scenario is no game. It is a picture pieced together from official Reagan administration documents, from interviews with officials in the "Star Wars" program and from extensive scientific studies of the kind of drama that might develop by 2000.

It is the kind of test that the "Star Wars" program, officially called the Strategic Defense Initiative, is designed to prevent—or to meet.

That program will be the main issue when the United States and the Soviet Union resume arms-control talks Tuesday in Geneva, Switzerland, after a lapse of 15 months.

The Soviets are determined to stop "Star Wars." Reagan has said he is determined to proceed. If the question can't be resolved, arms-control efforts that began more than 20 years ago may be dead.

Secretary of State George Shultz has said the talks in Geneva may provide the last chance to stop the arms race. Soviet spokesman Georgi Arbatov has said: "If you start 'Star Wars,' we will be obliged to build new nuclear weapons, and more of them, which can penetrate your defensive shield."

There is little question why the Soviets are so upset. Reagan's "Star Wars" proposal represents a dramatic change in American strategic doctrine and a rewriting of the American approach to arms control.

Some American officials have predicted privately that the Soviets will walk out of the talks because of U.S. insistence on pursuing "Star Wars."

Research projects already disclosed are linked to the possibility of a fantastic war of the future involving some of the most exotic weapons and deployment systems ever imagined.

Researchers are looking into lethal laser beams that, if perfected, could destroy giant missiles in fractions of a second from 1,000 miles away; space mirrors, 10 yards or more in diameter, to focus lasers; smaller "battle mirrors" to make quick kills; projectiles the size of a coffee can that could hurtle through space at 20,000 mph; and killer X-rays powered by nuclear explosions.

To meet an all-out Soviet attack, the "Star Wars" technology would have to destroy at least 2,100 of the 2,336 land- and sea-based missiles within three to four minutes of their launch. The remaining 236 missiles would have to be destroyed in later stages of flight.

There can be no exceptions without disaster. A single missile with 10 nuclear warheads could destroy an American city and kill hundreds of thousands, if not millions, of people.

No human judgment would be involved in the defense. There would be no time for analysis. The fate of man at that point would be left to supercomputers, programmed to respond instantly to the reports of electronic sensors.

So, at the moment of truth, the ultimate question is: Will "Star Wars" work?

Scientists are deeply divided.

Reagan declared the goal in a Feb. 11 interview, saying, "I want a defense that simply says that if somebody starts pushing the button . . . we've got a good chance of keeping all or at least the bulk of them from getting to the target."

But he also has said that the system he envisages does not have to be "leak-proof," that "you can have a most effective defensive weapon even if it isn't 100 percent."

Reagan reasoned that an enemy's uncertainty over the ability to destroy the capacity of the United States to retaliate could be enough to prevent an attack.

But Reagan has left unanswered the question of what might happen if the Soviets chose to defy this American sense of logic. If only a handful of nuclear bombs slipped through the "Star Wars" defense, it would cause an unparalleled national disaster.

Developing such a defense system is perhaps the most complex scientific challenge ever to face American technology. The challenge involves not only developing exotic weaponry to destroy enemy missiles and warheads but deciding how to deploy such weapons.

The research and development part of the program has been described by Richard DeLauer, undersecretary of defense for research and engineering, as having at least eight components, "every single one . . . equivalent to or greater than the Manhattan Project," the crash program that developed the atomic bomb in World War II.

Top officials in the "Star Wars" research program, however, say that technology already exists to enable the interception of 70 percent to 80 percent of the Soviets' missiles within a few minutes of their launch.

One official said that for $100 billion, using current technology, the United States probably could build a system capable of destroying 97 percent of the missiles, if the Soviets did not employ countermeasures. But no answers have been found to deal with possible countermeasures.

Reagan nearly tripled the "Star Wars" budget for next year, from $1.4 billion to $3.7 billion, and has projected at least a $1 billion-a-year increase for the rest of the decade. The research program from 1984 through 1990 is expected to cost about $30 billion.

(By James McCartney)

WASHINGTON.—President Reagan's Strategic Defense Initiative, described by administration officials and scientists as the largest

research project of all time, seeks to push American military technology to new frontiers in space.

But even at this early stage, the "Star Wars" program is incredibly complex, involving hundreds of different weapons systems and deployment plans at price estimates that have ranged beyond $1 trillion.

To grasp the essentials of the program requires a knowledge of what would be necessary to shoot down high-speed ballistic missiles in flight and of the various ways of approaching that problem.

Here is a summary of the technical challenges confronting the program and the main strategies being studies to meet those challenges.

THE PROBLEM

The central goal is to learn how to destroy most of the Soviet missiles in the first three to four minutes after launching, known as the "boost phase."

"Star Wars" is based on the idea of a "layered defense" that would destroy enemy warheads at each stage of their flight: the boost phase (three to five minutes); postboost (five minutes), when multiple warheads and decoys are deployed in space; midcourse (about 20 minutes), as the warheads and decoys travel through space; and the terminal phase (one to two minutes), when the vehicles re-enter the atmosphere and speed toward their targets.

A missile travels at 17,000 mph and takes only about 30 minutes to reach the United States from a launch site in the Soviet Union.

The Soviets are known to have 2,336 land- and sea-based missiles, carrying more than 8,000 nuclear warheads.

In the boost phase, the blastoff makes missiles detectable through long-range telescopic sensors. But moments later, when they begin to disperse multiple warheads and thousands of decoys, targeting is vastly complicated.

Just after launch, for example, there would be about 2,100 targets. A few moments later, according to a study by the Union of Concerned Scientists, there could be as many as 2,000 targets.

To destroy missiles in the boost phase, American satellites and weapons ideally would operate in space over the Soviet Union and be able to strike at close to the speed of light.

A group of "Star Wars" contractors was told last fall that the program would require an orbiting supercomputer that would have to start working within one second of the detection of the first Soviet missile.

But a recent White House report emphasized the "layered defense," saying that "technologies that are becoming available today may offer the possibility of providing . . . a defense that uses various technologies to destroy attacking missiles during each phase of their flight."

In the 20-minute "midcourse" of a missile's flight, that would mean sensing devices, targeting mechanisms and weapons that could strike tens of thousands of flying objects in a few minutes.

THE WEAPONS

The major weapons under study are various kinds of "beam" weapons and high-velocity projectiles, sometimes called "smart rocks."

Lasers—The most widely discussed beam weapon is the laser. If it proves workable at long distances, it could become a weapon right out of Buck Rogers, a kind of death ray that would cast a destructive beam 1,000 miles or more at the speed of light.

A laser is a powered beam of light, focused by mirrors. It can cause damage through intense heat or through a single giant pulse of energy.

Today's lasers have limited ranges, estimated by one "Star Wars" expert at 100 miles. There are serious questions about how far an effective kill range could be extended.

Some lasers are powered by chemicals, some by electricity. The most controversial system under study is the X-ray laser, powered by a nuclear explosion.

A major drawback: Lasers require so much intense energy that they might be impractical.

One study estimated that one-third of the total electrical output of the United States would be required to operate a ground-based laser system.

"Star Wars" officials disagree, saying lasers would need large amounts of power, but not as much as the studies suggest.

Particle beams—These weapons would use a stream of electrons, protons or neutrons accelerated nearly to the speed of light.

For use against the boost phase of enemy missiles, the particle beam has two major disadvantages: The particles are subject to the force of gravity, unlike laser light, and would curve over long distances and be difficult to aim. And the machinery to accelerate the particles is so heavy it probably could not be put in orbit. Studies aimed at developing particle beams that would not be subject to gravity are under way.

"Smart rocks"—The high-velocity projectiles, also known as "electric cannons" or "smart bullets," would be hurled by small rockets or electrically powered magnetic "rail guns" at speeds as high as 20,000 mph, much slower than the laser.

These are the most promising short-term weapons. "Star Wars" experts say the United States is close to being able to deploy such weapons on a fleet of about 500 satellites. About 5,000 such weapons, 10 on each satellite, would be necessary to confront Soviet missiles in the boost phase.

It has been computed that such projectiles might achieve a range of nearly 1,000 miles. They would be equipped with devices that automatically would home in on a target as they approached it.

Some projectiles under study would be about the size of a coffee can and weigh only a few pounds. Those now in research are about a foot long and a foot in diameter.

Such a device was tested successfully last June in an anti-satellite weapons experiment when a mock warhead was struck in space, the equivalent of a bullet hitting a bullet.

Despite their relatively slow speed, these non-nuclear weapons are technologically simpler than laser or particle beam weapons. They would destroy a missile simply by the force of impact without exploding.

DEPLOYMENT

Once weapons have been developed, the question becomes where to put them and how to get them there. The visions of Buck Rogers technology that would be used in this area led to the nickname of "Star Wars."

Research so far has concentrated on low-orbit satellites, high-orbit "battle mirrors" and a "pop-up" X-ray laser.

Low-orbit satellite battle stations—A fleet of satellites carrying lasers, particle beam weapons or high-velocity projectiles would be deployed in orbits over the Soviet Union at an altitude of about 625 miles.

But at that altitude, a satellite orbits the Earth once every 90 minutes and, because of the Earth's rotation, would pass over a fixed point only twice a day. As a result, many satellites would be needed to ensure that an adequate number actually were in battle positions at any one time. Estimates of the number necessary for an effective system, depending on the range and power of weapons, range from 80 to 2,400.

An advantage of this system is that the satellites not in battle positions over the Soviet Union could be monitoring the seas for submarine-launched missiles.

High-orbit "battle mirrors"—A large number of powerful lasers would be based on the ground and would cast their beams to huge mirrors orbiting at an altitude of 22,500 miles. The mirror-carrying satellites would keep pace with the Earth's rotation maintaining fixed positions above the equator.

The high-altitude mirrors would reflect the laser beams back to a fleet of "fighting mirrors" about 625 miles over the Soviet Union. The low-altitude mirrors, equipped with infrared sensing telescopes, would focus the beams to destroy Soviet missiles in the boost phase.

The advantage of this system would be that the lasers would be on the ground rather than in orbit and could be powered more easily.

Pop-up X-ray lasers—The government also is experimenting with a classified technique for developing an X-ray laser that would be powered by a nuclear explosion.

X-ray lasers would pop into the atmosphere from submarines based near the Soviet Union after satellite sensors reported a Soviet missile launch.

Methods have been developed to focus the X-ray laser beams so that they would deliver the force of part of the nuclear explosion on a target.

They would have to be fired from submarines because the curvature of the Earth would make it impossible to strike Soviet missiles from the U.S. mainland in the first few minutes of flight. New fleets of advanced submarines, along with ships to protect them, would be needed for this kind of a system.

Many scientists have questioned whether this system is practical. They have said Soviet missiles might be beyond the boost phase by the time the X-ray laser could be put in position to fire.

"STAR WARS" PLAN ALTERS PREMISE OF U.S. STRATEGY

(By James McCartney)

WASHINGTON.—President Reagan's "Star Wars" initiative proposes the most dramatic change in fundamental U.S. defense strategy in a generation.

"If the president's plan is actually pursued," said a report by a group of eminent scientists led by physicist Hans Bethe, "it will mark a turning point in the arms race perhaps as significant as the introduction of intercontinental ballistic missiles."

Reagan appeared to recognize the sweeping dimensions of his program from the beginning.

"We are launching an effort which holds the purpose of changing the course of human history," he said in his initial "Star Wars" speech on March 23, 1983.

Until Reagan proposed a crash program to develop a space-based defense system, the only U.S. response to the threat of a nuclear attack has been to threaten instant retalia-

tion. In other words, if you hit us, we'll destroy you.

Not without irony, that policy has come to be known by the acronym MAD, which stands for "mutual assured destruction."

The premise of that policy was a consensus reached by the scientific community in the late 1960s that there was no defense against modern ballistic missiles, which travel at 17,000 mph.

The belief became the basis of the 1972 SALT I treaty, signed by President Nixon in Moscow. The two superpowers agreed not to develop defensive weapons against nuclear missiles, although research was allowed. In effect, they agreed to preserve peace by allowing themselves to remain defensively naked.

But now Reagan has introduced what former Defense Secretary Harold Brown calls "a wild card" with his proposed Strategic Defense Inititative, popularly known as "Star Wars." The objective of the crash program, as Reagan described it, is to render nuclear missiles "impotent and obsolete."

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, calls "Star Wars" "a 180-degree turn from the policies of the previous four administrations."

Maj. Peter Worden, a special adviser to Lt. Gen. James Abrahamson, who heads the "Star Wars" program, says that the "shift in policy is potentially incredible."

"On one side it can lead to a vastly different strategic relationship with the Soviet Union and, perhaps optimistically, a nuclear disarmed world," Abrahamson said. "But there are down sides. Some of the critics will tell you it could lead to arms races in space and, in the long run, maybe offensive weapons in space. So we have both an opportunity and a danger."

REAGAN OPPOSES MAD CONCEPT

Even Reagan has conceded that the MAD policy has worked for 40 years. Why then the switch to a defense policy whose feasibility is fiercely debated?

For one thing, Reagan long has been repelled by the military philosophy that produced the MAD doctrine. In speeches long before he became president, he referred to it as the equivalent of two men pointing cocked pistols at each other.

When the driving force of technology opened the door to dreams about "Star Wars" in the military and scientific communities, Reagan bought those dreams.

Reagan also is an admirer of Edward Teller, the conservative physicist who played a major role in the development of the hydrogen bomb. Teller, an advocate of a space-based defense system, has visited Reagan at least four times and has discussed with him the possibilities of such a program.

The crucial meeting was Feb. 11, 1983, almost six weeks before Reagan announced his decision to pursue that program. The subject of that White House meeting was the embattled MX missile, but most of the nation's highest-ranking military officers were there. Reagan probed them about their thoughts on strategic defense.

RESEARCH BREAKTHROUGHS

He found ready interest, especially by Robert McFarlane, now White House national security adviser, and Adm. James Watkins, chief of naval operations. Reagan found that most of the military men thought there had been enough progress on defensive research to merit a new look at nuclear defense.

"Star Wars" officials say that research breakthroughs have been made in at least five major areas necessary to make a defensive system work—laser and particle beam technology, sensing devices, homing mechanisms, supercomputers and space transportation.

After Reagan announced his "Star Wars" plan, Teller wrote, "Today a wide range of good and ingenious technical plans, ranging from simple to extraordinarily complex, challenge the widespread opinion that practical defense cannot be obtained."

Reagan himself has said since, "New technologies are now at hand which may make possible a truly effective non-nuclear defense."

WILL STAR WARS WORK

But the question persists: Could a "Star Wars" system work?

That question is at the center of a raging debate in the military and scientific worlds. The Reagan administration says yes, it might, and it's worth trying because the stakes are so great.

But according to many former government officials and scientists, there is a widely shared belief in the technical community that Reagan's dream of a virtually leak-proof defense for the entire population is unachievable.

Defense Secretary Caspar Weinberger recently told Congress, "Based on our research so far, we cannot now say how soon we will be in a position to make decisions on defensive options; nor can we today describe all the forms such defense could take."

The most outspoken defense of the program has come from some well-known conservatives.

Three of the most optimistic defenders have been Zbigniew Brzezinski, President Carter's national security adviser; Max Kampelman, a conservative Democrat who has become Reagan's chief arms negotiator, and Robert Jastrow, a physicist at Dartmouth University.

They wrote in a joint article recently that "with development and some additional research, we can now construct and deploy a two-layer or double-screen defense, which can be in place by the early 1990s, at a cost we estimate to be somewhere in the neighborhood of $60 billion."

They said that one of the most difficult problems in developing a Star Wars defense—destroying Soviet missiles within a few minutes after takeoff—is solvable by using "smart" non-nuclear projectiles that "home in on the target, using radar or heat waves, and destroy it on impact."

They said that "the technology is close at hand and need not wait" for more sophisticated systems based on such weapons as laser beams.

Worden does not dispute that this kind of system is nearly achievable, but he says it's not good enough—a more leak-proof system will be necessary. Worden says the United States still hasn't learned how to deal with possible Soviet countermeasures, and computer technologies are lagging.

"Star Wars" opponents, many of them research scientists and former top government officials, argue that the entire system is built on dreams.

FORMER OFFICIALS SKEPTICAL

Former Defense Secretary Brown, a physicist and one-time Air Force secretary, said recently he believes there is an "overwhelming consensus" in the scientific community that the plan can't work. He said that even a majority of researchers in companies under "Star Wars" contract "are highly skeptical about it."

Two other former defense secretaries, James Schlesinger, a Republican, and Robert McNamara, a Democrat, also have expressed doubts.

McNamara, along with former White House national security adviser McGeorge Bundy, arms-control negotiator Gerard Smith and former ambassador to the Soviet Union George Kennan, wrote a recent article that declared:

"What is centrally and fundamentally wrong with the president's objective is that it can't be achieved. . . . The inescapable reality is that there is literally no hope that "Star Wars" can make nuclear weapons obsolete."

FALSE PRETENSES ALLEGED

Another key element in the debate is the question of whether the administration is truly seeking Reagan's goal of a population defense or a lesser goal—the ability to defend American missile sites.

Some administration critics have charged that Reagan is selling "Star Wars" under false pretenses and that the real objective of the military is to defend missile sites. That would be easier to do technically but would imperil existing arms-control treaties with the Soviet Union.

Astronomer Carl Sagan, who opposes "Star Wars," has said: "Different people are talking about different things. What the president was talking about . . . was a kind of impenetrable shield. . . . But what the actual technical people of the Department of Defense are talking about is . . . a defense system that would shoot down some percentage of incoming warheads. That is very different from an impenetrable shield."

[From San Jose (CA) Mercury News, Mar. 12, 1985]

HIGH-TECH CONTRACTORS SEE "STAR WARS" CORNUCOPIA

(By James McCartney)

WASHINGTON.—As Mireille Gerald recalls, some top officials of the American Institute of Aeronautics and Astronautics started thinking early last summer about staging a small conference to discuss the money-making opportunities in President Reagan's "Star Wars" program.

"We started with the idea of getting a small room somewhere and maybe having 200 or 300 people," said Gerard, administrator for corporate and international programs for the AIAA, whose members represent the cream of the nation's high-tech aerospace industries.

"Even before we got the announcement out, we were flooded with phone calls about it," she said. "The word flew like wild fire. And when the administration started talking about spending $26 billion . . . well, you can imagine, it was incredible."

By Aug. 6, when the three-day session opened, the "small conference" had blossomed into a major production. "We had 1,200 people without batting an eyelash and most of them signed up before we got out our publicity," Gerard said.

What happened at the AIAA conference illustrates the kind of excitement the "Star Wars" program has generated in the nation's high-tech community, whose members see it as a cornucopia of funds that should continue to flow into the next century.

In the competitive world of high tech, "Star Wars" is more than a challenging ex-

periment to see whether defenses against Soviet missiles can be found. It is manna from heaven.

The $26 billion figure mentioned by Gerard has already risen to at least $30 billion for research through 1990, and private studies have put the expected cost by 1993 at $65 billion to $80 billion. Former Defense Secretary James Schlesinger has said the cost, if the system is ever deployed, will be about $1 trillion.

The AIAA conference turned out to be an intense, classified series of briefings in which top officials in the "Star Wars" program provided inside information to potential contractors. Main meeting rooms overflowed, and the remarks had to be piped in to anterooms so everyone could hear.

The word "cornucopia" began getting around. The American Society of Mechanical Engineers used it in a printed program a few months later to tout its conference in Arlington, Va., entitled "Finding Your Role" in "Star Wars."

"Will you find a place in this state-of-the-art cornucopia—expected to be a greater undertaking than the Apollo program?" the program asked. "This conference will help both companies and engineering professionals learn how to get in on the ground floor."

MOTIVATIONS QUESTIONED

But there has been some public questioning about the motivations of the administration in plunging ahead with the program on a crash basis. The budget requested for "Star Wars" for 1986 is $3.7 billion, nearly triple the $1.4 billion budgeted for this year.

Gordon Adams, director of the privately supported Defense Budget Project, which has studied "Star Wars" funding, said there are grave questions about whether the program can efficiently absorb such rapid growth. "I'm not sure they will even be able to spend the money," he said.

Former arms control negotiator Gerard Smith has predicted an era of "free beer, no cops."

John Pike, a space expert for the Federation of American Scientists, has said, "Cutting away the rhetoric, it's a jobs program. It's a question of what sector of the economy you're going to create jobs in."

Pike said that in the contracting community, "the number of people who think it will actually work is infinitesimal compared to the number of people who want to work on it."

Said Adams, "I get a sense that the hogs are feeding at the trough. It has become something that everybody would like to get a piece of, but they don't know what it is yet."

CRITICS DISCOUNT GOAL

Adams is one of several critics who believe that the program is being sold to the public under false pretenses. He said he believes that most of the scientists working on the project question whether it can achieve Reagan's stated goal of defending the entire American population.

Population defense, Adams said, is being used as a sales gimmick, while the real objective of many is development of a missile-silo defense system, a far more limited objective. "'Star Wars' is a stalking horse for ballistic missile-silo defense," Adams said. "We're building up a huge spending base for site defense."

Some critics of the program have also charged that the huge amounts of money involved will generate pressures to continue work on "Star Wars," whether or not research seems to be panning out.

A group of six top scientists with long experience in defense contracting, including Hans Bethe and Richard Garwin, observed recently in a joint statement:

"When a trillion dollars is waved at the U.S. aerospace industry, the project in question will rapidly acquire a life of its own—independent of the validity of its public justifications.

PROJECT AS JUGGERNAUT

"With jobs, corporate profits and civilian and military promotions at stake, a project of this magnitude, once started, becomes a juggernaut, the more difficult to stop the longer it rolls on."

No one truly knows how much "Star Wars" might eventually cost, but as Col. Thomas Fiorino, a contracting officer for the program, put it, "What we know is that it will be a positive thing for the economy."

Maj. Peter Worden, a special assistant to Lt. Gen. James Abrahamson, the program's project director, estimated that "Star Wars" contracts now account for about 50,000 jobs. That figure is expected to increase to about 150,000 in the next five years, he said.

These figures are far more modest than those suggested in testimony to Congress by Defense Secretary Caspar Weinberger, who has estimated that about 35,000 jobs are created by every $1 billion in defense purchases.

If Weinberger's formula is applied to "Star Wars," it would suggest that as many as 129,500 jobs might be supported by the program by next year, with the eventual total for the $30 billion program far beyond that.

Officials decline to provide information on contract awards, except in the most general terms. However, a detailed study of "Star Wars" contracts, pieced together from public sources, was published recently by the Federation of American Scientists, which opposes the program. The study was conducted by Pike, the federation's associated director for space policy.

The study, noting that compiling an accurate list was "a rather tricky task" because the "Star Wars" organization is still growing rapidly and has been reorganized, listed these contractors:

Lockheed Missiles and Space Co., Sunnyvale. More than $150 million. Principal work: laser pointing and tracking devices.

Boeing Aerospace, Seattle. More than $150 million. Principal work: optical systems.

LTV Aerospace, Forth Worth, Texas. More than $100 million. Small radar-homing interceptor technology.

McDonnell Douglas Astronautics, Huntington Beach. More than $100 million. Terminal defense subsystems.

Teledyne Brown Engineering Inc., Huntsville, Ala. More than $100 million. Systems engineering and technical support for the Army's test efforts under "Star Wars," and "battle management" computer software.

Aerojet General, Azuza, Calif. More than $50 million. Infrared sensors.

General Electric Co., Syracuse, N.Y. More than $50 million. Silicon on sapphire transmitter module for space-based radar.

Honeywell Inc., Minneapolis. More than $50 million. Computers.

Hughes Aerospace Group, Culver City. More than $50 million. Optical and infrared sensors.

Rockwell International, Seal Beach. More than $50 million. Space-based laser.

TRW, Redondo Beach. More than $50 million. Booster surveillance and tracking systems.

Grumman Aerospace, Bethpage, N.Y. More than $20 million. Antenna for space-based radar.

ITEK Corp. (division of Litton Industries), Lexington, Mass. More than $20 million. Mirror for space laser.

Martin Marietta Aerospace, Orlando, Fla. More than $20 million. Kinetic energy weapons.

RCA Government Systems Division, Moorestown, N.J. More than $20 million. Radar for Kwajalein missile range.

Westinghouse Electronics Corp. Research and Development Center, Pittsburgh. More than $20 million. Electric discharge laser.●

J.W. FULBRIGHT CELEBRATES BIRTHDAY

● Mr. PRYOR. Mr. President, last week Senator J.W. Fulbright celebrated his 80th birthday. It was an appropriate day for his family and friends to honor him and also his wife, Betty, who through the years has been so much a part of his public life. Senator Fulbright distinguished this Chamber for 30 years, and as chairman of the Foreign Relations Committee he was one of our most effective leaders and spokesmen.

We continue to be proud of him in Arkansas and are privileged now to have the arts and science college at the University in Fayetteville named in his honor. We are also proud of the J.W. Fulbright Institute of International Relations at the same campus.

I want to share in the recognition of Senator Fulbright's birthday by inserting in the RECORD two recent news stories about his background and career. One of them is by Ray Jenkins of the Baltimore Evening Sun. The other is a UPI story that ran in the Arkansas Gazette on March 17, written by E. Michael Myers.

Both of these profiles define a leader who continues to command what Mr. Myers correctly refers to as "international respect." I recommend that my colleagues in the Senate read these columns, and that they join me in expressing every good wish to Senator Fulbright on his birthday.

The articles follow:

STILL IN DISSENT AT 80

(By E. Michael Myers)

WASHINGTON.—It has been a decade since J. William Fulbright wielded power from the Senate Foreign Relations Committee, but even now, at age 80, his sharp mind and voice of dissent commands international respect.

Not surprisingly, Fulbright argues that President Reagan is wrong in his approach to the Soviets. But, perhaps surprisingly to some, he feels the right course was set by another Republican chief executive—his old foe Richard Nixon.

CONFIDENCE BUILDING FIRST

"You do not do things in the most sensitive area, arms control, right in the beginning," Fulbright reflected in his law office just a few blocks from the White House. "That may be the ultimate objective, but you do things that are not so sensitive in

which you build a degree of confidence about the other persons' intentions and capabilities."

He said Nixon's pursuit of science agreements, joint space ventures and cultural exchanges were key "confidence building" steps to lead to greater accords.

"After a period, you begin to get a feel for each other," he said, adding that Reagan had "practically cut off all relations" with the Soviets.

Fulbright's 30 years in the Senate came to an abrupt end in the 1974 Arkansas Democratic primary. But he has not faded away.

One biography was published last year and another is being written. He has authored many articles and given many lectures. And he has been to several countries, and will be going to more, as the Fulbright scholarship program—the international educational exchange that he sponsored by law in 1946—celebrates its 40th anniversary.

Some 150,000 scholars from the United States and abroad have studies under the program and many have invited Fulbright to their homelands for anniversary celebrations.

"Many former participants are reaching middle age and are in positions of significance," Fulbright said. "One of the most important effects in my view is that these people will come to understand the United States and the United States will come to understand them much better.

"The prejudices inherited or developed about religions, customs, are disabused in a broad sense. People of this character in positions of influence are much less likely to go to war. It is important to establish attitudes so you are much more reluctant to resort to arms to kill people because you do not like the way they act.

"Let me say—suppose Mr. Reagan had gone to school at Moscow University. He would think of them in a different way."

Fulbright's name conjures memories of the Arkansas Democrat sitting at a horseshoe-shaped committee table, staring over his glasses as he denounced the Vietnam War during televised proceedings. Fulbright led congressional opposition to the war—calling it morally wrong.

He did not hesitate to oppose Nixon over the issue, and before him Lyndon Johnson.

Today Fulbright is grayer and more wrinkled than in the days when he battled Senator Joe McCarthy over his Communist witch-hunt or battled presidents over Vietnam.

On April 9 he will celebrate his 80 birthday.

He now advises a Washington law firm on international affairs and dealing with Congress, but his real passion—in lectures, articles and books—is the arms race.

Fulbright fears the continuing buildup will provoke war instead of deterring it. He worries about the staggering cost, and questions the reality of the fear and distrust on which the arms race is based. He doubts Reagan's "Star Wars" defense system—which supposedly would knock down incoming nuclear missiles—will work.

"But I don't think that's really the point "Fulbright said. "I think they're trying to intimidate the Russians."

That, he said, cannot be done. He said the Soviets are too strong to be pushed around, but he also believes they will not attack without provocation.

DOESN'T UNDERSTAND OBSESSION

"Except when you run into a Hitler once in a while, it is difficult to make policy on the basis that your enemies are insane, or completely irrational. They aren't, most of them. I don't see, really, fundamentally, why we are so obsessed with the Russians.

"Do you really think the Russians are raring to attack Western Europe? There is nothing in their history, really, to quite indicate that. Their attacking Afghanistan is no more significant than our attacking Grenada or Vietnam."

Fulbright praised Nixon's detente and the policies that led to the Anti-Ballistic Missile Treaty and a strategic arms agreement.

"You know, people have gotten to where they don't like to say anything Nixon did was good because of Watergate. But damn it, every man makes his mistakes and Nixon made one, but he did the best job of trying to turn this military conflict and the threat of a nuclear arms around—better than anybody."

"Evil empire," he shrugged, referring to Reagan's description of the Soviets." That kind of rhetoric gets under their skin. They don't forget.

"The assumption is they can be intimidated, and they are determined to attack us or Western Europe. You see that assumption is based on very low opinion of their intelligence.

"They are tough people to get along with, but I don't think they're monsters and inhuman. The American Indians thought we were monsters, too, back in 1870.

"The fact is, there they are, the Russians—260 million people. What are you going to do about them? Either you fight them or get along with them, I don't believe in fighting them."

Fulbright said the United States and the Soviet Union share "the most fundamental interest there is—survival of being allowed to develop your country."

"The peripheral interests, about what happens in Nicaragua, Afghanistan, Vietnam, are not really very significant," he said. "The main issue is a war between the United States and Russia."

And stopping the arms race is fundamental to avoiding a war.

"Either this policy we're following will result in a war or the impoverishment of both countries," he said. "I hope we will stop doing what we're doing and try to reduce those deficits and reduce the arms."

Fulbright said the Soviets want a calm relationship with the United States.

"They, as much as we do or more, need a period of consolidation and chance to develop their country. They have serious difficulties in their economy.

"I don't mean by that they're going to collapse. But the idea we can intimidate them by building 'Star Wars,' I don't think will work at all.

". . . But they are in trouble. They are suffering the diversion of their resources in armaments, as we are. And they would like, in my opinion, to have a period of peace if not a permanent period of peace with us."

CENTRAL AMERICA VIEWS

In Central America, Fulbright says Reagan has produced no proof about Soviet, Cuban and Nicaraguan subversion.

"The credibility is in question all the time," he said. "Ever since Vietnam—where I am convinced the committee and the country was lied to, misrepresented, whatever you want to call it, by the highest officials—I've been very skeptical of these things."

In the Middle East, Fulbright said the administration did not define its objectives in Lebanon at the cost of American lives and prestige. And he criticizes the aid to Israel which runs more than $2 billion a year.

"To finance and to encourage their expansion is a great disservice to Israel over the long term because I don't believe Israel can sustain forever a garrison state posture," he said. "As long as we give them the money, we are supporting, financing the continuation of war in the Middle East.

"They control our Congress. They influence the political process to the extent people are afraid to cut it off. It is always in the back of their minds, you will be accused of being anti-Semitic, no matter what the reason. Therefore, there's no debate on that subject," Fulbright said, and concluded:

"Damn, I may be completely cockeyed, but it doesn't make sense to me what we're doing."

FULBRIGHT REVISITED: STILL PUZZLED BY U.S. VIEW OF RUSSIANS

(By Ray Jenkins)

When the Senate Foreign Relations Committee opened hearings this week seeking a consensus on American foreign policy, one who was watching with more than a passing interest was J. William Fulbright.

For 15 years, from 1959 to 1974, Fulbright was chairman of that committee—the longest tenure of any man ever to hold that prestigious yet politically perilous post, and surely the most tumultuous tenure as well. His opposition to the Vietnam War and the policies of his own president led to his defeat a decade ago.

In an interview this week as the Senate inquiry began, Fulbright said the hearings hold some promise if the senators can bring themselves to seriously examine "our obsession about the Russians."

"As I read the interminable and often boring discussions by the 'experts' on arms control," he said, "it infuriates me that no one suggests that research or even attention should be devoted to finding, what is the justification for the conviction held by so many, that the Russians will take such an imprudent and irrational action as to attack the West? Why do we believe they are so foolish?"

Soon to turn 80, Arkansas Democrat Fulbright has warm words for Richard Nixon.

"Aside from Nixon's promising—and then aborted—effort to establish normal relations in 1972," he said, "little attention has been given to the idea of cooperating with the Russians in joint nonmilitary activities such as trade, research in medicine, economics, pollution, cultural exchange, and other endeavors in which confidence could be created."

In such words we catch an echo of the purpose he had in mind when, in 1946, he sponsored the legislation creating the Fulbright scholar program, which over four decades has enabled 50,000 American graduate students to study abroad and has brought 100,000 foreign students to America.

"Yet it is constantly reiterated that our interests and the Soviet interests are so inherently opposed that there is no possibility of normal, peaceful relations," he said. "This is said as a given, without reservation, with complete confidence, that no reasonable man should question.

"Well, as one unreasonable man, I question it. It seems clear to me that our true interests are not served by the arms race, and that if it continues, it will lead either to the gradual impoverishment of both superpowers or to armed conflict.

"If instead of endless negotiations about all manner of exotic arms, nuclear and con-

ventional, we seriously considered the effects of a well-designed program of joint ventures in all possible fields of activity, we would recognize that nuclear weapons have made the ancient game of trial-by-battle obsolete and dangerous and that the competition must be transferred to a different arena, to a non-military arena where the competition could be vigorous but not fatal."

He is especially troubled over the injection of religion into foreign policy, "the sense that God wants us to destroy the Russians."

Fulbright, a former college president, looks to history.

"We are mindlessly pursuing policies of a kind that led England and Germany into World War II without considering that there is an alternative approach," he said.

"The truth is, the real interests of both our countries are served by abandonment of the arms race, stabilization temporarily at the present level, and the vigorous development of trade and joint endeavors."

Richard Lugar, the Indiana Republican who undertook the foreign policy inquiry after becoming chairman of the Senate Foreign Relations Committee this month, was still in knee-pants when Fulbright went to Congress. They do, however, have one thing in common: Both were Rhodes Scholars.●

SENATOR DODD ON THE CONSTITUTIONAL CONVENTION CALL

● Mr. MITCHELL. Mr. President, the Federal budget deficit dilemma is a source of deep frustration, not only here in Washington, but also to State legislators and Governors, who face uncertainties each year as grant programs to the States are proposed to be cut.

It is not surprising, perhaps, that this frustration should find expression in calls for Congress to enact a constitutional amendment to balance the budget.

My own State of Maine is considering a resolution calling for a Constitutional Convention to this goal.

But it is a far cry from venting frustration about the Federal deficit to taking the uncharted course that may lead to the convening of the second Constitutional Convention in our Nation's history.

My colleague from Connecticut, Senator DODD, recently evaluated that idea in a particularly lucid address to his own State's legislature. Connecticut is also contemplating the call for a Constitutional Convention.

What gives Senator DODD's remarks their urgency and relevance today is the fact that it may take only two more States to trigger a second Constitutional Convention.

Since no precedent exists, except for the first Constitutional Convention, which went widely beyond its mandate to write our existing Constitution, that prospect ought to engage the attention of every Member of this body.

Senator DODD's remarks not only spell out the shortcomings of a balanced budget amendment; they also address the very serious issues that arise in connection with a Constitutional Convention, whose creation would tie up the energies of government for an unforeseeable time and which could, as Senator DODD explains, be "a fourth branch of government, not subject to outside limits.

I ask that the text of Senator DODD's remarks be printed in the RECORD.

The material follows:

STATEMENT OF U.S. SENATOR CHRISTOPHER J. DODD ON CONNECTICUT SENATE JOINT RESOLUTION 23

I appreciate this opportunity to discuss with you the question of a Constitutional amendment to require a balanced federal budget.

This is my first appearance before you in my 10 years of public service. I have always been reluctant to intrude in the debates of the General Assembly. As legislators we share a responsibility to represent our constituents as our own judgment and conscience dictate. But now, as you consider a resolution that will have great impact not just on our state but on the Federal Constitution, I feel duty-bound to testify. In Connecticut, the Constitution State, we take the Constitution seriously.

In my opinion the balanced budget amendment proposal before you is a bad idea. At best, the result would be more confusion, posturing and hyprocrisy in Washington, not less. As we know, no amendment, no procedure, no policy can substitute for political will.

If Congress and the President have the will to balance the budget, the amendment isn't necessary. If Congress and the President do not have the will, no Constitutional amendment will produce it.

But the question before us is more than a matter of policy. That proposal before us does not call for a balanced budget. It calls for the drafting of a Constitutional amendment. And if Congress doesn't do it, the resolution calls for a new Constitutional Convention.

Ten years ago, when a few legislatures adopted resolutions calling for a constitutional convention on balanced budget, the voting was easy. State legislators uncomfortable with federal deficits and pressed by persistent constituents had the luxury of casting a symbolic protest vote. More often than not, the resolution didn't even receive a hearing. In many states, the resolution didn't even come to a rollcall vote.

Even the sponsors of this effort regarded it as a mere protest. One of the founders of the National Taxpayers Union called it "just a way of getting attention—something akin to batting a mule with a board." Well, the board may have been aimed at Congress. Today, here in Connecticut, it is not only aimed at the Constitution of the United States, but will do serious damage to it if adopted.

You don't have the luxury of a protest vote. The Constitution says Congress must call a new convention if 34 states petition for one. By the time you act on this resolutuion, 33 other states may already have issued such a call. Thus, by whatever accident of history, the members of the General Assembly from the Constitution State have the responsibility and the power to decide whether this issue is of such significance that we must put our very U.S. Constitution at risk.

The stakes are beyond calculation. You must be sure before you vote. You must be willing to accept not only the voters' judgment, but history's. If a mistake is made, it is not easily corrected.

The fact is, we have had only one Constitutional Convention, in 1789. It was called for a limited purpose, and told to report back to Congress. Instead, it scrapped the old Articles of Confederation, completely restructured our government, and turned ratification over to the states. The document, our Constitution, endures. The precedent, however, is not comforting.

Your resolution attempts to limit the scope of the convention.

There are grave questions whether this is possible and considerable opinion that a convention would really be a fourth branch of government, not subject to outside limits.

State legislatures have used the convention call with increasing frequency in recent years. Sixty percent of all the convention calls in our 200-year-old history—150 of them—have been enacted since 1963.

Thirty-two states have enacted balanced budget calls of one form or another. But since 1979 states have also asked for a convention to consider busing, school prayer, abortion, electing federal judges, even to review federal grant requirements and administrative rules. Major debates are under way on whether to limit the powers of federal courts over these and other deeply-felt social issues.

Regardless how we feel about these issues themselves, we ought to ask ourselves whether we really want to risk a Constitutional Convention to consider them. We don't know how many Washingtons, Madisons and Hancocks would show up this time, and how many Jerry Falwells or Angela Davises. Is our nation's foundation stone so worn and cracked that the people are rising to demand such wholesale reform? I think not.

The stakes are too high. This proposal simply isn't worth the risk.

Let's look at the specifics: the resolution under consideration here does not specify the form of the balanced budget amendment. Many specific alternatives have been drafted and debated. They share one common characteristic: none of them will work. Most of you are familiar with the arguments, but let me summarize the major ones.

First, we must balance our family budgets. Our State Constitution requires our state budget to be balanced. Why shouldn't we expect the same from the federal government? Applying most of the balancing schemes to the family budget would make it impossible to take out an auto loan or a home mortgage. At the State level, we could say goodbye to Connecticut's new infrastructure program. That $400 million in bond money you approved last year, and the $600 million you are considering this year, would have to be found from current revenues.

More fundamentally, the federal budget is not like state budgets. At the federal level we don't distinguish between our capital expenses and our transient needs. We don't carry our ships and airplanes on the books as assets. Perhaps we should. It is one way to make the deficit vanish.

But we have chosen instead to present a "unified budget," a single look at our national accounts in the broadest sense. The budget is not just a collection of spending and tax programs, but a statement of national goals and aspirations.

Like all budgets, it is based on estimates. The more you think the economy will grow,

the smaller your deficit. President Reagan estimates the economy will grow by four percent a year over the next several years. The Congressional Budget Office foresees a more moderate 3.2% to 3.5%. Their different economic assumptions makes a $100 billion difference in their projections for the deficit by 1990.

The budget is also vulnerable to sudden shocks. In recent years oil embargoes, interest rate increases and unexpected shifts in our economic fortunes have taken their toll on our budget plan. So it is impossible to guarantee balance. If unemployment had increased by just one percentage point last January 1, for example, by the end of this budget year the deficit would be $24 billion larger and the deficit in 1986 would be $40 billion larger. All without Congress voting a single new spending program.

It's important to remember that the budget is supposed to work this way. When Herbert Hoover tried to balance the budget in response to the crash of 1929, it provoked a ruinous depression and sparked the search for a better approach.

Over the past half century we have developed a system to cushion the nation's fall when times are hard, and to modestly restrain the economy when the boom is on. The system has taken much of the pain from the vicious boom-and-bust cycles so common in our history. In fact, about the only thing economists can agree on, conservative and liberal, is that in hard times balancing the budget would be a grave mistake.

All of us recognize that the balanced budget proposals reflect a genuine public frustration with deficit spending. It is a frustration I share, as a member of the Senate and as a politician with an appreciation for the public mood.

The only way to balnace the budget is to gain a majority of the Congress in favor of a mix of initiatives which will yield black ink at the bottom of the ledger. And that's where the problems begin.

More conservative members of Congress will set aside their distastes for deficits when it comes to spending for defense. More liberal members believe the budget cannot be balanced on the backs of the poor, the elderly and the disadvantaged. Neither kind of member has an appetite for new taxes. The sin is the same.

Balancing the budget is not simply a matter of trimming a few billion dollars here and there. The easy choices have already been made. Despite the florid language of the resolution, we have stabilized federal spending at a little less than 25 percent of gross national product. Revenue has stabilized at about 19 percent. Closing that six percent gap has proved challenging indeed.

President Reagan's passion for a balanced budget knew no bounds in 1980, and he supports a Constitutional amendment to this day. Yet not even he has submitted a single balanced budget, nor a plan for achieving one.

Sometimes I suspect the chief reason for the popularity of the Constitutional amendment idea is that it is so much easier to conceive, and defend, than actually balancing the budget. Best of all, from this perspective, the amendment approach postpones the real work, and the tough choices.

Congressional action and ratification by three fourths of the states will take several years at least, especially given the controversy surrounding this amendment. ERA has taken 10 years, and is still not settled. A vote for a balanced budget amendment should not excuse members of Congress from coming to grips with the deficit now, this year, not in three or five or ten years.

But let's imagine for a minute that a balanced budget amendment has already been enacted by the Congress, ratified by the Legislatures, and now remains to be implemented. Let us imagine further that all the cuts in spending proposed by the President this year have been enacted—the phase out of revenue sharing, Amtrak subsidies and the Small Business Administration, cuts in education, health, housing and environmental programs, cuts in veterans' services, farm programs, mass transit and all the rest. That's about $35 billion in cuts. They would cost the State of Connecticut $300 million. Even with all that, the Congressional Office says the 1986 Budget would still be $186 billion in the red.

But the Constitution says we must be in balance, so let's look at our options. Let's assume no new defense spending and no new cuts in Social Security, Medicare and the other entitlement programs. We can't refuse to pay interest on the debt. That leaves what are called "nondefense discretionary spending"—the rest of government. This is money for energy programs, community development, education, training and employment, the State Department, NASA, the EPA, SEC and other regulators, The White House, the Congress, the $50 billion in direct grants to states—everything.

The Budget Office estimates all these programs (and all the others I have not mentioned) will total—TOTAL—$167 billion in 1986. Even if we reduced them all to zero, we still would not be in balance. Indeed, we would have brought a disaster down upon our economy, throwing five million people out of work, adding enormously to the costs of unemployment insurance and public assistance and reducing our revenue base. Swift and sudden balance, in short, is not only undesirable, it may be downright impossible.

Neither these cuts nor anything like them are remotely possible politically. So what would Congress do? The temptation to cheat would be overwhelming. Programs could be moved "off budget," where some programs already reside. Accounting changes, honest ones and not-so-honest ones, would be irresistible. Economic assumptions worthy of Pollyannah would become the norm. The budget plan would balance. The budget would not. And we would all act surprised at the end of the fiscal year. Honest government demands better.

The framers of the Constitution recognized the need for deficit financing by specifically authorizing the repayment of debts. Indeed, the war of revolution was financed by borrowing. And fully half the budget from 1789 to 1791 went for interest on the debt.

The Resolution before you also implicitly recognizes the need for deficits in certain circumstances. Supporters of the Resolution will tell you they have left an escape hatch. The specific proposals usually require a vote of 60 percent of both Houses of Congress to approve a deficit. Such a proposal gives enormous power to a minority to block appropriations, complicating and retarding a process which is already too slow and too vulnerable to delaying tactics.

Beyond that, the notion of allowing Congress to suspend the Constitution by a 60-40 vote is farcical. Suppose the founders had seized upon this idea. "We shall have free speech, unless Congress votes 60-40 against. We shall have trials by jury, unless Congress votes 60-40 against. We shall have due process, the right to bear arms, equal rights, income taxes, popular election of Senators, unless Congress votes 60-40 against. We shall have a free press, unless . . ." on some days, I suspect you could get 60 Senate votes against that one.

The founders were interested in controlling the power of the Congress, not expanding it.

The Constitutional Amendment idea is a bad one. there are other balancing ideas which stand a better chance of working. If developing a capital budget would give us a better idea of the true financial health of our country, we ought to consider it.

If we need a process, we should examine the "pay as you go" idea I first advanced in 1982. That approach would freeze federal spending at current levels. Any new spending, whether for defense, Social Security or education, would need to be financed by new revenue or cuts in existing programs. The Congressional Budget Office predicted the budget would be in surplus in three years if this approach were followed to the letter. Maybe that is too much to expect, and maybe the economy would not accommodate so rapid a schedule. But the plan could work. Congress could enforce it. Best of all, our Constitution would be protected.

Some of the support for this amendment comes from those who do not share my view of the federal government as an active participant in the search for opportunity for all Americans. What better way to reverse the tide of progressive legislation than by starving it to death? And what better way to enforce that starvation than by invoking the Constitution?

It is time to open thab agenda to public view. Every member who is considering a vote in favor of this resolution should first ask himself how he or she would balance the budget, what would be cut and what retained, whose needs foregone, what justice denied.

It is easy, and politically popular, to say we must balance the budget. It is hard, and politically difficult, to say how it should be done. We must be prepared to answer and every voter should demand the answer.

Here in Connecticut, you must also be prepared to answer a larger question and submit to a judgment beyond even the voter's, the judgment of history.

Each of us who serves in public office takes on two burdens. The first is to represent our people's interests to the best of our abilities. The second is more fundamental. We are also the stewards of a process of government, a government which protects and engages our ideas of liberty, justice and opportunity. Should Connecticut become the 34th state to call for a Constitutional Convention, the members of the General Assembly will have chosen to launch our country on an unknowable and frightening course. The foundation stones of the world's most successful experiment in democracy will shake. The crisis will be on. No one can predict the outcome. If we go astray, how will we answer to history?

And we will risk all this for the sake of an economic fancy which is being promoted by the very politicians who lack the will themselves to propose and vote for balanced budgets.

The choice is yours. If you choose to reject this Resolution, you will enjoy the blessings of history. I urge you to vote no—and reject this resolution.●

PENTAGON RULE CHANGE

● Mr. PRYOR. Mr. President, in today's edition of the Wall Street Journal there is a very interesting article entitled "Pentagon Softens Rule That Contractors Must Certify Overhead Billings as Proper."

The article describes the revisions made yesterday by the Department of Defense to regulations instituted last month requiring that defense contractors certify under penalties of perjury that the charges they bill the Government—and the taxpayers of this country—are appropriate. The certification requirement was put into place last month by Defense Secretary Weinberger to crack down on abuses, such as charging the Government for country club dues and kennel boarding fees for dogs owned by corporate executives. The changes made yesterday, while continuing to bar contractors from passing along advertising and public-relations costs, will still allow contractors to bill the Government for many unrelated, indirect costs. Further, Mr. President, the last paragraph of the article contains a warning of where we might be headed. It states:

> The recent changes don't end the fracas over the certificate. The language still bars military contractors from passing on advertising and public-relations costs to the Pentagon, and industry lobbyists say they are determined to preserve the right to charge the Pentagon for some of these costs.

So, it looks as if they will continue to try to chip away at even the most minimal procurement reforms.

The observation that needs to be made about this reversal is that on April 15 of every year the people who pay the bills—the taxpayers of this country—certify under penalties of perjury that their tax returns are accurate. The statement on the back of the form 1040 is:

> Under penalties of perjury, I declare that I have examined this return and accompanying schedules and statements, and to the best of my knowledge and belief, they are true, correct, and complete.

Now, after this most recent reversal, we have a situation where the people who pay the bills of this Government have to certify under penalties of perjury that their statements are correct, but the people who receive literally billions of dollars in contracts have to make no certification that the costs we're being asked to pay are directly related to the defense contract.

Mr. President, in the coming weeks, I hope constructive changes can be made in our defense procurement system. It is in dire need of change. With the reversal of a "get tough" after only 6 weeks, it shows how extraordinarily difficult it is to make any changes in the procurement area.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

PENTAGON SOFTENS RULE THAT CONTRACTORS MUST CERTIFY OVERHEAD BILLINGS AS PROPER

(By Tim Carrington)

WASHINGTON.—The Pentagon watered down a requirement that military contractors certify under penalty of perjury that any overhead charges they pass on to the government are appropriate.

Defense Secretary Caspar Weinberger unveiled the certification plan last month as part of a crackdown on contractor abuses. However, the move sparked sharp protests from contractors, some of whom flatly refused to sign such certificates.

Yesterday, the Pentagon's Defense Acquisition Regulatory Council said contractors could continue to pass on certain indirect overhead costs that weren't allowable under the original requirement and exempted some types of bills from having to carry certificates.

The Pentagon's weakening of the rule illustrates the difficulty it has in revamping the procurement system. On March 5, Mr. Weinberger announced that contractors would have to certify that they weren't submitting any claims "for political or entertainment or other expenses that are not made directly for the benefit of the government and are not required for the performance of the contract involved."

His order followed congressional disclosure that General Dynamics Corp. had billed the Pentagon for an array of unusual items including the costs of housing an executive's dog in a kennel.

However, the rule immediately met with protests. John Carr, vice chairman of Grumman Corp., said in an interview that it was "literally impossible to sign the original certificate." Grumman, among other companies, refused to sign, and as a result, the Pentagon withheld certain overhead reimbursements.

The problem with the rule, industry officials said, is that it would require that overhead expenses directly benefit the government and relate specifically to the contract in question. Most overhead expenses relate to the general costs of doing business and can't be specifically allocated to individual contracts, industry officials argue.

Moreover, earlier Pentagon rules allowed contractors to pass on a portion of their general operating costs, such as expenses for legal and insurance services and shareholder meetings. In a letter to Mr. Weinberger, the Council of Defense and Space Industry Associations criticized the certificates as "entirely new and excessively restrictive."

Under the changes announced yesterday, contractors can continue to gain reimbursement for these and other general costs of doing business, regardless of whether they can be directly related to the contract involved. Also, contractors won't have to sign certificates every time they submit a bill to recover overhead costs. Signatures will be required only on charges on which the billing rate has been adjusted after March 20, 1985.

A defense-industry lawyer who fought for the changes said that the new language "will have positive results for the relations between the Pentagon and its contractors." He added that "the contractors are feeling a bit embattled and harassed."

The recent changes don't end the fracas over the certificate. The language still bars military contractors from passing on advertising and public-relations costs to the Pentagon, and industry lobbyists say they are determined to preserve the right to charge the Pentagon for some of these costs.●

TENNESSEE LEGISLATURE URGES RESTORATION OF TVA APPROPRIATIONS

● Mr. SASSER. Mr. President, I would like to make Senators aware that both houses of the Tennessee Legislature have adopted a strong resolution urging Congress to adopt a freeze-level budget for the Tennessee Valley Authority, not the 70-percent cut recommended by OMB. The resolution was subsequently signed by Gov. Lamar Alexander on March 29.

The resolution calls on Congress for fairness in dealing with TVA's budget, saying that while TVA should contribute its fair share in reducing the Federal deficit, the Federal corporation should also receive its fair share of the appropriations to fulfill its mandated economic and resource development functions in the Tennessee Valley.

I commend the resolution to my colleagues in the Senate, not only because I think the resolution takes exactly the right tone in these times when Congress is wrestling with the deficit, but because it outlines so well the important and interrelated missions of TVA that will be unwisely lost if the proposed Draconian cuts are approved.

I ask that the resolution on behalf of TVA, as adopted by the Tennessee Legislature, be printed in the RECORD.

The resolution follows:

SENATE JOINT RESOLUTION NO. 35

Whereas, The Tennessee Valley Authority should contribute its fair share in reducing the federal deficit, but the Tennessee Valley Authority should also receive its fair share of funds to continue to fulfill its mandated economic and resource development functions in the Tennessee Valley; and

Whereas, The Tennessee Valley region in general and the State of Tennessee in particular have suffered longer under the recessionary impact of the 1980's than have other parts of the nation; and the high levels of unemployment in the Tennessee Valley are contributing to the federal deficit problem by reducing the number of dollars that a fully recovered Tennessee Valley economy would be circulating back into the federal treasury; and

Whereas, The Tennessee Valley Authority non-power programs funded by the federal government address regional resource and economic development problems that threaten to slow down the recovery of the states served by the TVA, including problems in water quality management, aquatic weed control, soil erosion control, agricultural development, forestry and wildlife management and recreation development; and

Whereas, The efforts of the Tennessee Valley Authority to combat the aquatic weed infestation of its reservoirs—notably of Nickajack, Watts Bar, and Chickamauga reservoirs in the eastern part of Tennessee—are necessary if TVA lakes are to continue to be a valuable recreational and tourism resource in this state and region; and

Whereas, The Tennessee Valley Authority's National Fertilizer Development Center in Muscle Shoals, Alabama, is the nation's only laboratory for advanced fertilizer research; three quarters of the fertilizers used in this country today are based on National Fertilizer Development Center developments; and the Center has contributed substantially toward increasing farm yields, maintaining our national balance of trade and helping fight the problem of hunger throughout the world; and

Whereas, The Tennessee Valley Authority has worked cooperatively with state and federal agricultural agencies to fight severe soil erosion problems in West Tennessee which has some of the most erosive soils in the country; and these erosive soils threaten farm productivity and pose run-off and sedimentation dangers for free-flowing streams; and

Whereas, The management and operation by the Tennessee Valley Authority of Land Between the Lakes, the 170,000 acre outdoor recreation and tourism laboratory in western Tennessee and Kentucky, has turned that area into a major national tourism attraction which last year was visited by people from all 50 states; and

Whereas, The Tennessee Valley Authority's assistance in the form of energy management surveys, employee training, financial resource identification, and other types of analysis to small and medium-sized businesses that wish to expand has contributed to the creation of 2,490 new jobs during fiscal year 1984; and

Whereas, The State of Tennessee in particular would face severe budgetary pressure if it were asked to assume responsibility for TVA initiatives in detecting water quality problems, in managing the recreational areas around TVA reserviors, in combatting aquatic weeds, in orphan mine reclamation, or in managing Land Between the Lakes; and

Whereas, Many of the programs of the Tennessee Valley Authority, including managing the dam lock and reservoir system on the Tennessee River, managing Land Between the Lakes, and conducting research in agricultural and fertilizer development, are all producing national as well as regional benefits, and the federal treasury also receives a substantial return on these investments in the form of the increased tax revenues that result from increased economic activity in the Tennessee Valley states; and

Whereas, The members of the Ninety-fourth General Assembly of the State of Tennessee recognize the need for the federal government to seek effective methods in dealing with the current deficit crisis and at the same time the need for the Tennessee Valley Authority to perform its necessary functions in the most efficient way possible; now, therefore,

Be it resolved by the Senate of the Ninety-Fourth General Assembly of the State of Tennessee, the House of Representatives concurring, That the members of the Ninety-fourth General Assembly of the State of Tennessee go on record as opposing any unwarranted reduction of funding for the Tennessee Valley Authority and urge the members of the United States Congress to take appropriate action to preserve the funding for the Tennessee Valley Authority at a level which will be sufficient to continue its present programs.

Be it further resolved, That a copy of this resolution be sent to each members of the Tennessee Congressional Delegation, to the Speaker of the United States Senate, to the Speaker of the United States House of Representatives, and to the President of the United States.●

ERNIE PYLE

● Mr. LUGAR. Mr. President, 40 years ago, a sniper's bullet ended the life of a modest but creative man who was the best friend of the American GI in World War II. Ernie Pyle, of Dana, IN, was a journalist whose sympathy and sensitivity brought home for all of us both the human suffering and valor of the American war effort. As a young man in Indianapolis, I read his words with a mixture of shared pride and pain for those men who sacrificed so much for the cause of freedom and democracy in the world. Even today Ernie Pyle's reports help us understand what the war was all about to the individual men and women who fought it. Pyle's immortal words will not let us ever forget these brave and noble Americans.

I ask that an excellent article on Pyle written by John Valentine of the Wall Street Journal be printed in the RECORD.

The article follows:

ERNIE PYLE SPEAKS TO A NEW GENERATION

(By John Valentine)

Ernie Pyle, the World War II newspaper correspondent, was killed by a sniper's bullet 40 years ago tomorrow. But he's making a comeback.

He isn't appealing just to the nostalgia crowd with copies of Studs Terkel's "The Good War" tucked under their arms. Pyle is also attracting members of the generations that grew up after his death and never heard of him.

Consider, for example, Pyle's recent appearance on stage in Pasadena, Calif. He was occupying the body of actor William Windom, who is handsomer and huskier than the correspondent was, but the words—the plain, straightforward, vivid, penetrating words—were pure Pyle.

He took the audience on a tour of the U.S. and Mexico in the 1930s and thrust it into the middle of London ablaze in the 1940 blitz. They visited the front lines in North Africa, where they saw American boys dead in the foxholes, rifles still ready to fire. A British officer walked among them saying, "Brave men. Brave men."

The audience, gripped by its experience, sat silent for several minutes after it was over, as the strains of "Lili Marlene," Pyle's favorite song, faded away.

After the performance, Mr. Windom was surrounded by groups of eager questioners about Pyle. Many of the most enthusiastic were young people. That didn't surprise Mr. Windom, who has been doing his one-man Pyle show for about 10 years but who is better known for his Emmy-winning portrayal on television in 1969 of a character based on James Thurber.

"It happens all the time," Mr. Windom says of the younger people in the audience. "They come in without knowing or caring about him. They're here because someone brought them or because they're slightly curious and have nothing else to do. After it's over, they're so hyped up over Pyle it's unbelievable, as if they've made a wonderful discovery." He pauses, and adds: "They have."

Ernie Pyle was a skinny, 110-pound, balding, middle-aged man, essentially shy when he was not reporting. He fell sick frequently and suffered bouts of depression during which he thought his writing was worthless. He worried about his wife, who became an invalid in the 1930s and eventually died just after he did.

He had few moments to himself from the time he began a successful aviation column in 1928, until he died. When he was home infrequently, so many friends visited him he had to sleep on the floor. He often escaped to motels and hotels for the privacy he needed to write his columns.

In short, Ernie Pyle was a highly sensitive person who happened to be born with the storyteller's gift. He lived the war along with the soldiers, and told readers firsthand how it feels to be in war. In 1944 he was awarded the Pulitzer Prize for foreign correspondence.

He wasn't just popular back home; the soldiers loved him, too, from the lowliest private on up. Correspondents were constantly besieged by GIs asking: "Do you know Ernie Pyle?" And entertainer Al Jolson said the soldiers treated Ernie Pyle like "Mr. God." But the most striking example of the hold Pyle had on Americans was when Harry S. Truman, six days into the presidency that had fallen to him after the death of Franklin D. Roosevelt, took the time and trouble to announce and mourn Pyle's death.

The resurgence of Pyle's popularity today is puzzling only at first glance. Television can, and did, fill our dinner hours with the Vietnam War's brutality and gore. But while we watched the conflict in living color, the men fighting it remained shadowy—so much so that only recently have many of them felt reaccepted into U.S. society. Ernie Pyle's human stories of war bridge that gap.

His best-known column told how Capt. Henry T. Waskow's body was brought down a mountain in Italy. It still makes people cry. Equally powerful is a four-paragraph passage on a dying GI carried into the medical tent where Pyle was recovering from a relatively minor ailment. The man received last rites, which he tried to repeat with his last breaths. Then he was left on a litter in the aisle of the crowded tent.

Pyle wrote: ". . . the aloneness of that man as he went through the last few minutes of his life was what tormented me. I felt like going over and at least holding his hand while he died, but it would have been out of order and I didn't do it. I wish now I had."

Pyle died in a characteristic gesture of compassion. A Japanese sniper on Ie Shima, an island off Okinawa, sprayed Pyle's jeep. After jumping into a ditch, Pyle poked his head up to see if the others were all right. The sniper put a bullet into his temple.

Roy O. McMillan, then a chaplain and now a Baptist minister in Orangeburg, S.C., spoke with Pyle the night before he died. "He was saturated with death and war, fatigued. I think he was so far gone he reacted out of confusion when he stuck his head up. He knew better, with a sniper out there."

Mr. Windom will be performing his one-man Pyle show tomorrow night in Pyle's hometown, Dana, Ind. In August, a "Birthday Party for Ernie Pyle" with a World War II theme will be held at the Pyle home in Dana, now the Ernie Pyle State Memorial. Pyle's name is also being commemorated at other centers named after him. There is a Pyle museum in Albuquerque, N.M., his adopted home, and an Ernie Pyle Media

Center at Fort Jackson, S.C., which recently illustrated the lasting power of Ernie Pyle's mystique.

Following the U.S. invasion of Grenada, relations between the press and the military were especially strained because the Pentagon excluded newspeople from the invasion. Fort Jackson officials, seeking to bring both sides closer, offered their media center as a forum for ironing out military-press problems. Pyle was a catalytic symbol; his memory made the idea palatable to both sides. Once again, Ernie Pyle brought people together.●

CONGRESSIONAL CALL TO CONSCIENCE

● Mr. ANDREWS. Mr. President, I am pleased to join today with many of my colleagues who have come together in support of the 1985 congressional call to conscience for Soviet Jewry.

The great philosopher George Santayana wrote that "injustice in this world is not something comparative: the wrong is deep, clear, and absolute in each private fate."

No words more aptly describe the hellish "private fate" suffered daily by Soviet Jews seeking to emigrate from the U.S.S.R. As a matter of course, the Soviets consistently and consciously violate both the letter and the spirit of the Helsinki accords to which the U.S.S.R. was a signatory. To delay justice is to deny justice and the Soviet Union stands guilty before the court of world public opinion for its intransigent and inhumane actions against its Jewish citizens.

In 1979, 51,320 Jews emigrated from the U.S.S.R. That number has steadily and dramatically declined over the last 5 years. In 1984, only 896 Jews were permitted to emigrate from that country.

In the Helsinki Final Act and other international agreements ratified by the Soviet Union, there was consensus that the right of any individual to leave any country, including one's own, is an internationally recognized right. The Soviet reality cruely mocks this basic right of freedom of movement which the Soviet Government approved.

By delaying emigration applications from Jewish citizens for months and even years, the U.S.S.R. engages in the cruelest form of psychological torture; at once holding out the possibility of emigration while malevolently delaying action on such applications. Unless an emigration application is first denied by the Government, an applicant cannot reapply for another. To avoid open public condemnation of their limited immigration policy in the West, the Soviets simply delay action on the majority of exit permits.

Mr. President, we must not forget that as the two most powerful nations in the world join together in talks to reduce nuclear arsenals and to prevent the possibility of a nuclear holocaust, earlier treaties entered into by the U.S.S.R. to improve and to protect basic human rights and freedoms, including the freedom to emigrate, are being consciously disregarded.

We in the Congress bear a direct responsibility to the people of the United States and the people of the free world to send a clear, strong signal to the Soviet Union that the United States will neither ignore nor quietly accept its abuses of human rights and the human spirit.●

HEBRON, ND

● Mr. ANDREWS. Mr. President, I would like to take this unique opportunity to make it a permanent part of the CONGRESSIONAL RECORD, that on this day, April 9, in the year 1885, the first settlers stepped off the train and founded the charming city of Hebron, ND.

The city of Hebron will be hosting a centennial celebration on June 27–June 30, 1985 in honor of their 100th jubilant year of existence.●

ORDER OF BUSINESS

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER [Mr. COCHRAN]. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(During the quorum call Mr. KASTEN assumed the chair.)

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SHIPPING CODE CHANGES

Mr. GORTON. Mr. President, I have three items, acting on behalf of the majority leader, which have been cleared by the distinguished Democratic leader.

I ask first with his permission unanimous consent that the Senate now turn to the consideration of Calendar Order No. 73, S. 597, Technical Corrections to the Shipping Act.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 597) to amend subtitle II of title 46, United States Code, "Shipping," making technical and conforming changes, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 597

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subtitle II of title 46, United States Code, is amended as follows:

(1) In section 3305(b), strike "life-saving" and "life preserver or firehouse" and insert in lieu thereof "lifesaving" and "life preserver, lifesaving device, or firehose", respectively.

(2) In section 3501—

(A) in subsection (a), strike the comma; and

(B) in subsection (c), strike "violates subsection (b) of this section" and insert in lieu thereof "carries more passengers than the number of passengers permitted by the certificate of inspection".

(3) In section 7702(a), strike "mariners' " and insert in lieu thereof "mariner's".

(4) In section 8302(b), strike "clerks" and insert in lieu thereof "clerks,".

(5) In section 10504, amend subsection (d) to read as follows:

"(d) Subsections (b) and (c) of this section do not apply to:

"(1) a vessel engaged in coastwise commerce.

"(2) a yacht.

"(3) a fishing vessel (except a vessel taking oysters).

"(4) a whaling vessel.".

(6) In section 11101(d), strike "light" and insert in lieu thereof "lighted".

(7)(A) In the analysis of chapter 121, amend the item relating to section 12109 to read as follows:

"12109. Recreational vessel licenses.".

(B) In sections 12101(5) and 12104(2), strike "pleasure" and insert in lieu thereof "recreational".

(C) In section 12109 and the catchline for such section, strike "Pleasure" and "pleasure vessel" wherever they appear and insert in lieu thereof "Recreational" and "recreational vessel", respectively.

(D) In section 12110 (a) and (c), strike "documented pleasure" wherever it appears and insert in lieu thereof "documented recreational".

(8) In section 12114(a), strike "of documentation".

(9)(A) In the caption for part E in the analysis of such subtitle II which appears before text of Part A of such subtitle, strike "Licenses, Certificates, and Merchant Mariners' " and insert in lieu thereof "Merchant Seamen Licenses, Certificates, and".

(B) In the caption for part E immediately before the analysis of chapter 71 of such subtitle II, strike "Licenses, Certificates, and Merchant Mariners' " and insert in lieu thereof "Merchant Seamen Licenses, Certificates, and".

(C) In section 7501(a), strike "certificate, or document" and insert in lieu thereof "certificate of registry, or merchant mariner's document".

(D) In section 7503(b), strike "certificate," or document" the first time it appears and insert in lieu thereof "certificate of registry, or merchant mariner's document".

(E) In section 7703, strike "certificate, the first time it appears and insert in lieu thereof "certificate of registry,".

(F) In section 7704(b), strike "document" the first time it appears and insert in lieu thereof merchant mariner's document".

(G) In section 7704(c), strike "certificate, or document" and insert in lieu thereof "certificate of registry, or merchant mariner's document".

(H) In section 7705(a), strike "certificates, and documents" and insert in lieu thereof "certificate of registry, or merchant mariners' documents".

(b) The effective date of subsection (a)(5) of this section is August 26, 1983.

SEC. 2. Section 22 of the Coast Guard Authorization Act of 1984 (Public Law 98-557; 98 Stat. 2871), and the amendments made by such section, are repealed as of November 8, 1984. Regulations prescribed and actions taken under, and references to, such section and the amendments made by such section are deemed to be regulations prescribed and actions taken under, and references to, section 701 of the Act of November 8, 1984 (Public Law 98-623; 98 Stat. 3413), and the amendments made by such section 701.

SEC. 3. Section 403(a) of the Commercial Fishing Industry Vessel Act (Public Law 98-364; 98 Stat. 450) is amended by striking "Before" and inserting in lieu thereof "Except as provided in chapter 37 of title 46, United States Code, and before".

Mr. GORTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EARTHQUAKE HAZARDS REDUCTION ACT AUTHORIZATION

Mr. GORTON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar No. 77, S. 817, the Earthquake Hazards Reduction Act.

The PRESIDING OFFICER (Mr. WILSON). The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 817) to authorize appropriations under the Earthquake Hazards Reduction Act of 1977 for fiscal years 1986 and 1987, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment, as follows:

on page 2, line 7, strike "1984", through and including the sum on line 8, and insert the following: "and immediately after '1984' and inserting in lieu thereof a semicolon, and by inserting '$35,578,000' "

So as to make the bill read:

S. 817

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 7(a) of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706(a)) is amended by adding at the end thereof the following:

"(6) There are authorized to be appropriated to the Director, to carry out the provisions of sections 5 and 6 of this Act, for the fiscal year ending September 30, 1986, $5,705,000, and for the fiscal year ending September 30, 1987, $5,962,000.".

SEC. 2. Section 7(b) of such Act (42 U.S.C. 7706(b)) is amended by striking *", and" immediately after "1984" and inserting in lieu thereof a semicolon, and by inserting $35,578,000* for the fiscal year ending September 30, 1986; and $37,179,000 for the fiscal year ending September 30, 1987" immediately before the period at the end thereof.

SEC. 3. Section 7(c) of such Act (42 U.S.C. 7706(c)) is amended by striking "and" after "1984;" and by inserting "; $28,700,000 for the fiscal year ending September 30, 1986; and $29,992,000 for the fiscal year ending September 30, 1987" immediately before the period at the end thereof.

SEC. 4. Section 7(d) of such Act (42 U.S.C. 7706(d)) is amended by striking "and" after "1984;" and by inserting "; $499,000 for the fiscal year ending September 30, 1986; and $521,000 for the fiscal year ending September 30, 1987" immediately before the period at the end thereof.

SEC. 5. Section 5(b)(2)(E) of such Act (42 U.S.C. 7704(b)(2)(E)) is amended to read as follows:

"(E) compile and maintain a written program plan for the program specified in subsections (a), (e), (f), and (g), which plan shall be submitted to the Congress and shall be updated at such times (but no less often than every two years) as may be necessitated by significant program events; and".

Mr. GORTON. Mr. President, this bill, S. 817, reauthorizes the National Earthquake Hazards Reduction Program for fiscal years 1986 and 1987. It authorizes the funding of earthquake hazards research and mitigation activities at the Federal Emergency Management Agency, the U.S. Geological Survey, the National Science Foundation, and the National Bureau of Standards.

A little over a month ago, a major earthquake struck Chile and reminded us of the potential destructive power of earthquakes. Although the Chilean earthquake was disastrous—it killed 176 people, injured nearly 2,500, and left more than 370,000 homeless—earthquakes of even greater power have occurred repeatedly in the United States. Catastrophic earthquakes have struck in California, Alaska, the Mississippi Valley, and South Carolina, and 39 States face at least moderate earthquake hazards. The earthquake that geologists give a 50-50 chance of striking southern California in the next 30 years is likely to be the most devastating event on U.S. soil since the Civil War, possibly causing 20,000 deaths and $50 billion in damages. A repeat of the 1811 and 1812 central U.S. earthquakes could be even more devastating.

The National Earthquake Hazards Reduction Program funds research into earthquakes and assists State and local governments in preparing for and responding to earthquakes. The Federal Emergency Management Agency coordinates the program and also develops and coordinates emergency preparedness and disaster response activities with State and local governments and private industry. The U.S. Geological Survey, National Science Foundation, and National Bureau of Standards conduct research into earthquake hazards, earthquake prediction, earthquake engineering, and building codes.

The program has already made significant progress in understanding and reducing earthquake hazards. It has improved the assessment and understanding of earthquake hazards in much of the United States, has increased our knowledge about how to design buildings and critical facilities to resist earthquakes, and has increased the country's preparedness for earthquakes. Just 2 weeks ago the U.S. Geological Survey issued the first earthquake forecast to be endorsed by the National Earthquake Prediction Evaluation Council. This prediction is for an earthquake of magnitude 5.5 to 6 to occur along the San Andreas fault at Parkfield between 1985 and 1993.

This bill provides for continuity in this important program. It authorizes appropriations at the fiscal year 1986 level for the Federal Emergency Management Agency and the National Bureau of Standards, authorizes a slightly decreased level of funding for the U.S. Geological Survey, and authorizes the small increase requested by the administration for the National Science Foundation. The budget for the total program is below the amount appropriated for fiscal year 1985. The bill also authorizes appropriations for fiscal year 1987 at the 1986 level with an addition of 4.5 percent to compensate for inflation.

Mr. HOLLINGS. Mr. President, I am pleased to join my Commerce Committee colleagues in supporting this legislation.

As Senator GORTON has mentioned, S. 817 reauthorizes the National Earthquake Hazard Reduction Program for another 2 years. The bill will continue the coordinated national program led by the Federal Emergency Management Agency and involving the U.S. Geological Survey, the National Science Foundation, and the National Bureau of Standards.

The program is a sound investment in the Nation's future. It aims not only at improving the prediction of major earthquakes but also at helping States and localities better prepare for these disasters. It provides leadership and advice on building codes, seismic zoning, and emergency response. Research has shown that major earthquakes could strike in many parts of the United States, with potentially devastating effects on life and property. Given that, I believe that these funds are money well spent.

I urge my colleagues to support reauthorization of this valuable national program.

Mr. GORE. Mr. President, I want to congratulate my distinguished colleague from Washington for his efforts in offering this legislation.

Before my election to the Senate, I served for 8 years as a Member of the House of Representatives. For the last 4 years, I served as chairman of the

House Science and Technology Subcommittee on Investigations and Oversight. In that capacity, I held several hearings on the problem of earthquakes in the Eastern United States. I learned a great deal from those hearings about the serious damage that could be caused by a quake in the Eastern United States and about the real need in this country for a coordinated earthquake awareness program.

The western portion of my home State of Tennessee lies along the New Madrid fault line. One of the most devastating earthquakes ever in this country occurred in 1811 along that fault. Immense damage occurred throughout the Southeastern United States as a result of that quake, and church bells rang in Boston from its tremors.

The largest city in Tennessee—the city of Memphis—lies in the southwest corner of the State. An earthquake along the New Madrid could cause serious damage to the city, with possibly many personal injuries and great economic losses. Clearly, foresight and preparation for the eventuality of an earthquake along the fault is essential.

This bill, to reauthorize the Earthquake Hazards Reduction Act, provides much-needed support to efforts to educate our people about the dangers of earthquakes and helps establish programs to minimize the dangers from quakes. Hopefully, through the National Earthquake Hazards Reduction Program, which the act continues, we can avoid future tragedies due to earthquakes. Particularly, I hope that greater attention will be given to the problem of eastern earthquakes so that we can learn more about them and anticipate their recurrence. Moreover, because the bill restores funding for the Center for Building Technology at the National Bureau of Standards, our country will be better able to understand the effects of earthquakes on buildings and other structures and take steps to make them more earthquake-proof.

In conclusion, Mr. President, I believe that this is an excellent bill and one that deserves our enthusiastic support.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL FIRE PREVENTION AND CONTROL ACT AUTHORIZATION

Mr. GORTON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 78, S. 818, the Fire Prevention and Control Act.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 818) to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. BYRD. Mr. President, there is no objection.

There being no objection, the Senate proceeded to consider the bill.

Mr. GORTON. Mr. President, this bill, S. 818, reauthorizes the Federal Fire Prevention and Control Act for fiscal year 1986, and provides for continued funding of the U.S. Fire Administration and the National Fire Academy. Reauthorization of this act is critical in treating a serious national problem. Fire is one of the largest causes of accidental death and property damage in the United States, and the United States and Canada have the worst fire death rates in the industrialized world. In 1983 alone, fires killed more than 6,000 people, injured 135,000, and destroyed nearly 6.6 billion dollars' worth of property. These deaths were disproportionately high among the poor, the elderly, and the very young. Although these are grim statistics, they have improved greatly since the Federal fire program began. Since the beginning of the Federal program in 1974, fire deaths have declined 30 percent from over 9,000 per year.

Although fire prevention and control is primarily a local concern, the Federal program provides vital support for local activities through research, development, and educational programs. Reauthorization of this bill will provide continued support for fire prevention, arson control, firefighter health and safety, fire data analysis, and other activities at the U.S. Fire Administration, and will provide continued support for the educational activities at the National Fire Academy.

S. 818 authorizes appropriations that are $1.7 million greater than the administration's budget request. The bill restores cuts that would weaken some of the most important parts of the Federal program, including projects directed at improving fire prevention in communities around the country and research into improving firefighter safety and health.

Even with the restoration of these important programs, the budget for this program is well below a freeze. This bill authorizes appropriations that are $1.9 million less than those for fiscal year 1985. This represents a cut of over 8 percent.

I understand that Senator GORE intends to offer an amendment restoring $1 million to the authorization, to be used for travel stipends for firefighters. Although I was concerned about the ability of firefighters to attend the Fire Academy without the stipend, I felt that this was one area in which local governments may be able to replace Federal funds. The amendment will not restore all of the travel money, and I expect the Federal Emergency Management Agency to explore other ways to help firefighters travel to its training center. I support my colleague's amendment, however, and I congratulate him on his interest and his expertise in this area.

AMENDMENT NO. 31

(Purpose: To restore funds for the travel stipend program for students at the National Fire Academy)

Mr. BYRD. Mr. President, I send to the desk an amendment on behalf of Mr. GORE and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.,

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for Mr. GORE, proposes an amendmend numbered 31.

Mr. BYRD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 4, strike "$21,036,000" and insert in lieu thereof "$22,036,000".

Mr. GORE. Mr. President, I am offering an amendment to S. 818 to restore $1 million for travel stipends for firefighters who attend training sessions at the National Fire Academy.

Annually, many firefighters—both professional and volunteer—from around the country travel to the National Fire Academy in Maryland to take part in the academy's training program. This is an extremely valuable program that provides excellent technical training to those who participate in it. Elimination of the travel stipend would mean that many firefighters—especially those from small-town fire departments and local volunteer units—would be prevented from attending the academy.

I want to congratulate my good friend Mr. GORTON for the excellent work he has done in drafting this legislation and in conducting hearings on it. I also want to thank him and Mr. DANFORTH, our distinguished chairman, for their cooperation in my amendment.

Mr. GORTON. Mr. President, I have discussed this amendment with the Senator from Tennessee [Mr. GORE], and with Mr. DANFORTH, the distinguished chairman of the Senate Commerce Committee. I believe it is an appropriate amendment which restores most of the funds for the firefighters travel stipend program. This travel money is important to the program, especially for firefighters traveling from Western States such as mine. I am happy to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 31) was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was adopted.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 818

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 17 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2216) is amended by adding at the end thereof the following:

"(f) Except as otherwise specifically provided with respect to the payment of claims under section 11 of this Act, to carry out the purposes of this Act, there is authorized to be appropriated $22,036,000 for the fiscal year ending September 30, 1986.".

Mr. GORTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORTON. Mr. President, I thank the distinguished minority leader for his assistance in these matters.

Mr. BYRD. My distinguished friend is complimented on his good work.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is ordered.

COMMEMORATION OF THE 24TH ANNIVERSARY OF THE BAY OF PIGS

Mr. CHILES. Mr. President, I introduced this resolution yesterday in commemoration of the 24th anniversary of the Bay of Pigs attempted liberation of Cuba.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of House Joint Resolution 236, a joint resolution to commemorate the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny—which is now at the desk.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Florida?

Mr. CHILES. Mr. President, I understand it has been cleared with both sides.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A House Joint Resolution (H.J. Res. 236) commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, on this day, we honor and pay tribute to the men of the 2506th Brigade. These brave men who fought and died on that day never questioned the almost insurmountable odds they faced. They set forth in their just cause with dedication and courage. And theirs was a cause many still long for today—the liberation of a beloved homeland, the resurgence of a free and independent Cuba. This patriotic effort commands nothing less than utmost respect from all.

We must never forget the cause for which these men so courageously fought. The spirit of the 2506th Brigade should be contagious.

While it is well known that these men lacked the resources to successfully complete their mission, they proved to be amply equipped with courage and bravery. The final outcome of the Bay of Pigs liberation effort was unsuccessful, but the men who so gallantly fought in the invasion were genuine heroes. They are true Cuban patriots who risked their lives and in some cases sacrificed their lives for a free Cuba.

On this day, with this resolution, we commemorate the spirit of the 2506th Brigade and the bravery of these true Cuban heroes.

Mr. President, I am proud to acknowledge this courageous attempt by the men of the 2506th Brigade. Their gallant fight was reinforced by their belief in democratic principles and desire for a free Cuba. The final outcome of this liberation effort was unsuccessful, but there is no denying that the men who fought in the Bay of Pigs returned as heroes. With this resolution, we appropriately acknowledge this heroic effort for a free and independent Cuba.

Mr. President, Congressman PEPPER introduced this resolution in the House of Representatives. It was passed unanimously over there.

I would certainly hope that we could have a unanimous vote on passage here.

Mrs. HAWKINS. Mr. President, today marks the 24th anniversary of the day when 1,400 brave and daring men landed at the Bay of Pigs in an attempt to liberate Cuba and restore democracy there. The battle raged for 3 days, and in spite of a heroic effort against a foe who outnumbered them in both men and weapons, 2506 Brigade was eventually surrounded and captured—but not defeated. The spirit, courage, bravery and determination of the brigade lives on. It lives on not only in the lives of those who survived this harrowing experience, but it lives on in those who continue the struggle for freedom and democracy in Cuba.

The valiant effort that we today commemorate celebrates a long tradition of men and women who have been willing to count the cost and make great sacrifices on behalf of liberty and freedom. In this country we remember men like George Washington and the Founding Fathers, in large parts of South America we remember Simon Bolivar, and in Cuba there was Jose Marti. It is men and women like these who give us hope for the future because they inspire us with their love of freedom, their sense of commitment and their lives of dedication. Such too were the men of 2506 Brigade.

In remembering the events of this day some 24 years ago, I believe that we need to do more than offer a few toasts or say a few nice words. I believe that we should use this opportunity to recommit ourselves to freedom and democracy. To do less would be to dishonor the memory of those whose effort and sacrifice are an inspiration to us all. It is not sufficient for this renewed commitment to be in words only, that would be useless. What we need is commitment with action. If democracy and freedom is to be cherished, then we must be willing to struggle for it.

I hope that my colleagues will reflect on the character and actions of the men whose actions at the Bay of Pigs we are commemorating and take to heart the lessons that they taught us through their sacrifice and their lives.

The PRESIDING OFFICER. The resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 236) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHILES. Mr. President, it is my understanding, I say to the majority leader, that the President does want to sign this joint resolution. I hope it could go down there quickly because I think today or tomorrow would be the date it should be signed.

Mr. DOLE. We will make every effort to see to its delivery.

Mr. CHILES. I thank the majority leader.

ORDER FOR DISCHARGE OF JUDICIARY COMMITTEE FROM FURTHER CONSIDERATION OF SENATE JOINT RESOLUTION 113

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 113, a bill to commemorate the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny, and that it be indefinitely postponed

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR INDEFINITE POSTPONEMENT OF CALENDAR ORDER NO. 8, S. 457

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar Order No. 8, S. 457 the sub-Saharan Africa relief bill, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE MEMBERSHIP ON JOINT COMMITTEE ON PRINTING AND JOINT COMMITTEE OF CONGRESS ON THE LIBRARY

Mr. DOLE. Mr. President, it is also my understanding that Calendar Order No. 71, Senate Resolution 126 has been cleared by the distinguished minority leader for action at this time, and I ask unanimous consent that it be considered.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 126) providing for members on the part of the Senate of the Joint Committee on Printing and the Joint Committee of Congress on the Library.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 126) was agreed to, as follows:

S. RES. 126

Resolved, That the following-named Members be, and they are hereby, elected members of the following joint committees of Congress:

Joint Committee on Printing: Mr. Mathias of Maryland, Mr. Hatfield of Oregon, Mr. Stevens of Alaska, Mr. Ford of Kentucky, and Mr. DeConcini of Arizona.

Joint Committee of Congress on the Library: Mr. Mathias of Maryland, Mr. Hatfield of Oregon, Mr. Warner of Virginia, Mr. Inouye of Hawaii, and Mr. Pell of Rhode Island.

ORDER FOR INDEFINITE POSTPONEMENT OF HOUSE JOINT RESOLUTION 188

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar Order No. 80 (H.J. Res. 188, a joint resolution to designate April 1985 as "Fair Housing Month," be indefinitely posponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY

Mr. DOLE. Mr. President, I understand—in fact I have been informed—that the distinguished minority leader has gone over the other requests for the day and he has cleared those requests, so I am prepared to proceed, having that assurance from the distinguished minority leader, Senator BYRD.

ORDER FOR RECESS UNTIL 12 NOON

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 12 noon on Thursday, April 18, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that following the two leaders under the standing order there be special orders in favor of the following Senators for not to exceed 15 minutes each, Senators MCCONNELL, MURKOWSKI, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond 1:30 p.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following routine morning business tomorrow, it will be the intention of the majority leader to turn to any and all of the following bills: Calendar Order No. 76, S. 813, pipeline safety; Calendar Order No. 81, S. 796, National Bureau of Standards authorization. Either one of these, I think, can be handled by unanimous consent.

There is a possibility there could be rollcall votes.

In addition tomorrow we will turn to any other legislative or executive items that many have been cleared.

RECESS

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 12 noon, Thursday, April 18, 1985.

The motion was agreed to; and, at 3:49 p.m., the Senate recessed until Thursday, April 18, 1985, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate April 17, 1985:

DEPARTMENT OF STATE
